## FREEDOMS AND ADDRESSES (CITY OF LONDON).

THE *Honorary Freedom of the City of London* is conferred as a mark of high distinction upon eminent subjects of the Crown for exceptional services to the Country and the Empire. The *Freedom of the City of London* is acquired after strict compliance with regulations from time to time issued pursuant to resolutions of the Court of Common Council. The names of applicants who have complied with the regulations are submitted for election to the Court of Common Council at its fortnightly meetings, those applying through the medium of a Livery Company being submitted in a similar manner to the Court of Aldermen. Orphans of Freemen are eligible for election as foundation scholars at the Freemen's School, Ashted, Surrey, and Freemen of the City of London are themselves eligible for admission to Almshouses at Brixton, in accordance with regulations from time to time issued.

*Addresses of Welcome* are occasionally offered to Foreign Sovereigns and Presidents pursuant to resolutions of the Court of Common Council. These high distinctions are sometimes confused with the ceremony of admission to the *Honorary Freedom of the City*, but the *Honorary Freedom* is conferred only on persons in allegiance to H.M. the King.

## THE PRINCIPALITY OF WALES AND MONMOUTHSHIRE.

## PHYSICAL GEOGRAPHY.

**Position and Extent.**—Wales and Monmouthshire occupy the extreme west of the central southern portion of the island of Great Britain, with a total area of 8,006 sq. miles; they are bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, and Hereford, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Ayr to Barry Island) is 136 miles, and the greatest breadth from W. to E. (St. David's Head to the English border) is 92 miles. Separated from the mainland by the Menai Straits is the Welsh island-county of *Anglesey* or *Môn* (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826, and by the tubular railway bridge (1,100 ft. long) of the L.M. & S. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

**Population.**—The population at the Census of 1931 was 2,593,014 (inclusive of Monmouthshire).

**Relief.**—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,560 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-fawdd 2,970 ft.); Powys (Felinllyn 2,462 ft., Drygan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,862 ft., Pen-y-gaver fawr 2,660 ft.).

**Hydrography.**—The principal river of those rising in Wales is the *Severn* (see England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Telfi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Taf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

## EARLY HISTORY.

**Celts and Romans.**—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by *Caradog* (Caratacus), King of the

Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

**The Anglo-Saxon Attacks.**—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated the Waelisc of Wales from those of Cornwall, while the battle of Chester (613) similarly cut off communication with the Waelisc of Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 9th century *Rhodri Mawr* united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.), and *Deheubarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last-named being Howel Dda, who codified the laws of the country, while Llewelyn ap Seissyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015–1022.

**The Norman Conquest.**—After the Norman conquest of England William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of *Griffith ap Rhys* and routed the Norman-Flemish forces at the fords of the Telfi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendancy over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1282 during hostilities between the Welsh and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (*Eisteddfod*), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of P. ydian, a ruling prince in an age many centuries before the Christian era.

## CARDIFF.

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Caer Taff), Rumney and Ely, the port of the South Wales coal fields, has a municipal area of 13,628 acres, and a population (1931) of 223,648. The principal industries include ship repairing, rope making, steel, copper, lead and zinc works, iron and steel foundries, patent fuel works, engine wagon works, flour mills, chemical factories, paper mills, breweries, jam, vinegar and ice factories, tin plate and paint works. The chief imports are grain, timber, pit-wood, ore, fruit, butter, cheese, frozen and chilled meat, live cattle, canned goods, sugar, potatoes. The exports include coal, coke, patent fuel, iron and steel manufactures, tin plates, &c.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

The Lord Mayor (1936-37), Herbert Hiles, M.B.E.

Stipendiary Magistrate, W. Hugh Jones, K.C.  
Recorder, Roland E. L. Vaughan-Williams, K.C.  
Town Clerk & Clk. of Peace, David Kenwyn Rees.

## SWANSEA.

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tinplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal (the largest anthracite port), patent fuel, ores, and the import and export of oil (National Oil Refineries). There is also a large ship-repairing industry. The trade is principally with France, Italy and Belgium. The municipal area is 24,241 acres, with a population at the census of 1931 of 164,825. Included in the borough is the health resort of Mumbles.

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton, the 17th century Grammar School, founded by Hugh Gore and the Guildhall, containing Brangwyn panels. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns 2 members to Parliament.

Mayor (1936-37), Richard Henry.

Recorder, E. W. Milner-Jones.

Town Clerk, H. L. Lang-Coath.

## THE KINGDOM OF SCOTLAND.

**Position and Extent.**—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, the Orkney, Shetland, and many other islands. The Kingdom lies between 6° 51' 30" and 54° 38' N. latitude and between 1° 45' 32" and 6° 14' W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length\* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 30,410 square miles. The population (at the census of 1931) was 4,842,554, a decrease of 39,943 since the census of 1921.

**Relief.**—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinn of Kells (2,668 feet), and Cairnsmuir of Ca' sphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfries; and Whitecraeb (2,695 feet), in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and *Ben Muich Dhui* (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (2,676 feet).

**Hydrography.**—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet), and Stoneyres Linn (80 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The

*Spey* (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth Bridge*, constructed 1882-9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,295 feet).

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Eriicht in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (20 miles) and Mares in the northern Highlands.

**Orkney.**—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1911) of 25,896. Kirkwall, in *Pomona* (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between Pomona and Hoy, was the war station of the Grand Fleet from 1914-9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

**Shetland.**—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Shetland, a group of about 100 islands and islets, of which 29 are inhabited. The total area of the group is 551 square miles, with a population (1911) of 27,911. Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51' 30" N. lat.).

**Western Islands.**—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 202 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles)—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Invernesshire, in 1746), which contains the *Cullins* (Sgurr-na-Banachdich, 3,243 feet), *Red Hills* (Ben Caillich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles), containing *Ben More* (3,185 feet), *Ben Buy* (2,354 feet), and *Ben Creuch* (2,289 feet); *Jura*

\* *Land's End to John o' Groat.*—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncairn Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 663 miles in a straight line and (approximately) 900 by road. But the site of the house of John o' Groat (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncairn Head, while Dunnet Head (also in Caithness) extends farther N. than Duncairn. John o' Groat is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488-1513).

\* *The Hebrides.*—Until the closing years of the 13th century, "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Heboular*, latinized as *Hebules* by Pliny, and corrupted to its present form. The Norwegian name *Sudreygar* (Southern Islands) was latinized as *Sudreygar*, a name that survives in the Anglican bishopric of "Sodor and Man."

(160 square miles), with a chain of hills culminating in the *Paps of Jura*, Beinn-an-Oir (2,571 feet), and Beinn Chaolais (2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis-with-Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callernish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

*Climate*.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift*, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 58° Fahrenheit.

The offices of the *Scottish Travel Association* are at 37, George Street, Edinburgh.

## EARLY HISTORY.

*Prehistoric Man*.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Celtic immigrants. Celtic *Goidels* and *Brythons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

*The Roman Invasion*.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about A.D. 450.

*The Scots*.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic Brythons, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Carraig*, or Picts' Work Dyke, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern Caledonia about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic Waelisc (Welsh) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 6th century the Scots under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of Malcolm I. (943-954) the Brythons or Waelisc (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sheriffmuir, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops under Sir John Cope at Preston Paus and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The *Hebrides* did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1550.

**AREA AND POPULATION OF SCOTTISH COUNTIES.**  
**WITH CAPITALS, LORDS LIEUTENANT AND CONVENERS.**

Counties and Headquarters	Population, 1931	Area	Lord Lieutenant.	Convener of County.
* Aberdeen (Aberdeen) .....	300,430	1,261,521	Marquess of Aberdeen, O.B.E.	Earl of Caithness.

West Lothian (Linlithgow) .....	81,426	76,861	Marq. of Linlithgow, K.T.	Robert Crichton.
Wigtown (Wigtown) .....	29,299	311,984	Earl of Stair, D.S.O.	Earl of Stair, D.S.O.

\* The Cities of Edinburgh, Glasgow, Dundee, and Aberdeen are each a County of a City and the Lord Provost of each is entitled, by virtue of his office, to be appointed Lord Lieutenant.

### EDINBURGH.

EDINBURGH, the Capital of the Kingdom, has a municipal area of 32,402 acres, and a population (Census of 1931) of 439,000 (over the enlarged area). The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St. Giles's Church (restored 1870-82), and St. Mary's (Scottish Episcopal Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland), the Scottish National War Memorial, Parliament House (the present seat of the judicature, containing the National and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and the Palace of Holyroodhouse (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1935-38), Louis S. Gumley.

Town Clerk, David Robertson, LL.B.

City Chamberlain, John D. Imrie, M.A., B.COM.

### GLASGOW.

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 30,046 acres, and a population (1931 Census) of 1,088,461 (estimated at 1,123,541 at Midsummer 1935). The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, the total net tonnage of the ships entering (1935-36) being 7,193,403 tons; of those cleared 7,116,052 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin-weaving, distilling, tobacco, cotton-mills and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Mitchell Library. The City is governed by a town council of 116 members, and sends 15 members to Parliament.

Rt. Hon. Lord Provost (Nov. 6, 1935-38), John Stewart.

Town Clerk, James L. Mackenzie, M.A., LL.B.

City Chamberlain, A. C. McMillan, C.A., J.P.

SCOTTISH COUNTY OFFICIALS.

Counties.	County Clerk.	Clerk of the Peace.	Chief Constable.
Aberdeen .....	H. L. F. Fraser M.A., LL.B.	A. C. Morrison, O.B.E., LL.B.	John Gauld, O.B.E.

Wigtown .....	A. Aitken, Stranraer	Percy J. Adair, Stranraer	

DUNDEE.

DUNDEE, a City, Parliamentary, Municipal and Royal Burgh, on the left bank of the River Tay, 42 miles N. of Edinburgh, has a municipal area of 7,317 acres, and a population (Census 1931) of 175,583 (an increase of 7,268 since 1921). The principal buildings are University College (St. Andrews University), the Technical Institute, High School, Albert Institute and the Caird Hall Buildings. One of the finest Public Baths is in Dundee. The harbour affords dock accommodation of nearly 38 acres. There are public parks of 644 acres and an observatory at Balgay Park. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, ship-building, engineering, dyeing, fruit, &c., canning, hosiery manufacturing, and brewing. The City is governed by a town council of 37 members and sends 2 members to Parliament. *Broughty Ferry*, the eastern portion of Dundee, is a noted holiday resort.

The Lord Provost (1935-38), John Phin.  
Town Clerk, David Latto.

ABERDEEN.

ABERDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 11,021 acres, with a population (Census 1931) of 167,258. The chief industries are quarrying and granite working, white fish, salmon and herring fisheries, engineering, chemicals, shipbuilding, paper-making, woollen, jute and linen manufacture. Being built of grey granite the beauty and cleanliness of the town has an irresistible appeal. From an architectural point of view, Aberdeen is truly famous, its many beautiful buildings including Marischal College, reputed to be the most imposing white granite building in the world, King's College (1494), St. Machar Cathedral (1378), the Auld Brig o' Balgownie (1320) and the Municipal Buildings. There is a sea beach promenade, which stretches for fully two and a half miles along golden sands, and at Hazlehead an open public park of 800 acres of which 200 are wooded, with one of the finest public golf courses in Scotland. The climate is bracing and healthy. The City is governed by a Town Council of 37 Members, and sends 2 Members to Parliament.

The Lord Provost (1935-38), E. W. Watt.  
Town Clerk, George S. Fraser, M.A., B.L.

## BURGHs OF SCOTLAND IN ORDER OF POPULATION.

NOTE.—R signifies a Royal Burgh; P, a Parliamentary Burgh Remainder are Police Burghs.

Burgh.	Population.	Burgh.	Population.	Burgh.	Population.

## SECRETARIES FOR SCOTLAND.

At the Union of the Crowns of Scotland and England a Secretary of State was appointed for Scotland, but the office was abolished in 1746, and from 1782 until 1885 Scottish Affairs were entrusted to the Secretary of State for Home Affairs, who acted therein under the advice of the Lord Advocate. In 1883 the office of Secretary for Scotland was revived, and in 1926 was raised to a principal Secretaryship of State.

## SECRETARIES FOR SCOTLAND.

1885 The Duke of Richmond and Gordon.	1912 Rt. Hon. T. McKinnon Wood.
1886 Rt. Hon. G. O. Trevelyan.	1916 Rt. Hon. H. J. Tennant.
1886 The Earl of Dalhousie.	1916 Rt. Hon. R. Munro.
1886 Rt. Hon. A. J. Balfour.	1922 Viscount Novar.
1887 The Marquess of Lothian.	1924 Rt. Hon. W. Adamson.
1892 Rt. Hon. Sir G. O. Trevelyan, Bt.	1924 Rt. Hon. Sir J. Gilmour, Bt.
1895 Lord Balfour of Burleigh.	1929 Rt. Hon. W. Adamson.
1903 Rt. Hon. A. Graham Murray (Lord Dunedin).	1931 Rt. Hon. Sir A. Sinclair, Bt.
1905 The Marquess of Linlithgow.	1932 Rt. Hon. Sir Godfrey Collins, K.B.E., O.M.G.
1905 Rt. Hon. J. Sinclair (Lord Pentland).	1936 Rt. Hon. Walter E. Elliot, M.C.

## SCOTTISH REPRESENTATIVE PEERS (15).

(Elected for each Parliament.)

Earl of Airlie, F.C.V.O., M.C.	Lord Fairfax.	Lord Polwarth, C.B.E., V.D.
Lord Balfour of Burleigh.	Earl of Haddington, M.C.	Earl Rothes.
Lord Belhaven and Stenton, C.I.E.	Earl of Lauderdale.	Lord Saltoun, M.C.
Earl of Breadalbane and Holland, M.C.	Earl of Leven and Melville, K.T.	Lord Sempill, A.F.O.
Earl of Carnwath, C.B.	Earl of Lindsay.	Lord Sinclair, M.V.O.
	Earl of Mar and Kellie, K.T.	

## PRECEDENCE IN SCOTLAND.

The Sovereign.	Younger sons of Dukes of Blood Royal.	Solicitor-General for Scotland.
The Lord High Commissioner to the General Assembly (while that Assembly is sitting).	Marquesses' eldest sons.	Lyon King of Arms.
The Duke of York.	Dukes' younger sons.	Sheriffs Principal.
Younger brothers, uncles, and nephews (successively) of the Sovereign.	Keepers of the Great Seal and of the Privy Seal (successively)—if not Peers.	Knights Bachelor.
Lords Lieutenant of Counties, Lord Provosts of Cities, and Sheriffs Principal (successively)—within their own localities and during holding of office.	Lord Justice-General.	Sheriffs Substitutes.
Lord Chancellor of Great Britain.	Lord Clerk-Register.	Companions of Orders as in England.
Moderator of the Church of Scotland.	Lord Advocate.	Commanders of Royal Victorian and British Empire Orders.
Keepers of the Great Seal and of the Privy Seal (successively)—if Peers.	Lord Justice-Clerk.	Eldest sons of younger sons of Peers.
Hereditary High Constable.	Viscounts, in order as Dukes	Companions of Distinguished Service Order.
Hereditary Master of the Household.	Earls' eldest sons.	Members (Class 4) Royal Victorian Order.
Dukes (successively) of England, Scotland, Great Britain and United Kingdom (including Ireland since date of Union).	Marquesses' younger sons.	Officers of British Empire Order.
Eldest sons of Dukes of Blood Royal.	Barons, in order as Dukes.	Baronets' eldest sons.
Marquesses, in same order as Dukes.	Viscounts' eldest sons.	Knights' eldest sons successively (from Garter to Bachelor).
Dukes' eldest sons.	Earls' younger sons.	Members of Class 5 of Royal Victorian Order.
Earls, in order as Dukes.	Barons' eldest sons.	Members of British Empire Order.
	Knights of the Garter.	Baronets' younger sons.
	Privy Counsellors not included in above ranks.	Knights' younger sons.
	Senators of Coll. of Justice (Lords of Session).	King's Counsel.
	Viscounts' younger sons.	Esquires.
	Barons' younger sons.	Gentlemen.
	Sons of Life Peers.	
	Baronets.	
	Knights of the Thistle.	
	Knights of St. Patrick.	
	Knights of other Orders as in England.	

**Position and Extent.** Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,458 sq. miles and its geographical position between 51° 26' and 55° 21' N. latitude and from 5° 25' to 10° 30' W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Armagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the *Sperren Mountains* (Sawel 2,240 ft.) of County Tyrone in the North; the *Mountains of Moine Shive Donard* 2,796 ft. of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.) in the North-East; the *Berrycagh Mountains* (Erigal 2,466 ft.) of County Donegal in the North-West; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway in the West; *Macgillivray's Reeks* (Caruntuohill 3,414 ft., the highest point in Ireland) in the South-West; and the *Glenties Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Conneragh Mountains* (2,470 ft.) of County Waterford, in the South. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Suir, Nore, and Barrow* to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough Neagh (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen, Bodery, Forbes, Rea* and *Duff*, and the Erne Chain of *Gowna, Oughter, Lower Erne, and Erne*, in the central plain; *Melvin, Gall, Gara* and *Conn* in the north; and *Corrib* and *Mask* (joined by a hidden channel) in the south. In County Kerry, to the east of Macgillivray's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about 3° Fahrenheit, the summer extremes being 59° in the N. and 62° in the S.

**Primitive Man.**—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

**Legendary History.**—According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardrí* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn McCool (Fingal) to connect Antrim with Scotland (Staffa).

**Christianity.**—Christianity did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

**Later History.**—The Roman conquest of Britain was not extended to Ireland, and little is known of the history of the country until the invasions of *Northernmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Findgail* (White Strangers) and the Danes as *Dubgail* (Black Strangers), names which survive in "Fingall,"

"MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaidstir, Laiginstir, Mumans-tir and Kunnak-tir). The outstanding events in the encounters with the Northernmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Anlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermot MacMurrough (Diarmait Mac-Murchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII. English rule was greatly extended, and the administration of Irish affairs was anglicised by Robert Poyning, Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law*, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland.

Patrick O'Neil.	G. O. L. Young.

# CONSTITUTION AND GOVERNMENT.

UNDER the Government of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922, a separate Parliament and Executive Government were established for Northern Ireland, which comprises the six parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone, and the Boroughs of Belfast and Londonderry. Under the Constitution of Northern Ireland certain legislative and fiscal powers are reserved to the Parliament of the United Kingdom.

The Northern Irish Parliament consists of a House of Commons of 52 elected members (who receive an allowance of £200 per annum) and a Senate of 2 *ex-officio* Senators and 24 Senators elected by the members of the House of Commons on the proportional representation system. Northern Ireland continues under the Act of 1920 to return 13 members to the House of Commons at Westminster.

The Executive power is vested in the Governor on behalf of His Majesty the King; he holds office for 6 years, and is advised by 7 Ministers responsible to Parliament.

## EDUCATION.

On Dec. 31, 1935, there were 1,775 Public Elementary Schools with 200,607 pupils. In 1935-36 there were 73 Preparatory, Intermediate and Secondary Schools recognised by the Ministry of Education, with 13,165 pupils, and in 1934-35 there were 124 Centres of Technical Instruction, with 23,218 students. The Queen's University at Belfast had 133 Professors, Lecturers, and Demonstrators, and 1,587 students in 1935-36.

## FINANCE.

The greater part of the taxation in Northern Ireland is imposed and collected by the Imperial Authorities; the balance after deducting the cost of collection and of certain services reserved to the control of the Imperial Parliament is paid

over to Northern Ireland's Exchequer. Northern Ireland makes a contribution to the cost of the Imperial Services, i.e., Navy, Army and Air Force, National Debt, &c.

	1934-35.	1935-36.
Total revenue .....	£12,127,000	£13,101,000
Total expenditure (including Imperial contribution)	£12,119,000	£13,096,000

## PRODUCTION AND INDUSTRY.

*Agriculture and Live Stock.*—In 1935 there were 285,775 acres under corn crops (oats, 272,688 acres), 166,971 under green crops (potatoes, 129,015), 27,755 under flax, 8,541 under fruit, and 424,136 under hay, a total acreage of 913,178. The production (1935) in tons was: oats, 260,165; potatoes, 885,679; turnips, 578,356; flax, 6,892; hay, 764,923. The Live Stock included 799,251 cattle; 818,304 sheep; 457,878 pigs; 41,668 goats; 99,580 horses; 197 mules, 7,443 asses, and 10,055,000 poultry (estimated number of eggs, 1534, 530,000,000).

*Principal Industries.*—Agriculture, shipbuilding and ship repairing, flax spinning and weaving, linen bleaching and finishing, distilling, linen embroidering, fruit preserving, food canning, milling, and the manufacture of textile machinery, ropes and twine, furniture, tobacco, tweeds and woollens, shirts and collars, chemical manures, soaps and candles, clothing, hosiery, pottery, roofing felts, biscuits, matches, &c., the production of bauxite, salt, diatomite or kieselguhr. Herring fishing and pickling is an important industry during the summer months.

*Minerals.*—About 2,000 persons were engaged in the various mines and quarries in 1935, the principal output being igneous rocks (other than granite) 420,000 tons, sandstone, chalk, clay, granite, limestone.

*Manufactures.*—Belfast is the principal industrial centre. The manufacturing of linen gives direct employment to approximately 60,000 persons, the number of spindles being 800,000.

## COMMUNICATIONS.

*Seaports.*—The principal seaports are Belfast, Londonderry, Newry, Larne and Coleraine. There are regular week-day shipping services from Belfast to Liverpool, Heysham, Ardrossan and Glasgow, and from Larne to Stranraer.

*Railways.*—The principal railways are the Great Northern, L.M. & S. (Northern Counties Committee), Belfast and County Down, Londonderry and Lough Swilly, and the Clogher Valley. The total railway mileage in 1934 was 755 miles.

*TOURIST ASSOCIATION.*—The Ulster Tourist Development Association, 6, Royal Avenue, Belfast.

## IRISH REPRESENTATIVE PEERS (28).

\* Since created U.K. Baron Bingham.

(And 12 Vacancies.)

## Saorstát Éireann—The Irish Free State.

## THE GOVERNOR GENERAL.

Domhnaill un Buachalla (Donald Buckley) ..... £10,000

## CONSTITUTION AND GOVERNMENT.

*The Constitution.*—The Constitution of the Irish Free State (Saorstát Éireann) was enacted by Dail Éireann, sitting as a Constituent Assembly, on October 25, 1922, and came into operation on December 6, 1922, by Royal Proclamation of that date. Article 50 of the Constitution provided that amendments thereto might be made by ordinary legislation within a period of eight years from the date of the coming into operation of that instrument, but that any amendment after the expiration of such period could be effected only by a Referendum of the people as therein provided. The period of eight years was extended to 16 years by a Constitutional Amendment, and the period wherein amendments to the Constitution may be effected by ordinary legislation accordingly expires on December 5, 1938.

The Constitution declares the Irish Free State (Saorstát Éireann) to be a co-equal member of the Community of Nations forming the British Commonwealth of Nations and that "all powers of Government and all authority, legislative, executive and judicial in Ireland are derived from the people of Ireland." Irish nationality is regulated by Article 3 of the Constitution and by the Irish Nationality and Citizenship Act 1935. Irish is the national language, but English is recognised equally as an official language. No titles or honours may be conferred on any citizen except with the approval or upon the advice of the Executive Council. Liberty of the person and the dwelling of the citizen are inviolable. Freedom of conscience and profession and practice of religion are guaranteed, and no law establishing or prohibiting any religion may be passed. Free speech and the right of lawful assembly are guaranteed. Elementary education is free, and the natural resources of the State are inalienable.

*The Legislature.*—The Legislature, known as the *Oireachtas*, consists of the King and one House, the Chamber of Deputies (*Dail Éireann*). Two Houses were established under the Constitution of 1922, but the Second House (*Seanad Éireann*) was abolished by a constitutional amendment which became law on May 29, 1936. The members of *Dail Éireann* are elected by secret ballot, by direct vote of all citizens above the age of 21 years who comply with the existing electoral laws. The Dail consists of not less than one member for each 30,000 of the population and not more than one member for each 20,000 of the population, together with three members from each of the two Universities. The number of deputies is at present 153. Every citizen of 21 years and over, not otherwise disqualified, is eligible for election to *Dail Éireann*. A number of amendments were made in 1928 in the Articles of the Constitution relating to election to and membership of the Senate. The *Oireachtas* shall hold at least one Session each year. The Initiative and, save in regard to amendments to the Constitution, the Referendum which were, originally embodied in the Con-

stitution, have been abolished by Constitutional amendments. The *Oireachtas* has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State (Saorstát Éireann) and every such force shall be subject to the control of the *Oireachtas*. Save in the case of actual invasion, the Irish Free State shall not be committed to active participation in any war without the assent of the *Oireachtas*.

*The Executive.*—The Executive Authority is vested in the King and is exercisable in accordance with the law, practice and constitutional usage in the Dominion of Canada, by the representative of the Crown who is styled the Governor-General of the Irish Free State (Saorstát Éireann). The Executive Council consists of not more than 12 and not less than five Ministers. They are responsible to the Dail and must include the President and Vice-President of the Council and the Minister for Finance, who must be members of the Dail. All other members of the Executive Council must also be members of the Dail save one, who may be a member of the Senate. The President shall be appointed on the nomination of *Dail Éireann*; he nominates a Vice-President and the other members of the Executive Council, who must be approved by the Dail.

*The Judiciary.*—The Judiciary consists of Courts of First Instance, and a Court of Final Appeal called the Supreme Court (*Cúirt Uachtarach*). The Courts of First Instance include a High Court (*Ard Chúirt*), invested with full original jurisdiction in and power to determine all matters and questions whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court is in all cases final and conclusive, and cannot be reviewed by any other Court, Tribunal or Authority whatsoever.

To Germany.—Charles H. Bewley, 8.C., 344 Tiergartenstrasse, Berlin.

To France.—Art Ua Briain, 37bis, Rue de Villejust, Paris.

#### THE JUDICATURE—CUIRT OACHTARACH.

The Supreme Court of the Irish Free State has appellate jurisdiction from all decisions of the High Court.

Chief Justice, Hon. Hugh Kennedy ..... £4,000

Pres. of the High Court, Hon. Timothy Sullivan ..... 3,000

Judges, Supreme Court, Hon. Gerald Fitz-Gibbon; Hon. J. A. Murnaghan ..... each 3,000

Judges, High Court, Hon. J. Creed Meredith; Hon. W. J. Johnston; Hon. H. Hanna; Hon. J. O'Byrne; Hon. C. A. Maguire ..... each 2,500

Master of High Court, Gerald Horan, K.C.

#### DEFENCE—ROINN COSANTA.

Article 46 of the Constitution of the Irish Free State lays it down that the Oireachtas has the exclusive right to regulate the raising and maintaining of the armed forces in the Irish Free State. The strength provided for (1935-36) is 576 Commissioned Officers and 5,312 Non-Commissioned Officers and men. The estimated total expenditure on the Army for the financial year ending March, 1937, is £1,529,987.

#### RELIGION. (Census of 1926.)

Catholics .....	2,751,269
Episcopalians .....	164,215
Presbyterians .....	32,429
Methodists .....	10,663
Others .....	13,416
<b>Total</b> .....	<b>2,971,992</b>

#### EDUCATION.

Primary Education is directed by the State. Secondary Education is in private hands and is largely conducted by Religious Orders. There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin). The estimated State expenditure on education in 1936-37, excluding administration and inspection, was Primary £3,605,286; Secondary £420,300; Technical £244,245; Science and Art £45,369.

#### FINANCE.

	1935 36. Actual.	1936 37. Estimated.
Receivables .....	£30,601,620	£30,112,000
Expenditure .....	31,106,840	32,883,000*

The estimated Revenue for 1936-37 includes Customs, £9,467,000; Excise, £6,045,000; Estate, &c., Duties, £1,155,000; Income Tax and Super Tax, £5,282,000; Excess Profits Duty, £210,000; Motor Vehicles Duties, £1,000,000; Post Office Services, £1,900,000.

The principal items of estimated Expenditure for 1936-37 are Debt Service, £2,192,000 (Interest £1,477,000, Sinking Fund £715,000); Agriculture, land division, &c., £6,311,000; Army, £1,530,000; Police, £1,865,000; Education, £4,763,000; Old Age Pensions, £3,467,000; Postal Service, £2,032,000; Unemployment, £2,558,000, &c.

The Gross debt on March 31, 1936, was £48,402,681, with assets £29,139,773, leaving the net total of the debt at £19,262,908.

\*Expenditure figures include a number of items of a capital or non-recurrent nature which are met from borrowings. The Budget for 1936-37 is based on estimated revenue and expenditure of £30,102,000 and £30,184,000 respectively, leaving a surplus of £8,000.

#### PRODUCTION AND INDUSTRY.

**Agriculture and Live Stock.**—In 1935 there were 918,804 acres under corn crops, 660,531 under root and green crops, 4,820 under flax, 7,230 under fruit, and 2,083,203 under hay, a total of 3,674,648 acres. The principal produce in 1935 was: oats, 615,704 tons; wheat, 179,077 tons; barley, 156,067; turnips, 2,793,063 tons; potatoes, 2,577,262 tons; mangolds, 1,629,474 tons; sugar beet, 594,478 tons; and hay, 4,358,111 tons. The Live Stock included 4,019,468 cattle, 3,041,686 sheep, 1,087,679 pigs, 419,968 horses.

**Minerals.**—733 persons were employed in the coal mines in 1931, 122,723 tons of coal won (1935).

**Sea Fisheries.**—9,072 persons were employed in the fisheries in 1935, the total value of all fish landed being £163,298.

#### TRADE

The total trade of the Irish Free State for 1935, exclusive of Ballion and Specie, was valued at £57,267,922, being £37,347,860 for Imports and £19,920,062 for Exports; the Imports consigned from Great Britain were valued at £25,271,124, and the Exports to Great Britain at £16,242,180; the Imports consigned from Northern Ireland at £1,774,369, and the Exports to Northern Ireland at £2,030,436.

## THE LEGISLATURE—OIREACHTAS EIREANN.

The Legislature (*Oireachtas*) consists of a Chamber of Deputies (*Dáil Éireann*) on a population basis (153 at present) elected on the principle of Proportional Representation. The *Oireachtas*, unless sooner dissolved, continues for "six years or such shorter period as may be fixed by legislation." The period fixed by legislation is at present five years.

## THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat.  $54^{\circ} 3' - 54^{\circ} 25' N.$  and long.  $4^{\circ} 18' - 4^{\circ} 47' W.$ , nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population (1931) of 49,308 (22,459 males, 26,849 females). In 1924 the births numbered 664 and the deaths 761. The cultivated area (1936) was 77,272 acres, and the live stock included 3,458 horses, 20,743 cattle, 89,873 sheep, and 4,269 pigs. The Island's main industry is catering for holiday-makers (numbering about 500,000 in the year) from all parts of the British Isles.

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Forty-seven miles of railway have been constructed, and about 25 miles of electric tram road.

**Government, etc.**—In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £427,144.

Man is now governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, 2 members appointed by the Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *keise*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the adult male and female population, 16 from the six *sheadings*, 5 from Douglas, and 1 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members,

and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual contribution of £10,000 is made to the Imperial Government. In 1921 Tynwald accepted liability for the redemption of £250,000 War Stock, and in 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the Great War. In the financial year 1933-34 the Government of the Isle of Man discharged this war liability to H.M. Government from the proceeds of a loan (£530,000) (Isle of Man Government  $\frac{3}{4}$  per cent. 1953-1983 Stock) raised for that purpose, as well as for the purpose of financing in part the cost of extending the Red Pier, Douglas. The chief source of revenue is found in the customs duties, the only direct taxation being income tax, which ranges from 8d. for incomes under £500, to 2s. 4d. for incomes over £5,000. There are 33 elementary and 4 secondary schools in addition to King William's College; the gross expenditure on elementary education in 1935-36 was £74,915, and on higher education £27,642.

**CAPITAL, Douglas.** Pop. (1931), 19,329 (Castletown is the ancient capital); the other towns are Peel and Ramsey.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

**Boundaries.**—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povalo Schveikovski on the Taghdumbash Pamir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socatra, Bahrain, and various chiefdoms along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the capital, lies in 77° E. long.

**Area and Population.**—The total area of India proper is about 1,806,600 square miles, with a population of nearly 353 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 77 per cent. of the population. The details of the 1931 Census are as follows:—

PROVINCE, STATE, OR AGENCY.	Area in square miles (1931).	PERSONS.				Difference per cent. 1931 & 1921.
		1931.			1921.

In this table the population shown in the Census Tables of 1921 have been adjusted with subsequent changes of area.

\* Districts and Administered Territories.      Bihar and Orissa.      See p. 773, 775.      Sind.      See p. 775.  
 § Central Provinces and Berar.      See p. 774.      Madras.      See p. 770.

*Physical Features.*—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

*The Himalayas.*—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 23,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 15,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tami or Duar jungle, densely forest-covered and full of big game.

*The Great Plain.*—The northern river plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsun-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

*The Deccan.*—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhya. The Eastern and Western Ghats all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhya, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the

Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

*Burma.*—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs, while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

*Climate.*—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 30 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

*Population.* The sixth general census of India was taken on the 26th February, 1931. The returns gave a population of 352,837,778, as compared with 318,942,480 in 1921 (for details see p. 753), an increase in the ten years of 10·6 per cent. The census total of 1931 is divisible into 271,526,933, (or nearly 77 per cent.) for British India, and 81,310,845 (or over 23 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1931 37 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 11 per cent. of the total population.

*Caste, Tribe, Race or Nationality.*—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet. The chief castes and races are (Census 1931)—Brahman (15,207,277), Chamar (12,195,156), Ahar, &c. (11,170,032), Rajput (10,743,091), Burmese (8,553,538), Jat (8,377,810), Maratha (6,113,061). According to the Census Returns of 1931 the population included 300,529 persons of European and allied races (including Armenians), viz., 155,555 British subjects, 12,570 persons of other European races, and 138,395 Anglo-Indians. The description of an Anglo-Indian for Census purposes was a person whose father, grandfather or other progenitor in the male line was an European.

*Religions* (Census 1931).—The population by religions in 1931 includes 230,195,140 Hindus (65 per cent. of the total), 77,677,515 Muhammadans (22 per cent.), 12,786,806 Buddhists (3·6 per cent.), nearly all in Burma, leaving nearly 6 per cent. for all other religions, including 6,206,703 Christians (3,773,087 of whom are in Madras, Travancore, and Cochin), 1,435,771 Sikhs, 1,252,105 Jains, 109,752 Parsis, Jews 24,141, and 8,280,347 described as Tribal, who believe in magic and strive to propitiate impersonal forces. Minor Religions, and Religions not returned, 571,187. The Muhammadans, who are increasing faster than the Hindus, are influenced by the caste system and other Hindu characteristics. No particulars of religion are available of 2,308,221 persons (Bombay 75,735, Burma 19,640, and North-West Frontier Province, 2,212,837). The number of Indian Christians has increased 238 per cent. since 1881.

*Occupations.* Over 66 per cent. of the population was in 1931 dependent on agricultural and pastoral pursuits. Industry occupies 10 per cent. of India's workers. The most

important industrial occupations are those connected with textiles, mainly hand-weaving.

Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1931 over 2,000,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945, and 1,000 to 940 in 1931.

*Languages.* India has 225 languages, exclusive of dialects, spoken in the Indian Empire, about 15% of which are confined to Assam and Burma. The languages spoken by 2,000,000 persons in 1931 (excluding 2,938,221 persons for whom details by language are not available) are grouped in eight families. The principal languages are Western Hindi (spoken by 71,517,000 persons), Bengali (53,169,000), Bihari (27,927,000), Urdu (26,777,000), Marathi (22,309,000), Tamil (20,112,000), Punjabi (15,830,000), Rajasthani (15,000,000), after which come Kanarese, Oriya, Gujarati, Malayalam, and Burmese. Hindustani, a dialect of Hindi, containing a large number of Persian and Arabic words is the *lingua franca* of India. Hindustani and Hindi have become the chief literary languages of Hindustan. English is understood by many.

The principal latest official publications relating to India, are:—*Parliamentary Papers* (Session 1935-36).—Moral and Material Progress Report, 1933-34 ("India in 1933-34") (H.C. 16); East India Budget, 1936-37 (H.C. 158); Statistical Abstract, 1923-24 to 1932-33 (Cmd. 5158); Accounts and Estimates, 1936-37, Explanatory Memorandum (Cmd. 5283); Indian Finance Act, 1936 (H.C. 129); Constitutional Reforms:—The Government of India Act, 1935. Proposals of H.M.'s Government for (1) the Electorate for the Council of State and for Provincial Legislative Councils; (2) Electorates in Chief Commissioners' Provinces for the Federal Legislature; and (3) "Scheduled Castes" for the purposes of para. 26 of the First Schedule to the Act (Cmd. 4998); Excluded and Partially Excluded Areas, Recommendations of the Provincial Governments and of the Government of India, 1935 (Cmd. 5064); Delimitation of Constituencies in India (Hammond) Committee (Report, Cmd. 5099, Proposals, Cmd. 5100); Delimitation of Constituencies in Burma, Report of Sir Laurie Hammond (Cmd. 5101); Government of India and Burma Acts, 1935; Memorandum by the Secretary of State for India explanatory of the Draft Orders relating to the Provincial Legislative Assemblies, Provincial Legislative Councils, Scheduled Castes, Burma House of Representatives and Burma Senate Elections (Cmd. 5133); Indian Financial Enquiry, 1935-36, Report by Sir Otto Niemeyer (Cmd. 5163); Government of India and Burma Acts, 1935; Explanatory Memorandum of the Draft Orders relating to the commencement of Transitory Provisions of the Acts, and distribution of revenues, also views of the Government of India, Provincial Governments and the Secretary of State for India on the Financial Enquiry made by Sir Otto Niemeyer (Cmd. 5181). *Non-Parliamentary Publications.*—Half-Yearly Returns of Loans raised in England; Home Accounts, 1934-35; Estimate of Revenue and Expenditure 1935-36. *Government of India Publications.*—Education in India, 10th Quinquennial Review, 1927-32; Report of the Fourth Census of Live-stock and Agricultural Implements and Machinery held in 1935. *Published by the High Commissioner for India.*—Report of the Indian Trade Commissioner, 1934-35. Parliamentary and Non-Parliamentary Papers can be purchased through any Bookseller, or directly from H.M. Stationery Office, Imperial House, Kingsway, W.C.2. Government of India publications can be obtained from the High Commissioner for India, India House, Aldwych, W.C.2. One-inch Ordnance Survey Maps are published by the Survey of India, and can be obtained from the High Commissioner for India (address above) (1s. to 1s. 9d. each).

## A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The writers of these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads*; their epics, the *Mahabharata* and *Ramayana*, extol their mythical heroes; while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinamen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautama, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 450 B.C. to 350 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to litigation, and notes the absence of slavery. Asoka (272-231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 695 A.D.

The influence of the Greek conquest was

swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606-648), after many years of fighting, made himself master of Northern India, and ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions; but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years; but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutub-din, whose memory is perpetuated by the Kutb Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1204.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 Babar, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, Humayun (1530-56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540-1545. Akbar the Great, Humayun's son (1556-1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms. He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet. Jahangir (1605-27) received in 1616 Sir Thomas Roe, the ambassador of James I. Under Shah Jahan (1627-1658) the Mogul Empire reached the zenith of its glory. Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was

embittered by the rivalries of his four sons. *Aurangzeb* (1658-1707) defeated and killed his brothers and kept his father a prisoner till death (1666). *Aurangzeb* had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and *Bahadur Shah* (1707-12) secured the crown. After four short-lived emperors *Muhammad Shah* (1719-48), grandson of *Bahadur*, came to the throne. His viceroys became rebellious, and so contributed to the success of the *Mahrattas*, who subdued the Deccan. About 1724 part of the Deccan became practically independent under *Nizam-ul-Mulk* (ancestor of the present *Nizam*). In 1738, to avenge an alleged insult, *Nadir Shah* of Persia invaded India, captured *Dellhi*, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of *Muhammad*, the phantom rulers, *Ahmad Shah* (1748-1754) and *Alamgir II.* (1754-1759), occupied the throne, and were succeeded by *Shah Alam* (1759-1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the *Mahrattas* increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Sivaji* (1627-1680), a chieftain of the family of *Bhonsla*, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishvanath* (1712-1720) *Peishwa*, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, *Sivaji's* descendants thenceforth holding a merely nominal position. Under the *Peishwas*, aided by *Scindia*, *Holkar*, and the *Gaekwar*, who formed independent States about this time, the *Mahrattas* rapidly extended their territory and influence, conquering *Gujarat*, *Malwa*, *Berar*, and *Orissa*. Although they were severely defeated at *Panipat* in 1761 by *Ahmad Shah*, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the *Pindaris*, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both *Pindaris* and *Mahrattas* were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The *Mahratta* empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the *Mahrattas*. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near *Lahore* in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Govind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780-

1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of *Lahore*, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were *Calicut*, *Ormuz*, *Aden*, and *Malacca*. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by *Vasco da Gama*, who anchored before *Calicut* in May, 1498. From that time until they lost their naval supremacy, a century later, the Portuguese enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, *Francis of Almeida* (1505-1509), established numerous factories and fortresses; while his successor, *Alfonso de Albuquerque*, captured *Goa* (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under *Philip II.*, the Portuguese brought Indian products to *Lisbon*, whence the Dutch carried them to other parts of Europe. But when *Philip II.*, on account of the Dutch revolt, shut *Lisbon* against them, the Dutch were driven to trade directly with the East. In 1602, by amalgamating existing trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were gradually captured. By 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. French and Danish East India Companies were established in 1601 and 1616 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at *Surat* after several stubborn engagements off *Swallay* in 1612. In 1615 the British ambassador, *Sir Thomas Roe*, supported by the Emperor *Jahangir*, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified

it, and named it Fort St. George; in 1653 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay; in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company." After a brief period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant; and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing to Clive's efforts, the Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their government. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule Warren Hastings (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act

of 1773. He vigorously reformed the revenue system and judicial procedure. Hastings was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of his Council. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of Lord Cornwallis (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore War, in which he defeated Tippee, the son and successor of Hyder Ali. The rule of Sir John Shore (1793-98) was uneventful.

The administration of the Marquess Wellesley (1798-1805) was distinguished by many important events. Tippee, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippee, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta confederacy, but led to the Second and Third Mahratta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India. During the brief second administration of Lord Cornwallis (1805), and that of Sir G. Barlow (1805-7), Wellesley's policy of subsidiary alliances was reversed.

Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the Marquess of Hastings (1814-23) a severe struggle with Nepal ended with the Treaty of Sagauli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa enlarged Bombay Presidency to its present dimensions. Lord Hastings in the same year crushed the marauding Pindaris of Central India, who had devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India.

He encouraged education. *Lord Amherst* (1823-8) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the provinces of Aracan and Tenasserim, and, practically, Assam.

While *Lord William Bentinck* was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of *Lord Auckland* (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of *Lord Ellenborough* (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely contested battles, ending with Sobraon (1846).

*Lord Dalhousie's* administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *via* the Red Sea, and opened the Ganges Canal. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to Indian rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 this "doctrine of lapse" was applied to Satara, and in 1853 Jhansi similarly became British territory; while on the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

*Earl Canning* (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India. A mutiny of sepoys broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the

authority off the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

*Sir John (Lord) Lawrence* (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

*Lord Mayo* (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty.

*Lord Lytton's* administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

*Lord Curzon* (1899-1904, and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord

Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Beitar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 Lord Amthill occupied the post of Viceroy. Lord Curzon was reappointed in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (afterwards H.M. King George) made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 12 December, 1911, by H.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam. Delhi was chosen as the capital on geographical, historical, and political

grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. In Dec., 1912, the Viceroy took formal possession of the new headquarters at Delhi. The State entry was marred by an attempt on the life of the Viceroy. The outbreak of *The Great War* in August, 1914, was the signal for an outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Chelmsford succeeded in April, 1916. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Public Services Commission, appointed during Lord Hardinge's administration, reported.

Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The Bombay Government took the first steps towards obligatory primary education; a policy of more complete local self-government was decided on by the Government of India. The influenza epidemic spread to India, and it was estimated that over 12 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916, issued a report. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmsford Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were undertaken. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a "passive resistance" movement, inaugurated by Mr. Gandhi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of

the powers with which the Government had armed themselves during the War to deal with sedition. The murder of the Amir and the subsequent events in Afghanistan were followed by an inroad of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. The Home Parliament, by rules, laid down the details of the constitution of the new Central and Provincial Governments. The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, i.e., an exchange rate of Rs. 10 to the £, was adopted. A *High Commissioner for India* in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

In January, 1921, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

*Lord Reading* succeeded in April, 1921. The battle between constitutionalism and revolution continued. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gandhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrest. The Moplahs (Muhammadan fanatics of Malabar) resisted the ordinary processes of law, and a widespread outbreak of violence ensued which forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England.

In November the Prince of Wales (now H.M. King Edward VIII) visited India. In 1922 the Government arrested Mr. Gandhi, who was sentenced to six years' imprisonment. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press.

The Fiscal Commission (appointed in 1921)

reported and advised the adoption of a policy of protection.

The Hon. V. Srinivasa Sastri visited the Dominions, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Dominions. Twenty-three Acts and Regulations supplementing the criminal law were repealed. A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province. The "Inchcape" Retrenchment Committee, appointed in 1922, reported and recommended a total reduction in the Budget of Rs. 12½ crores. The Government accepted the principle of Protection, but declared that it should be applied with discrimination; hitherto the Indian tariff had been a revenue tariff. A trade Convention was concluded with Afghanistan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy was further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border. At the Imperial Conference, a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1921, that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, had been given effect to and to what extent it could be further applied. The Bengal Government was given special powers to deal with violent crime. The Punjab was greatly disturbed by the Sikh invasion of the Nabha State. The Royal Commission on the Superior Civil Services, appointed in 1923, reported and recommended financial improvements for the Indian Civil and other Services. Further Indianisation of the Services was recommended. During the year a Legislative Council was set up in Coorg.

Early in 1925, the Swarajist leader, Mr. Das, repudiated the policy of violence, but asked in return for the cessation of "repressive" measures. A committee was appointed to enquire into the difficulties arising from or inherent in the working of the Constitution, and recommended many alterations, particularly that the control of the Secretary of State should be relaxed in purely Indian matters. The terms of reference did not, however, extend to the larger question of a complete revision of the Constitution, contemplated in the Montagu-Chelmsford scheme of 1918. The Viceroy came home to confer with the Home Government, and on his return to India announced the decision that the moment for such an enquiry had not arrived. The Government extended the policy of protection by granting a bounty on steel manufactured in India. The Khyber Pass Railway, 27 miles in length, from Jamrud—some three miles from the entrance of the Pass—to Landi Kotal, on the Afghan border, was opened.

In 1926 the Cotton Excise duty was abolished.

It was decided to reconstruct the Royal Indian Marine as a combatant force so that India may ultimately undertake her own naval defence. The Government of India decided to prohibit the export of opium for medical purposes, thus taking the lead in initiating the measures for which the Geneva Protocol provides.

Lord Irwin succeeded Lord Reading as Viceroy in April, 1926. In the United Provinces a Bill was passed to improve the lot of tenants in Agra Province by facilitating occupancy tenure and for the prevention of unauthorised imposts by landlords.

The Royal Commission on Indian Currency and Finance recommended that the gold value of the rupee should be fixed at *rs. 6d.*, that the currency authority should be put under a statutory obligation to buy and sell gold or gold exchange at appropriate prices to maintain the ratio, that a central bank should be created apart from the Imperial Bank and that measures should be taken to establish a gold standard for India. Government announced their intention to adopt the ratio of *rs. 6d.* and to pass the necessary legislation to put the matter on a statutory basis.

Following the success of the Government mission for the suppression of slave trading in the Hukawng valley an expedition was sent to the Kachin tribal chiefs in Burma with the object of endeavouring to persuade the chiefs to agree to the abolition of the system of tribal slavery in the area lying between the head waters of the Irrawaddy. In Nepal the slave liberation scheme, formulated by the Prime Minister of that State, was completed at a cost of *£275,000*.

Important changes in the administration of the State of Hyderabad were made by H.H. the Nizam following representations by the Supreme Government.

During the year there was a recrudescence of communal and religious strife between Moslems and Hindus, and serious riots, with great loss of lives, occurred in most parts of India, particularly in Kohat, Calcutta and Delhi. The Government of Bengal were obliged to proclaim a state of emergency.

In 1927 a continuance of the measures for the protection of the Indian steel industry, in a modified form, was recommended by the Indian Tariff Board, whose main proposals were accepted by the Government of India. It was also decided to protect the cotton textile industry against competition in cotton yarn produced under conditions which enable such yarn to be produced at a cost below that at which it can be produced in India, by an alteration in the import duty on cotton yarn, and to abolish the duty on imported mill stores, &c. An Act for the registration of trade unions came into force. The rupee was stabilised by legislation, at *rs. 6d.*, and a bill for the establishment of an Indian Reserve Bank was introduced. The Bombay Back Bay Reclamation Committee recommended the carrying on of a certain portion of the work, but that it should in future, as far as possible, be undertaken by contract agency.

A substantial and progressive Indianisation of the Indian Army was recommended by the Sandhurst (Skeen) Committee in order that, by 1952, 50 per cent. of the cadre of officers should be Indians.

A settlement was reached with the Government of South Africa on the question of the position of Indians in the Union. A Public Services Commission was formally constituted. The new Council House at New Delhi was opened. The Indian Princes met in conference to consider their future status. His Highness the Maharajah of Patiala sanctioned a scheme of compulsory education in his State. Slavery was abolished in the State of Kalat (Baluchistan).

In the Home Parliament the Indian Navy Bill and the Indian Church Bill were passed. The latter provides that the Church in India shall be an autonomous body.

In November the Home Government announced its intention to set up a Statutory Commission, with the Rt. Hon. Sir John Simon as Chairman, to report to what extent it was desirable to establish the principles of responsible government in India, or to extend, modify or restrict the degree of responsible government.

In 1928 the Commission visited India, but was unfavourably received by many who were dissatisfied with the terms of reference. Boycotts and sympathetic strikes were organised. Towards the end of the year the Commission succeeded in securing the offer of the co-operation of most of the political parties and groups previously hostile. A Committee was appointed, with Sir Harcourt Butler as Chairman, to consider the relations between the Paramount Power and the Indian States, with special reference to the financial and economic relations between British India and the States.

The Royal Commission on Agriculture in India (appointed in 1926) issued its Report and the first step to carry out its recommendations was taken by the opening of a Conference in India to draw up schemes for co-ordinated action.

In 1927 it was announced that in future the number of direct vacancies open to Indian candidates at Sandhurst would be doubled, that a certain number of vacancies would be reserved for Indian officers holding the Viceroy's commission, and that Woolwich and Cranwell would be open to Indian aspirants for King's Commissions.

In 1929, power was given by the Appellate Jurisdiction Act to appoint Indian judges, &c., as additional members of the Judicial Committee of the Privy Council for the hearing of appeals from India. The Statutory Commission continued its labours, but met with a considerable amount of opposition organised by some of the political groups in India. Indian leaders attempted (but with little success) to draw up proposals acceptable to the main recognised political parties for submission to the Commission. A bill was introduced in the Assembly providing for the removal from India of non-Indian communist agents and a few days later an attempt was made by communists to destroy members of the Assembly by throwing bombs at the Government benches. The Bill was passed later as an Ordinance owing to the refusal of the President of the Assembly to allow its discussion on the ground that some of its provisions were *sub judice* in view of a trial of some conspirators then proceeding. There was considerable unrest in parts of India during the year, particularly in Bombay. An Act was passed providing for the investigation and settlement of trade disputes; under it strikes and lock-outs in utility services are penalised; strikes and lock-outs having any object than the furtherance of a trade dispute within the trade or industry in which the strikers or employers are engaged, or are designed to inflict severe general and prolonged hardship upon the community and government, are illegal.

A Royal Commission was appointed to report on the existing conditions of labour in industrial undertakings in British India, on the health, efficiency and standard of living of the workers, and on the relations between employers and employed. A Committee was also appointed

to consider the general problem of road development.

An Act was passed providing that the age of marriage shall not be less than 14 and the age of consent not less than 16.

The Indian States Committee presented its Report. It recommended that the Viceroy, not the Governor-General in Council, should in future be the Agent of the Crown and that important matters of dispute between the states themselves, between the states and the Paramount Power and between the states and British India should be referred to independent Committees for advice. The Committee dealt with the relationship between the Paramount Power and the financial relations between British India and the states, particularly the claim of the states for a share in the maritime customs, the proceeds of which are enjoyed at present exclusively by British India.

In 1930 the outstanding event was the issue of the Report of the Statutory Commission (the Simon Commission). The Commission's Recommendations (Cmd. 3569) foreshadowed many changes. Broadly these may be summarised as the grant of the greatest possible measure of independence to Local Governments within their own sphere, and the substitution of a Federal system in place of the existing arrangements.

The Commission's Report, published in June, was received with a storm of disapprobation in Indian political circles, and was the signal for a recrudescence of the non-co-operation movement in an acute form. There were serious riots and bomb outrages in various parts of India. In the course of the measures taken to restore order Mr. Gandhi and numerous other political leaders were brought to trial, convicted, and sentenced to terms of imprisonment.

In September the Round Table Conference was convened in London, as the next stage in the process of settling the future constitution.

In 1931 the various Committees of the Round Table Conference presented their Reports, one of the most important being that of the Federal Relations Sub-Committee outlining the constitution of a Federal Government of India. The representatives of the Indian States had expressed their willingness to consider their entry into a Federal system. The Conference adjourned in January. Later, there was considerable disorder in India, but eventually negotiations resulted in an agreement for the cessation of civil disobedience and of the boycott of English goods.

New Delhi was inaugurated in February. The *Earl of Willington* succeeded Lord Irwin as Viceroy in April. The Royal Commission ("Whitley") on Labour, appointed in 1929, submitted their Report and recommendations. The Round Table Conference re-assembled in London in October, and discussed the composition and functions of the proposed Federal Legislature, the Federal Court, the representation of minorities, the States' places in the Legislature, &c. At the conclusion of the Session of the Conference in December the Prime Minister stated that, in view of the differences of opinion revealed during the discussions, the Government proposed to appoint three Committees to work in India to investigate more fully the questions of franchise, federal finance, and relations with certain Indian States.

In 1932 measures were taken to counteract the civil disobedience movement and Mr. Gandhi, who attended the Conference, was arrested on

his return to India. The various communities having failed to agree in regard to their representation in the Provincial Legislatures, the Home Government decided on certain provisions to give effect to a scheme for the representation of the communities, to be laid before Parliament in due course. Later, it was announced that another (small) Round Table Conference would be convened in November, with a view to reach an agreement consistent with the declared policy of His Majesty's Government on the important constitutional questions still remaining to be decided. The North-West Frontier Province was constituted a Governor's Province; an annual subvention of Rs. 1 crore (£750,000) being granted by the Central Government, to be operative for three years or until the new constitution of India is inaugurated, whichever is earlier. An initial balance of Rs. 10 lakhs (£75,000) was placed at the disposition of the Province. Aden was constituted a Province, under a Chief Commissioner under the direct control of the Government of India.

In March, 1933, after further inquiries and discussions, including a third session of the Round Table Conference, His Majesty's Government announced their proposals for constitutional reforms (Cmd. 4268—White Paper). A Joint Select Committee of both Houses of Parliament was set up to consider and report on them in consultation with Indian representatives.

In January, 1934, one of the greatest earthquakes in history caused widespread devastation throughout North Bihar and Nepal. The damage, in a less intense form, extended east into Bengal and Assam and west into the United Provinces. The Indian States (Protection) Bill, of which the object is to protect the Indian States from subversive activities of all kinds conducted from British India, was passed in April. In July a Commercial Agreement was concluded with Japan, regulating, among other matters, the totals of Japanese purchases of Indian raw cotton and Japanese exports of cotton textiles. Under the Agreement the two countries enjoy most-favoured-nation treatment. A settlement was reached of the controversy between the Government of India and the State of Nawanagar in regard to Customs receipts. An Act constituting a Reserve Bank of India was passed, regulating the issue of Bank notes and the keeping of reserves with a view to securing monetary stability in British India and generally to operate the currency and credit system of the country to its advantage.

In December, a Bill to make further provision for the Government of India, based to a great extent on the recommendations of the Joint Select Committee, was introduced in Parliament, and passed in August, 1935, entitled Government of India Act, 1935 (see p. 765).

The *Marquess of Linlithgow* succeeded in April, 1936. Orissa and Sind were constituted Governors' Provinces; a subvention for the year of Rs. 50 lakhs (£375,000) for the former and Rs. 108 (£820,000) lakhs for the latter being granted by the Central Government, to enable the Provinces to carry on during the provisional regime. The Central Government devoted attention to the position and difficulties of Indians overseas, the commercial relations with Japan, public health, and rural development during the year.

**IMPERIAL LEGISLATION.**—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act (1773)*, which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. *Pitt's India Act (1784)* left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. The Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915. The Government of India Act, 1919, conferred on provinces a larger measure of independence of the Government of India; it distinguished the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature; it provided for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provided for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gave borrowing powers to local governments. It laid down that the major provinces should be governed, in relation to reserved subjects, by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It conferred extended powers on local legislatures. For the Supreme or Central Government, it provided

that the Legislature should consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly. It provided for the appointment of an Auditor-General and a Public Services Commission.

The Government of India Act, 1935, provides for the establishment of an All-India Federation,\* Provincial Autonomy (see p. 769), and responsibility with safeguards. The establishment of the Federation is dependant upon the accession of Rulers of States representing not less than half the aggregate population of the States and entitled to not less than half the seats to be allotted to the States in the Federal Upper Chamber (Council of State). The Federal Legislature will consist of His Majesty, represented by the Governor-General, and two chambers—the Council of State and the House of Assembly. The former will consist of 156 representatives of British India, the great majority of whom will be elected on a franchise of some 100,000 persons, and not more than 104 representatives of Indian States, appointed by the Rulers of the States concerned. The House of Assembly will consist of 250 representatives of British India, chosen by the Provincial Legislatures, and not more than 125 representatives of the India States, the allocation of the seats to each State or group of States to be in proportion to their population.

The executive authority of the Federation will be exercised on behalf of His Majesty by the Governor-General, who will have certain special responsibilities. The Governor-General will have a Council of Ministers, responsible to the Legislature, to aid and advise him. The functions of a Governor will be exercised with the help and advice of a Council of Ministers, subject to the retention of special powers and responsibilities. The Governor-General and Governors will be responsible to the Secretary of State for the exercise of their special powers or when acting in their discretion.

It provides that Burma shall be separated from India and shall have a Constitution on similar lines to that of the Governors' Provinces, with the necessary changes, and that Aden shall cease to be part of India. The Chief Commissioners' Provinces will be administered by the Governor-General acting, to such extent as he thinks fit, through a Chief Commissioner to be appointed by him in his discretion.

The Act makes no change in the internal régime of the States or in the relationship between their Rulers and the Crown outside the Federal area.

**INDIAN LAW.**—The law administered in the Indian courts consists mainly of: (1) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

\* Consisting of the Governors' Provinces:—Madras, Bombay, Bengal, the United Provinces, the Punjab, Bihar, the Central Provinces and Berar, Assam, the North-West Frontier Province, Orissa, and Sind; the Chief Commissioners' Provinces:—British Baluchistan, Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicobar Islands, the area known as Panth Piploda, and such other Chief Commissioners' Provinces as may be created under the Act; and the Indian States which accede to the Federation.

## The Government of India.

EMPEROR OF INDIA—H.I.M. EDWARD VIII

*Secretary of State*—The Most Hon. the Marquess of Zetland, G.C.S.I., G.C.I.E.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (e.g., foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India.

The King-Emperor appoints the Governor-General, the Governors of the major Provinces (Bengal, Madras, Bombay, the United Provinces, Bihar, the Punjab, the Central Provinces, Assam, Burma (which will be separated from on April 1, 1937), the North-West Frontier Province, Orissa, and Sind), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term (except for judgeships) is usually 5 years.

Subject to the Secretary of State's direction the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 7 members including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the Indian Legislature consists of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (see p. 767 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council; of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament. The seat of the Supreme Government is at

Delhi, the summer headquarters being still at Simla.

Business is conducted by 9 Departments—Finance; Foreign and Political; Home; Legislative; Commerce; Industries and Labour; Education, Health and Lands; Defence; and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The Finance Department deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The Foreign and Political Department conducts relations with Foreign States, frontier tribes, relations with Indian States and Feudatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat look after the commercial and political interests of India in those quarters. The Home Department deals with the internal politics, civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the Legislative Department. The department of Commerce deals with trade and shipping, ports, &c. The department of Industries and Labour deals with industries, stores, labour, public works, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the Defence Department, of which the Commander-in-Chief has charge in Council. The Education, Health and Lands Department has the control of education, local government, sanitation, land revenue and surveys, agriculture, famine, meteorology, forests, foodstuffs, &c. Railway administration is entrusted to a Railway Department, which is in the charge of the Commerce Member.

British India is divided into 18 Local Governments and Administrations, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar, the Central Provinces, Assam, Burma, the North-West Frontier Province, Orissa, and Sind; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, British Baluchistan, Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicobar Islands and Aden.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of administration, and is the responsible head of his jurisdiction. There are 267 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bengal, Bombay, Bihar, the United Provinces of Agra and Oudh, the Punjab, Burma, and in the Central Provinces, and a Chief Court in Oudh.

Appeals may be carried to the English Privy Council. The North-West Frontier Province, Sind, British Baluchistan, and Coorg have each a *Judicial Commissioner's Court*. The High Court of Bihar is the High Court for the whole of Orissa.

# CONSTITUTION OF THE TWO CHAMBERS OF THE INDIAN LEGISLATURE.

## COUNCIL OF STATE.

*President*, Sir Maneckji Byramji Dadabhoi, K.C.S.I., K.C.I.E.

## LEGISLATIVE ASSEMBLY.

*President*, Sir Abdur Rahim, K.C.S.I.

*Deputy President*, Akhil Chandra Datta.

*Secretary*, Mian Mohamed Rafi.

The *Council of State* consists of 60 members, 34 elected and 26 nominated. Of the latter not more than 20 may be officials. The total electorate in the 1930 election was 40,513.

The *Legislative Assembly* consists of 145 members, 104 elected and 41 nominated, 26 of the latter being officials. The total electorate in the 1934 election was 1,415,892.

# THE SUPREME GOVERNMENT, DELHI.

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.\*

The new provincial Governments and Legislatures are to be in being on April 1, 1937, when for every Governor's Province (Madras, Bombay, Bengal, the United Provinces, the Punjab, Bihar, the Central Provinces and Berar, Assam, the North-West Frontier Province, Orissa, and Sind) there will be a Provincial Legislature (Legislative Assembly) and in the Provinces of Madras, Bombay, Bengal, the United Provinces, Bihar, and Assam, two Chambers (the Legislative Council and the Legislative Assembly.) The

\* The areas and populations of the separate provinces are for British territory only, according to the Census of 1931.

Governor of a Province will have a Council of Ministers to aid and advise him in the exercise of his functions, except in so far as he is by or under the Government of India Act, 1935, required to exercise them in his discretion. The composition of the Chambers will be as shown below.\* The Legislative Assemblies, unless sooner dissolved, will continue for five years. The Legislative Councils will be permanent bodies not subject dissolution, but as near as may be one-third of the members will retire in every third year in accordance with the provisions of the Act. The Governor will have powers of assenting to, or withholding assent from,

of returning for consideration, or of reserving Bills for the consideration of the Governor-General. The Governor-General will have powers of assenting to, or of withholding assent from, or of reserving for the signification of His Majesty's pleasure Bills reserved for his consideration.

Provincial Budgets will show separately—(1) the sums required to meet expenditure described by the Act as expenditure charged upon the revenues of the Province (salaries, etc., of the Governor, Ministers, Advocate-General, High Court Judges, debt charges for which the Province is liable, expenditure connected with excluded areas, sums required to satisfy judgments, &c., of any court or arbitral tribunal, &c.) and (2) the sums required to meet other expenditure proposed to be made from the revenues of the Province. Estimates falling under category (1) are not to be submitted to the vote of the Legislative Assembly, but such estimates, other than those relating to the salary and allowances of the Governor and the expenditure relating to his Offices, can be discussed. Other estimates of expenditure will be submitted, in the form of demands for grants, to the Legislative Assembly, which will have powers of assenting to, or of withholding assent to, or of assenting to a demand subject to a reduction. No demand for a grant will be made except on the recommendation of the Governor.

Persons over 21 years of age are eligible for the franchise. The electorates in each Province are arranged for the most part on a basis designed to give separate representation to the various races, communities, and special interests into which the diverse interests of the Indian population naturally range themselves, and the franchise rules have given the vote to about 8,000,000 of the adult population, including about 350,000 women. The qualifications for electors, as also for candidates, vary in detail from province to province, but generally speaking, both in rural and urban areas the franchise is based on a property qualification as measured by the payment of a prescribed minimum of land revenue, income tax or municipal taxes. In all Provinces retired, pensioned or discharged officers and men of the regular army are entitled to the vote irrespective of the amount of their income and property. The general elections will probably be held in most Provinces in February, 1937.

(1) **MADRAS** (area, 142,277 sq. miles; pop. 46,740,107, including the areas transferred to the new Province of Orissa in 1936), was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. The province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 88 per cent. of the people are Hindus. There are 1,774,226 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some

only temporarily. The languages principally spoken are Tamil, Telugu and Malayalam. Madras (182,018) and Trichinopoly (142,843), famous for their Hindu temples, are the chief cities after the Capital.

**CHIEF CITY, Madras.** Population, 647,230.

(2) **BOMBAY**.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. The province (excluding Aden, which will cease to be a part of India on April 1, 1937) contains 77,221 square miles, with a population of 17,992,053. About 76 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis (89,544), who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Kanarese and Western Hindi are the principal languages. Millet and other food-grains and oil seeds are cultivated. Cotton is largely

produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system; Ahmedabad (313,789), Poona (250,187), Sholapur (144,654), and Surat are the most important cities.

**CHIEF CITY, Bombay.** Population, 1,161,383.

(3) BENGAL (area of newly-constituted province, 77,521 sq. miles, with population of 50,114,002) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 55 per cent. of the population are Muhammadans and 43 per cent. Hindus. The principal languages are Bengali and Hindustani. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and

coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. Important cities are Dacca (138,518), now the second capital, and Howrah (224,873), a great jute-manufacturing centre adjoining Calcutta.

**CHIEF CITY, Calcutta.** Pop., including suburbs and Howrah, 1,485,582.

(4) THE UNITED PROVINCES OF AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 106,248 sq. miles; pop.

48,408,763), forms the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and nearly 15 per cent. Muhammadans. Western Hindi is the chief language. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. Among the important cities may be named the ancient city of Agra (229,764), containing the Taj Mahal and other great works of architecture, the sacred Hinducity of Benares (205,315), the great manufacturing centre, Cawnpore (243,775), Lucknow (274,659), Bareilly (144,031), and Allahabad (183,914).

CHIEF CITY (Agra), Allahabad. Pop. 183,914.

(5) THE PUNJAB (area, 99,200 sq. miles; pop. 23,580,852) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. 57% of the population are Muhammadans, and 27% are Hindus. The Sikhs number about 4,072,000 in the Punjab and Punjab States, to which they are mainly confined. Panjabi, Western Panjabi and Western Hindi are the chief languages. The various branches of the North-Western and Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 264,840 people.

CHIEF CITY, Lahore. Population, 429,747.

Governor, H. E. Sir Herbert W. Emerson, K.C.S.I., C.I.E., C.B.E. (Apr. 1933).....Rs. 8,333

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west. It has a total area of 233,492 sq. miles, about equal to Spain and Portugal, with a population of 14,667,146. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled; but, owing to remarkable prosperity, the population has increased 11 per cent. in 10 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Shangle are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jade-stone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkyina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin. Burma will be separated from India on April 1, 1937. The executive authority will be exercised by the Governor, representing His Majesty, assisted by a Council of Ministers. The Legislature will consist of two Chambers, to be known respectively as the Senate (Upper House) and the House of Representatives. The former will consist of 36 members, 18 of whom are to be elected by the members of the House of Representatives in

accordance with the system of proportional representation by means of the single transferable vote, and 18 will be chosen by the Governor. The House of Representatives will consist of 132 members elected to represent the general non-communal population (51 members), Karens (12), Indians (8), Anglo-Burmans (2), Europeans (3), Commerce and Industry (11), Rangoon University (1) Indian Labour (2), and non-Indian Labour (2).

(7) BIHAR (area of new province, 69,348 sq. miles, with pop. of 31,371,434). This province, 1936, comprises Bihar and Chota-Nagpur, hitherto forming part of Bengal. Bihar is liable to extreme temperatures. The population is exceedingly dense. Chota-Nagpur is ill-watered and liable to drought. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1926. Rice, wheat, oilseeds, sugar and tobacco are cultivated. 82% of the people are Hindus. There is a variety of languages. The language spoken by the majority of the population is Bihari. The railway systems are the East Indian, Bengal and North-Western, and Bengal-Nagpur.

CHIEF CITY, Patna. Population, 159,590.

(8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,149 sq. miles; pop. 12,065,885). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. A small part of the Province was transferred to the new Province of Orissa on April 1, 1936. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Western Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal-Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds and cotton. There are cotton mills at Nagpur.

Since October 1, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,789 sq. miles; pop. 3,441,838), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

CHIEF CITY, Nagpur. Population, 215,165.

*Governor*, H.E. Sir Hyde C. Gowan, K.C.S.I., C.I.E. (Sept., 1933) .....Rs. 6,000

(9) ASSAM (area, 55,014 sq. miles; pop. 8,622,251) was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1825. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. Seat of Government, Shillong (pop. 21,300).

*Governor*, H.E. Sir Michael Keane, K.C.S.I., C.I.E. (May, 1932) .....Rs. 5,500

(10) THE NORTH-WEST FRONTIER PROVINCE was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan (area, 13,518 sq. miles; pop. 2,425,976, partly estimated). It was constituted a Governor's Province on April 18, 1932. Attached to the Province are the five trans-border political agencies of Malakand, Khyber, Kurram, Tochi and Wano, together with tribal areas under the control of the Deputy Commissioners of the five settled districts first above mentioned. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans, and the chief languages are Pashtu and Western Punjabi. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

CHIEF CITY, Peshawar. Population, 121,866.

(12) SIND (area 46,378 sq. miles; pop. 3,887,070) was constituted a Governor's Province on April 1, 1936, by the transfer of the Sind Division from the Presidency of Bombay. It was annexed in 1843, and for a brief period was administered as a separate entity before it was absorbed in the Presidency of Bombay. From earliest days Sind has been a Moslem territory; 73 per cent. of the people are Moslems. The chief language is Sindhi. About 59 per cent of the population are engaged in agriculture and husbandry. The Lloyd Barrage and Canals project is designed to secure perennial irrigation to areas which hitherto have received indifferent supply from inundation canals. Karachi is the port for the extensive North-Western Railway system.

CHIEF CITY, Karachi. Population, 263,563.

Governor, Sir Lancelot Graham, K.C.S.I.,

is *ex officio* Chief Commissioner and the chief

executive and judicial authority.

Chief Com., Lt.-Col. C. T. C. Plowden, C.I.E.

Rs. 4,000

(15) BRITISH BALUCHISTAN (area, 54,228 sq. miles; pop. 463,508) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it

comprises (Sibi, Quetta, Pishin, Thal-Chotiali, Nushki, Zhob, Chagai, Nasirabad and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamak (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans, and Pashto is the chief language. The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs *via* Quetta and is continued to Mirjawa. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

*Chief Commissioner in Baluchistan, Lieut.-Col.*

A. E. B. Parsons, C.B.E., D.S.O. ....Rs. 4,000

*Secretary to the Chief Commissioner, Major*

I. W. Galbraith, M.C. ....Rs. 1,700

*Rev. and Judl. Commr., R. E. L. Wingate, C.I.E.*

Rs. 3,000

(16) DELHI.—This province (area, 573 sq. miles; pop. 636,246) was constituted on October 1, 1912, out of the Punjab division of Delhi, in pursuance of the policy announced by H.M. the King-Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi. (Pop. 447,442.)

*Chief Commissioner, E. M. Jenkins, C.S.I. (1936)*

Rs. 3,000

(17) THE ANDAMANS AND NICOBARS (area, 3,143 sq. miles; pop. 29,463) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 21 (area 635 sq. miles) islands.\* The principal products are coco-nuts.

*Chief Commissioner, W. A. Cosgrave, C.I.E.*

Rs. 3,200

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 16,046 in 1931.)

ADEN AND PERIM.—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great oil bunkering and coaling station and port of call, and an emporium for the trade

of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. It has an area of 75 square miles and a population (according to the census of 1931) of 51,478. It is a free port. The chief industries are salt and cigarette manufacture. The traffic in arms and ammunition is subject to special regulations. The total sea-borne trade in 1934-35 was £5,651,395. In 1934-35, 1,749 vessels called at Aden and 271 at Perim. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadhramaut), from the Straits of Bab-el-Mandeb to Muscat territory at Ras Darbat Ali.

Aden was separated from the Bombay Presidency and formed into a Province under a Chief Commissioner under the direct control of the Government of India from April 1, 1932. It will cease to be a part of British India on April 1, 1937, and will then be known as the Colony of Aden. The Governor will have an Executive Council. There will be a Court of unlimited civil and criminal jurisdiction to be called the Supreme Court, from which appeals will lie to the High Court at Bombay, in certain cases.

PERIM—A small unfortified island with an area of 5 square miles and a population of 1,700 serving as a bunkering station at the southern entrance to the Red Sea, was occupied in 1857 and is administratively attached to Aden.

*Aden: Chief Commissioner and Resident and Commander-in-Chief, Lt.-Col. Sir Bernard Reilly, K.C.M.G., C.I.E., O.B.E.*

*per mensem* Rs. 3,000

In 1834 the East India Company occupied Sokotra (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 12,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign power. The Kuria Muria Islands, to the south of Oman, which have been a British possession since 1854 and which were formerly attached to the Aden Residency, were transferred to the control of the British Resident in the Persian Gulf in 1931.

The island of Kamaran in the Red Sea about 200 mile north of Perim was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Chief Commissioner of Aden. It has an area of 22 square miles and a population of about 2,200. A quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Dutch East Indies.

*Civil Administrator, Capt. D. Thompson.*

## INDIAN APPOINTMENTS.

THE higher civil administration of British India is recruited from four sources—1. Open competitive examination in England and India. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments. 5. By selection in England and India.

*The Civil Service of India.*—The annual ex-

amination ordinarily commences in London July-August. Candidates must be over 21 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on forms that can be obtained from the Secretary, Civil Service Commission, London W. 1. Examination fee, £8. Selected candidates are on probation in England for one or two

years, and receive an allowance of £300 if of European domicile, or £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, fulfil the requirements of the authorities, and show satisfactory progress. A final examination is held in Indian law, language, &c. A first-class passage to India will be engaged for selected candidates. In case of failure to pass the final examination, or to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences at Rs. 7,200 a year. The Regulations for competitive examinations in India and for admission by selection can be obtained from the India Office, London.

*The Indian Army.*—Copies of a pamphlet giving full information regarding conditions of service may be obtained, on application, from the Military Department of the India Office. The following is a summary of the principal points. Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 18 and 25 years of age (in the case of Indian candidates the age limits are 18 and 20 years). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India; the remainder being offered to candidates in the order of their passing the entrance examination. A few direct appointments to the Unattached List for the Indian Army are made by the War Office from candidates nominated by the principal Universities in the United Kingdom. A few direct appointments are also offered to officers of the Territorial Army and Supplementary Reserve between the ages of 21 and 25 who undertake the final examination of the Royal Military College, Sandhurst, under arrangements made by the War Office. At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's initial pay is at the present moment roughly Rs. 480 (£36) per month. Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

*Indian Police Force (Higher Grade).*—A competitive examination is usually held in London and other centres in June of each year in conjunction with the Army and Air Force Examination. The standard of the competitive examination for admission to the Indian Police Service is such that competitors whose school education ended before they reached the age of 17 can have little prospect of qualifying for appointment. A fee of £4 is required from candidates examined in London, and a fee of £5 from those examined in other centres. A candidate must be a British subject of non-Asiatic domicile whose father (if alive) is a British subject or (if dead) was at the time of his death either a British subject or a person in the permanent service of the Crown or a person who had retired from that service; provided that in the case of a male British subject this rule may be waived by the Secretary of State in

Council if he is satisfied that their observance would occasion exceptional hardship and the candidate is so closely connected by ancestry or upbringing with His Majesty's dominions as to justify special treatment. Candidates must be above 19 and under 22 years of age on Aug. 1; must be unmarried, and if they marry before reaching India must forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London. Successful candidates are required to undergo a strict medical examination; are examined as to their ability to ride. Free passage to India is granted to probationers. Their initial pay is Rs. 350 per month, plus an overseas pay of Rs. 100 per month in the case of probationers with non-Indian domicile. The pay proceeds by annual increments to Rs. 700, plus overseas pay of £30 a month, and thence to Rs. 1,350 per month, with overseas pay of the same amount, subject to efficiency bars, with prospects of promotion to higher posts.

*Indian Forest Service.*—Recruitment for this Service is at present suspended, and it is not known whether, or under what conditions, it is likely to be resumed. In Bombay and Burma, the Forest Service is under the control of the Local Government, by whom appointments are made. Any recruitment of candidates from Europe is undertaken by the High Commissioner for India, India House, Aldwych, London, W.C.2, to whose offices enquiries should be addressed.

*Indian Medical Service.*—Admissions to the Indian Medical Service are made by nomination by the Secretary of State, who is assisted in making appointments by a Selection Committee. A similar Committee has been appointed in India to investigate applications, and to forward recommendations to the Secretary of State. Applications from candidates of pure European descent should be addressed to the Secretary, Military Department, India Office, Whitehall, London, S.W. 1. Other applications should be addressed to the Director-General, Indian Medical Service, Simla (or Delhi), India, from whom further information can be obtained.

The patronage of the *Secretary of State for India* is not extensive. Appointments of *Chaplains* of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplaincies Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,050 per month, plus overseas pay of £30 a month.

Further information regarding these and other Indian appointments can be obtained on application, from the Services and General Department, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations and other Statutory Rules, which can be consulted at the India Office.

# THE FINANCES OF INDIA (CENTRAL GOVERNMENT AND PROVINCIAL GOVERNMENTS) FOR THE YEAR ENDED MARCH 31, 1935.

(In lakhs of rupees.)\*

## SEPARATION OF CENTRAL AND PROVINCIAL FINANCES

The Government of India Act, 1919, was designed *inter alia* to secure a greater measure of independence for Provincial Governments, and to this end provision was made, in the Act and in Rules subsequently published under authority of the Act, for the delimitation of the functions of Government as between the Government of India and the chief Provincial Governments, and for the definite assignments to each of these Provincial Governments of specific revenues of their own. Effect has been given to these measures of devolution in the "Governor's Provinces" (Bengal, Madras, Bombay, the United Provinces, the Punjab, Bihar, the Central Provinces, Assam, Burma, the North-West Frontier Province, Orissa, and Sind), and in Coorg.† As regards these provinces the functions of Government have been classified as either "central subjects" or "provincial subjects." A general authority to control all matters coming under the latter head, subject to certain expressed provisos, is devolved upon the Local Governments concerned.

The sources of revenue available to Local Governments for the purpose of defraying their administrative charges consist, in the main, of the receipts from those provincial subjects which are revenue-producing, the principal heads being Land Revenue, Irrigation, Stamp Duties and Excise. In addition, a local Government is given a small share in any expansion of Income Tax (otherwise a "central" source of revenue) that may be due to an increase of the total assessed incomes within the Province over that of 1920-21.

When the division of the sources of revenue was made between the Central and Provincial Governments, it was realized that the Central Government would be left insufficiently provided. It was therefore arranged that an annual contribution should be made by eight of the local Governments to the Central Government. The annual contributions fixed at the outset aggregated 983 lakhs of rupees. They were not, except in case of emergency and with the sanction of the Secretary of State, to be subject to increase, and should reduction of the aggregate be found possible, reductions were to be made in fixed proportions from the quotas of the several Provinces. The general policy pursued has involved a progressive reduction of the provincial contributions with a view to their ultimate cessation. The Budget for 1928-29 provided for the remission of those portions of the contributions which had not been permanently remitted at the close of the previous year.

The revised financial arrangements outlined above came into force from April 1, 1921, as from that date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government. In the case of Coorg the separation was made on April 1, 1924.

\* A lakh = Rs. 100,000. (See p. 779 for the Indian system of notation.)

† See p. 764 as to the financial arrangements sanctioned on the constitution of the North-West Frontier Province, Orissa, and Sind as "Governor's Provinces."

INDIAN SYSTEM OF NOTATION.—The Indian numerical notation system differs from the European. Large numbers are punctuated as crores and lakhs and not in hundreds, thousands and millions. A *lakh* is one hundred thousand (written Rs. 1,00,000), and a *crore* is one hundred lakhs or ten millions (1,00,00,000). Thus, 1,68,00,000 is read as 1 crore 68 lakhs. A lakh of rupees (Rs. 1,00,000), may be read as equal to £7,500 at 13¼ rupees—the statutory rate adopted for conversion in this article. The rupee is divided into 16 annas and at 13¼ rupees to £1. The anna is equivalent to 1½d. The anna is subdivided into 12 pies (½d. approximate value).

NET REVENUE AND EXPENDITURE OF THE CENTRAL GOVERNMENT.

The figures of Gross Revenue given above include the net receipts of railways and other com-

mercial undertakings without any deduction on account of interest charges, the total receipts from the sale of opium, and the receipts of certain spending departments; while the figures of Gross Expenditure include the interest charges of commercial undertakings, and the cost of cultivation and manufacture of opium. This method of compilation may cause the revenue available for administrative purposes and the expenditure on such purposes to appear greater than they really are. A statement of the net revenue and expenditure of the Central Government for 1934-35 is therefore given in the table below, which shows the net revenue derived from commercial undertakings, after deducting all expenditure including interest charges, and net figures under other heads of revenue and expenditure obtained by deducting (1) the cost of cultivation and manufacture of opium from sale receipts, and (2) the receipts of the spending departments from the gross expenditure incurred by them. The cost of the establishments maintained for the collection of revenue is not shown as a deduction from revenue, but as a separate head of expenditure.

Equals (at Rs. 13½ to £1) (ooo omitted) }	£2.797	£3.197	£4.026

**BURDEN OF TAXATION.**—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden is estimated at Rs. 3.73 per head, or, if land revenue (which is akin to rent) be added, Rs. 4.81 per head.

**DEBT AND ASSETS.**—On March 31, 1936, the public debt of the Central Government amounted to Rs. 460 crores (£345 million) in India and £377 million in England. The figures include the portion of Indian Debt incurred on behalf of Government Commercial undertakings and of the Provincial Governments. The interest-yielding obligations and certain interest-bearing assets of the Government of India amounted to Rs. 707 crores (£531 million) in India and £378 million in England. The excess of interest-bearing obligations over interest-yielding assets amounts to Rs. 198 crores (£149 million). Apart from Rs. 22.99 crores in cash, bullion and securities held on Treasury Account, the Central Government held on March 31, 1936, £7½ million in the Silver Redemption Reserve.

**LAND REVENUE.**—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land,

\* And † relate to the Province as it was before April, 1936, that is including the areas transferred to the Province of Orissa on that date.

revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *raiyatwari* tenure prevails, and each raiyat, or peasant proprietor, holds direct from the State. In temporarily settled *zamindari* districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled *raiyatwari* districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial Governments) in 1934-35 amounted to Rs. 3,230 lakhs (£24,221,800).

**THE OPIUM REVENUE.**—Poppy may now be grown only in parts of the United Provinces and in the Central Indian (Malwa) States. Opium is produced under Government supervision in the United Provinces and under special arrangements in the Central India, Rajputana and Gwalior States, and is bought in its crude condition from the cultivators in the United Provinces and from the Durbars of the States concerned by Government at fixed rates. Opium is either sold direct to Foreign and Colonial Governments with whom agreements have been made for supply at fixed rates, or issued to the Excise Department for local consumption. In addition a substantial quantity is supplied to the Medical Department for medical purposes, and by export to the United Kingdom for sale to chemists. The gross revenue from opium, including the value of opium sold to the Excise Department for consumption in India, was £539,566 in 1934-35. The expenses of production, &c., were £261,641. The Government of India decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited. In 1926 the Government of India announced its intention to restrict the export of opium except for medicinal purposes. Exports of provision opium to foreign countries ceased at the end of 1935.

**EXCISE.**—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue amounted to Rs. 1,505 lakhs (£11,285,600) gross in 1934-35 (Central and Provincial Governments).

**CUSTOMS.**—The net receipts amounted to Rs. 5,267 lakhs (£39,506,000) in 1934-35. (For tariff see p. 784.) The export duty on rice yielded 63 lakhs (£473,000). The export duty on jute produced 358 lakhs (£2,687,000). The duty on motor spirit and kerosene amounted to 769 lakhs (£5,769,000). The protective special duties on iron, steel, cotton piece goods, &c., yielded 1,366 lakhs (£10,246,000).

INCOME TAX is levied on non-agricultural incomes at the following rates:—

Annual Income.	Rate of Tax per Rupee.*
Rs. 2,000 and over .....	6½ pies
" 5,000 " .....	9% "
" 10,000 " .....	13 " "
" 15,000 " .....	17½ " "
" 20,000 " .....	20% " "
" 30,000 " .....	24½ " "
" 40,000 " .....	27½ " "
" 100,000 or upwards .....	28% "

In the case of companies and registered firms, whatever the total income, the rate is 28½ pies in the rupee.

Super-tax is leviable in addition to ordinary income tax on incomes of Hindu undivided families at rates ranging from 1 anna 4½ pies to 6 annas 9½ pies in the rupee on incomes over Rs. 75,000, and on the taxable incomes of companies above Rs. 50,000 at a flat rate of 1 anna 1 pie in the rupee. In the case of individuals, unregistered firms, and other association of individuals not being a registered firm or a company, the rate ranges from 9½ pies to 6 annas 9½ pies on incomes in excess of Rs. 30,000. Rs. 1,758 lakhs (£13,185,000) were received from taxes on income in 1934-35.

**STAMPS.**—Stamps yielded 1,202 lakhs gross (£9,019,000) in 1934-35. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

**SALT.**—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (82½ lb.) in 1903, to Rs. 1½ in 1905, and to R. 1 in 1907. It was increased to Rs. 1½ on March 1, 1916, to Rs. 2½ from March 1, 1923, reduced to Rs. 1½ from March 1, 1924, raised to R. 1 As. 9 in 1931, and reduced to Rs. 1 As. 4 in 1935. Rs. 804 lakhs (£6,028,000) were received from salt in 1934-35.

**FORESTS.**—About 107,000 square miles of forests are reserved and scientifically worked by the State, while about 142,000 square miles besides are under State control. The revenue from forests amounted to Rs. 398 lakhs (£2,979,000) in 1934-35. A third of the revenue comes from Burma.

**POSTS AND TELEGRAPHS.**—The Post Office in 1934-35 handled 1,143 million of letters, postcards, newspapers, &c., and issued 38.8 million of money orders. Inland letter rates are the lowest in the world. The length of telegraph wire, including cable, in India on March 31, 1935, was 604,766 miles, and the number of paid messages sent in 1934-35 was 17.2 million. The capital outlay amounted to Rs. 1,713 lakhs (£12,851,000) at the end of 1934-35. The Indian Postal and Telegraph services were amalgamated on April 1, 1914. The combined services showed for the year a profit of Rs. 38 lakhs (£284,600).

**RAILWAYS.**—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for traffic on March 31, 1935, was 43,021. Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and about 42 per cent on the metre gauge. On March 31, 1935, the total capital at charge was Rs. 885 crores (£664,105,000). The net earnings

\* 12 pies = 1 anna; 16 annas = 1 rupee; 138 rupees = £1 (statutory rate). A lakh is 100,000 rupees.

of the railways in 1934-35 amounted to 3,221 lakhs (£24,155,000), showing a percentage of 3·6 on total capital at charge. The number of passengers "originating" was 496 million, and the goods traffic amounted to 84·6 million tons. Rates are very low, third-class passengers travelling on the average about four miles for a penny. The net gain to the Central Government from "Budget Lines" administered from funds under its direct control was 1·3 crores in 1934-35. The payment of the contribution has been held in abeyance until the return of prosperous years. The total capital expenditure on State and other railways in 1934-35 was 1·3 crores (£976,000).

**IRRIGATION.**—The total capital outlay on State irrigation works up to March 31, 1934, was Rs. 14,876 lakhs (£111,570,000), which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,109,000. The area irrigated by Government irrigation works, excluding the Indian States, in 1933-34 amounted to 31·6 million acres, while the annual value of the crops raised amounted to 62 per cent. of the total capital expended on the works. Two-fifths of the irrigation revenue comes from the Punjab.

**HOME CHARGES.**—The net expenditure in England, chargeable to Revenue, amounted in 1934-35 to £23,247,131. The main items were:—Interest on Railway Debt and Annuities, £9,356,317; Interest on Ordinary Debt and other obligations, £4,589,715; management of debt, £105,476; Stores, £801,607, of which £757,346 was for Marine and Military Stores; payments for British forces, troop service, &c., £1,123,970; Army non-effective charges, £3,658,400; Civil annuities, pensions, &c., £1,323,404; Furlough payments, civil and military, £1,768,531; home administration (£422,208 less £104,528 contributed by H.M. Treasury); Aden contribution, £134,317; League of Nations contribution, £107,803.

**CURRENCY.**—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy or 1 tola. Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1926, was practically stable at 1s. 4d. The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 10 rupees in 1920, and to 13½ rupees in 1927. The Gold Standard Reserve was built up out of the profit from the coinage of rupees. The principal objects for which it was maintained were (1) to provide funds from which the Secretary of State could finance his requirements when remittance of funds from India through the usual market channels could not conveniently be arranged, and (2) to furnish resources against which sterling drafts might, if necessity arose, be sold by the Government of India to remitters in India. On April 1, 1935, the Reserve Bank of India took over the management of the currency and the duties of selling

Treasury Bills on behalf of Government and of supplying the Secretary of State for India with his sterling requirements. On the same date certain assets were handed over to it by Government, including £32,500,000 from the Gold Standard Reserve. The balance of £7,500,000 of the Gold Standard Reserve in the form of sterling securities and cash was retained by Government in the newly created Silver Redemption Reserve, which is held to meet the liability imposed by Section 36 of the Reserve Bank Act, under which Government are obliged to pay full value for surplus rupees which may be transferred by the Bank up to a maximum of Rs. 5 crores a year. The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 31, 1935, amounted to £61,659,894. Of this sum £1,123,655 was used for capital expenditure on railways; £2,886,217 was transferred to the Paper Currency Reserve in reduction of created rupee securities, £16,025,828 was transferred to Revenue, and the remainder credited to the Gold Standard Reserve. India has a paper currency. Government received Rs. 43 lakhs (£322,500) as its share of the profits of the Reserve Bank of India in 1934-35. The 1, 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. In 1918 a branch of the Royal Mint was established at Bombay for the minting of gold coins.

**ARMY.**—The Army in India to-day consists of the regular British troops, about 60,000, the regular Indian troops, 150,000, the Auxiliary Force, 33,000, the Indian Territorial Force, 19,000, the Indian Army Reserve, 42,500, and the Indian State Forces, 44,000, when these are placed at the disposal of the Indian Government. During the period (1902-9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912-13 to 4,434 lakhs (£33,257,500) in 1934-35. The estimated net expenditure for 1936-37 is 4,545 lakhs (£34,118,000). In 1927 the bar hitherto precluding the admission of Indians to King's Commissions was removed. India has an Auxiliary Force on a volunteer basis. A contribution of £1,500,000 a year is paid by the Imperial Government towards the cost of India's defence.

**THE ROYAL INDIAN NAVY,** reorganised on a combatant basis in 1928, flies the white ensign. An admiral of the Royal Navy was appointed as the first Flag Officer commanding. The fleet consists of one depot ship, five sloops, one patrol boat, one surveying ship and one trawler.

*Flag Officer Commanding and Director, Rear-Admiral Sir A. E. F. Bedford, C.B. ...Rs. 2,800*

**EDUCATION.**—Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. There are 16 Universities in

British India and <sup>a</sup> in Indian States, viz., Agra, Andhra, Annamalia, Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Dacca, Aligarh (Muhammadan), Lahore, Hyderabad, Mysore, Lucknow, Rangoon, Nagpur and Delhi. In State institutions education is secular. The institutions in 1933-34 numbered 256,725, and the scholars 13,172,800, including 1,661,539 females. Of the institutions, about 50 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1933-34, (£19,632,000), £4,859,000 came from fees, and £11,747,000 from Government revenues or local and municipal funds. The census of 1931 showed that only 156 males and 29 females per thousand are literate, in the sense of being able to read and write any language.

LOCAL SELF GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1932-33 numbered 780, with a total population of 22·8 million, and receiving an income of £9,423,500 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £19,900,000 from other sources. Out of 13,155 members of municipal bodies 747 were officials and 12,408 non-official. In almost all districts in British India there are local district boards, partly representative. Of their total expenditure of about £11,334,000 in 1932-33 24 per cent. was devoted to civil work, nearly 40 per cent. to education, and the remainder largely to sanitation and hospitals.

TRADE OF INDIA.—India's visible balance of trade in 1935-36 was Rs. 6692 lakhs (£50,190,000). The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure, but in 1935-36 exports of treasure exceeded imports by £28,665,000. The table (*below*) exhibits the leading figures for the last five years in thousands of pounds

sterling (Rupees being converted at the rate of 13½ to the £).

During the year 1935-36 as compared with 1934-35 the value of the imports (excluding Government stores and treasure) increased by Rs. 220 lakhs (£1,575,000), or 2 per cent., while the total exports (including re-exports but excluding treasure and Government stores) increased by Rs. 904 lakhs (£6,779,000), or 6 per cent.

The bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1935-36 (converted at Rs. 13½ = £1):—

IMPORTS (000 omitted).

Cotton Goods ...	£13,078	Rubber Manuf's ...	£1,551

JUSTICE, POLICE, AND PRISONS.—There are 7,603 officers and 19,452 honorary judges and magistrates exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1932, 2,714,135 civil suits were instituted; 2,820,924 persons were tried, and 1,454,096 convicted, in criminal cases, of whom 1,207 were sentenced to death and 767 executed, 2,660 to transportation, and 271,149 to imprisonment. The strength of the police in 1932 was 14,461 officers and 186,952 men. There were 1,203 prisons, with a daily average of 177,221 prisoners. At the convict settlement of Port Blair (Andamans) there were 6,791 prisoners on March 31, 1933.

VITAL STATISTICS.—The reporting of vital occurrences is still defective. The recorded death rate for British India in the decennium ended 1913 ranged between 38.21 per 1,000 in 1908 and 28.72 in 1913; it was 35.9 per 1,000 in 1919 and 21.85 in 1932. There were over 12 million deaths from influenza during 1918-19. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoea, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1932 were about 12,399,000 in India as a whole. The ratio of births per 1,000 of the population was 340.8 in 1932. In 5,081 hospitals and dispensaries, maintained mostly from public funds, 63,227,000 patients were treated in 1932. The number of persons vaccinated in 1932-33 was 20,708,000. According to the census of 1931 there were 127,911 lepers.

CUSTOMS DUTIES.—The general import tariff is now 25 per cent. *ad valorem*. The principal exceptions are:—Cotton twist, yarn and thread 6½ per cent. or As. 1¼ per lb. whichever is higher; cotton piece goods 25 per cent. if of British manufacture, 50 per cent. if not; plain grey, i.e., not bleached or dyed in the piece, 25 per cent. or As. 4¾ per lb., whichever is higher, if of British manufacture, 50 per cent. or As. 5½ per lb., if not; raw cotton Ps. 6 per lb.; raw hemp, artificial silk yarn and thread 18½ per cent.; silk or artificial silk mixtures 35 per cent. or As. 2 Ps. 3 per sq. yard, whichever is higher; motor cars and motor cycles 37½ per cent.; sugar Rs. 9 As. 1 per cwt.; arms and certain "luxury" articles, including gold and silver manufactures, silk or artificial silk piece goods, gold and silver plate, &c., 50 per cent., diamonds, 10 per cent. *ad valorem*; cigars, 12½ per cent.; cigarettes, 25 per cent. *ad valorem* plus either Rs. 8 As. 2 per 1,000, or Rs. 3 As. 4 per lb., whichever is higher; spirits generally Rs. 37 As. 8 per gallon; salt R. 1 As. 4 per maund (82½ lb.); motor spirit As. 10 per

gallon, and kerosene As. 3 Ps. 9 per gallon; mineral oil 12½ per cent. (an excise duty of As. 10 is leviable on motor spirit and As. 2 Ps. 9½ per gallon on kerosene produced in India); coal As. 10 per ton; cord tar dyes 10 per cent.; spices 37½ per cent.; manufactured tobacco Rs. 3 As. 12 per lb.; unmanufactured tobacco Rs. 3 As. 4 per lb. (the standard rate), and Rs. 2 As. 12 per lb. (the preferential rate for British Colonies); matches R. 1 As. 14 per gross of boxes of 100; match splints As. 5 Ps. 7½ per lb.; veneer (for match boxes) As. 7 Ps. 6 per lb.; ale, beer As. 18 per gallon; porter, &c., As. 15 per gallon; perfumed spirits Rs. 60 per gallon; certain machinery 10 per cent.; certain metals, iron and steel and railway plant and rolling stock 15½ per cent.; gold coin, metallic ores, certain agricultural instruments, quinine, &c., are free. A few other articles pay 2½ per cent. There are protective duties at special rates on coal tubs, iron and steel and certain manufactures thereof. There are export duties of As. 2 Ps. 3 a maund on rice; Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, for which the rate is Rs. 1½ per bale; Rs. 20 per ton on jute sacking and Rs. 32 per ton on hessians.

SHIPPING.—In 1935-36 the number of vessels engaged in the foreign trade which entered and cleared with cargoes at ports in British India was 6,281 with a tonnage of 16,549,000. Of this tonnage, over 66 per cent. was under the British flag.

The following table shows the distribution of the Indian private sea-borne trade in 1935-36:—

COUNTRIES.	PRIVATE MERCHANDISE ONLY.	
	Imports.	Exports.
Total Value (000 omitted)	£200,793	£120,366
	Per cent.	Per cent.
British Empire:—		
United Kingdom	38.9	31.0
Ceylon	1.0	4.4
Hong Kong	0.3	0.3
Mauritius	0.0	0.6
Straits Settlements	2.7	2.3
S. Africa	0.2	1.0
Kenya	2.4	0.3
Canada	0.7	1.1
Australia and New Zealand	0.9	2.0
Aden	0.3	0.4
Other Possessions	1.3	2.2
Total, British Empire	48.7	45.6
Foreign Countries:—		
Belgium	1.8	3.3

Total, Foreign Countries	51.3	54.4

(NOTE.—Rupee figures converted at rate of Rs. 134 = £1.)

\* Including "For orders" cargoes (2½ per cent.).

**PORTS.**—The chief ports are Bombay, Calcutta, Rangoon, Karachi, and Madras.

**AGRICULTURE** is by far the most important occupation of the people of India. In British territory in 1934-35, 259,000,000 acres were sown, or 227,000,000 acres excluding area sown more than once. Of the total area sown approximately 15 per cent. was under wheat, 31 per cent. under rice, and 31 per cent. under other food-grains and pulses, 6 per cent. under oilseeds, and 6 per cent. under cotton, jute, and other fibres. Sugar, tea, and tobacco are other important crops. The total area under irrigation (government and private) was about 54 million acres, including area irrigated at both harvests.

**Live-stock.**—According to the fourth Census of live-stock held in India in 1935, there were 113 million heads of bovine cattle (i.e., 83,869,425 oxen and 29,414,548 buffaloes) in British India, excluding Bengal and Bihar and Orissa, these two Provinces not being able to participate in the Census, and Baluchistan, where the cattle Census is taken decennially. There were 22,113,795 sheep, 26,089,060 goats, 1,408,622 horses and ponies, 64,713 mules, 1,442,823 donkeys, and 526,231 camels. The figures relating to about 66 per cent. of the total area of the Indian States were:—42,023,748 oxen, 12,351,823 buffaloes, 18,081,763 sheep, 15,670,833 goats, 733,680 horses and ponies, 13,482 mules, 548,625 donkeys and 495,213 camels. In 1930 there were 46,594,857 bovine cattle in Bengal and Bihar and Orissa, 1,846,897 sheep, 10,980,574 goats, 307,678 horses and ponies, 1,903 mules, 32,756 donkeys and 624 camels. The figures for Baluchistan (1930-31 Census) were:—320,761 bovine cattle, 1,347,591 sheep, 936,014 goats, 17,630 horses and ponies, 5,303 mules, 68,047 donkeys and 105,826 camels.

**BANKS.**—In addition to the Imperial Bank of India, which is closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. In 1932 there were 34 Indian joint-stock banks, whose head offices are located in India, in addition to 18 exchange banks with head offices outside India, and 32 Indian co-operative banks, with capital and reserve of Rs. 5 lakhs and over. The capital of the Imperial Bank of India was Rs. 562 lakhs; reserve, Rs. 543 lakhs; deposits, Rs. 7,543 lakhs; and cash balance, Rs. 2,097 lakhs. The corresponding figures for the Indian joint-stock banks were: capital, Rs. 782 lakhs; reserve, Rs. 439 lakhs; deposits, Rs. 6,836 lakhs; cash balance, Rs. 770 lakhs. The 18 exchange banks with head offices not located in India had:—capital, £98 million; reserve, £76 million; deposits, £1,115 million outside India, and Rs. 7,306 lakhs in India; cash balances £209 million outside, and Rs. 960 lakhs in India. The 32 Indian co-operative banks had a capital of Rs. 177 lakhs; a reserve of Rs. 153 lakhs; deposits, Rs. 1,756 lakhs; loans outstanding, Rs. 1,090 lakhs; and cash balances amounting to Rs. 235 lakhs. The proportion per cent. of cash to liabilities on deposit was:—28 in the case of the Imperial Bank; 12 for exchange banks doing a considerable portion of their business in India; 15 for other exchange banks; and 13 in the case of Indian joint-stock banks. As regards the Reserve Bank of India see p. 782.

**CO-OPERATIVE CREDIT SOCIETIES.**—In 1934-35 there were in British India and Indian States 1,415 central, 93,160 agricultural and 11,436 non-agricultural societies, with a total membership of 4,409,637 and a capital of £72,664,000. The Provincial and Central Banks showed a profit of £319,700, and agricultural and non-agricultural societies £1,382,000.

**MINERALS.**—The output of coal in India in 1934 was 22,057,000 tons. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 322 million in 1934. The production of salt is about 1,964,000 tons. The production of manganese ore was about 406,300 tons, and of saltpetre 8,314 tons (export figures). The yield of gold (nearly all from Mysore) was about 322,000 oz. Monazite and tungsten ore have taken an important place in the list of minerals of economic value produced in India. The output of the former was 1,009 tons (1934), and of the latter 3,328 tons (1934).

**MANUFACTURES.**—In India the ancient village handicrafts still survive. Cotton-weaving is by far the most important hand industry. There were 9,761 factories in 1934 subject to the Indian Factories Act, employing 1,487,231 persons, including 220,860 women and 18,362 children (12 to 15 years of age); the percentage of factories maintaining a week of 48 hours or less for men is 35 (perennial), the corresponding percentage for women was 36. The percentage of factories which fixed their maximum hours for children at not more than 30 per week was 35 (perennial) and 52 (seasonal). There were 331 cotton mills at work in British India and Indian States in 1932-33, mostly in Bombay and Ahmedabad. In 1934-35, the production was 1,001 million lb. of yarn (mostly of low counts) and 737 million lb. of woven goods. The 99 jute mills, mostly situated in or near Calcutta, contained 1,202,183 spindles and 60,506 looms in 1932-33. There were, in 1932, 18 woollen and 10 paper mills, 9 breweries, and various other factories.

**JOINT STOCK COMPANIES.**—In 1932-33 there were 8,719 joint stock companies registered in British India and in the Indian States, with a paid-up capital of Rs. 28,643 lakhs (£274,824,000). The companies were classified as follows:—Banking and loan, 2,054; insurance, 975; navigation, 24; railways and tramways, 45; other transit and transport, 267; trading and manufacturing, 3,106; tea, 471; other planting, 115; coal mining, 273; gold mining, 2; other mining and quarrying 110; cotton mills, 328; jute mills, 69; mills for wool, silk, &c., 20; cotton ginning, pressing, &c., 106; jute presses, &c., 30; flour mills, 25; estate, land and building, 153; sugar (including jaggery), 110; others, 496. In addition, there were 901 joint stock companies registered elsewhere than in India, but working in British India and in the Indian States, with a paid-up capital of Rs. 9,306 lakhs (£69,794,000). The companies were classified as follows:—Banking and loan, 29; insurance, 144; navigation, 19; railways and tramways, 18; other transit and transport, 11; trading and manufacturing, 356; tea, 286; other planting, 41; coal mining, 4; gold mining, 6; other mining and quarrying, 35; cotton mills, 7; jute mills, 6; cotton ginning, pressing, &c., 2; estate, &c., 5; sugar (including jaggery), 1; others, 30.

TABLE OF THE PRINCIPAL INDIAN RULING PRINCES AND CHIEFS SHOWING THE SALUTES TO WHICH THEY ARE ENTITLED, AND THE AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES.

STATE, SALUTE, AND TITLE OF CHIEF.	Date of suc- cession.	Area in sq. miles.	Population in 1931.	Prevailing Religion.	Revenue for last year recorded or approximate.

## STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE Indian States, in number about 560, occupy in area approximately two-fifths of the entire Indian peninsula and contain over one-fifth of the whole population of the country. They display a very wide diversity in size, population and resources. They are not British territory, and their inhabitants are not British subjects, but British protected persons. The States are governed by hereditary Rulers, under the suzerainty of the Crown. They have no relations with foreign powers. Over the internal affairs of the States the Rulers exercise vary-

ing degrees of control, but their authority is in all cases limited by their relationship to the Paramount Power, which is determined by treaties, supplemented by usage and sufferance. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial Legislative Councils cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore),

Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 712,508 square miles, and a population of 81,310,845. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Indian State forces. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The rulers of Indian States have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 786, 787 are the names of 88 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as H.H. the Aga Khan, G.C.S.I., G.C.I.E., G.C.V.O., and the Maharajah of Burdwan, G.C.I.E., K.C.S.I., are not ruling chiefs.

The *Chamber of Princes* was inaugurated in February, 1921, as a permanent consultative body. It meets periodically for the discussion of matters affecting the Indian States generally or of common concern to the States and to British India or the Empire at large. It consists at present of 109 Rulers of States who are members in their own right, together with 12 Rulers elected as representatives by 127 other States. The Chancellor, Pro-Chancellor and Standing Committee are elected annually by the Chamber from among its members.

In pursuance of the general policy advocated in paragraph 310 of the Montagu-Chelmsford Report on Indian Constitutional Reforms the great majority of the States, many of which were until recently in political relations with local governments and administrations, are now in direct relations with the Government of India.

The Indian States may be thus classified:—  
1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 466,894—the fifth city in India). This State is in the centre of the

Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore* This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. 4. The Himalayan Hill States, west of Nepal, including *Jammu and Kashmir*. The important frontier State of *Jammu and Kashmir* (capital, Srinagar, pop. 173,573) was granted to Gholab Singh by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. 5. *Gwalior*, the largest State in Central India. 6. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 7. The Sikh States, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala*. 8. *Rajputana*, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 11,225,712) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 23 States of varying size and importance. Of these 19 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and two by Muhammadans. The Governor-General's Agent's headquarters are at Mount Abu. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), *Jaipur* and *Bikaner*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 9. The States of *Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 28 are petty chiefships. The most important are *Indore*, *Bhopal* and *Rewa*, which include between them one-half of the whole area. 10. The Malayalam States of *Travancore* and *Cochin*, lying together in S.W. India. These important States represent ancient Hindu dynasties. 11. The three northern Muhammadan States of *Khairpur* (Sind), *Bahawalpur*, and *Rampur*. 12. *Kalat* (including Makran and Kharan) and *Las Bela*, with tribal areas in the possession of the Marri and Bugti tribes. 13. *Kutch* and the

numerous petty chiefships of Kathiawar. 14. The Southern Mahratta States. 15. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 16. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 17. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

## Countries Contiguous to India.

### NEPAL.

*Sovereign*, His Majesty Maharaja Dhiraja Tribhubana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jang; *suc.* 1911.

*Prime Minister*, Lieut.-Colonel H.H. Ojaswi Rajanya, Projwal Nepal Tara, Ati Pravala Gorkha Dakshina Bahu Prithuladheesha Sri Sri Sri, Maharaja Sir Joodha Shumshere Jung Bahadur Rana, Grand Croix de la Legion d'Honneur, Grand Cross of Order of Leopold, G. C. SS Maurizio e Lazzaro, G.C.S.I., G.C.I.E., *Ye Ten Pao Ting Shun Chian, Luh Chuan Shang Chang, Prime Minister and Supreme Commander-in-Chief of Nepal.*  
(Personal salute in British India, 19 guns.)

*Representative in London—Envoy Extraordinary and Minister Plenipotentiary*, Lieutenant-General Krishna Shumshere Jung Bahadur Rana. 12A, Kensington Gardens, W.8.  
*Military Attaché*, Lt.-Col. Sovag Jung Thapa, C.B.E., Comm. SS. M.E.L.

*First Secretary*, Sardar Manick Lal.

*Second Secretary*, Krishna Mohan, O.B.E.

Nepal (area, about 54,000 sq. miles; pop. 5,600,000) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. Its exports to British India are estimated to amount to about £4,000,000, and its imports to £2,000,000 a year. The chief trade route is that between Katmandu and the Bihar and Orissa frontier (77 miles). Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religions are Buddhism and Hinduism. The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in about 1769 and has since given its name to all. The ruling family are Hindu Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the Nepal rulers. The real political power rests with the Prime Minister. This office is always held by a member of his family, the

succession being determined by special rules. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments. During the Great War, and in the subsequent Afghan war, the Nepal Government rendered unstinted and unconditional assistance to the British Government in men, money and material. A new Treaty was concluded in December, 1923, between the British and Nepalese Governments, by which *inter alia* the internal and external independence of the State was recognised.

*CAPITAL, Katmandu* (pop. 80,000) — *British Envoy Extraordinary and Minister Plenipotentiary*, Lt.-Col. F. M. Bailey, C.I.E.

Rs. 3,000

### BHUTAN

Bhutan (area, about 20,000 sq. miles; pop. about 250,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, the late Sir Ugyen Wangchuk, K.C.S.I., G.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India is estimated at over £65,000 a year. There is no British Resident.

*CAPITAL, Punakha.*

### THE PERSIAN GULF.

For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Iranian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few.

The ruler of *Bahrain* (capital, Manama) has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrain. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Oman* (Muscat) is in treaty relations with the Government of India, who have a Political Agent and Consul at his Court.

The independent tribes of the Trucial Oman coast (*Pirate Coast*) from Ras-al-Khaima to Odaid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes

agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *via* Bahrain.

Important caravan routes converge at *Kuwait*, which has an excellent harbour. The Shaikh is under treaty obligations with the Indian Government.

*Political Resident, Persian Gulf*, Lt.-Col. T. C. W. Fowle, C.B.E.

*Secretary*, Major C. C. L. Ryan.

*Political Agent and Consul, Muscat*, Major R. P. Watts.

*Political Agent, Kuwait*, Capt. G. S. H. de Gaury, M.C.

*Political Agent, Bahrain*, Lieut.-Col. G. Loch, C.I.E.

IRAN (Persia) (*q.v.*) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is continuous with Iran and Afghanistan. The Trans-Caspian Railway runs, *via* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

*Chinese Turkestan* is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. There is a British consul-general at Kashgar. Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) *via* Ladakh, in Kashmir.

*Tibet*, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged

themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initiated by the three representatives, but the Chinese Government have so far refused to ratify it.

*Yunnan* is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Têng-yueh and Ssumao, near the Burma frontier, are treaty "ports." There are British consuls at Têng-yueh and Yunnan-fu.

SIAM (*q.v.*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiengmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

Indian Population (1921) 110,455; (1931) 122,911.

Eskimo population (1921) 3,269 (exclusive of

Eskimos of Baffin land); (1931) 5,979.

\* Including 186,654 Greek Catholics. In earlier censuses only small numbers were involved, and Greek Catholics and Greek Orthodox were included under the general term "Greek Church." A rapid increase in membership of both Greek Catholics and Greek Orthodox has been shown for recent censuses, and, since the former owe obedience to the Pope in matters of faith, they have been included with the Roman Catholics for 1931.

† Practically all Methodists and Congregationalists, and a large number of Presbyterians, united to form the United Church of Canada in 1925.

‡ Including Tunkers.

§ Including Hutterites.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first permanent settlement at Port Royal (now Annapolis), Nova Scotia, was founded in 1605, and Quebec was founded in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Erie, at 41° 41' (approximately the latitude of Rome, Italy).

*Relief.* From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laurentian plateau. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 12,972 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,850 feet, and Mount St. Elias, 18,008 feet, both in the Yukon.

*Climate.*—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

#### GOVERNORS-GENERAL OF CANADA SINCE 1867.

Name.	Appointed.	Assumed Office.
Viscount Monck, G.C.M.G. ....	June 1, 1867	July 1, 1867

## GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign on the advice of the Canadian Ministry, and aided by a Privy Council.

## Governor-General and Staff.

*Governor-General and Commander-in-Chief, His Excellency The Right Honourable Lord Tweedsmuir, G.C.M.G., C.H.* ..... \*£10,000  
*Secretary to the Governor-General, A. S. Redfern.*  
*Comptroller of the Household, Lt.-Col. Eric D. Mackenzie, C.M.G., D.S.O., late Scots Gds.*  
*Assistant Secretary to the Governor-General, F. L. C. Pereira, O.B.E.*  
*Deputy Assistant Secretary to the Governor-General, H. R. Stewart.*  
*Aides-de-Camp, Lieut.-Col. Henry Willis O'Connor, C.B.E., D.S.O., P.P.C.M.I.; Lieut. S. G. Rivers-Smith, R.N.; Capt. J. Boyle, Royal Scots Fusiliers.*

## THE EXECUTIVE.

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council.

## THE DOMINION CABINET.

(Formed October 23, 1935).

*Prime Minister, President of the Privy Council, Secretary of State for External Affairs, Rt. Hon. W. L. Mackenzie King, C.M.G.* ..... \*\$15,000  
*Minister of Finance, Hon. Charles Dunning* ..... 10,000  
*Minister of Justice and Attorney-General, Hon. E. Lapointe* ..... 10,000  
*Minister of Trade and Commerce, Hon. W. D. Euler* ..... 10,000  
*Minister of National Revenue, Hon. J. L. Halsey* ..... 10,000  
*Minister of Labour, Hon. Norman McLeod Rogers* ..... 10,000  
*Minister of Transport, Hon. C. D. Howe* ..... 10,000  
*Minister of Mines and Resources, T. A. Cretar* ..... 10,000  
*Minister of Agriculture, Hon. J. G. Gardiner* ..... 10,000  
*Postmaster-General, Hon. J. C. Elliott* ..... 10,000  
*Minister of National Defence, Hon. Ian Mackenzie* ..... 10,000  
*Minister of Pensions and National Health, Hon. Charles G. Power* ..... 10,000  
*Minister of Fisheries, Hon. J. E. Michand* ..... 10,000  
*Secretary of State, Hon. Fernand Rinfret* ..... 10,000  
*Minister of Public Works, Hon. P. J. A. Cardin* ..... 10,000  
*Minister without Portfolio, Hon. R. Dandurand* .....

*Leader\* of the Opposition, Right Hon. R. B. Bennett, P.C.* ..... 10,000

\* Regular rates of salaries are given. They were subjected to a 10 per cent. reduction from 1932-33 to 1934-35.

† NOTE.—In every case—including the Prime Minister's—four thousand dollars in addition is paid to a Minister of the Crown as his sessional indemnity as a member of either the Senate or the House of Commons of Canada. All salaries and sessional indemnities were subject to a reduction of 10 per cent. for the fiscal years 1932-33 to 1934-35.

## CANADIAN REPRESENTATION ABROAD.

*High Commissioner's Office, London, England, Canada House, Trafalgar Square, London, S.W. 1.*

*High Commissioner, Hon. Vincent Massey, P.C., M.A., LL.D.*

*Secretary, Lt.-Col. G. P. Vanier, D.S.O., M.C.*

*1st Secretary, L. B. Pearson.*

*Assistant Secretary, Lt.-Col. F. M. Stanton.*

*Canadian Legation in the United States, 1746, Massachusetts Avenue, Washington, D.C.*

*Envoy Extraordinary and Minister Plenipotentiary, Hon. Sir Herbert M. Marler, K.C.M.G.*

*Counsellor, H. Hume Wrong.*

*First Secretary (Commercial Secretary), M. M. Mahoney.*

*2nd Secretary, E. D'Arcy McGreer.*

*Canadian Legation in France,*

*1, Rue Francois 1<sup>er</sup>, Paris.*

*Envoy Extraordinary and Minister Plenipotentiary, Hon. Philippe Roy, M.D.*

*Counsellor, Jean Désy.*

*2nd Secretary, Pierre Dupuy.*

*Canadian Legation in Japan,*

*16, Omote-cho, Sancho-me, Akasaka-Ku, Tokyo, Japan.*

*Envoy Extraordinary and Minister Plenipotentiary, Hon. Robert Randolph Bruce.*

*Commercial Secretary, J. A. Langley.*

*2nd Secretary, K. P. Kirkwood.*

*Office of the Canadian Advisory Officer, League of Nations,*

*41, Quai Wilson, Geneva, Switzerland.*

*Dominion of Canada Advisory Officer, W. A. Riddell.*

*3rd Secretary, P. E. Renaud.*

*3rd Secretary, Alfred Rive.*

## BRITISH HIGH COMMISSIONER IN CANADA.

*British High Commissioner, Sir Francis Floud, K.C.B. (Barncliffe, Ottawa).*

## THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The Senate consists of 96 members nominated for life by the Governor-General, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 6 for British Columbia, 6 for Manitoba, 6 for

Alberta, and 6 for Saskatchewan; each Senator must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The House of Commons is elected every five years at longest, and the Parliament consists of 245 members, elected as follows: 82 for Ontario, 65 for Quebec, 12 for Nova Scotia, 10 for New Brunswick, 17 for Manitoba, 16 for British Columbia, 4 for Prince Edward Island, 17 for Alberta, 21 for Saskatchewan, and 1 for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec. 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive\* \$4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Feb. 3, 1916, the new buildings being started the same year; the foundation stone was laid by H.R.H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1917, and the corner stone of the main tower by H.R.H. the Prince of Wales (King Edward VIII.), Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex-Speaker of the House of Commons of the United Kingdom) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons.

#### The Senate.

Speaker of the Senate, Hon. Walter E. Foster (with Sessional indemnity \$4,000 and residence allowance \$3,000) *\$6,000	
Clerk of the Senate & Clerk of the Parliaments, Austin Blount, C.M.G. ....	7,500
1st Clerk Assistant, L. P. Gauthier .....	5,100
Gentleman Usher of the Black Rod, Andrew R. Thompson (and allowance \$600) .....	4,140
Law Clerk, W. F. O'Connor, K.C. ....	6,000

#### The House of Commons.

Speaker of the House of Commons, Hon. Pierre E. Casgrain, K.C. (and allowance \$3,000) .....	\$6,000
Deputy Speaker, Hon. R. D. Morand (Indemnity \$4,000, and allowance \$1,500) .....	4,000
Clerk, A. Beauchesne, M.A., K.C., F.R.S.C., C.M.G. ....	7,500
Clerk Assistant, Thos. M. Fraser, LL.B. ...	5,120
Sergeant-at-Arms, Major M. F. Gregg, V.C., M.C. (and allowance \$600) .....	4,520

#### THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and six puisne judges, and holding three

sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

#### Supreme Court of Canada.

Chief Justice of Canada, Rt. Hon. Sir Lyman Poore Duff, P.C., G.C.M.G. ....	\$15,000
Puisne Judges, Hon. T. Rinfret; Hon. J. H. Lamont; Hon. L. A. D. Cannon; Hon. O. P. Crocket; Hon. H. H. Davis; Hon. P. Kerwin; Hon. A. B. Hudson	each 12,000
President of the Court of Exchequer for the Dominion, Hon. A. K. McLean .....	10,000
Puisne Judge of the Exchequer Court, Hon. Eugene R. Angers .....	9,000
Registrar of the Supreme Court, James F. Smellie, K.C. ....	6,000
Registrar of the Exchequer Court, A. W. Duclos, K.C. ....	5,000

#### DEFENCE.

The Canadian Militia is composed of the Active Militia and the Reserve, the Active Militia consisting of the Canadian Permanent Force (a small body of all arms) and the units of the Active Militia of the several branches of the service which are organized and perform annual training. The Reserve Militia consists of reserve units and of all able-bodied citizens between the ages of 18 and 60, with certain well-defined exceptions. The total establishment of the Non-Permanent Active Militia (1936) is 9,010 officers and 124,925 other ranks.

Expeditionary Force in the Great War.—The number enlisted up to the cessation of hostilities was 595,441, of whom 418,052 were sent overseas. Over 80% of all enlistment was voluntary. The total outlay for the War is estimated at \$2,000,000,000.

#### Royal Canadian Navy.

The Royal Canadian Navy consists (Sept. 1936) of 4 Destroyers and 1 Mine-sweeper. The authorized complements are 117 officers and 862 men of the Permanent Force. There is also a Naval Reserve of 70 officers and 430 men and a Naval Volunteer Reserve of 70 officers and 930 men.

#### Royal Canadian Air Force.

The Royal Canadian Air Force had a strength (Sept. 1, 1936) of 142 officers and 965 airmen on the Permanent Force (with a Reserve of 184 officers). The Non-Permanent Force had a strength of 60 officers and 401 airmen. The total aircraft was 185.

#### Royal Canadian Mounted Police.

Headquarters: Ottawa.

Hon. Commandant, The King-Emperor.	
Commissioner, Maj.-Gen. Sir James Howden	
MacBrien, K.C.B., C.M.G., D.S.O.	
Deputy Commissioner, Col. J. W. Spalding.	
Director of Criminal Investigation, Asst.-Commr. G. I. Jennings, O.B.E.	
Supply Officer, Asst.-Commr. C. D. La Nauze.	
Adjutant, Supt. V. A. M. Kemp.	
Departmental Secretary, G. T. Hann, M.B.E.	
Chief Accountant, J. Stevens, M.B.E.	

\* All salaries and sessional indemnities are subject to a reduction of 5 per cent. for the fiscal year ending March 31, 1937.

## EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (1935) about 24,000 public elementary and secondary school districts (attendance at the former being compulsory except in the Province of Quebec), with 2,230,905 pupils. In addition there were 32,924 pupils in private elementary and secondary schools. Higher education is conducted in 150 universities and colleges with an enrolment, in 1935, of 93,213.

In 1935 the live stock included 2,931,337 horses, 8,820,600 cattle, 3,399,100 sheep, 3,549,200 swine, and 56,768,800 poultry.

In dairy produce the Dominion output of creamery butter in 1935 was 238,854,600 lb., valued at \$50,804,600. There was also produced 106,940,000 lb. of dairy butter. The cheese production, home-made and factory, for the same period in 1935 totalled 101,378,600 lb., valued at \$11,202,223.

**Fur Farming.**—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were 7,019 fur farms in the Dominion in 1934, 6,083 of which were fox farms, the remainder being divided between mink, raccoon, marten, skunk, fisher, Karakul sheep, beaver, muskrat, chinchilla rabbit, coyote, badger and Siberian hare. The total number of animals on the farms at the end of 1934 including estimates of the numbers of muskrats and beaver was 196,970, valued at \$8,427,567; born in captivity, 203,491; sold from farms, 13,839, value \$573,051; pelts sold, 137,288, value \$3,956,010; the total sale for live animals and pelts being \$4,539,661 as compared with \$4,066,905 in 1933.

**Fisheries.**—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch marketed in the calendar year 1935 was \$34,427,854, as against \$34,022,323 in 1934 and \$60,259,744 in 1918, the banner year of the fishery harvest. The capital invested, in vessels, &c., engaged in catching operations and in fish-canning and curing establishments in 1935 was \$43,542,677, and the number of persons employed 82,835. The number of canning and curing establishments in operation in 1935 was 632.

**Lumbering.**—The value of production, including (a) primary forest production and (b) the value added by manufacture in sawmills and pulp mills, was \$156,859,181 in 1934, as compared with \$128,624,803 in 1933. The principal items of production in 1934 were sawn lumber \$40,509,600, shingles \$4,422,578, lath \$412,844, and wood pulp \$75,726,958.

**Industrial Statistics.**—Industrial establishments of all kinds in 1934 had a total capital of

\$4,703,917.730, the gross value of the products being \$2,533,758.954. These industries employed 545,162 hands, the total pay roll for whom was \$533,594.635.

**Minerals.**—Some minerals produced in 1935 were as follows: Gold, 3,284,800 oz. fine (\$67,904,700)\*; nickel, 138,516,240 lb. (\$35,345,103); copper, 418,997,700 lb. (\$32,311,960); silver, 16,618,558 oz. fine (\$10,767,148); lead, 339,105,079 lb. (\$10,644,772); zinc, 320,649,859 lb. (\$9,936,908); cobalt, 681,419 lb. (\$512,705); coal, 13,888,006 short tons (\$41,963,110); natural gas, 24,910,786 M. cu. ft. (\$9,363,141); crude petroleum, 1,446,620 bbls. (\$3,492,188); asbestos, 210,467 tons (\$7,054,614); Salt, 350,343 tons (\$1,880,978); gypsum, 541,864 tons (\$932,203). The total value of the mineral output in 1935 was \$312,344,457.

### COMMUNICATIONS.

**Railways.**—The total single track mileage of steam railways in operation on Dec. 31, 1935, was 42,577 miles, the capital liability of the steam railways being \$4,460,264,309 (1935), earnings (1935) \$310,107,155, the working expenses (1935) \$263,942,899. There were also (1935) 1,833 (single track, 1,275) miles of track of electric railways with a capital of \$207,191,039, earnings \$40,442,320, and working expenses \$28,009,013. In 1935 the passengers carried numbered 30,084,185 (steam), 600,728,353 (electric), and freight 69,141,100 tons (steam), 2,057,897 tons (electric).

### Provinces of the Dominion.

#### ALBERTA.

**Area and Population.**—The Province of Alberta has an estimated area of 255,285 square miles, including about 2,360 square miles of water, with a population of 731,605, according to the Dominion Census of 1931.

**Government.**—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 63 members, elected for five years, representing 53 electoral districts into which the Province is divided. The Executive Council consists of 9 members.

**Canals.**—In 1935 the vessels passing through the canals of the Dominion numbered 25,694 of 17,862,655 tons. There are seven systems under control of the Dominion Government with a total waterway of 1,846 miles (of which 509.40 miles are constructed canals).

The new *Weiland Ship Canal* between Lake Erie and Lake Ontario, with a 25 foot channel, was opened for traffic on April 20, 1931.

**Posts and Telegraphs.**—There were 12,158 post-offices on Mar. 31, 1936. The postal revenue was \$32,507,889 in 1935-36. On Dec. 31, 1935, there were 4,379 rural mail delivery routes on which were erected 242,150 boxes. The length of telegraph lines directly operated by the Dominion Government in 1934 was 8,864 miles, and that by the Canadian National System 23,980 miles. Other lines reached 19,217 miles. On March 31, 1935, there were 2,431 coast and land wireless stations (including 2,012 amateur experimental stations), 272 ship wireless stations, 76 wireless and radio broadcasting stations, and 812,335 private receiving stations for the reception of broadcast programmes. The ship to shore wireless traffic for the twelve months ended March 31, 1935, amounted to 327,670 messages and 7,177,949 words. Wireless "beam" stations are operated at Drummondville, Quebec, for direct communication with Great Britain and Australia, and a station at Louisburg, N.S., provides a long-distance service to ships.

On December 31, 1934, there were 1,193,729 telephones and 5,133,521 miles of telephone wire in use; earnings, \$57,380,171; expenses, \$50,989,088.

*Trial Division—Judges, Hons. (vacant) (C.J.); W. C. Ives; T. M. Tweedie; Frank Ford; A. F. Ewing; W. R. Howson* .....each 9,000

**Agriculture and Live Stock.**—The total area in field crops, 1935, was 13,451,450 acres. The Department of Agriculture in the Provincial Government conducts free schools of agriculture at two points in the Province. Free homesteads are still available in many desirable localities. The value of the field crops in 1935 was estimated at \$97,726,000. The live stock included 697,300 horses, 464,200 milch cows and 1,140,000 other cattle, 639,600 sheep, and 809,100 swine. The creamery butter made totalled 23,094,707 lb., valued at \$4,588,917, and cheese 1,364,526 lb., valued at \$168,280.

**Finance.**—Gross bonded Debt, March 31, 1936, \$153,567,010; Net General Debenture Debt, \$127,893,840. Revenue (1935-36) \$16,575,152. Expenditure (1935-36), \$18,225,950. Assessed valuation of property, \$577,407,878.

**Manufactures.**—The gross value of the output in 1934 was \$69,389,118, against \$1,313,375 in 1900, the principal manufacturing centres being Calgary and Edmonton.

**CAPITAL, EDMONTON.** Pop. (1936) 85,676; Calgary (83,304). Other centres are Lethbridge, Medicine Hat, Red Deer, and Westaskiwin.

#### BRITISH COLUMBIA.

**Area and Population.**—British Columbia has a total area estimated at 366,255 square miles, with a population (Census of 1931) of 694,263; the Census of 1921 gave 524,582, showing an increase in the decennial period of 169,681 (56.86 per cent.), the highest percentage for the Dominion.

**Government.**—The Government consists of a Lieutenant-Governor and an Executive Council, together with a Legislative Assembly (elected Nov. 2, 1933) of 48 members.

*Lieut.-Governor, Eric W. Hamber (1936) \$9,000*  
*Private Sec., A. M. D. Fairbairn* ..... 2,400

#### Executive.

*Premier, Minister of Railways and President of the Council, Hon. T. D. Pattullo*

*Minister of Agriculture, Hon. K. C. MacDonald, M.D.* ..... 6,000

*Attorney-General, Hon. Gordon McG. Sloan, K.C.* ..... 6,000

*Provincial Secretary and Minister of Education, Hon. G. M. Weir* ..... 6,000

*Minister of Finance and of Industries, Hon. John Hart* ..... 6,000

*Minister of Lands and of Municipalities, Hon. A. Wells Grey* ..... 6,000

*Minister of Mines and Labour and Commissioner of Fisheries, Hon. G. S. Pearson* ..... 6,000

*Minister of Public Works, Hon. F. M. MacPherson* ..... 6,000

*Speaker, Legislative Assembly, Hon. H. G. T. Perry.*

#### The Judicature.

*Court of Appeal—Chief Justice, Hon. J. A. Macdonald* ..... \$10,000

*Justices of Appeal, Hons. A. Martin, W. G. McQuarrie, Albert E. McPhillips, M. A. Macdonald* .....each 9,000

*Supreme Court—Chief Justice, Hon. Aulay Morrison* ..... 10,000

*Puisne Judges, Hons. D. Murphy, H. B. Robertson, D. A. McDonald, A. I. Fisher and A. M. Manson* .....each \$9,000  
*Local Judge in Admiralty, Hon. Archer Martin* ..... 1,000

**Agent-General in London, (Acting) W. A. McAdam, British Columbia House, 2 Regent Street, S.W.1.**

**Finances.**—The receipts of the provincial government in 1934-5 were \$22,761,719, and the expenditure \$21,597,544.

**Agriculture and Live Stock.**—The agricultural production of British Columbia in 1935 was valued at \$42,419,992. Live stock in 1935 included 59,537 horses, 312,700 cattle, 175,400 sheep, 48,500 swine, and 3,400,900 poultry. The butter output totalled 6,059,368 lb. of creamery and 2,720,000 lb. of dairy butter, and the cheese 752,558 lb.

**Production and Industry.**—The gross value of the output of manufactures in 1934 was \$176,721,398, the principal manufacturing centres being Vancouver, Victoria, New Westminster, and Prince Rupert. The yield of the principal industries was, in 1935: forests, \$56,941,000; agriculture, \$42,419,992; mining, \$48,821,239; fishing, \$15,169,529. There are extensive coal measures, and a vast and compact area of merchantable timber; the mines have produced over \$1,425,253,642, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are miles of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals, timber, fruit, pulp and paper.

**Principal Cities.**—**CAPITAL, VICTORIA.** Population 1931, 39,082. Vancouver (founded in 1886), the largest city in the Province; population (1931) 246,593, is the western terminus of the C.P.R., and possesses one of the finest natural harbours in the world. Other centres are New Westminster (17,524), Prince Rupert (6,350).

#### MANITOBA.

**Area and Population.**—Manitoba, originally the Red River Settlement, is situated in about the centre of the continent, between 49°-60° N. lat. and 95°-101° W. long., with a total area of 246,512 square miles and a population (1931 Census) of 700,139, an increase since the last census of 61,079.

**Government.**—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 8 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of \$1,674. *Lieut.-Governor, Hon. William Johnston*

*Tupper* ..... \$9,000

#### Executive.

*Premier and President of the Council, Provincial Secretary and Railway Commissioner, Hon. John Bracken* ..... \$6,100

*Mines and Natural Resources, Hon. J. S. McDiarmid* ..... 4,576

*Public Works and Labour, Hon. W. R. Clubb* ..... 4,576

*Minister of Agriculture and Immigration, Hon. D. L. Campbell* ..... 4,576

*Minister of Education, Hon. L. Schultz* ..... 4,576

*Attorney-General, Minister of Telephones and Telegraphs and Municipal Commissioner, Hon. W. J. Major, K.C.* ..... 4,576

Provincial Treasurer, Hon. S. S. Carson, K.C. .... \$4,576  
 Minister of Health and Public Welfare,  
 Hon. I. B. Griffiths ..... 4,576  
 Without Portfolio, Hon. Sauveur Marcoux

## The Judicature.

## Court of Appeal.—

Chief Justice of Manitoba, Hon. J. E. Prendergast ..... \$10,000  
 Puisne Judges, Hons. R. M. Dennistoun,  
 C.B.E., W. H. Trueman, H. A. Robson,  
 S. E. Richards ..... each 9,000

## King's Bench.—

Chief Justice, K.B.D., Hon. D. A. Macdonald ..... 10,000

Puisne Judges, Hons. A. K. Dysart,  
 J. E. Adamson, W. J. Donovan, P. J. Montague and F. G. Taylor ..... each 9,000

**Finances.**—The revenues of the provincial government for the year ended April 30, 1936, were \$14,560,573, and the expenditures \$14,438,873; bonded debt \$124,104,707.

**Agriculture and Live Stock.**—The total land area in Manitoba is 140,622,720 acres, of which 5,962,000 acres were under field crops in 1935. The soil is fertile and productive. The value of field crops in 1935 was \$32,674,000. The live stock included 297,000 horses, 759,500 cattle, 218,000 sheep, 183,500 swine, 4,262,000 poultry. The dairy output was valued at \$10,421,000; the honey production was over 5,000,000 lb.

**Manufactures.**—The gross value of the manufactured products in 1934 was \$105,358,000. The capital invested in the 1,077 manufacturing enterprises amounted to \$183,937,703 and the hands employed 21,723; the chief industrial centres being Winnipeg, St. Boniface, Brandon and Portage La Prairie. In 1935 there were 4,564 miles of steam railway in the Province, not including industrial tracks, yards and sidings.

**Principal Cities.**—CAPITAL, WINNIPEG, the third largest city in Canada, population 1931, 218,785. Other centres are Brandon (17,082), St. Boniface (16,305), Portage La Prairie (6,597).

## NEW BRUNSWICK.

**Area and Population.**—NEW BRUNSWICK is situated between 45°–48° N. lat. and 63° 47'–69° W. long., and comprises an area of 27,985 square miles, with a population in 1931 of 408,219, an increase since the last census of 20,343 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

**Government.**—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Lieutenant-Governor, Col. Hon. Murray Maclaren (1936) ..... \$9,000

## Executive.

Premier and Minister of Public Works,  
 Hon. A. Allison Dysart ..... \$5,900

Minister of Lands and Mines, Hon.  
 Fred W. Pirie ..... 3,500

Provincial Secretary and Treasurer, Hon.  
 Clovis T. Richard ..... 3,500

Attorney-General, Hon. John B. McNair  
 Agriculture, Hon. Austin C. Taylor ..... 3,500

Health and Labour, Hon. W. F. Roberts,  
 M.D. .... 3,500

Education, and Municipal and Federal  
 Relations, Hon. A. P. Paterson ..... 3,500

Without Portfolio, Hon. W. S. Anderson

Speaker, Legislative Assembly, H. F. G. Bridges.

## The Judicature.

## Court of Appeal and Chancery Division.

Chief Justice of New Brunswick, Hon.  
 J. B. M. Baxter ..... \$10,000  
 Justices of Appeal, Hon. W. C. H. Grimmer;  
 Hon. W. H. Harrison ..... each 9,000

## King's Bench Division.

Chief Justice, K.B.D., Hon. J. H. Barry \$10,000  
 Judges, Hons. A. T. Le Blanc; C. D.  
 Richards; J. H. A. L. Fairweather each 9,000

## Court of Vice-Admiralty.

Judge, Hon. L. P. D. Tilley ..... \$1,000

## Court of Divorce and Matrimonial Causes.

Judge, Hon. W. C. H. Grimmer ..... \$500  
**Finance.**—The ordinary receipts for 1935 were \$6,342,491, and the ordinary expenditure \$7,045,608.

**Agriculture and Live Stock.**—The total land area is 18,663,000 acres, of which 605,900 acres were under field crops in 1932. The total value of the field crops in 1932 was \$12,629,000. The live stock (1932) included 221,000 cattle, 131,000 sheep, 96,300 pigs, 52,390 horses, and 1,470,100 poultry. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; value of the fisheries (1925) \$4,798,589. In 1927 the cheese factories in operation produced 802,000 lb., and the creameries 1,885,262 lb. of butter.

**Manufactures.**—The gross value of the output of manufactured goods in 1932 was \$55,209,818, the principal manufacturing centre being St. John (\$26,552,152). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

**Principal Cities.**—CAPITAL, FREDERICTON; population (1931), 8,830. St. John (pop. 47,514) is one of the principal winter ports of Canada, and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (20,689).

## NOVA SCOTIA.

**Area and Population.**—NOVA SCOTIA is a peninsula between 43° 25'–47° N. lat. and 50° 40'–66° 25' W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,428 square miles (360 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1931, of 512,846, a decrease since the last census of 10,991 persons.

**Government.**—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 30 members.

Lieut.-Governor, His Honour Hon. Walter H. Covert, K.C. .... \$9,000

## Executive.

Premier and Provincial Secretary, Hon.  
 A. L. Macdonald, K.C. .... \$7,000

Minister of Highways, Hon. A. S. Macmillan ..... 6,000

**Agriculture and Live Stock.**—Out of a land area of 13,483,529 acres the total area occupied by farms is 4,402,031 acres, or 31.91 per cent. Of this farm area, 844,652 acres are improved land and 704,100 acres rough pasture land, making a total of 1,548,752 acres of cleared land. The balance (2,753,279 acres) is composed mainly of woodland with a small proportion of barren land. Fruit is extensively cultivated, especially in the famed Annapolis Valley. The apple crop for 1933 was 2,862,658 barrels. The gross value of the products of the farms, including field crops, farm animals, dairy products, poultry products, fruit and vegetables, fur, maple products, and honey for the year 1934 was \$26,525,000. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £200 to £1,000. There is an Agricultural College, operated by the Provincial Government, at Truro, and two Experimental Farms operated by the Dominion Government, at Nappan and Kentville, as well as a Technical College at Halifax. In 1935 the live stock included 41,110 horses; 223,100 cattle; 39,700 swine; 132,800 sheep; 1,240,000 poultry, including hens, turkeys, geese and ducks.

**Manufactures.**—In 1934 the gross value of the manufactures was \$60,844,581. The capital invested was \$119,064,747, and 15,041 hands were employed, the principal industrial centres being Sydney (\$10,123,057), Halifax (\$9,698,038) and Dartmouth (\$4,880,404).

**Fisheries.**—The total value of the fisheries in 1935 was \$5,877,234, and the number of persons employed was 21,287.

**Minerals.**—Mine products in 1934 were valued at \$29,600,000; the coal deposits are extensive. An estimate of coal resources by the Dominion of Canada Geological Survey in 1915 gives approximate coal reserve of actual 2,100,000,000 metric tons, and probable 9,600,000,000 metric tons. Since 1915 subsequent development work has shown that the probable reserve is in the vicinity of 18,000,000,000 metric tons. 5,310,112 long tons were produced in 1935. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

**Principal Cities.**—CAPITAL, HALIFAX (population 59,275), one of the terminals of the Canadian National Railway, with a magnificent harbour, is one of the principal winter ports of Canada, and the entrepôt of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries.

#### CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of 132,581 inhabitants. The chief city, Sydney (pop. 23,089), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. Glace Bay has a population of 20,706. The Canadian National Railway connects the island with the mainland by rail ferry.

#### ONTARIO.

**Area and Population.**—The Province of Ontario contains a total area of 412,582 sq. miles, with a population (1931) of 3,431,683. Of the population (Census 1931) 1,335,691 live in rural parts and 2,095,992 in urban centres.

**Government.**—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 90 members elected for five years which meets every year at Toronto. Executive Council act as the Ministry of the Province.

<i>Lieutenant-Governor, Hon. Herbert A. Bruce</i> .....	\$10,000

*Agent-General for Ontario in the British Isles,*

**Finance.**—The Ordinary Receipts of the Provincial Government for 1935-36 were \$59,785,526, and the Ordinary Expenditure \$74,391,873 (including Relief Expenditure formerly included in Capital Accounts).

**Agriculture and Live Stock.**—The total area is 234,163,200 acres, and in 1934 the area of

cleared land was about 15,000,000 acres, of which 9,000,000 acres were under field crops. The estimated total value of all field crops in 1935 was \$131,141,060. Cheese factories produced 73,497,000 lb. of cheese in 1934 valued at \$7,202,700, and creameries made 80,423,400 lb. of butter valued at \$16,728,100. In 1935 there were 562,900 horses, 2,469,200 cattle, 945,700 sheep, 1,225,300 pigs, and 22,961,900 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

**Lumbering.**—The value of production including primary forest production and the value added by manufacture in pulp-mills and saw-mills in 1933 was \$81,791,671.

**Manufactures.**—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1934 was \$1,255,325,701. There were, in 1934, 259,621 employees, an invested capital of \$2,063,721,375, and an annual wage bill of \$270,834,102. The chief manufacturing centres in 1930 were Toronto (\$521,540,080), Hamilton (\$166,910,535), Ottawa (\$33,104,464), Oshawa (\$41,382,402), London (\$45,497,024), and East Windsor (\$44,123,658).

**Minerals.**—Ontario is the leading mineral Province in the Dominion, the output in 1935 being \$18,934,269. The principal metals are: gold, \$78,133,624; silver, \$3,344,229; nickel, \$35,345,103; and copper, \$19,295,905.

**Hydro-Electric Power.**—The chief power rivers are the Niagara, the St. Lawrence and the Ottawa. One of the world's largest and most successful electrical undertakings—the largest publicly-owned—is operated by the Hydro-Electric Power Commission of Ontario, which generates and transmits power to more than 700 co-operating municipalities and serves about 75 per cent. of the population of the Province. The aggregate peak load exceeds 1,366,735 h.p. The undertaking represents a capital investment of about \$394,661,000.

**Principal Cities.**—CAPITAL, TORONTO, population (1931) 631,027, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (155,547); Ottawa, the Federal capital (126,872), with a large lumber trade and woodenware manufactures; London (71,148); Brantford (30,107); Kingston (23,439); Peterborough (22,327); Windsor, connected by tunnel beneath Detroit River with Detroit, Mich., U.S.A. (63,108); Fort William (26,277); Kitchener (30,793); Guelph (21,075); St. Catharines (24,753); Sault Ste. Marie (23,082).

#### PRINCE EDWARD ISLAND.

**Area and Population.**—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 130 miles in length, and from 4 to 24 miles in breadth; its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1931) 88,038, a decrease from the last census of 577 persons. The island was first settled by the French, who held it for many years as a

fishery station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

**Government.**—The Government is vested in a Lieut.-Governor and an Executive Council, and Legislative Assembly of 30 members elected by the people, 15 as Councillors (with a property qualification) and 15 as Assembly-men (on general suffrage).

Lieutenant-Governor, Hon. George Des Brisay Deblois (1933) ..... \$7,000

#### Executive.

Premier and Minister of Education and of Public Health, and Provincial Secretary and Treasurer, Hon. Walter Lea ..... \$3,500

Minister of Public Works, ..... 2,000

Minister of Agriculture, ..... 2,000

Attorney and Advocate-General, ..... 2,000

Speaker, Legislative Assembly, Hon. Heath Strong, K.C. .... 2,000

Deputy Provincial Sec.-Treas., Clerk of Executive Council and Supt. of Insurance, H. R. Stewart ..... 2,000

#### The Judicature.

Chief Justice, Hon. John A. Matheson ... \$10,000

Assistant Judges, Hon. Aubin E. Arsenault; Hon. Albert C. Saunders ... each 9,000

Judge of Vice-Admiralty Court, William S. Stewart ..... 2,000

**Agriculture and Live Stock.**—The value of the field crops in 1929 was estimated at \$25,976,000. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from \$20 to \$60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity is an established and profitable industry. There are about 600 fox ranches, conducted by incorporated companies and private partnerships or individuals. The live stock (1930) included 35,570 horses, 99,500 cattle, 87,000 sheep, 54,000 pigs, and 979,700 poultry.

**Manufactures.**—The gross value of the manufactures in 1930 was \$4,638,725, against \$2,326,708 in 1900.

**Principal Cities.**—CAPITAL, CHARLOTTETOWN (Pop. 12,347), on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Summerside (3,228), Souris (1,094), and Georgetown (884).

#### QUEBEC.

**Area and Population.**—The Province of Quebec contains an area estimated at 594,534 square miles, with a population (1931) of 2,874,255, an increase since the last Census of 513,590. Estimated population 1926, 3,110,000.

**Government.**—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 90 members elected for five years to represent the 90 electoral districts of the Province.

Lieut.-Gov., Hon. Esioff L. Patenaude ... \$10,000  
Aide-de-Camp, Lt.-Col. J. D. Papineau . hon.

*Executive.*

<i>Prime Minister and President of the Council and Attorney-General, Hon. Maurice Duplessis, K.C.</i> .....	\$12,000

<i>Judges, Hons. J. B. Archambault; R. T. Stackhouse; J. B. D. Bumbray; J. G. Magnan.</i>	
---	--

*Court of Sessions of the Peace:—*

<i>Montreal—Hon. Gustave Perrault (Chief Justice); F. T. Enright; Amédée Monet; Victor Cusson; J. O. Lacroix; Gustave Marin; Maurice Tetreau; Jules Desmarais.</i>	
<i>Quebec—Hons. Hugues Fortier (Chief Justice); Art. Fitzpatrick; J. H. Fortier.</i>	

*Agent-General for Quebec in England, Hon. L. J. Lemieux, 2 Cockspur St., Trafalgar Square, S.W.1.*

*Finance.*—The actual revenue for the year 1935-36 was \$38,666,299 and the actual expenditure \$40,589,475. The bonded debt (June 30, 1936) was \$164,747,607 and the net funded debt \$130,643,615.

*Production and Industry.*—The gross value of manufactured products in 1934 was \$766,498,000, the principal manufacturing centres being (1934): Montreal (\$361,058,212), Montreal East (\$38,648,837), Quebec (\$25,952,573), Three Rivers

(\$22,246,590) Drummondville (\$12,910,696), La Salle (\$10,633,150), and Sherbrooke (\$10,549,029). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organize an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 120,000,000 acres, of which 51,000,000 are under licence to cut timber. The pulp and paper industry leads all other industries for gross and net values of products, as well as for total number of employees and distribution of salaries and wages. During 1935 the production of pulp reached 1,916,382 tons, valued at \$38,235,076. The Province produces nearly half of the total output of the Dominion. In 1935, 1,658,312 tons of paper were manufactured, valued at \$64,820,519 (mainly newsprint). Unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1935, was about 8,678,721 acres. In 1934 the production of dairy industry products was cheese 20,265,992 lb. (valued at \$2,074,660), and butter 73,397,096 lb. (valued at \$15,894,297). In 1935 there were in the Province 266,600 horses, 1,662,200 cattle, 666,800 sheep, 611,200 swine, and 6,964,900 poultry.

*Education.*—The Superintendent of Education, assisted by a Council composed of a Roman Catholic and a Protestant Committee, each under a deputy head, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1934, 8,815 schools with 684,679 scholars, including the high and superior schools and 32 normal schools, out of which 20 are supported by the State. There are also Schools of Agriculture, Dairying, Polytechnic, Fine Arts, Rangers', Historic Guides', Blind and Deaf, Nursery, Commercial and Classical Schools, and four Universities—two Protestant (McGill University, Montreal, and Bishop's College, Lennoxville); and two Roman Catholic (Laval University, Quebec, and Montreal University).

*Principal Cities.*—CAPITAL, QUEBEC (population, 140,000), historic city visited annually by thousands of tourists, and one of the great seaport towns of Canada; and Montreal (population, 865,000), the commercial metropolis, and the principal centre of the Canadian grain export trade, situated at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Verdun (73,000), Hull (30,000), Sherbrooke (30,000), Trois Rivières (38,000). Population figures from the "Vital Statistics Report, 1935."

## SASKATCHEWAN.

*Area and Population.*—The Province of Saskatchewan lies between Manitoba on the east and Alberta on the west, and has an area of 251,700 square miles, the population at the Census of 1931 being 921,785, an increase of 164,275 persons since the Census of 1921.

*Government.*—The Government is vested in the Lieutenant-Governor, with a Legislative Assembly of 55 members. There is an Executive Council of 9 members.

*Lieutenant-Governor, His Honour A. P. McNab* .....

\$9,000

*Executive.*

<i>Premier, President of Council, Minister of Telephones and Telegraphs, and Pro- vincial Treasurer, Hon. W. J. Patterson</i>	\$7,500
<i>Minister of Public Health, Provincial Secretary and Minister in Charge of Theatres and Cinematographs Act, &amp;c., Hon. J. M. Uhrich, M.B.</i>	6,000
<i>Attorney-General, Hon. Thomas C. Davis, K.C.</i>	6,000
<i>Minister of Public Works, Hon. George Spence</i>	6,000
<i>Minister of Highways and Transportation, Hon. Charles M. Dunn</i>	6,000
<i>Minister of Municipal Affairs, Hon. R. J. M. Parker</i>	6,000
<i>Minister of Education, Hon. J. W. Estey, L.L.B., K.C.</i>	6,000
<i>Minister of Agriculture, Hon. J. G. Tag- gart</i>	6,000
<i>Minister of Natural Resources, Hon. W. F. Kerr</i>	6,000
<i>Speaker of the Legislative Assembly, Hon. J. M. Parker</i>	

*The Judicature.*

<i>Chief Justice, Court of Appeal, Hon. Sir Frederick Haultain, born 1857</i>	\$10,000
<i>Puisne Judges, Hons. W. F. A. Turgeon, W. M. Martin P. E. Mackenzie and P. H. Gordon</i>	each 9,000
<i>Ch. Justice, King's Bench, Hon. J. T. Brown</i>	10,000
<i>Puisne Judges, Hons. H. Y. MacDonald, H. V. Bigelow, J. F. L. Embury, C.M.G., G. E. Taylor, D. MacLean and W. E. Knowles</i>	each 9,000

*Agriculture and Live Stock.*—Saskatchewan is normally the largest wheat-producing province of the Dominion, and one of the most productive grain areas in the world. In 1935 the grain yield totalled 135,000,000 bushels. The approximate value of grain and field crops was \$114,272,600, livestock and products \$16,303,000, poultry products \$7,178,000, and fruit and vegetables \$2,655,000. Live-stock on farms in 1935 included 933,800 horses, 1,486,300 cattle, 459,700 sheep, and 514,400 swine.

*Industries.*—The capital invested in manufacturing enterprises in 1934 as reported from 845 establishments was \$65,957,159, and the value of the manufactured products \$42,261,723, the principal industrial centres being Regina, Moose Jaw, Saskatoon and Prince Albert.

*Education.*—In 1935 there were: (a) 5,123 school districts under The School Act with an enrolment of 25,000 in the high school grades and 185,945 in the elementary grades, operating 6,242 rooms of which 687 were continuation or high school rooms; (b) in addition to the large number of high schools operating under The School Act there were 18 high school districts under The Secondary Education Act operating 26 high schools, collegiate institutes and technical schools with an enrolment of 10,390 employing 275 teachers; (c) 635 pupils in the elementary school grades and 534 in the high school grades receiving full tuition in The Government Correspondence School, while 7,095 in all grades were receiving the lesson outlines from this school and having their work corrected in rural schools, in their homes, or elsewhere.

*CAPITAL, REGINA.* Population (1935), 53,389. Other large centres are Saskatoon (41,606), Moose

Jaw (19,782), Prince Albert (11,050), Weyburn (5,325), Swift Current (5,065), Yorkton (4,931) and North Battleford (4,727).

*TERRITORIES.*

THE YUKON TERRITORY was constituted a separate political unit in 1898. It is governed by a Comptroller and a Territorial Council of three elected members. The area of the Territory is 207,076 square miles. The population in 1931 was 4,230 (2,825 males and 1,405 females). Mining is the chief industry. The gold output for the year ending March 31, 1936, was \$921,223; the silver output during the same period was nil.

*CAPITAL, Dawson City.* Pop. (1921), 975. *Comptroller, George A. Jeckell.* *Judge, Hon. C. D. Macaulay.*

*NORTH-WEST TERRITORIES.*

(Reconstituted Sept. 1, 1905.)

Area, 1,309,682 sq. miles; population (1931), 9,723; seat of Government, Ottawa.

The North-West Territories comprise the territories formerly known as Rupert's Land and the North-western Territory (except such portions thereof as form the provinces of Manitoba, Saskatchewan and Alberta and the Yukon Territory) together with all British territories and possessions in North America and all islands adjacent thereto not included within any province, except the Dominion of Newfoundland and its dependencies. For administrative purposes the Territories were subdivided into the provisional districts of Mackenzie, Keewatin and Franklin by Orders in Council (March 16, 1918). The North-West Territories are governed by the Commissioner, the Deputy Commissioner and 5 Councillors appointed by the Governor-General in Council.

*Territorial Council.*

*Deputy Commissioner of the North-West Territories, Roy Alexander Gibson.*

*Members of the North-West Territories Council, Charles Camsell, C.M.G., B.Sc., LL.D., F.R.S.O.; Austin Louis Cumming, B.Sc.; Kenneth Robinson Daly, B.A.; Maj.-Gen. Sir James Howden MacBrien, K.C.B., C.M.G., D.S.O.; Harold Wigmore McGill, M.C., M.D.*

*Dominion Officials.*

*Director, Lands, North-West Territories and Yukon Branch, J. Lorne Turner, Ottawa.*

*Stipendiary Magistrate, A. Norquay, Edmonton, Alta.*

*Sheriff, Maj.-Gen. Sir J. H. Macbrien, K.C.B., C.M.G., D.S.O., Ottawa.*

*Registrar, Land Titles, K. R. Daly, Ottawa.*

*Legal Adviser, W. M. Cory, Ottawa.*

*Public Administrator (Mackenzie District), H. Milton Martin, Edmonton, Alta.; (Franklin District) W. M. Cory, Ottawa.*

*District Agent (Mackenzie District) and Supt. Wood Buffalo Park, A. L. Cumming, B.Sc., Fort Smith, N.W.T.*

*Mining Recorder, and Crown Timber and Land Agent for Great Bear Lake Mining Districts, J. H. Davies, Cameron Bay, N.W.T.*

*Medical Officers, Drs. J. A. Urquhart (Aklavik), P. W. Read (Good Hope), J. M. Morrow (Fort Smith), J. E. Amyot (Resolution), W. A. M. Truesdell (Simpson), T. J. Orford (Pangnirtung), T. Mellington (Chesterfield), M. J. Thomson (Cameron Bay).*

*General Foreman (Reindeer), J. A. Parsons, Kittigazuit, N.W.T.*

## PHYSIOGRAPHY.

The Island of Newfoundland is situated between  $46^{\circ} 37' - 51^{\circ} 37'$  N. latitude and  $52^{\circ} 44' - 59^{\circ} 30'$  W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with fells (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from  $70^{\circ}$  to  $80^{\circ}$ .

## GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

In 1933 the financial difficulties into which Newfoundland had fallen compelled recourse to His Majesty's Government in the United Kingdom for assistance.

A Royal Commission visited the Island and recommended that, in consideration of certain measures of financial aid, responsible Government should be suspended temporarily and the administration of affairs vested in a form of Commission until such time as the Island again became self-supporting.

These recommendations were accepted, and the Commission took office on Feb. 16, 1934.

## COMMISSION OF GOVERNMENT.

His Excellency Vice-Admiral Sir Humphrey Thomas Walwyn, K.C.S.I., C.B., D.S.O., *Chairman*; Hon. J. A. Winter, K.C. (Newfoundland), *Commissioner for Home Affairs and Education*; Hon. R. W. Ewbank, C.S.I., C.I.E. (U.K.), *Commissioner for Natural Resources*; Hon. William Richard Howley, K.C. (Newfoundland), *Commissioner for Justice, Vice-Chairman*; Hon. Thomas Lodge, C.B. (U.K.), *Commissioner for Public Utilities*; Hon. John Charles Puddester (Newfoundland), *Commissioner for Public Health and Welfare*; Hon. Everard Noel Rye Trentham (U.K.), *Commissioner for Finance*.  
*Secretary*, W. J. Carew.

## JUDICATURE.

*Chief Justice*, Hon. Sir W. H. Horwood, Kt. \$8,000  
*Assist. Judges*, Hon. J. M. Kent, Hon. W. J. Higgins .....each 7,000  
*Registrar*, Rt. Hon. Sir W. F. Lloyd, P.C., K.C.M.G., D.C.L., K.C.

## DEFENCE.

Newfoundland contributed 11,922 men to the fighting forces of the Empire during the War. In addition to 3,000 enlisted in Canadian and other forces.

## EDUCATION.

The schools, while denominational, are public schools. They are mainly supported by the Government, assisted by the religious denominations. Primary and Secondary schools were attended in 1933-34 by 55,289 pupils. The Government grants in 1936-37 amount to \$725,000.

## RELIGION.

Census figures for 1921 and 1935:—

Religion.	1921.	1935.
Roman Catholics.....	86,576	93,920
Church of England.....	84,665	92,722
United Churches.....	74,205	75,088
Presbyterians .....	1,876	1,460
Salvation Army .....	13,023	18,049
Various .....	2,688	8,277

## FINANCE.

Revenue, expenditure (including U.K. grants and Colonial Development Fund Loans), and debt (including C. D. F. Loan) of Newfoundland:—

Year.	Revenue.	Expenditure.	Public Debt.
	\$	\$	
1933-34	8,518,946	10,166,812	...
1934-35	9,556,909	11,634,891	£20,086,750

## EXTERNAL TRADE.

Year.	Imports.	Exports.	Total.
	\$	\$	\$
1913-14 ...	15,193,726	15,134,543	30,328,269

1933-34 ...	16,305,562	26,791,503	43,097,065
1934-35 ...	19,240,425	27,229,125	46,469,550

Chiefly distributed in 1934-35 as under:—

Country.	Imports from.	Exports to.
United Kingdom.....	\$4,683,940	\$10,316,579
United States .....	5,700,234	5,171,646
Canada.....	7,154,731	2,183,624
Portugal .....	28,982	925,482
Spain .....	99,813	1,376,505
Belgium .....	70,307	1,807,931
Brazil .....	3,074	1,172,309
B. W. Indies .....	255,052	852,409
Italy .....	29,833	913,942

The principal imports are flour, textiles, coal, hardware, and provisions; the principal exports are codfish, cod and seal oil, pulp and paper, herrings, seal-skins, tinned lobsters, iron pyrites, and other minerals; the total value of the fishery products in 1934-35 was upwards of \$8,287,546.

## PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's. The total value of all fishery products exported for year ended

June 30, 1933-34, was \$7,600,000, and for year ended June 30, 1934-35, \$8,288,000. A total of 298,292 tons of standard newsprint was produced in 1934, valued at \$12,376,000, and in 1935 316,438 tons valued at \$13,202,000. The estimated value of agricultural products (including live-stock) in 1934 was \$7,500,000. Iron ore produced in 1934 totalled 506,616 long tons, and in 1935, 662,441 long tons. Shipments of iron ore for year ended June 30, 1934, totalled 352,351 long tons, valued at \$972,000, and in 1935, 629,179 long tons valued at \$1,735,000. Lead zinc concentrates mined and milled in 1934 totalled 442,670 short tons, valued at \$1,842,000.

## COMMUNICATIONS.

**Railways.**—There were 752 miles of railway open in 1935 and 56 miles of private line. The trans-insular line runs to Port-aux-Basques, *via* Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista and Hearts Content, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Communication between various points on the coast and Sydney, C.B., is maintained by a fleet of 10 first-class steamers.

**Posts and Telegraphs.**—There were 528 post offices in 1935 (200 of which were also telegraph offices), dealing with 10,589,000 letters and post-cards, 4,300,000 newspapers and books, and 270,000 parcels. There were also 84 landline offices, 15 wireless, and 10 combined landline and wireless offices; total 179. There are 4,269 miles of telegraph line and 1,298 miles of postal telephone wire. Postal revenue (1934), \$394,235; telegraph revenue (1934), \$134,364.36.

**Shipping.**—On Dec. 31, 1934, the Mercantile Marine of Newfoundland consisted of 2,065 sailing vessels of 82,315 tons, and 319 steam and motor vessels of 42,472 tons. In 1934-35 the tonnage of vessels entered and cleared at Newfoundland ports was 2,315,114 tons, of which 1,773,185 tons were British.

## TOWNS.

The CAPITAL, ST. JOHN'S (population 1935, 39,886; with suburbs, 54,386), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (2,215), Bonavista (4,022), Carbonear (3,367), and Twillingate (3,203).

## TRADE COMMISSIONER.

*Trade Commissioner in London*, D. James Davies, C.B.E., F.I.C., F.C.S., F.O.S. Office, 58, Victoria Street, S.W. 1.

## LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits on the north. The territory under the jurisdiction of Newfoundland has an area estimated at 120,000 square miles. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Grand Falls on the Hamilton River. The inhabitants are mainly Eskimos, engaged in fishing and hunting. There are no towns; the Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek have been purchased by Hudson's Bay Company.

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between  $10^{\circ} 41' 39''$  South latitude and  $113^{\circ} 9' 153'' 39'$  East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise gold, silver, copper, zinc, iron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium, opal, sapphires, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested.

*Climate.*—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

#### GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto. The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

## Governor-General and Staff.

*Governor-General.* His Excellency Brigadier-General the Right Honourable Lord Gowrie, V.C., G.C.M.G., C.B., D.S.O., born, July 6, 1872; appointed, Aug. 17, 1935; assumed office, Jan. 22, 1936. £9,050

*Military and Official Secretary,* Captain L. S. Bracegirdle, C.M.G., D.S.O., R.A.N.

*Private Secretary,* Brigadier-General A. T. Anderson, C.M.G., late R.A.

*Comptroller of the Household,* Capt. C. B. Ponsonby, 10th Hrs.

*Aide-de-Camp,* Capt. the Earl of Ranfurley, Notts Yeo.; Capt. P. V. W. Blacker, R. of O.

*Extra Aide-de-Camp,* Flight-Lt. S. J. Moir, A.F.C., R.A., A.F.R.

Executive Council.  
(Nov. 7, 1934)

*Prime Minister and Vice-President of the Executive Council,* Rt. Hon. Joseph Aloysius Lyons, P.O., C.H.

*Minister for Commerce,* Hon. Earle C. G. Page, M.D.

*Attorney-General,* Hon. R. G. Menzies, K.O.

*Minister for Defence,* Hon. Sir Robert Archdale Parkhill, K.C.M.G.

*Minister for External Affairs,* Rt. Hon. Sir George Foster Pearce, P.C., K.C.V.O.

*Treasurer,* Hon. R. G. Casey, D.S.O., M.C.

*Minister for Trade and Customs,* Hon. Thomas Walter White, D.F.C., V.D.

*Postmaster-General,* Hon. Alexander John McLachlan.

*Minister for Health and Repatriation,* Rt. Hon. William Morris Hughes, P.C., K.O.

*Minister for the Interior,* Hon. T. Patterson.

*Assistant Ministers,* Hon. Sir H. S. Gullott, K.C.M.G.; T. C. Brennan, K.C.; H. V. C. Thorby; and J. A. J. Hunter.

*British High Commissioner in the Commonwealth of Australia* (Canberra), Sir G. G. Whiskard, K.O.M.G., C.B.

COMMONWEALTH OFFICES IN LONDON,  
Australia House, Strand, W.C. 2.

*High Commissioner,* Rt. Hon. S. M. Bruce, P.O., C.H., M.C. £4,125

*Official Secretary,* S. G. McFarlane, C.M.G., M.B.E. 1,650

*Assistant Sec.,* V. C. Duffy, M.V.O. 756

*Commissioner-General for Australia in America* (vacant)

*Official Secretary,* D. McK. Dow, "Cunard Building," 25, Broadway, New York ... 1,091

*Commercial Representative for Australia in Canada,* L. R. McGregor, 36 Yonge Street, Toronto.

## THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The Senate contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1934, is made up of 28 for New South Wales, 20 for Victoria, 10 from Queensland, 6 from South Australia, 5 each from Tasmania and Western Australia, and 1 (entitled to debate but not to vote) from the Northern Territory. Members of the Upper and Lower Houses receive £825 per annum, with free railway passes.

*President of the Senate,* Hon. Patrick Joseph Lynch.

*Speaker, House of Representatives,* Col. Hon. George John Bell, C.M.G., D.S.O., V.D.

## THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 5 Judges, having original and appellate jurisdiction, subordinate to the Judicial Committee of the Privy Council.

*Chief Justice,* Rt. Hon. Sir John Latham, G.C.M.G. £3,500

*Judges,* Rt. Hon. Sir George Edward Rich, K.O.M.G.; Hon. Hayden Erskine Starke; Hon. Owen Dixon; Hon. Herbert Vere Evatt; Hon. Edward Aloysius McTiernan each 3,000

*Court of Conciliation and Arbitration,* Chief Judge, His Hon. George James Dethridge 3,000

*Judges,* Their Hons. George Stephenson Beeby; Edmund Alfred Drake-Brockman, C.B., C.M.G., D.S.O., V.D. each 2,500

*Conciliation Commissioner,* E. H. Coneybeer 1,250

*Federal Court of Bankruptcy, Judge,* Hon. Lionel Oscar Lukin 2,500

## DEFENCE.

## Navy.

The Australian fleet consists of the Cruisers *Australia*, *Canberra*, *Brisbane*, *Adelaide*, 1 sloop, 10 destroyers, seaplane carrier, and several auxiliaries. The personnel of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The sea-going forces of the Royal Australian Navy on February 15, 1934, consisted of 334 officers and 2,879 men. There is also a R.A.N. Brigade composed of members of the Citizen Naval Forces.

## Army.

From 1911 to 1929 the defence policy was based on the universal compulsory training of a Citizen Army, but from November 1st, 1929, the constitution of the forces on a voluntary basis was adopted. Under this system men from 18 to 40 years of age may be enlisted in the Militia Forces, and youths from 14 to 17 years in the Senior Cadet Corps. On March 31st, 1934, 29,674 were undergoing training.

## Air.

The permanent strength of the Australian Air Force in April, 1934, was 102 officers and 588 airmen; and of the Citizen Air Force, 40 officers and 261 airmen. The Air Force and the Civil Aviation expenditure (excluding war services) for the year 1932-33 was £457,245.

## FEDERAL FINANCE.

## The Premiers' Plan.

The Governments of Australia met in Conference (May-June and August-Sept., 1931) to consider what measures were possible to restore solvency and to avoid default. The National Income of Australia was £650,000,000 in 1927-28, falling to £564,000,000 in 1929-30, and a further fall to £450,000,000 was estimated for 1931-32.

The Premiers' Conference adopted a plan which combined all possible remedies in such a way that the burden fell as equally as possible on every one, and no considerable section of the people was left in a privileged position. The plan was adopted by the Conference as a whole, each part being accepted on the understanding that all the other parts were equally and simultaneously put into operation. It embraced the following measures:—

- A reduction of 20 per cent. in all adjustable Government expenditure, as compared with the year ending 30th June, 1930, including all emoluments, wages, salaries, and pensions paid by the Governments, whether fixed by statute or otherwise, such reduction to be equitably effected;
- Conversion of the internal debts of the Governments on the basis of a 2½ per cent. reduction of interest;
- The securing of additional revenue by taxation, both Commonwealth and State;
- A reduction of bank and Savings Bank rates of interest on deposits and advances;
- Relief in respect of private mortgages.

These proposals required the greatest effort in economy and taxation which the Conference considered it safe to attempt.

## REDUCTION OF EXPENDITURE.

The plan provides for Government economy on the basis of an immediate cut, averaging 20 per cent., for all Government wages and salaries below the level of 1929-30. To this will be added all saving that can be made from a strict scrutiny into the necessity of every item of Government expenditure.

The Commonwealth Budget for 1933-34 provided *inter alia* for substantial remissions of direct and indirect taxation; including further exemptions from Sales Tax and reduction of the rate of tax from 6 to 5 per cent., reduction of special tax on income from property from 10 to 5 per cent., reductions in the income taxation on Life Assurance and other companies, and partial restoration of Financial Emergency reductions in Invalid, Old-age and War Pensions, Public Service salaries and contributions to the Public Service Superannuation Fund. The total relief of taxation was estimated to be at the rate of £7·5 millions annually. At the same time the Government signified its intention of giving effect to that part of the report of the Tariff Board on the protective incidence of primage and exchange which applied to protected goods entitled to admission under the British Preferential Tariff. Further restorations of Public Service Salaries and modifications to legislation regarding Invalid and Old-age Pensions, Maternity Allowances and War Pensions, and additional relief from Sales Tax and Primage duties were provided for in the 1934-35 Budget of the Commonwealth Government.

## Commonwealth Finance.

Years.	Revenue.	Expenditure	Payments to States,†
	£	£	£
1929-30	77,143,387	78,614,392	9,489,344

## DEBT.

The total of the Public Debt for Commonwealth Purposes on June 30, 1934, was £393,050,777, including a War Loan from the British Government of £79,724,220, which is subject to a funding arrangement whereby the debt is to be extinguished about 1956 by annual repayments of 6%, of which £1 xs. 8d. per cent. is for reduction of principal. The British Government agreed to the suspension for the years 1931-32, 1932-33 and 1933-34 of the repayment of principal moneys due under this arrangement, and of the interest moneys for 1932-33 and 1933-34. Interest payments for 1931-32, which were suspended under the Hoover Moratorium are to be liquidated by 10 equal annuities from July 1, 1933, with interest at a rate to be determined. Adding the indebtedness of the States, viz., £829,508,021, the "face" or "book" value of the public debts of Australia amounted (June 30, 1934) to £1,222,558,798 (£183 per head of population), of which £(Aust.) 629,285,016 was

\* In addition, the following amounts were spent from loans for War Purposes and for Works—1925-26, £9,273,588; 1926-27, £9,428,570; 1927-28, £8,638,848; 1928-29, £8,231,147; 1929-30, £5,991,533; and 1930-31, £1,988,800. There was no direct loan expenditure on Works in 1932-33 and 1933-34, all such expenditure being made from revenue. Loan expenditure in 1931-32 was £3,450,337. Wheat Bounty £3,296,464 and Unemployment Relief £153,873, and in 1932-33 £561,595, including Wheat Bounty £32,807 and Unemployment Relief £1,155,698. Credits to Loan Fund included £821,910 from sale of Commonwealth ships.

† Ordinary expenditure of the year. The balance of receipts over this expenditure has been appropriated for the payment of Invalid and Old-Age Pensions.

‡ Excludes grants for relief to primary producers, £2,249,692 in 1932-33 and £2,999,105 in 1933-34.

§ Excludes Federal and Roads Grants.  
(a) Excludes Metropolitan Board of Water Supply and Sewerage. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals are exclusive of payments by Commonwealth to the States on account of interest on States' debts and disabilities grants and payments by the States to the Commonwealth in respect of interest on Soldier Land Settlement loans. (c) Preliminary figures in some cases.

redeemable in Australia, £85,547,325.462 in London, and £45,948,310 (dollars converted to £) on basis of \$4.8665 to £1 in New York.

In July and August, 1931, the internal debt of £558,000,000 was the subject of a voluntary conversion plan in connection with the "Premiers' Plan" for financial rehabilitation. Of the total internal bondholders, conversion applications totalled £510,000,000, while in the absence of notification of dissent, £31,000,000 was automatically converted. Dissents amounted to only £16,000,000, or less than 3 per cent. The conversion plan involved an interest reduction of 2½ per cent.

Conversion operations in London in 1933, involving £109,849,000, have resulted in an annual saving to the Commonwealth States of £1,847,000 in interest and £456,000 on Exchange.

**Banking.**—For the quarter ended June 30, 1934, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £386,795,289, and the Australian assets to £437,390,554. On June 30, 1934, the amount of deposits in the Savings Banks totalled £210,104,326, approximately £31 ros. per head of population. The Trading and Savings Banks have reduced their interest rates for deposits and advances in accordance with the "Premiers' Plan."

#### PRODUCTION AND INDUSTRY.

The estimated values of products:—

	1932-33.	1933-34.

Barley .....	405,000	7,959,000
Maize .....	304,000	7,494,000
Hay .....	3,081,000	3,583,000
Sugar Cane .....	329,000	4,898,000

#### Live Stock.

	1932.	1934.
Sheep .....	112,926,931	114,100,000
Cattle .....	12,783,137	13,512,000
Horses .....	1,765,437	1,763,000
Pigs .....	1,162,407	1,047,000

In 1932-33 Australia produced 1,061,672.628 lb. of wool (as in the grease), against 1,006,630,847 lb. in 1931-32; 419,674,803 lb. of butter; 36,933,306 lb. of cheese, and 65,365,534 lb. of bacon and hams.

**Mines and Minerals.**—In 1933 the value of gold produced was £6,406,069 (Australian currency); silver and lead, £2,570,262; copper, £531,153; tin, £540,331; coal, £5,975,900; value of all minerals produced in 1933. £17,651,202.

**Manufactures.**—In 1932-33 there were in Australia 22,330 industrial establishments, employing 370,727 hands; wages paid amounted to £59,416,436; value of plant and machinery, £120,549,857; of lands and buildings, £105,836,872; of materials used, £175,148,548; value added by manufacture, £119,072,247; and total value of final output, £304,697,868.

**Labour Statistics.**—In 1933 there were 356 Trade Unions, with 739,398 members, of whom 113,132 were women. The estimated total number of employed persons 20 years of age and over in 1933 was 1,344,290 males and 321,500 females. The number of unemployed members of trade unions averaged 25½ per cent. Employers' Associations (1931) number 547, with membership of 122,428. Retail Price Index No. for food, groceries and rent (4 and 5 rooms) (6 Capital Cities) 1933 (base 1923-1927=1,000) 768; including food, groceries and rent (4 and 5 rooms), clothing, fuel, light and other miscellaneous household expenditure (base 1923-1927=1,000) 804. Melbourne Wholesale Price Index 1933 (base 1911=1,000) 1,409. Nominal Weekly Wage Index No., Australia, 1933, males (base 1911=1,000=51s. 3d.) 1,584=81s. 2d. Number of industrial disputes in 1933 was 90 involving 30,113 persons in a loss of 111,956 working days and £95,048 in wages.

## COMMUNICATIONS.

**Railways.**—Total length of Government (and private) railways open for general traffic at June 30, 1933, private lines being included in the totals and shown in parentheses:—

State.	Miles open.
New South Wales.....	6,247 (83)
Victoria.....	4,746 (25)
Queensland.....	6,833 (267)
South Australia.....	2,580 (51)
Western Australia.....	4,615 (277)
Tasmania.....	786 (141)
Federal Trans-Australian.....	1,052 —
Central Australia.....	771 —
Federal Capital Territory.....	5 —
Northern Territory.....	317 —

Total..... 27,952 (844)

The *Trans-Australian* (Government) *Railway*, 4 ft. 8½ ins. gauge, connects Kalgoorlie, W.A., with Port Augusta, S.A. (1,051 miles) and so forms a link (including Kalgoorlie-Fremantle 387 miles) between Fremantle and Brisbane, Q., a total length of 3,384 miles.

The gross earnings of all Government lines in 1932-33 were £37,999,993, working expenses £27,523,473, and net earnings £10,476,520, being

at the rate of 2s. 11d. per train mile, and representing a return on the total cost (£325,531,319) of 3·22 per cent., as against 2½ per cent. in 1931-32. In 1932-33 passenger journeys numbered 314,839,977 and 26,921,700 tons of goods and live stock were carried, the train miles run being 63,557,257. The electrification of the Sydney suburban system is almost completed.

**Tramways.**—There are 622 miles of tramways in Australia, 574 miles of which are of electric, 22 of steam, 24 of cable, and 2 of horse traction. Extensive conversions to electrical traction have been made and more are in progress. The several Governments control 400 miles; municipal authorities, 186 miles; and the remaining 36 miles are operated by private companies and individuals. The total capital cost of tramways at June 30, 1933, was £25,468,793. The revenue of electric tramways for the year 1932-33 was £6,740,344, working expenses £4,981,258, and net revenue £1,759,086, or 5·63d. per car mile. 75,016,000 car miles were run and 598,499,000 passenger journeys recorded.

**Shipping.**—The entrances and clearances of vessels engaged in overseas trade at the various Australian ports in 1932-33 were: entered, 1,554 (c.933,324 tons); cleared, 1,560 (5,908,316 tons). Of the vessels entered, 903 of 3,479,461 tons were under the British flag and 651 of 2,453,863 tons under foreign flags.

The total including local shipping entering the ports of the capital cities during 1932-33 was: Sydney 6,315 vessels of 9,360,116 tons, Melbourne 3,100 (6,775,744), Brisbane 1,157 (7,637,774), Adelaide 2,924 (4,245,445), Fremantle 689 (3,460,481), and Hobart 614 (896,116). At December 31, 1933, there were 2,232 vessels of a total net tonnage of 326,886 on the shipping registers of the several States.

**Posts and Telegraphs.**—In year ended June 30, 1933, there were 8,014 post offices; there were 9,137 telegraph stations, with 157,099 miles of wire, transmitting 12,778,024 telegrams, receiving 579,958 and dispatching 539,121 cablegrams. A Beam wireless station, giving a service to and from Great Britain, was opened for traffic in April, 1927. At the end of year 1932-33, 487,662 *Telephones* were connected with 6,071 telephone exchanges; approximately 378,568,000 "local" and 29,210,983 "trunk line" calls were recorded for the year. 468,390 wireless broadcasting listeners' licences were issued in 1932-33.

**Motor Vehicles.**—At June 30, 1933, there were 617,232 motor vehicles registered in the several States. These comprised 438,499 cars, 72,896 motor cycles, and 105,837 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., in 1932-33 was £4,119,379. Motor omnibus services are extensively operating in urban areas.

**Civil Aviation.**—177 aeroplanes of various types were registered with the Department of Civil Aviation at June 30, 1933. During the year 85,346 flights of a total duration of 31,883 hours were effected: 2,587,389 miles were flown, and 71,104 passengers carried. 36,212 lb. of mail were carried by aerial mail contractors. Three subsidized companies are now operating machines over approved routes (5,529 air miles), while several unsubsidized companies also are operating commercial services over additional routes.

**CAPITAL.**—CANBERRA, the Capital of the Commonwealth, is 202 miles by rail from Sydney, N.S.W., and was acquired in 1911 from the State of N.S.W. for the Federal Capital. The original area was 912 sq. miles, increased in 1917 by the acquisition of 28 sq. miles at *Jervis Bay* for a Naval College. The total expenditure on the Federal Territory is about £12,000,000. Canberra contains the Parliament House, Commonwealth Offices and the nucleus of a University, and is connected with the N.S.W. railway system by a line ( $\frac{3}{4}$  miles) to Queanbeyan and by good roads to Melbourne and Sydney. At June 30, 1933 the population of the Federal Capital Territory amounted to 8,946, of which 7,325 were living in Canberra.

### THE NORTHERN TERRITORY.

The Northern Territory has a total area of 523,620 square miles, and lies between 12°S–138°E. East longitude as far as 25° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia. The headquarters of the Administrator are at Darwin in the far north, a Deputy Administrator being stationed at Alice Springs in the south, to exercise all the powers and functions of the Administrator in that portion of the Territory situated south of 20° S. lat., except the power to fix the commencement of Ordinances, and to make regulations under Ordinances in force in the Northern Territory. At the census of 1933 the population of the Northern Territory was:—males 3,376, females 1,434, total 4,860 (Rural 3,219, Urban 1,566, Migratory 75); the population as at June 30, 1934, was 5,045 (exclusive of full-blooded aboriginals).

The failure of agriculturists to practise diversification of crops and the absence of any experimental work have retarded the progress of agricultural development. Peanuts continue to be the only crop produced for market, and the production of this crop has considerably increased. This applies to the land situated north of 20° S. lat. Agriculture is practically negligible in that part south of 20° S. lat. Agricultural leases are granted in perpetuity at nominal rentals, which are subject to re-appraisal every 21 years. They may be converted to freehold at any time after commencement of lease, subject to easy and liberal conditions. Most tropical products can be grown, and the potentialities for pig raising and bacon curing are excellent. The staple industry is pastoral: cattle raising north of 20° S. lat. and cattle, horse, and sheep raising south of 20° S. lat. Until railways are constructed, however, little, if any, improvement is expected in the pastoral industry in that part north of 20° S. lat., owing to the distance between the eastern and southern Australian markets. The position south of 20° S. lat. is more hopeful, as a result of the extension of the railway from the Adelaide (South Australia) market to Alice Springs. The whole of the Territory is capable, under proper conditions, of carrying successfully and profitably a great expansion of the beef cattle industry. There are vast areas of magnificent country which could be so utilised. From the Queensland border to the Western Australian border, a distance of over 600 miles, there are many thousands of square miles of country splendidly grassed and growing edible shrubs. The chief rivers are Vic-

toria, Adelaide, Daly, Roper, South Alligator, McArthur, Liverpool, and the Goyder. The first six are navigable, from 40 to 100 miles from their entrance, for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources; mineral production is increasing, particularly in regard to gold, tin concentrates and mica, the latter of the finest quality. The increased price of gold has stimulated the search for that metal and has resulted in the discovery, within the past two years, of two previously unknown goldfields in Central Australia. Other minerals being produced are wolfram and tantalite. The railway extends from Darwin to Birdum in the N. (315 miles), and Alice Springs is now connected by rail with Adelaide.

Darwin occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin. Alice Springs is situated in the MacDonnell Ranges, and possesses a splendid climate.

### PAPUA.

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises a part of the New Guinea mainland situated between the meridians of 141° and 150° 50' E. longitude, and between the 5th and 12th parallels of South latitude; also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louisiades, the Conflict Group and the Laughlan Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Executive Council of nine members who, with five non-official members, form the Legislative Council. The white population in 1936 was 1,203. The official estimate of the native population is 275,000. On Dec. 31, 1935, 58,629 acres were under crops (47,642 coco-nuts, 9,591 rubber, 150 sisal hemp and 388 coffee). Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best known rivers are the Fly (650 miles long and navigable by steam launch for 500 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

## CAPITAL, Port Moresby.

Port Moresby is distant from Sydney, N.S.W., 1,800 miles; transit from Sydney 5 to 6 days.

## TERRITORY OF NEW GUINEA.

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 8°S., and in longitude between 141° E. and 156° E. It consists of the N.E. portion of New Guinea to 141° E. (70,000 sq. miles), *Bismarck Archipelago*; including New Britain, New Ireland, and islands adjacent to both (19,200 sq. miles), and the two northernmost *Solomon Islands* (4,100 sq. miles) (Bougainville and Buka). The principal river in N.E. New Guinea is the Sepik, which is navigable for 250 miles.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1935 there were 95,748 hectares under crops (coco-nuts, 92,767). The white population in 1936 was 5,881, and the Asiatic population 1,571 (estimated); the native population in 1936 was 500,040 (enumerated), including 36,927 working under indentures. (Natives living in areas not under complete Government influence are not included in the above total, as no reliable estimate can be made.)

## NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 53 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in July, 1936, was 1,142.

*Administrator*, Capt. Charles Robert Pinney, M.C.

*Official Sec.*, E. J. C. Stopp.

*President Advisory Council*, E. C. Robinson, M.B.E.

## ANTARCTICA.

An Order in Council dated February 7, 1933, assigns certain territories in the Antarctic to the Commonwealth of Australia.

The order begins by stating that "that part of the territory in the Antarctic Seas which comprises all the islands and territories other than Adélie Land, situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude, and the 45th degree of East Longitude is territory over which His Majesty has sovereign rights."

"It is expedient," it is added, "that the said territory should be placed under the authority of the Commonwealth of Australia," and it is ordered accordingly. The Order came into force by the passing of Act No. 8 of 1933 (Commonwealth of Australia) the Territory being accepted by the name of the *Australian Antarctic Territory*.

The exception of Adélie Land from the Order in Council is due to French claims based on rights of discovery.

Other parts of Antarctica are also British. One area is administered by the Falkland Islands and another by New Zealand. The territory administered by Australia adjoins that belonging to New Zealand.

## NAURU ISLAND.

This island is administered, under a Mandate from the League of Nations, by Great Britain, Australia and New Zealand (see p. 831).

• From Irish Free State Population Preliminary Report, 1936.

## States of the Commonwealth of Australia.

## NEW SOUTH WALES.

The State of New South Wales is situated almost entirely between the 29th and 36th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 310,372 square miles (inclusive of 940 square miles of Federal Territory)—i.e., more than five times that of England and Wales, and over three times the size of Great Britain and Northern Ireland.

POPULATION.—The population at December 31, 1935, was: Males, 1,344,339; Females, 1,313,327. Total, 2,657,666.

## Births, Deaths, and Marriages.

Year.	Births.	Deaths.	Marriages.
1932	44,905	21,357	17,362
1933	44,195	22,322	18,399
1934	43,335	23,474	20,210
1935	44,676	24,547	22,361

Vital Statistics.—Annual rate per 1,000 of population in 1935:—Births, 16.89; Deaths, 9.28; Marriages, 8.45. Deaths under 1 year per 1,000 births, 39.4.

## Religions.

The members of the Church of England in New South Wales, according to the Census of 1933, number 1,143,493; Roman Catholic 556,106, Presbyterian 257,522, Methodist 203,042, Congregational (Independent) 20,274, Baptist 29,981, Salvation Army 9,610, and Hebrew 10,305. There was no answer in respect of 297,034 persons.

## PHYSIOGRAPHY.

The Eastern or coastal district is traversed by the Great Dividing Range, the various portions of the Range in N.S.W. being (from N. to S.) Macpherson, New England, Liverpool, Main or Blue Mountain, Cullarin, Gourcock, Monaro and Muniong Ranges—the highest points being Mount Kosciuszko, 7,328 feet, and Townsend, 7,266 feet. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Bellinger, Nambucca, Macleay, Hastings, Camden Haven, Manning, Wollomba, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Turoos, Bega, Towamba, and Snowy Rivers. The western portion of the country is not so well watered, but immense reservoirs have been constructed for irrigation purposes, and there are many artesian bores. The Darling, 1,702 miles, and the Murrumbidgee, 981 miles, are both tributaries of the Murray, which has a total length of 1,609 miles, 1,203 miles forming part of the boundary between the States of New South Wales and Victoria. Other inland rivers are: Lachlan, Bogan, Macquarie, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is equable and very healthy. At the capital (Sydney) the average mean shade temperature is 63.2°. The mean temperature in the shade for the north coast is 67° to 68°, south coast 60° to 63°, northern tableland 56° to 60°, southern tableland 44° to 59°; north-western slopes, the mean annual temperature ranges from 62° to 68°; in the Central-western slopes 58° to 64°, south-western slopes 59° to 62°, and in the Western Plains and Riverina Division from 62° to 69°. The Seasons are as follows: Spring during September, October and November; Summer during December, January, and February; Autumn during March, April, and May; Winter during June, July, and August.

## GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. New South Wales federated with the other States of Australia in 1901. The executive authority of the State is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

## GOVERNOR.

Governor of New South Wales (vacant)

..... £5,000  
 Official Secretary, L. A. Robb, C.M.G.  
 Private Secretary, Captain H. B. Robinson,  
 D.S.O., R.N.

Lieutenant-Governor, Hon. Sir Philip Whistler  
 Street, K.C.M.G., born 1863.

## EXECUTIVE COUNCIL.

H.E. the Governor presides:

The Ministry:

(Re-constructed, Feb. 11, 1935.)

Premier and Colonial Treasurer, Hon. B. S. B. Stevens, M.L.A.

Deputy Premier and Minister for Transport, Lt.-Col. Hon., M. F. Bruxner, D.S.O., M.L.A.

Attorney-General and Vice-President of the Executive Council, Hon. H. E. Manning, K.C., M.L.C.

Secretary for Lands, Hon. E. A. Buttenshaw, M.L.A.

Colonial Secretary, Capt. Hon. F. A. Chaffey, M.L.A.

Minister for Education, Hon. D. H. Drummond, M.L.A.

Minister for Labour and Industry, Hon. J. M. Dunningham, M.L.A.

Minister for Agriculture, Hon. H. Main, M.L.A.

Asst. Minister in the Legislative Council, Hon. J. Ryan, M.L.C.

Minister for Local Government and Secretary for Public Works, Hon. E. S. Spooner, M.L.A.

Secretary for Mines and Minister for Forests, Hon. R. S. Vincent, M.L.A.

Minister of Justice, Hon. L. O. Martin, M.L.A.

Minister for Health, Hon. H. P. Fitzsimons, M.L.A.

Minister for Social Services, Hon. H. M. Hawkins, M.L.C.

Minister without Portfolio, Major Hon. J. B. Shand, V.D., M.L.A.

Allowances, amounting in the aggregate to £16,724 per annum, are payable to members of the Ministry.

N.S.W. GOVERNMENT OFFICES IN LONDON,  
 Wellington House, 125 Strand, W.C. 2.

Official Representative in London of the N.S.W. Government, A. E. Heath, C.M.G.

## THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. The Legislative Council, formerly a nominee chamber, was reconstituted as a result of a referendum carried in May, 1933. It consists of 60 members, elected jointly by both houses of Parliament. Membership is for 12 years, 15 members retiring in rotation triennially. The

present Council, constituted on April 23, 1934, comprises four groups of 15 members elected for three, six, nine and twelve years respectively. Members are not entitled to remuneration, but travel free on the State railways and tramways. The *Legislative Assembly* consists of 90 members. Each member of the *Legislative Assembly* receives £670 per annum, and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The *Women's Legal Status Act, 1918*, removed disqualification regarding the election of women to be members of the *Legislative Assembly*. Natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise. At the State General Elections in May, 1935, there were 769,220 male and 759,493 female electors, making a total of 1,529,713 enrolled and qualified to vote; of these 1,254,752 or 95·85 per cent. of electors in contested districts voted.

<i>President of the Legislative Council, Professor Hon. Sir J. B. Peden, K.O.M.G., LL.B., K.C.</i> .....	£8.8
<i>Chairman of Committees, Legislative Council, Hon. E. H. Farrar</i> .....	544
<i>Clerk of the Parliaments, C. H. H. Calvert</i> .....	792
<i>Speaker, Legislative Assembly, Hon. Sir Daniel Levy, B.A., LL.B.</i> .....	1,217
<i>Chairman of Committees, Legislative Assembly, W. W. Hedges</i> .....	839
<i>Clerk of Assembly, W. R. McCourt</i> .....	1,553
<i>Librarian, J. J. Quinn</i> .....	729
<i>Principal Shorthand Writer, E. G. M. Baker</i> .....	204
<i>Leader of Opposition, Hon. J. T. Lang (in addition to allowance as M.L.A.)</i> .....	8r4

#### THE JUDICATURE.

The judicial system includes a Supreme Court (with a Chief Justice and nine Puisne Judges), Land and Valuation Court, Industrial Commission, District Courts, Workers' Compensation Commission, Courts of Quarter Sessions, Petty Sessions and Children's Courts. Trial by jury has been in force since 1824.

#### Supreme Court.

<i>Chief Justice, Hon. Sir Frederick Richard Jordan, K.C.M.G.</i> .....	£3,500
<i>Puisne Judges, Hon. R. H. Long Innes; Hon. C. G. W. Davidson; Hon. P. Halse Rogers; Hon. E. Milner Stephen; Hon. K. W. Street; Hon. F. S. Boyce; Hon. A. V. Maxwell; Hon. H. S. Nicholas; Hon. Sir T. R. Bavin, K.C.M.G.</i> .....each	2,600
<i>President, Industrial Commission of New South Wales, His Honour Mr. Justice Browne</i> .....	2,600
<i>Members, His Honour Mr. Justice Webb; His Honour Mr. Justice Cantor; His Honour Mr. Justice Ferguson</i> .....each	2,600
<i>Land and Valuation Court Judge, His Honour Mr. Justice Maxwell (Deputy)</i> .....	2,600
<i>Ch. Judge in Equity, Probate Judge and Judge in Bankruptcy, Hon. R. H. Long Innes</i> .....	2,600
<i>Judge in Divorce and Matrimonial Causes, Hon. F. S. Boyce</i> .....	2,600

#### District Courts.

His Honour Judge White, His Honour Judge Barton, His Honour Judge Clancy, His Honour Judge Markell, His Honour Judge Coyle, His Honour Judge Thomson, His Honour Judge Curlew, His Honour Judge Sheridan, and His Honour Judge Nield .....each £1,500

(The several District Court Judges are also Chairmen of the Courts of Quarter Sessions and Judges of the Court of Review within their respective districts, and Judges of the Court of Marine Inquiry.)

<i>Crown Solicitor, John Ernest Clark</i> .....	1,965
<i>Workers' Compensation Commission Chairman, His Honour Judge Perdriau</i> .....	1,500

#### EDUCATION.

*Education.*—Education is compulsory between the ages of 7 and 14 years. It is non-sectarian and free at all State schools. The total enrolment in December Term, 1935, in 3,463 State schools was 380,610, and the average daily attendance 310,894. In addition to the State schools there were in 1935, 746 private colleges and schools, with 96,565 scholars, exclusive of many business and shorthand schools, and schools at private Charitable Institutions. The University of Sydney, with which 6 colleges are affiliated, including two Women's Colleges, was incorporated in 1850, and had 3,029 students (2,375 male and 654 female) in 1935. The State expenditure on Education was £4,161,649 in the year ended June 1935. The individual students at State Technical classes numbered 19,959 in 1935. Students attending the State Agricultural College and Farm Schools numbered 1,490.

#### FINANCE.

Year ended June 30th.	Revenue*	Expenditure*	Loan Liability
	£	£	£
1934.....	21,857,185	22,701,820	324,606,869
1935.....	21,439,531	22,685,307	337,101,269

Of the loan liability of New South Wales to Commonwealth at June 30, 1935, an amount of £161,585,120 was repayable in London, the annual interest being £6,556,806 at par, and £13,226,344 was repayable in New York, interest £641,854 at par. The balance, £162,289,805, was held in Australia, with an annual interest bill of £5,541,609.

*Banking, &c.*—There were (June 30, 1936) 14 banks, with total assets within New South Wales £165,347,581, including advances, &c., and Government securities £147,470,659; coin, bullion, Australian Government Notes, and cash with Commonwealth Bank, £12,165,494; and liabilities, £133,050,171, including deposits, £126,373,150. The savings bank deposits on June 30, 1936, amounted to £79,999,999.† The amount assured in New South Wales in Life Assurance Societies in 1935 was £126,853,311 Ordinary, and £29,902,160 Industrial. The membership of Friendly Societies was 204,626, and the funds at June 30, 1935, were £4,352,857. Members of Trade Unions at Dec. 31, 1934, numbered 294,691, the funds of 190 Unions being £413,154.

\* Exclusive of Government railways and tramways, harbours and waterworks.  
† Preliminary Figures.

*Co-operative Societies.*—There were 387 registered societies in existence at June 30, 1935. During the year ending on that date the sales of 136 rural societies amounted to £12,672,791, and the turnover of 74 trading societies amounted to £1,884,002. Building Societies advanced £443,725 to members.

*Shipping.*—Excluding coastal trade, 2,978 vessels entered ports of N.S.W. during the year ended June 30, 1935. During the year ended June 30, 1936, the shipping entries at Sydney, including State coastal, were 6,985 vessels of 10,479,774 net tonnage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips. At Newcastle there are a floating dock and four patent slips.

*Motor Vehicles.*—At June 30, 1936, there were 264,978 motor vehicle registrations, viz. 177,289 cars, 62,149 vans and lorries, 23,048 cycles, 528 omnibuses, 1,113 taxicabs and 851 traders plates.

*Railways.*—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 109 miles, are controlled, by the State. At June 30, 1935, the mileage of the State railways open for traffic was 6,164, the capital cost amounted to £141,726,212, and the net earnings in the year 1934-35 to £4,437,912. There were also 191 miles of State tramways, the capital cost being £9,092,893, and the net earnings during the year 1934-35 £712,827. Preliminary figures as to net earnings in the year 1935-36 are railways £5,110,653, and tramways £703,929.

*Aviation.*—Flying in Australia is subject to control of Commonwealth Government, which has surveyed routes and established landing places and afforded assistance to private organisations for the encouragement of civil aviation. In New South Wales at June 30, 1935, there were 72 registered aircraft and 264 licensed pilots. Commercial services are maintained from Sydney to Brisbane (twice daily each way\*), Newcastle (once daily each way\*), Bega (twice weekly each way), Nanomine (once weekly), Canberra (once weekly), and from Cootamundra to Charleville (once weekly each way) as part of the England-Australia Air Mail route.

*Roads and Bridges.*—The Main Roads Administration is controlled by a Commissioner in a department of the Ministry of Transport. The department co-operates with local governing bodies in the construction and maintenance of the main avenues of traffic throughout the State. There are 128,413 miles of roads in New South Wales. The total expenditure by the State Government and the Main Roads Department on roads, bridges, &c., other than on Sydney Harbour Bridge, in 1934-35 was £6,243,003 (including loan money). The construction of an arch bridge over Sydney Harbour was completed and the bridge opened for traffic in March, 1932. This bridge carries a roadway 57 ft. wide, two footways each 10 ft. wide, and four lines of railway, of which two are being used as tramways. At mean high water there is a headway of 17½ feet. At June 30, 1935, the Government expenditure in connexion with the bridge amounted to £10,083,282. Of this sum £1,352,292 had been expended on resumptions £2,329,740 on approaches, &c., and £4,810,516 was paid to contractors for main bridge and

steel approaches and £1,495,367 capitalized interest and exchange. The cost of the bridge is being defrayed partly by a levy of ¼d. in the £ on the unimproved capital value of properties in adjacent local areas, and partly by charges and tolls in respect of traffic (except pedestrian) across the bridge.

*Posts, Telegraphs and Telephones.*—The postal, telegraphic, telephonic and radio services are administered by the Commonwealth Government. At June 30, 1935, there were 2,451 post offices in New South Wales. The postal matter carried during 1934-35 included 317,493,200 letters and postcards, 2,805,726 registered letters, 3,645,100 parcels and 70,618,100 newspapers. During the year ended June 30, 1935, 5,088,853 telegrams were despatched to places within Australia, and 332,859 cablegrams were despatched, and 324,575 received. The telephone line connections numbered 150,527. In June, 1936, there were 4 National Broadcasting Stations in New South Wales and 18 stations operating under license. The number of broadcast listeners' licences was 315,731.

#### TRADE.

The overseas imports of merchandise into New South Wales during 1935-36 (preliminary figures) were valued at £Stg. 34,762,000 (estimated Australian currency value £A43,540,000). Overseas exports of merchandise were £A42,400,000 (estimated British currency value £Stg. 33,853,000). In addition, bullion and specie amounting to £Stg. 1,943,000 was imported, and £A4,467,000 exported. Chief exports (in Australian currency) were wool £22,113,765, wheat £4,210,925, flour £1,720,655, butter £1,523,932, meats £1,789,442, hides and skins £2,496,810, lead £1,205,947, and iron and steel £496,110.

#### PRODUCTION AND INDUSTRY.

*Agriculture* is one of the principal industries of New South Wales; 5,684,558 acres, excluding 3,430 acres double-cropped, were under cultivation during the year ended Mar. 31, 1935, producing 48,678,000 bushels of wheat, 3,238,590 bushels of maize, 3,856,680 bushels of oats, 1,888,430 bushels of rice, besides other kinds of grain, with 46,033 tons of potatoes, 1,004,761 tons of hay, and 2,052 cwt. of dried leaf tobacco. Sugar-cane to the extent of 227,424 tons was crushed; and 1,539,274 gallons of wine, 933,165 cases of bananas, and 18,701 cases of pineapples obtained; almost every kind of fruit and vegetable is grown. The total area under wheat in the year 1934-35 was 4,190,057 acres, of which 3,893,000 acres were harvested for grain, and 271,272 acres for hay, and 26,017 acres were fed off. The production of wheat was 48,678,000 bushels of grain and 342,135 tons of hay. It is estimated that 47,265,000 bushels of wheat for grain were produced in 1935-36.

*Land Alienation.*—The total extent of land alienated and in process of alienation from the Crown on June 30, 1935, was 68,541,008 acres, while the area of land held under lease, &c., from the Crown was 112,485,848 acres, and the balance, 17,009,664 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of Federal Capital Territory, being 198,036,480 acres.

*Live Stock.*—The country is admirably adapted for sheep-farming, the principal breed of sheep being the celebrated merino, which was introduced in 1797. On Mar. 31, 1935, there were

\*Except Sundays.

534,853 horses, 1,173,763 dairy cows, 2,309,068 other cattle, total cattle 3,482,831; 52,104,000 sheep (1934), 397,535 swine, 27,358 goats, and 340 camels. In 1934 35, 494,981,000 lb. (stated as in the grease) of wool were produced, 146,106,328 lb. butter, 8,445,468 lb. cheese, and 19,667,619 lb. bacon and ham. The production of wool in 1935-36 was about 472,000,000 lb., and butter about 124,500,000 lb. During 1934-35 there were 133,818 persons permanently engaged on rural holdings of one acre and over, 126,408 being males, and 7,410 females.

*Values of Rural Industries.*—The agricultural production was valued in 1934-35 at £15,161,000, dairying and farm-yard produce at £12,885,000, and pastoral production at £23,931,000, a total of £51,977,000.

*Forests, Fisheries and Trapping.*—The production of these industries in 1934-35 was valued at £3,437,000; and 7,494 persons were engaged.

*Mining Industry.*—The goldfields were opened in 1851. The principal minerals are coal, copper, silver, lead, zinc, tin and iron. The total value of minerals won during 1935 was £10,583,792, exclusive of Portland cement £992,377, lime £47,777, and coke £802,887, coal accounting for £4,887,241, silver, silver lead and ore £3,189,388, and gold £A439,123 (Australian currency: £212,418 valued at Standard Rate). The value of the mining plant and machinery was £7,532,101. The mining industry gave employment to 17,864 persons during the year.

*Factories.*—In 1934-35 there were 8,254 factories. The average number of persons employed during the year was 175,033, of whom 127,114 were males and 47,919 females, the amount of £29,513,000 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an amount of £208 10s. 9d. during the year and females £90 8s. 0d. The capital value of land, buildings and fixtures amounted to £47,937,922, and of plant and machinery £50,454,000. The full capacity of the machinery was 1,518,815 h.p., including steam, 916,048 h.p.; gas, 12,694 h.p.; electricity, 496,221 h.p.; water, 21,743 h.p.; oil, 72,109 h.p. The power actually used was, on the average, 869,009 h.p. The value of output was £154,433,000; materials used, £87,056,873, and fuel consumed (including motive power rented), £5,905,307; the production, i.e., value added to raw materials, was £61,430,000. Large iron and steel works with subsidiary factories are in operation at Newcastle and Port Kembla in proximity to the coalfields. The products include iron and steel of various grades, pipes, boilers, steel wire and wire netting, copper wire, copper and brass cables, and spun cast-iron pipes. The production in 1934-35 was pig-iron 698,493 tons, and lugot steel 696,861 tons.

The total value of the production of the primary industries in 1934-35 was £62,653,000, making, with factory production, a total for all industries (as far as it is recorded) of £124,083,000, which is equal to £47 2s. 0d. per head of population.

#### LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,400 sq. miles in the sparsely-populated western division, the State is divided into 177 municipalities and 139 shires, governed by councils which are elected

triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is mainly on the unimproved capital value of land, which in 1935 was £168,359,000 in municipalities, including the city of Sydney, and £141,789,000 in shires.

The total income of the local governing bodies was £14,780,019, and the expenditure on works and services, &c., £13,675,357.

#### TOWNS.

SYDNEY, the chief city and capital, stands on the shores of Port Jackson, with a water frontage of 188 miles; the depth of water at the Heads is not less than 80 feet, and at the wharves up to 40 feet. There are extensive facilities for handling cargo, and for storing and loading grain in bulk or bags; also for replenishing coal and oil bunkers. For 20 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the port is 14,284 acres, or about 22 square miles, of which approximately one half has a depth of not less than 30 feet; the rise and fall of the tide is from three to six feet. The city comprises 3,244 acres or approximately 5 square miles, and contains a population of 87,570 (Dec., 1935); or, including suburbs, a population of 1,254,780. In addition to the Government buildings, there are the University and Colleges, National Art Gallery, museums, botanic gardens, zoological gardens, free public libraries, observatory, conservatorium of music, two cathedrals, numerous churches and some large public hospitals. The parks within the metropolitan area are 93,966 acres in extent, and include the National Park which measures 33,807 acres, Kuring-gai Chase 35,300 acres, Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park 252 acres. Other towns are Newcastle (with suburbs), 107,100; Broken Hill, 26,820; Lithgow, 13,550; Maitland, E. & W., 12,500; Goulburn, 15,120; Katoomba, 6,720; Bathurst, 10,640; Lismore, 12,490; Albury, 10,990; Cessnock, 14,620; Wagga Wagga, 12,130; Liverpool, 6,560; Fairfield, 9,220; Grafton and South Grafton, 9,160; Wollongong, 12,300; Orange, 9,910; Tamworth, 10,410; Armidale, 6,380; Dubbo, 8,510; Parkes, 6,020; Forbes, 5,530.

Approximate time in transmission of mails by sea from London to Sydney, 31 days.

A weekly air service for transportation of passengers and mails between these centres provides for a journey of 13 days.

#### DEPENDENCY OF NEW SOUTH WALES.

LORD HOWE ISLAND (436 miles north-east of Sydney). Lat. 31° 33' 4" S., Long. 150° 4' 26" E. Area, 3,220 acres. Pop., Dec., 1935, 160. The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control. Office, Chief Secretary's Department, Sydney.

## QUEENSLAND.

This State, situated in lat.  $10^{\circ} 40' - 29^{\circ}$  S. and long.  $128^{\circ} - 153^{\circ} 30'$  E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 670,500 square miles (i.e., equal to more than  $5\frac{1}{2}$  times the area of the United Kingdom).

POPULATION.—At the Census of June 30, 1933 the population numbered 947,534 persons (497,217 males and 450,317 females). On June 30, 1936, the estimated population was 979,500.

## Increase of the People.

Year.	Births.	Deaths.	Marriages.
1932	27,367	7,813	6,415
1933	27,150	8,354	6,471
1934	27,350	8,192	7,635
1935	27,688	8,851	8,280

## Religion.

Since 1861 no State aid has been afforded to religion. At the Census of 1933 there were 331,972 Church of England, 185,889 Roman Catholics, 106,813 Presbyterians, 87,909 Methodists, 18,890 Lutherans, 14,991 Baptists, 8,669 Congregationalist, 1041 Hebrew, and 56,539 other Christians, all other (incl. no religion), 134,821.

## PHYSIOGRAPHY.

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the Kirby's Range divides the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1935 was  $69^{\circ}3'$ , the maximum and minimum shade temperatures being  $97^{\circ}5'$  and  $37^{\circ}8'$ ; mean barometer,  $30^{\circ}039$ . The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall in Brisbane during 1935 was 34.63 inches, and there were 111 wet days.

## GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 10 members.

## GOVERNOR.

Governor of Queensland, His Excellency Col. The Rt.-Hon. Sir Leslie Orme Wilson, G.C.S.I., G.C.I.E., C.M.G., D.S.O. £3,000  
Private Sec., C. H. Fielden 300  
Aide-de-Camp, Capt. R. C. de M. Leathes 300  
Lieut.-Governor, Hon. Sir James W. Blair, K.C.M.G.

## EXECUTIVE COUNCIL.

(H.E. the Governor presides.)

Premier, Chief Secretary and Treasurer, Hon. Wm. Forgan Smith, LL.D. £1,300  
Secretary for Public Lands, Hon. Percy Pease 1,000  
Secretary for Labour and Industry, Hon. Maurice Patrick Hynes 1,000

Secretary for Mines, Hon. James Stopford £1,000  
Attorney-General, Hon. John Mullan 1,000  
Secretary for Public Works, Hon. Henry Adam Bruce 1,000  
Secretary for Public Instruction, Hon. Frank Arthur Cooper 1,000  
Secretary for Agriculture and Stock, Hon. Frank William Bulcock 1,000  
Secretary for Health and Home Affairs, Hon. Edward Michael Hanlon 1,000  
Minister for Transport, Hon. John Dash 1,000

## AGENT-GENERAL IN LONDON.

Agent-General, L. H. Pike, A.C.I.S., J.P., Strand, W.C.  
Acting Official Secretary, T. J. Whittington.

## THE LEGISLATURE.

Parliament consists of a Legislative Assembly of 62 members, elected by universal adult suffrage.  
Speaker, Hon. George Pollock £1,000  
Chairman of Committees, Edward Joseph Hanson 700  
Clerk, T. Dickson 700

## THE JUDICATURE.

There is a Supreme Court, with a Chief Justice and six Puisne Judges; an Industrial Court, with a President and two Commissioners; and Inferior Courts at all the principal towns, presided over by Police Magistrates.

Chief Justice, Supreme Court, Hon. Sir James W. Blair, K.C.M.G. £2,250  
Senior Puisne Judge, H. D. Macrossan  
Puisne Judges, W. F. Webb; H. H. Henchman; E. A. Douglas; F. T. Brennan; R. J. Douglas each 2,000

## EDUCATION.

Primary Education is compulsory, secular and free. In 1935 there were 1,731 State schools, including 76 Provisional and 12 High schools in operation, with 4,137 teachers and an average daily attendance of 113,533 children; and in 1934, 210 private and 10 grammar schools, with 1,359 teachers and an average attendance of 27,002. A State-aided University was established during 1910.

## FINANCE.

Revenue, Expenditure, and Debt of Queensland for four years ended June 30:—

Year.	Revenue.	Expenditure.	Debt (Gross).
	£	£	£
1933 .....	13,396,644	14,951,088	114,530,855
1934 .....	13,859,385	14,987,916	117,817,352
1935 .....	15,280,021	15,844,633	118,846,753
1936 .....	15,488,991	16,230,806	122,647,000

Banking.—Assets of Joint Stock Banks at March 31, 1936, £45,015,399, liabilities £38,673,339. The deposits at the same date amounted to £36,724,423. The Commonwealth Bank of Australia also has a branch in Queensland with assets June 30, 1936, £8,872,377, and liabilities £9,296,399. Depositors' balances in Queensland branch of the Commonwealth Savings Bank at March 31, 1936, £26,891,957, averaged £27 12s. 3d. to each inhabitant. There were 425,150 operative accounts.

## PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 19,545,135, and 91,570 acres have been granted without payment; under a system of deferred payment, 8,354,161

acres more are in process of alienation, and an additional area including preferential pastoral leases of 232,226,880 acres leased out for sheep and cattle runs, 81,197,977 acres for grazing selections, 11,345,921 acres are held under occupation licence, 483,127 acres under gold-mining and mineral lease, 1,242,111 for special purposes, 5,598,715 acres perpetual leases and perpetual lease prickly pear selections, 20,976 acres held as auction perpetual leases, prickly pear leases 812,080 acres, forest grazing leases 20,720 acres, reserves and roads 21,299,826 acres, leaving 46,880,801 unoccupied. Large areas are devoted to maize and wheat, the average yield per acre over a period of 20 years being, maize 23'23 bushels and wheat 14'64 bushels, and oats and barley are grown. Both English and sweet potatoes are cultivated, as also are cotton, oranges, pineapples, grapes, bananas, coconuts, mangoes, peaches, plums, various English fruits, and tobacco. In the year 1935, 610,080 tons of sugar were produced. The live stock in January 1936 included 6,033,004 cattle, 18,060,093 sheep, 441,913 horses, and 304,888 pigs. Wool, meat, sugar and butter are the principal products.

**Forestry.**—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 6,111,335 acres. In 1934-5, the wealth produced by the timber industry of Queensland was about £3,183,000, and there were 4,377 hands employed in the sawmills and plywood mills. At June 30, 1935, the total area of reforestation plantations was 13,481 acres, and in addition 142,326 acres had been treated for natural regeneration by the State Forest Service, which employs 971 persons, and is engaged actively in timber farming and wood-trading operations. An area of 335,893 acres has been reserved for National Parks.

**Minerals.**—The total mineral output in 1935 was £2,954,948. There are rich deposits of gold, copper, tin, lead, silver, limestone, ironstone, and wolfram, while coal is found in several districts. The output in 1935 was—gold, £904,755; lead, £471,221; silver, £284,678; tin, £187,234; copper, £101,489; zinc, £68,863; limestone, £76,842; bismuth, £7,639; wolfram, £2,888; molybdenite, £1,953; gems, £1,805; ironstone, £677; marble, £635; fluor spar, £403; opal, £200; coal, £843,034.

**Commerce.**—The chief articles of export overseas, the produce of the State, in 1935-36 were: Wool, £7,870,668; meat, including extract, and bacon, hams, and pork, £2,683,606; hides, £149,086; skins, sheep, £73,996; skins, other, £44,801; tallow, £137,799; butter, cheese, £3,570,770; sugar, £2,157,324.

#### TOWNS.

**CAPITAL, Brisbane**, population 306,154 at Dec. 31, 1935, is situated on the Brisbane River, which is navigable by large vessels to the city, over 10 miles from Moreton Bay. The new Town Hall is a notable building, and there are fine Government and private buildings. There are two Cathedrals, a University, a Museum, Botanic Gardens, &c. The Greater Brisbane area (385 square miles) is controlled by a City Council presided over by a Lord Mayor.

The main ports, in their order along the coast, are Brisbane, Maryborough (11,734), Bandaberg (11,898), Gladstone (7,200), Rockhampton (30,000), Mackay (11,050), Bowen (2,800), Townsville

(27,865), Cairns (13,000), Port Douglas (200), Cooktown (550), and Thursday Island (1,484). Other towns are Ipswich (23,315), Gympie (8,100), and Southport (5,600), in the south-east; Toowoomba (27,415), and Warwick (7,000), on the Darling Downs; Mount Morgan (3,324), near Rockhampton; and Charters Towers (8,100), and Mount Isa (3,301), inland from Townsville.

Transmission of mails from London to Brisbane, approximate, 32 days. Air mail takes 12 days.

#### SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

**POPULATION.**—In 1936 the population numbered 587,206 (293,976 males and 293,230 females).

#### Increase of the People.

Year.	Births.	Deaths.	Marriages.
1932	8,521	4,957	3,635
1933	8,903	4,904	3,973
1934	8,459	5,493	4,310
1935	8,270	5,163	4,845

Birth rate 14'00, death rate 8'83, marriage rate 8'28 per 1,000 of population. Infantile mortality, 34'95 per 1,000 births, being one of the lowest rates in the world (see p. 634).

#### Religions.

Religion is free and receives no State aid. At the Census, 1933, the persons belonging to the principal religious denominations were as follows:—Church of England, 164,531; Methodists, 127,978; Congregationalists, 13,836; Baptists, 19,081; Lutherans, 26,027; Roman Catholics, 63,466; Presbyterians, 25,060; and Churches of Christ, 15,262.

#### PHYSIOGRAPHY.

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The north-western portion is partly desert, while the northern portion of the State, between Lake Eyre and 26° South latitude, is unpromising in comparison with the fertile land that surrounds the hill country of the east. Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

**Climate.**—The mean annual temperature at Adelaide is 63°, the winter temperature (July-August) averaging 53°, and the summer (November-March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from 97 years' record, is 21'17 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

#### GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

## GOVERNOR.

Governor of South Australia, His Excellency  
Major-Gen. Sir Winston Joseph Dugan,  
K.C.M.G., C.B., D.S.O. (1934) ..... £5,000  
Private Sec., Legh Winner, C.M.G., M.V.O.  
Lieut.-Governor, Hon. Sir George John  
Robert Murray, K.C.M.G., LL.M., born  
1863 (1916)

## THE MINISTRY (April 18, 1933).

(£7,750 is allotted as salaries to Ministers.)  
Premier and Treasurer, and Minister of Immi-  
gration, Hon. Richard Layton Butler.  
Attorney-General and Minister of Education,  
Industry and Employment, Hon. Shirley  
Williams Jeffries.  
Chief Secretary and Minister of Mines and of  
Health, Hon. Sir George Ritchie, K.C.M.G.  
Commissioner of Crown Lands and Minister of  
Repatriation, Irrigation and Afforestation,  
Hon. Malcolm McIntosh.  
Commissioner of Public Works and Minister of  
Railways and Marine, Hon. Herbert Sydney  
Hudd, M.C.  
Minister of Agriculture and Local Government,  
Hon. Albert Percy Blessing.

## AGENT-GENERAL IN LONDON.

Agent-General and Trade Commissioner  
in London, C. F. C. McCann, British  
Industries House, Marble Arch, W.1 £1,600  
Secretary, A. H. Greenham.

## THE LEGISLATURE.

Parliament consists of a *Legislative Council* of  
20 members elected for 6 years, one-half retiring  
every 3 years; and a *House of Assembly* of 46  
members, elected for a maximum duration of 3  
years. Election is by ballot, with universal adult  
suffrage for the House of Assembly for all British  
subjects, male and female; there is a small  
property qualification for electors to the Legisla-  
tive Council, who numbered 127,659 in 1935, those  
for the Assembly numbering 350,650.

President of the Legislative Council, Hon.  
Sir D. J. Gordon ..... £800  
Speaker of the House of Assembly, Hon.  
R. D. Nicholls ..... 800

## THE JUDICATURE.

*Law and Justice.*—The Supreme Court is pre-  
sided over by the Chief Justice and four Puisne  
Judges; there are Courts of Vice-Admiralty and  
Insolvency, as well as Local Civil Courts, with  
stipendiary magistrates and the usual Police  
Courts. The Supreme Court convictions for  
1934 totalled to 248, which is at the rate of 1 in  
every 2,400 of the population.

Chief Justice and Judge of Vice-Admiralty,  
Hon. Sir G. J. R. Murray, K.C.M.G., B.A.,  
LL.M. ..... £2,500  
Judges, Hon. J. M. Napier, LL.B.; Hon.  
Sir Angus Parsons, LL.B.; Hon. F. W.  
Richards, LL.D.; Hon. E. E. Cleland,  
LL.B. .... 2,000

## EDUCATION.

*Public Education (Primary, Secondary and  
Technical)* is provided by the State, and con-  
trolled by a responsible Minister; it is secular,  
compulsory, and free, except that from Jan. 1,  
1934, fees may be charged for secondary educa-  
tion of children over 14 years of age; there are  
1,115 State schools, with 3,374 teachers and 90,301  
scholars; the expenditure in 1935 was £989,984, in-  
cluding grants to University, Libraries, &c. The  
Government grants Exhibitions and Scholarships,  
carrying the holders to higher schools and the  
University. Private schools number 185, with

921 teachers and 14,554 scholars. There is an  
endowed University at Adelaide, founded in 1874,  
with 939 undergraduates, and 1,359 other  
students; all classes are open to women. A  
State School of Mines and Industries has also  
been established, and there are technical schools  
at 9 country centres and also special trade  
schools for apprentices and domestic art centres.  
The public library, museum, art gallery and local  
institutes are supported or assisted by the State.

## STATE FINANCE.

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1932	10,481,977	11,545,336	101,599,232
1933	10,160,712	11,169,610	103,707,332
1934	10,187,986	11,031,802	105,419,280
1935	11,001,578	10,965,353	105,349,536
1936	11,429,325	11,260,360	105,608,481

*Banking.*—There are 8 banking institutions in  
Adelaide, in addition to the Commonwealth  
Government Bank and the State Bank of South  
Australia, with about 400 branches and agencies,  
having a total average liability of £28,048,586  
and assets £31,136,788 in June quarter, 1936.  
The savings banks on June 30, 1936, had 622,470  
accounts open with £25,316,532 to their credit.  
Approximately 90 per cent. of the population  
have Savings Bank accounts.

## PRODUCTION AND INDUSTRY.

*Land Tenure.*—Of the total area of the State  
(243 million acres); 11 million acres have been  
sold; 5 million have been alienated by the  
Crown under systems of deferred payment; 102  
million acres are held under pastoral leases and  
19 million under other miscellaneous leases.

*Agriculture.*—The total area cultivated is  
7,500,000 acres—under wheat 3,000,000 acres, hay  
570,000, oats 300,000, barley 400,000, clover,  
lucerne and green forage 400,000, orchards and  
vineyards 82,000, with 2,500,000 acres lying fallow.  
Wheat produced 31,500,000 bushels, barley  
6,500,000 bushels. Oranges, lemons, apples,  
apricots, peaches, and all stone fruits and  
olives are successfully grown, and fruit drying  
is profitable. There were 53,000 acres of  
vines, with an average annual production of  
11,000,000 gallons of wine; 160,000 cwt. of currants,  
and 210,000 cwt. of raisins. Considerable quan-  
tities of fruits (fresh and dried) and also wine are  
annually sent to overseas countries, principally  
the United Kingdom and the other Australian  
States. Brandy and other spirits are also pro-  
duced. The land is also very suitable for the  
growing of all kinds of root crops and vegetables.

*Live Stock* (Dec. 31, 1935).—There were  
7,946,000 sheep, cattle 335,000, horses 197,000,  
pigs 86,000. Wool production, 81,000,000 lb.

*Minerals.*—Silver, lead, manganese, bismuth,  
iron, gypsum, salt, phosphate rock, coal, &c.,  
are found, the total mineral output being valued  
at £2,700,162 (1935). £33,000,000 of copper  
have been produced since the foundation of the  
State, but production has not been profitable  
for some time.

*Manufactures.*—In 1935 there were 1,803  
factories, employing 33,497 hands, the gross value  
of the output being £25,699,172, and the wages  
paid £5,733,865. Plant, machinery, land, and  
buildings were valued at £17,241,273.

*Value of Production, 1934-35.*—Crops, total  
value, £9,982,418, average per head, £17;  
pastoral, £3,852,854; minerals, £1,739,478;

dairying, £1,545,320; poultry, fisheries and game, forestry, &c., £1,761,787. Gross value of primary production, £18,881,762, total net value £21,650,455.

*Trade and Commerce Oversea, 1934-35.*—The total value of the Imports in Sterling was £3,965,808 (U.K. £1,649,250, or 43 per cent.; other British countries £756,771, or 20 per cent.; foreign countries £1,437,756, or 37 per cent.). The total value of the Exports in Australian Currency was £11,834,784 (U.K. £7,297,021, or 62 per cent.; other British countries £987,911, or 8 per cent.; foreign countries £3,549,852, or 30 per cent.). In 1935-36 the imports were £486,541,942 and exports £15,348,163, consisting of breadstuffs £4,903,368; pastoral and dairying products £5,168,427; fruits and wine £1,628,227; minerals £3,416,355.

*Transport, &c.*—There are 3,776 miles of railway in South Australia, 156 miles of electric tramways, 46,000 miles of roads and several good harbours. On June 30, 1936, there were 73,601 motor vehicles in use, classified as 47,501 cars, taxi-cabs, &c., 16,836 lorries, trucks, &c., 9,264 motor cycles, and in addition there were 139 road tractors. There are 832 post offices in the State, and 818 telegraph stations and 50,512 telephones connected.

*Shipping (1934-35).*—Ships entered numbered 1,283, tonnage 4,974,058; British 1,045 (4,036,357 tons), foreign 238 (937,701 tons).

*Wireless.*—Broadcast stations 7, Listeners' licences 76,471.

#### TOWNS.

ADELAIDE, the chief city and capital, population (1935) 315,130, inclusive of suburbs within 10 miles radius. Other towns are Moonta (3,300), Kadina (3,650), Wallaroo (3,000); Port Pirie (12,500), and Port Augusta (3,450) at the head of Spencer Gulf, and Kapunda (2,000), Gawler (5,000), and Peterborough (3,600) on the line from Adelaide to the north, Victor Harbor (3,000) in the south, Mt. Gambier (6,600) in the south-east, and Port Lincoln (3,150) on Eyre Peninsula. Murray Bridge (4,350) and Renmark (4,350) on the River Murray.

Transmission of mails from London to Adelaide, approximate, 20 days by ordinary mail and 13 days by air mail.

#### TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, about 140 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33'—43° 39' S. lat. and 144° 39'—148° 23' E. long., and contains an area of 26,215 square miles.

*POPULATION.*—On March 31, 1936 the estimated population numbered 231,209 (117,229 males and 113,980 females).

Year.	Birth Rate.	Death Rate.	Infant Mortality.	Marriage Rate.
1932 .....	19'78	8'90	41'2	6'64
1933 .....	19'93	9'60	41'1	7'13
1934 .....	19'51	10'23	42'3	7'32
1935 .....	19'41	10'25	51'8	8'16

#### Religion.

All religions are free. In 1933 there were 105,228 members of the Church of England, 33,189 Roman Catholics, 26,470 Methodists, 13,194 Presbyterians, 3,963 Congregationalists and Independents, and 4,666 Baptists.

#### PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the island. At Hobart the mean annual temperature averages 54° 4', the mean temperature for Dec., Jan., and Feb. being 61° 5', and that of June, July, and Aug. 46° 9'. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

#### GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, *q.v.* The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of responsible Ministers.

#### GOVERNOR.

*Governor of Tasmania, His Excellency Sir Ernest Clark, K.C.B., C.B.E., born 1864 (1933).*

*Lieut.-Governor, Hon. Tasman Shields, LL.B. (1936)*

*THE MINISTRY (June 22, 1934).*

*Premier, without Portfolio, Hon. Albert George Ogilvie, K.O.*

*Treasurer, Hon. Edmund Dwyer-Gray.*

*Attorney-General and Minister for Education, Hon. Eric James Ogilvie.*

*Chief Secretary and Minister for Transport, Hon. T. D'Alton.*

*Lands, Works and Mines, Hon. T. H. Davies, D.S.O.*

*Agriculture and Forestry, Hon. R. Cosgrove.*

*Honorary Ministers, Hon. J. F. Gaha, M.L.C. (Health); Hon. J. McDonald, M.L.C.*

#### AGENT-GENERAL IN LONDON.

*Acting Agent-General in London, H. W. Ely, I.S.O., J.P.*

*Address, Australia House, Aldwych, W.C.2.*

#### THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years; and a *House of Assembly* of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

*President of the Legislative Council, Hon.*

*W. B. Propsting, C.M.G.*

*Speaker of House of Assembly, Hon. D.*

*J. O'Keefe.*

*Clerk of the House, Henry McPherson.*

#### THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

*Chief Justice, Hon. Sir H. Nicholls, K.C.M.G. (b. 1868) £1,800*

*Puisne Judges, Hons. H. Crisp; A. J. Clark each 1,500*

Solicitor-General, P. L. Griffiths, K.C. ....	£950
Registrar Supreme Court, A. G. Brammall	730
Recorder of Titles, A. A. Richardson .....	775

## EDUCATION.

Primary education is compulsory, secular, and free, there being 506 State schools in 1934, with 37,354 children on the registers. Secondary education is also provided by the State (5 high schools with 1,387 scholars), and by private endowment. There is a University at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

## FINANCE.

Year.	Revenue.	Expenditure.	Debt.
1932-33 ...	£2,522,191	£2,577,407	£23,708,532
1933-34 ...	2,698,224	2,746,099	23,767,268
1934-35 ...	2,872,148	2,991,259	23,835,354
1935-36 ...	3,117,602	3,247,288	24,418,156

Banking.—June 30, 1936, the banks of issue had total deposits £8,383,000; the savings bank deposits were £6,818,000.

## PRODUCTION AND INDUSTRY.

*Agriculture and Live Stock.*—Of the total area of 16,778,000 acres there were, in 1934-35, 292,000 acres under crops. The principal crops are apples, potatoes, hay, and other fruit, followed by hops, peas, oats, green forage and wheat. The live stock included 261,588 cattle, 2,038,450 sheep, 40,291 pigs, and 30,662 horses. The wool production was 14,025,000 lb. The butter produced amounted to 10,689,043 lb.

*Electrical Energy.*—The Hydro-Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State, the capacity of the installation being 81,000 h.p. The advantage of cheap power is steadily attracting new manufacturing industries.

*Forestry.*—Timber reserves total 950,000 acres. Area held under lease or forest permits for saw-milling, logging, &c., 239,000 acres. The amount of timber milled for 1934-35 was 67,019,024 super feet, exclusive of piles, poles, fencing, and for practically all sleepers. The utilisation of forest waste for the production of wood-pulp has, after long investigation, been brought within the scope of business operations. A company has been formed with options over large areas, and there is every prospect of an early commencement of manufacturing operations.

*Minerals.*—The chief minerals produced are copper, tin, silver, lead, coal, the value of all minerals produced in 1935 being £1,079,538.

*Manufactures.*—The chief factories for export are metallurgical, fruit preserving, woollen mills, cement, and confectionery; the net value of production in 1934-35 was £3,158,146, the capital invested in the 926 establishments being £8,764,000 in 1934-35.

## TOWNS.

CAPITAL, Hobart. Population (March, 1936), 62,740.

Other towns are Launceston (pop. 32,960), Devonport, Ulverstone, Burnie, and Queenstown. Transmission of mails, approximate, 31 days.

## VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th

parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 493 miles, its greatest breadth is about 290 miles, and its extent of coast-line is about 980 geographical miles, including the length around Port Phillip Bay, Western Port and Corner Inlet, the entire area being 87,884 square miles.

POPULATION.—The estimated population at March 31, 1936, was 1,846,844 (922,927 males and 923,927 females).

## Increase of the People.

Year.	Births.	Deaths.	Marriages.
1931	30,332	17,033	10,182
1932	27,464	16,805	11,744
1933	28,392	17,456	12,668
1934	27,888	18,648	13,862
1935	27,884	18,456	15,409

*Vital Statistics.*—Annual rate per 1,000 of population in 1935:—Births, 15·16; Deaths, 10·03; Marriages, 8·38. Deaths under 1 year per 1,000 births, 41·17.

## Religion.

There has been no State aid to religion since 1875. Members of the Church of England at the date of the census in 1933 numbered 626,172, "Protestants" 25,231, Presbyterians 276,699, Methodists 193,096, Baptists 31,427, Church of Christ 26,274, Independents 12,458, and Roman Catholics 315,516. The number of persons who did not state their religion was 235,556, an increase of 213,284 compared with the census of 1921.

## PHYSIOGRAPHY.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The Murray River which forms part of the northern boundary of Victoria is the largest river in the State, and its length along the Victorian bank is 997 miles. Melbourne, the capital city, stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

*Climate.*—The mean temperature, recorded at the Melbourne Observatory, over a period of 80 years, ended in 1935, was 58·4° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 140, and the average yearly rainfall was 25·72 inches.

## GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of 12 members.

Governor of the State of Victoria, His Excellency the Lord Huntingfield, K.C.M.G., born 1883 (1934).....£5,000  
 Controller, Lt.-Col. E. H. Pott, D.S.O., M.V.O.  
 Aides-de-Camp, Captain G. R. Barbour; Lieut. A. W. P. Robertson, R.N.  
 Hon. Aides-de-Camp, Major R. H. Nimmo;  
 Flight-Lieut. F. W. Thomas.  
 Official Sec., C. W. Kinsman, O.B.E.

## THE MINISTRY (April 6, 1935).

(The sum of £11,250 is allocated for Salaries of the Ministry.)

**Premier, and Treasurer,** Hon. A. A. Duustan, M.L.A.  
**Minister of Water Supply and in Charge of Electrical Undertakings,** Hon. F. E. Old, M.L.A.  
**Minister of Agriculture and of Mines,** Hon. E. J. Hogan, M.L.A.  
**President of the Board of Land and Works, Commissioner of Crown Lands and Survey, and Minister of Forests,** Hon. A. E. Lind, M.L.A.  
**Minister of Transport Attorney-General and Solicitor-General,** Hon. A. L. Bussan, M.L.A.  
**Chief Secretary,** Hon. H. S. Bailey, M.L.A.  
**Minister of Labour,** Hon. E. J. Mackrell, M.L.A.  
**Minister of Public Instruction and of Public Health,** Hon. Dr. R. J. Harris, M.L.C.  
**Commissioner of Public Works and in charge of Immigration,** Hon. G. L. Goudie, M.L.A.  
**Ministers without Portfolio,** Hon. G. J. Tuckett, M.L.C.; Henry Pye, M.L.C.; H. J. T. Hyland, M.L.A.

## AGENT-GENERAL IN LONDON.

**Agent-General in London, Brigadier The Hon. M. W. J. Bouchier, C.M.G., D.S.O., V.D.,** Victoria House, Melbourne Place, Strand, W.C.2.

## THE LEGISLATURE.

Parliament consists of two Houses—the *Legislative Council* of 34 members, elected for the 17 Provinces for 6 years, one-half retiring every 3 years, and the *Legislative Assembly* of 65 members, elected for a maximum duration of 3 years, for the 65 electoral districts, by universal adult suffrage. The electors (June 30, 1936) for the Council number 473,740, and those for the Assembly, 1,110,216.

**President of the Legislative Council,** Hon. Sir Francis Grenville Clarke, K.B.E. .... £750  
**Speaker of the Legislative Assembly,** Hon. W. H. Everard ..... 1,000

## THE JUDICATURE.

There are magistrates' courts, and general sessions and county courts; and a Supreme Court with a Chief Justice and five Puisne Judges.  
**Chief Justice,** His Honour Sir F. W. Mann, K.B. .... £3,000  
**Puisne Judges, Their Honours** J. R. Macfarlan, C. J. Lowe, C. J. Gavan Duffy, F. R. B. Martin (a vacancy) each 2,500  
**County Court Judges,** J. S. Wasley, H. C. Winneke, H. C. G. Macindoe, A. W. Foster, W. H. Magennis, J. A. Richardson, each 1,500  
**Chief Clerk of Supreme Court and Master-in-Equity,** M. M. Phillips ..... 1,200  
**Taxing Master for the Supreme Court,** E. H. Trebilco ..... 800  
**Crown Prosecutors,** C. H. Book, £1,250; R. M. Nolan, W. St. G. Sproule, M. L. Cussen ..... each £900  
**Crown Solicitor,** F. G. Menzies ..... 1,500

## EDUCATION.

**Primary Education** is compulsory, secular and free between the ages of 6 and 14, there being 259,750 children on the registers of the primary schools and 31,237 on the registers of the secondary schools in 1934, the average attendance being 71 per cent. in the primary and about 80 per cent. in the secondary schools. At registered schools which are not under State control, 69,792 pupils were in attendance at the 510 schools in 1934. There is a State-aided University at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newmau).

## FINANCE.

The revenue and expenditure and State Debt for five years are given as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1931-32	24,565,272	26,173,594	169,833,964
1932-33	24,905,985	25,747,486	171,399,031
1933-34	24,777,739	25,546,979	175,132,749
1934-35	25,805,557	25,955,754	174,160,663
1935-36	26,563,000*	26,678,000*	175,058,225

\* Preliminary.

**Banking, &c.**—There were (June 30, 1936) 13 banks (including Commonwealth Bank) with total assets £129,323,722, within the State, and liabilities £145,562,305. The savings bank deposits (including amounts deposited in the Commonwealth Savings Bank) at June 30, 1936, amounted to £73,890,120.

## PRODUCTION AND INDUSTRY.

**Agriculture.**—Of the 6,894,147 acres under cultivation in 1934-35, 2,458,583 were wheat crops and 506,638 oats, and 1,261,552 acres were cut for hay. In 1934-35, 1,276,176 gallons of wine were produced. The estimated value of production in 1934-35 was (including manufacturing values) £90,476,460. The area under cultivation in 1935-36 was 6,795,515 acres, of which 2,323,753 acres were under wheat crops, 505,623 under oats, and 1,240,326 under hay crops.

**Live Stock.**—There were in 1935, 951,849 milch cows, producing 147,651,179 lb. of butter and 10,095,139 lb. of cheese; and 1,133,231 other cattle, 16,783,631 sheep, 265,006 pigs, and 357,877 horses. There were at March 1, 1936, 987,676 milch cows, 1,103,570 other cattle, 17,457,291 sheep, 314,301 pigs, and 356,106 horses. The quantity of wool produced in 1934 was 150,945,884 lbs., and in 1935 162,573,452 lbs.

**Minerals.**—The gold production in Victoria, which had declined to 24,119 ozs. in 1930, has steadily increased each year since the year 1931; the amount produced in 1935 was 87,609 ozs. (£768,401), making a total since 1851 of 71,656,294 ozs. (£305,498,000). Other minerals raised consisted principally of coal (black and brown), kaolin, tin and gypsum.

**Trade and Industry.**—Wool, wheat, flour, butter, live stock, fruits, milk and cream and poultry are the staple productions of the State; and the manufactures (9,100 factories, &c., employing 169,691 hands in 1934-35) are mainly for home consumption. The export trade consists largely of agricultural and pastoral products. The value of wool, wheat, flour, butter, fruits (all kinds), meats, skins, and milk and cream exported during 1935-36 amounted to 90 per cent. of the total merchandise exported. The principal overseas imports of the State are apparel, textiles, manufactured fibres, machines and machinery, metals and metal manufactures, tea, timber, petroleum spirit, paper, stationery, &c., and drugs and chemicals.

Year.	IMPORTS. (British Currency.)	EXPORTS. (Australian Currency.)
	£	£
1932-33	21,516,988	29,809,418
1933-34	22,404,232	30,519,726
1934-35	26,345,073	28,119,827
1935-36	30,616,056*	34,684,766*

\* Subject to revision.

## CITIES AND TOWNS.

MELBOURNE, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum and large churches are the principal features of the city. Melbourne and suburbs cover an area of 125,926 acres and contained on Dec. 31, 1935, an estimated population of 1,008,300. Other cities are Geelong, 39,600; Ballarat, 38,000; Bendigo, 29,650; Warrnambool, 9,000; Mildura, 6,800. The chief towns are Wonthaggi, 6,600; Hamilton, 5,830; Shepparton, 5,780; Maryborough, 5,660; Horsham, 5,320; Castlemaine, 5,240, and Ararat, 4,930.

Melbourne, distant from London 11,267 miles. Transmission of mails, approximate, 30 days by sea, 13 days by air.

## WESTERN AUSTRALIA.

Includes all that portion of the continent west of 120° E. long., the most westerly point being in 112° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west; total area 975,920 sq. miles.

POPULATION.—At the Census of June 30, 1933, the population was 438,852 (233,937 males, 204,948 females), and on June 30, 1935, 445,692 (236,578 males and 209,114 females).

## Natural Increase of the People.

Year.	Births.	Deaths.	Marriages.
1930 .....	9,200	3,774	3,205
1931 .....	8,549	3,687	2,741
1932 .....	7,955	3,725	2,904
1933 .....	7,874	3,790	3,374
1934 .....	7,801	4,076	3,682

## Religions.

Census of 1933.—185,457 Church of England, 74,354 Roman Catholics, 44,521 Methodists, and 32,694 Presbyterians.

*Physical Features.*—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a sea-ward slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the King Leopold ranges into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils. The climate is one of the most temperate in the world. The total rainfall at Perth during 1934 was 40·61 inches, the average for the past 50 years 34·92. Of the total area two-thirds is suitable for pastoral purposes.

## GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible

government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1921; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

## GOVERNOR.

Governor of Western Australia, (vacant).  
*Lieutenant-Governor*, His Excellency Hon. Sir James Mitchell, K.C.M.G. (July, 1933).  
*Private Sec.*, Col. C. H. E. Manning, D.S.O., O.B.E.

## EXECUTIVE COUNCIL.

*Premier, Treasurer and Minister for Forests*, Hon. John Collings Willcock, M.L.A. .... £1,700  
*Lands and Immigration*, Hon. Michael Francis Troy, M.L.A. .... 1,500  
*Mines and Health*, Hon. Selby Walter Munsie, M.L.A. .... 1,500  
*Works and Water Supplies*, Hon. Harold Millington, M.L.A. .... 1,500  
*Education, Agriculture and Police*, Hon. Frank Joseph Scott Wise, M.L.A. .... 1,500  
*Employment and Labour*, Hon. Albert Redvers George Hawke, M.L.A. .... 1,500  
*Chief Secretary*, Hon. William Henry Kitson, M.L.C. .... 1,500  
*Justice and Railways*, Hon. Frederick Charles Lee Smith, M.L.A. .... 1,500  
*Honorary Minister*, Hon. Edmund Harry Gray, M.L.C. .... unpf.

## AGENT-GENERAL IN LONDON.

*Agent-General in London*, Sir Hal Pateshall Colebatch, C.M.G. *Offices*, Savoy House, 115-116, Strand, W.C. 2 ..... £2,000  
*Secretary*, J. C. Wade (acting) ..... 690

## THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

*President of the Legislative Council*, Hon. Sir John Waters Kirwan ..... £1,000  
*Speaker of the Legislative Assembly*, Hon. Alexander Hugh Panton ..... 1,000

## THE JUDICATURE.

There is a Supreme Court presided over by a Chief Justice and three Puisne Judges, which has complete jurisdiction in all criminal and common law matters. There are courts known as local courts which have limited civil jurisdiction. There are Courts of Session, dealing with criminal matters outside Perth, and there are Magistrates' courts and Children's courts.  
*Chief Justice*, Hon. Sir J. A. Northmore, K.C.M.G., LL.B. .... £2,300  
*Puisne Judges*, Hons. T. P. Draper, C.B.E., J. P. Dwyer (and 1 vacant) ..... each 2,000

## EDUCATION.

*Education.*—Education is compulsory and free, and 920 primary schools are under the control of the Minister of Education. In addition the Government has established a Training College, Technical Schools, a School of Mines, a School of Agriculture, and several Secondary Schools

(in the capital and the more important country centres), and subsidises a University. The total amount expended on education (from Revenue) during the year ended June 30, 1935, was £631,609; in addition, a grant of £25,674 was made to the University.

## FINANCE.

Revenue and Expenditure and gross public Debt for 5 years ended June 30:

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1932	8,035,316	9,593,212	79,707,953
1933	8,322,153	9,196,234	83,514,698
1934	8,481,697	9,270,609	85,847,802
1935	9,331,430	9,498,525	88,590,176
1936	9,406,490	9,662,150	...

**Banking.**—There were, including the Commonwealth Bank of Australia, 8 cheque-paying banks, formerly banks of issue, in the State on June 30, 1935, with total assets £28,038,783 and liabilities £19,922,815. The amount due to depositors in Savings Banks on June 30, 1935, was £10,929,010.

## PRODUCTION AND INDUSTRY.

**Crops and Live Stock.**—Of the total area (624,588,800 acres) 3,838,064 acres were under crops in 1934-35, wheat for grain accounting for 2,763,786 acres. On Dec. 31, 1934, the live stock included 912,016 cattle, 11,191,803 sheep, 98,093 pigs, 18,607 goats, and 161,660 horses. In 1933-34 there were 5,700 acres of vineyards, and 20,760 acres of orchards.

**Manufacturing Industries.**—There were on June 30, 1934, a total of 1,606 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was

16,154. The combined output of these establishments for 12 months ended June, 1934, was computed at £12,877,288, of which the "value added in the course of manufacture" amounted to £5,444,280.

**Forestry.**—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported. The quantity of timber cut during the 12 months ended June, 1934, is computed to have been 56,427,568 super feet.

**Minerals.**—The mines of the Coolgardie and adjacent goldfields, which cover a vast portion of the interior and extend to the 125th meridian, and of the northern fields, are being constantly worked, the production of gold being 651,338 fine ozs. in 1934. The total amount produced in the State from 1886 to June 30, 1935, is 40,970,802 fine ozs. Magnetic iron, lead, copper and tin ores and coal, bauxite and gypsum exist in large quantities.

## TOWNS.

**CAPITAL.** Perth. Population on Dec. 31, 1934, of Metropolitan area, including Fremantle, 213,828. Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 32,940), Albany (4,226), Kalgoorlie and Boulder (16,800), Bunbury (5,200), Cottesloe (5,910), Claremont (6,500), Geraldton (4,925), Midland Junction (5,410), Northam (4,816), Collie (3,785), and Subiaco (17,024).

Transmission of mails from London to Perth, approximate, 26 days (ordinary), 14 days (Air).

## GOLD AND SILVER PRODUCTION.

THE Annual Production of Gold, for the 28 years 1907-1934, is stated below from figures issued by the Bureau of the Mint, Washington, D.C., U.S.A. In 1934 the chief producing countries were (fine ounces valued at \$35 per oz.) *Union of South Africa*, \$366,794,995; *Dominion of Canada*, \$103,938,800; *United States*, \$95,959,710; *Philippine Islands*, \$11,911,060; *U.S.S.R.*, \$149,196,950; *Mexico*, \$23,149,175; *Australia*, \$30,473,739; *New Guinea (Brit.)*, \$7,648,795; *New Zealand*, \$5,608,680; *Southern Rhodesia*, \$24,190,320; *Belgian Congo*, \$11,808,650; *Japan*, *Chosen (Korea)*, \$12,949,685; *British India*, \$11,276,755; *British West Africa*, \$13,449,380; *Colombia*, \$12,044,900. In 1934 the production of Silver was 190,859,421 fine oz. (\$92,153,803) (*Mexico*, \$35,799,436; *United States*, \$15,685,640; *Canada*, \$7,938,382; *Peru*, \$5,012,410; *Japan*, \$3,322,911; *Germany*, \$2,869,955; *British India*, \$2,808,875; *British West Africa*, \$1,641,438; *Australia*, \$5,363,480).

Year.	Fine Oz. Gold.	Value.	Year.	Fine Oz. Gold.	Value.
1907	19,077,260	\$412,966,600	1921	15,974,962	\$330,231,792
1908	21,422,244	442,837,000	1922	15,451,945	319,420,063

## THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. M. J. SAVAGE, *Prime Minister of New Zealand.*)

The Dominion of New Zealand is a small and wealthy country of a million and a half people situated in the South Pacific Ocean. It is a land of singular natural beauty, renowned for its mountains, lakes, fiords and forests. The Dominion extends for a length of over 1,000 miles north and south, and in addition has control over numerous islands with a large Polynesian population in the South Pacific. Its jurisdiction extends, in fact, from the Penrhyn Islands, some 8 degrees south of the Equator down to the Ross Sea in the Antarctic Circle.

With an enormous overseas trade—the highest per capita external trade in the world—New Zealand has developed an economy peculiarly sensitive to price fluctuations in the world's markets and one very largely dependent on products derived from the cow and the sheep. It has, moreover, one main market, the United Kingdom, where New Zealand is responsible for supplying two-thirds of the British imports of cheese, one-third of the imports of butter, half the imports of mutton and half of those of lamb. New Zealand also occupies fourth place amongst the world's wool producers.

In the past it was held that New Zealand's economic destiny lay solely in the expansion of her farming industries. Such a policy was mutually advantageous in that New Zealand's increasing export surplus enabled it to purchase increasing quantities of British manufactured goods, and at the same time provided the means of paying interest on the British capital invested in New Zealand. In more recent times the disastrous price-fall in the values of primary products in the British market have had a marked effect on the prosperity of this country. Similarly, the possibilities of market restrictions in the United Kingdom and in other overseas countries, have proved an equally serious and aggravating factor. New Zealand is by no means completely developed and her prosperity depends upon the expansion of her industries.

At the present time the Dominion is faced with the necessity of adopting one of two alternative policies. Either it must develop its manufacturing industries and thus provide internally the expanding market that is necessary for the prosperity of the people, or it must attempt to find further foreign markets for its primary products.

Manufacturing industries in the Dominion are concerned mainly with the processing of the principal primary products, but latterly more diversified forms of factory production have been developing. Indeed, apart from steel, cotton goods, woven rayon fabrics, porcelain and table china, rubber tyres, and complicated machinery, nearly everything made in the United Kingdom can now be made in New Zealand. The volume of New Zealand manufactures is, however, not large, the country is so obviously suited to agricultural and pastoral production, and it has always been the expressed policy of New Zealand Governments to give a very generous preference to the goods of the United Kingdom.

While New Zealand's attitude towards the United Kingdom is largely a matter of enlightened self-interest, it is, nevertheless, manifested in a nation-wide genuine feeling of affectionate loyalty to the British Crown and the Mother country. The people of New Zealand, both white people and Maoris, are proud of their membership of the British Commonwealth.

New Zealand has long had the reputation of being a pioneer in the field of social legislation. The tradition and practice of State socialism has been more commonly accepted than it has in most other countries, and the advent of a Labour Government after the General Elections in 1935 has resulted in further and far-reaching changes in the economic and social institutions of this Dominion. It is a common conviction in the Dominion to-day that economic forces must be operated consciously for the purpose of providing the highest possible standard of living consistent with the natural resources of the Dominion and the ability of the people to utilize them effectively.

## PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22' and 47° 18' South latitude and 162° East longitude - 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

*Geographical.*—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,340 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles long by 1½ wide) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

*Climate.*—New Zealand has a moist-temperate marine climate, but with abundant sunshine. A very important feature is the small annual range of temperature which permits of some growth of vegetation, including pasture, all the year round. Very little snow falls on the low levels even in the South Island. The mean temperature ranges from 58° F. in the North to about 49° F. in the South. Rainfall over the more settled areas in the North Island ranges from 35 to 70 inches and in the South Island from 25 to 45 inches. The total range is from 13 to over 200 inches. The number of rain days is generally in the neighbourhood of 160 in the North Island and between 110 and 140 in the South, except on the west coast. The amount of sunshine is generally over 2,000 hours per annum and ranges between 1,500 and 2,500 hours.

## GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

## Governor General and Staff.

*Governor-General and Commander-in-Chief of New Zealand*, His Excellency the Viscount Galway, G.C.M.G., D.S.O., O.B.E., b. 1882 (April, 1935). (Salary £5,000, and allowances £2,500) ..... £7,500  
*Military Secretary*, Major Arthur Frederic Purvis, M.C., late Scots Gds.  
*Official Secretary*, D. E. Fouhy.  
*Asst. do.*, J. H. L. James.  
*A.D.C.'s*. Capt. A. G. W. Heber-Percy, Gren. Gds.; Lieut. Sir Standish O'Grady Roche, Bt., R.N.

## \* EXECUTIVE COUNCIL.

His Excellency the GOVERNOR-GENERAL.

LABOUR CABINET (Aug., 1936).

*Prime Minister, Minister of External Affairs, Native Minister, Minister for Cook Islands, of Broadcasting, and in Charge of Native Trust, Legislative, Electoral, Audit and High Commissioner's Departments*, Rt. Hon. M. J. Savage, P.C.

\* Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £2 per diem when so engaged, but not during attendance at a session of the General Assembly. The honoraria of Ministers are: Prime Minister, £2,000 per annum; other Ministers, £1,170 per annum, plus £200 house allowance where no Government residence is provided. A "pooling" system is at present in operation whereby the salaries of Ministers are shared with co-opted members of the Government Party.

*Minister of Education, Health, Marine, and in Charge of Mental Hospitals, Police, and Inspection of Machinery Departments*, Hon. P. Fraser.

*Minister of Finance, Customs, Marketing, Stamp Duties, and in Charge of State Advances, Land and Income Tax, Public Service Superannuation, Public Trust, Government Life Insurance, State Fire Insurance, and Census and Statistics Departments*, Hon. W. Nash.

*Minister of Industries and Commerce, Railways, and in Charge of Scientific and Industrial Research Department*, Hon. D. G. Sullivan.

*Attorney General, Minister of Justice, and in Charge of Prisons, and Registrar-General's*,

Departments and Patents, Designs, Trade-Marks, and Copyright Offices, Hon. H. G. R. Mason.

Minister of Labour, Immigration, and Employment, Hon. H. T. Armstrong.

Minister of Public Works, and Transport, and in Charge of Roads and Buildings, Hon. R. Semple.

Minister of Internal Affairs, and in Charge of Pensions, Museum, and Advertising Departments, Hon. W. E. Parry.

Minister of Mines, and in Charge of Printing and Stationery Department, Hon. P. C. Webb.

Minister of Agriculture, and in Charge of Friendly Societies, and National Provident Fund Departments, Hon. W. Lee Martin.

Minister of Lands, Commissioner of State Forests, and Minister in Charge of Land for Settlements, Scenery Preservation, Discharged Soldiers' Settlement, Valuation, and Tourist and Publicity Departments, Hon. F. Langstone.

Postmaster-General and Minister of Telegraphs, Defence, and in Charge of War Pensions, Hon. K. Jones.

Member of Executive Council without Portfolio, Hon. M. Fagan.

#### HIGH COMMISSIONER IN LONDON.

High Commissioner in London, W. J. Jordan, New Zealand Government Offices, 415 Strand, W.C. 2 (and allowance £1,000).....£2,000  
Secretary, E. T. Sandford.....1,055

#### THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 38 members; and a House of Representatives consisting of 80 members elected for 4 years. Four of the members are Maoris elected by the natives. Women have been entitled to vote since 1893, and to be elected Members of the House of Representatives, since the passing of the Women's Parliamentary Rights Act, 1919. Members of the Legislative Council receive £315 per annum, and of the House £450 per annum, in each case with travelling expenses and deductions for non-attendance.

Speaker of the Legislative Council, Hon. Sir W. C. F. Carncross ..... £720  
Speaker of the House of Representatives, Hon. W. E. Barnard (plus sessional allowance of £83 per annum and free sessional quarters) ..... 900

#### THE JUDICATURE.

The judicial system comprises a Supreme Court and Court of Appeal; also Magistrates' Courts, having both civil and criminal jurisdiction.

Chief Justice, Rt. Hon. Sir Michael Myers, P.C., K.C.M.G. .... £2,250  
Puisne Judges, Hon. Sir J. R. Reed, C.B.E., Hon. H. H. Ostler, A. W. Blair, D. S. Smith, R. Kennedy, A. Fair, J. B. Callan, E. H. Northcroft.....each 2,000  
Judge, Court of Review of Mortgagees' Liabilities, Hon. H. F. Johnston .... 2,000  
Judge, Court of Arbitration, Hon. E. Page 2,000

In 1935, 40,094 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 38,337. In 1935 convictions (or sentences) in Supreme Courts were 1,148. Civil cases to number of 391 were tried, and 383 judgments were recorded for a total amount of £148,155.

#### POLICE.

On March 31, 1936, the strength of the Police Force was 1,226 of all ranks, equivalent to 1 for every 1,283 of the population. Average cost of police protection per inhabitant was, in 1935-36, 5s. 9½d.

#### LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards.

For cities or boroughs, any adult of either sex resident in the town may register as an elector. Non-resident ratepayers may also exercise the franchise.

For counties, adult ratepayers of either sex may register as electors, and may have one, two, or three votes according to the value of their property.

Revenue of local bodies, 1934-35 ..... £14,678,729  
Receipts not revenue, 1934-35 ..... 3,943,488  
Expenditure, 1934-35 ..... 18,744,891  
Net indebtedness, March 31, 1935 ... 59,551,850

#### PASSPORTS.

With certain exceptions, no person over 16 years is permitted to land unless in possession of a passport or some other document satisfactorily establishing his or her nationality and identity.

#### DEFENCE.

##### Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force, the New Zealand Air Force, and the Cadets.

Units of the N.Z. Permanent Forces are the Staff Corps, the Permanent Staff, the Artillery, the Permanent Air Force, the Permanent Army Service Corps, the Army Medical Corps, the Army Ordnance Corps, and the General Duty Section. The compulsory territorial system (including Cadets) is at present in abeyance, for reasons of economy. It has been replaced by a volunteer system on a reduced scale. Present strength of N.Z. Permanent Forces, 106 professional officers; establishment of N.Z. Permanent Staff, 110 (chiefly drill-instructors). Strength of (volunteer) Territorial Force on May 11, 1935, 787 officers, 11,512 other ranks. Expenditure on land defence in year 1935-36 was: Military Forces, £378,179; Air Force, £160,774.

##### Navy.

The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period (fixed at 12 years or until age 30), members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A Naval Board controls all matters relating to the Naval Forces, and is vested with the executive command of the Naval Forces. By Order-in-Council of the 26th June, 1921, it was provided that the ships and personnel shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy." Expenditure on naval defence 1935-36, £592,859. The New Zealand Division comprises the cruisers *Achilles* and *Dunedin*, the depot ship *Philomel*, the trawler *Wakakura*, and oil-tanker, *Nucula*. Two sloops, *Wellington* and *Leith*, are maintained by the British Government for duties in the South Pacific within the limits of the New Zealand station.

## FINANCE.

Year.	REVENUE.	EXPENDITURE.	GLASS DEBIT.
1932	£22,719,733	£24,860,552	£281,942,800
1933	22,568,521	22,528,379	282,622,958
1934	23,492,749	24,202,027	302,791,996†
1935	26,126,094	24,499,595	280,581,217
1936	26,172,368	25,890,568	282,561,098

**Banking.**—At the end of 1935 there were six banks (with numerous branches) doing business, two of which were New Zealand banks. Total assets, £63,008,626; liabilities, £65,981,412; value of notes in circulation at December 31, 1935, £7,615,000. The Reserve Bank of New Zealand commenced business on August 1, 1934. The note-issuing powers of other banks have been withdrawn and the Reserve Bank notes are legal tender.

Post-office and private savings banks had, at the close of the year 1934-35, 1,045,542 depositors, having £60,709,775 to their credit.

## EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1935) 2,486 public primary schools, with 6,048 adult teachers and 197,489 scholars; there are also 310 registered private primary schools, with 26,869 scholars, and, in addition, 138 village schools for the Maoris with 7,876 scholars. The higher education of boys and girls in the cities and large towns is carried on in 44 colleges and grammar schools, in 21 technical high and technical day schools. In addition there are 85 secondary depts. of district high schools, and 56 endowed and private secondary schools, and 10 secondary schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,818 students in 1935, and has power to confer degrees. Two Agricultural Colleges (Lincoln and Massey) with 287 students are affiliated to the University.

## PRODUCTION AND INDUSTRY.

**Agriculture and Forestry.**—The total area of the Dominion (excluding annexed islands) is 56,390,196 acres, and, apart from boroughs and holdings under 1 acre, 43,282,093 acres of this were in occupation in 1936, this acreage representing 84,547 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area of wheat for threshing in 1935-36 was 248,639 acres, giving a yield of 8,859,223 bushels. An area of 77,502 acres of oats was threshed, the yield totalling 3,302,642 bushels; while 227,480 acres were converted to chaff, hay, or ensilage. Other acreages in 1935-36 were: barley, 20,659; peas, 24,428; rye-grass, 66,625; and potatoes, 22,958. An area of 395,159 acres was sown in turnips and mangolds, exclusive of 59,905 acres of turnips and rape, grown together. Amongst the forest

productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine, and wool-packs are now being made also.

**Live Stock.**—The cattle at January 31, 1936, numbered 4,254,073; sheep, 30,039,133; pigs, 803,463; and horses, 276,170. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

**Manufactures.**—Statistics of factory production show (1934-35) 5,270 factories in operation, employing 79,358 hands. Value of output for year, £79,324,473.

**Minerals.**—Coal-mining is one of the largest industries, the output in 1935 being 2,100,000 tons, the approximate total output to the end of 1935 being 84,000,000 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, occurs in great abundance in Taranaki, and in the form of brown hematite at Onakaka and Parapara, near Nelson.

EXTERNAL TRADE (£ N.Z.).  
(Excluding specie.)

Year.	Imports.	Exports.	Total
1930...	£44,340,000	£44,941,000	£89,281,000

Germany .....	469,853	165,304
Belgium .....	204,742	647,212
Dutch East Indies .....	1,432,847	2,235

\* N.Z. produce only.

† Financial year ends March 31; railway and post and telegraph revenue and expenditure are excluded throughout, although Post and Telegraph profits are included in revenue from 1931-32.

‡ Includes Treasury Bills for £3,452,109 issued in anticipation of revenue; and £19,404,872 Treasury Bills issued under the Banks Indemnity (Exchange) Act, 1932-3. These latter were issued to finance purchase of surplus London exchange from trading banks in connection with exchange regulation. The Reserve Bank took over exchange regulation from August 1, 1934, and the above £19,404,872, although included in the Public Debt as at March 31, 1934, has been since paid off.

## COMMUNICATIONS.

**Railways.**—In March, 1936, there were 3,320 miles of Government railway lines in working order, and more under construction; and 189 miles of private lines, together with an excellent system of road service cars. The number of passengers carried on Government lines in 1935-36, including season-ticket holders, was 20,358,524, and in addition 3,239,609 on railway road motor services, while goods carried amounted to 6,188,805 tons. Operating revenue and expenditure were £6,243,519 and £5,523,193.

**Shipping.**—During 1935 the vessels entered inwards numbered 609 (tonnage, 2,571,122), and those entered outwards 627 (tonnage, 2,617,669) exclusive of coasting vessels.

**Posts and Telegraphs.**—The annual postal circulation was (1935), 296,974,198 letters and postcards, 34,547,494 newspapers, 191,066,262 books and packets, and 3,538,725 parcels, and the work is effected by 1,777 post-offices. At March 31, 1936, there were 12,109 miles of telegraph line, with 65,384 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 16,033,131.

## TOWNS.

**CAPITAL, WELLINGTON**, in the North Island.

The population of the principal towns at the Census of March 24, 1936, was as follows:—Wellington, 149,816; Auckland, 221,813; Christchurch, 132,530; Dunedin, 81,983; Wanganui, 25,761; Invercargill, 25,761; Palmerston North, 23,954; Napier, 18,689; Timaru, 18,843; New Plymouth, 18,503; Hamilton, 19,585; Hastings, 17,959; Gisborne, 16,037; Nelson, 13,571.

## THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper:—*North Island* and adjacent islets; *South Island* and adjacent islets; *Stewart Island* and adjacent islets, and *Chatham Islands*, between 43° 30' S. lat. and 175° 40'–177° 15' W. long. *Chatham Islands* have a population of 757, two-fifths of whom are Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 0' S. lat. and 172° 8' 8" E. long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in 50° 32' S. lat. and 166° 13' E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (45° 41' 15" S. lat. and 178° 43' E. long.) uninhabited, *Bounty Islands* (47° 43' S. lat., 179° 0' 30" E. long.) uninhabited, and *Snares Islands* (uninhabited.)

The following islands have been annexed:—

*The Kermadec Group*, between 29° 10' to 31° 30' S. lat., and 177° 45' to 179° W. long., includes Sunday, Macaulay, Curtis Islands, and L'Esperance, and some islets. At the Census of 1936 there were two persons on Sunday Island engaged in the cultivation of land.

*Cook and other Islands*, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Manke, Mitiaro, Manuae and Te Anu-o-tu, Takutea, Palmerston, Penrhyn, Manihiki, Rakahanga, Pukapuka, Niue, Suvarow, and Nassau. The population at the Census of 1926 numbered 13,877 (Cook Islands, Lower

Group 8,321; Northern Group 1,761; and Niue Island 3,795), all except 313 being Natives. At the Census of April 30, 1936, the population of the Lower Group was 10,243, and Niue Island 4,104. The returns for the Northern Group are not yet available. The chief exports are citrus fruits, bananas, tomatoes and copra. The trade is chiefly with New Zealand and the United States of America. The exports (1935) were valued at £65,675 (Cook Group, £53,599, Niue Island, £12,076) and the imports at £76,964 (Cook Group, £61,676, and Niue Islands, £15,288). Rarotonga is the chief island of the Cook Group, with a native population of 4,839, and a population other than native of 215. Niue (population 4,104) is the chief of the islands outside the group. The government is administered locally under the direction of New Zealand by Resident Commissioners at Rarotonga and Niue, with the assistance of Island Councils, including Native Arikis or chiefs. Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

*Resident Commissioner, Rarotonga*, H. F.

Ayson, C.M.G.

*Resident Comm., Niue*, W. M. Bell, C.B.E.

*Cook Dependency (1923).*

*Tokelau or Union Islands.* A group of atolls (population 1,198 in 1935), transferred in 1926.

The Mandated Territories are:—

*Western Samoa*, consisting of the islands of Savaii (703 square miles) and of Upolu, which, with its small adjacent islands, Apolima, Manono, Fanaatapu, Namua, Nuutele and Nuula is 430 square miles and had a population at the Census of 1926 of 40,229. 35,880 were Samoans, 1,079 Chinese and Melanesians, and 2,270 half-castes and Europeans. The remaining islands of the Samoan group belong to the U.S.A. Population of Western Samoa in 1936, 54,733. All the islands are mountainous, the highest peak rising to 6,094 feet. Upolu, the most fertile, contains the harbours of Apia and Saluafata, of which the former is the capital. In 1889 a very heavy sea set up by a cyclone wrecked three U.S.A. warships and the *Eber* and *Adler* of the German Navy, H.M.S. *Calliope*, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco-nuts (copra), cocoa, bananas and rubber are the chief products of the islands. The exports were valued in 1925 at £189,298 (copra £108,695, cacao £19,639, bananas £38,146) and the imports at £135,757.

*Administrator*, A. C. Turnbull (*Acting*).

*Nauru Island*, situated in longitude 166 degrees east, and 26 miles south of the Equator, is administered by the U.K., Australia, and New Zealand under a mandate from the Allied and Associated Powers, 1919, the first and second Administrators having been appointed by agreement by the Australian Government. The island has a population (April 1, 1935) of 2,696, of whom 158 are Europeans. There are valuable deposits of phosphates on the island (exports 1935, 695,882 tons). The value of the imports in 1934 was £97,684.

*Administrator*, Commander R. C. Garsia, R.A.N. (address, Nauru Island, Central Pacific).

## AREA AND POPULATION.

Provinces.	Area (English Sq. Miles).	Census of 1936. †		European Population, 1931.
		European.	Total.	
Cape of Good Hope .....	277,164*	789,293	3,522,231	749,231
Natal .....	35,284	189,867	1,940,552	177,449
Transvaal .....	110,450	815,537	3,301,016	696,120
Orange Free State .....	49,647	199,037	766,850	205,375
Union of South Africa ....	472,550*	1,993,734	9,530,649	1,828,175
Southwest Protectorate ....	322,393	30,505	357,382	24,115†

Of the European population of the Union, 1,012,868 were males, and 980,866 females. The increase in the European population of the Union (1931-36) was 9·1 per cent.

Increases in the Provinces, Cape, Natal and Transvaal, were as follows:—5·3 per cent., 7·0 per cent., and 17·2 per cent. respectively. In the Orange Free State there was a decrease of 3·1 per cent.

\* Includes Walvis Bay (430 sq. miles), which is administered by the Territory of S. W. Africa, but is an integral part of the Cape of Good Hope Province.

† 1926 figures.

‡ Preliminary figures.

## Births, Deaths, and Marriages of European Population.

Number.				Rate per Thousand.			
Year.	Births.	Deaths.	Marriages	Year.	Births.	Deaths.	Marriages.
1932	44,944	18,542	15,408	1932	24·17	9·97	8·29
1933	44,519	17,666	16,709	1933	23·55	9·35	8·84
1934	44,878	18,537	19,890	1934	23·44	9·68	10·39
* 1935	48,176	20,762	20,509	1935	24·78	10·68	10·60

\* The figures for 1935 are merely provisional, except those for marriages.

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

## PHYSIOGRAPHY.

*Boundaries.*—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50' - 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

*Relief.*—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwart Berg* and *Lange Berg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggenveld* and *Nieuwveld* to the north is the Great Karroo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooie Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

*Rivers.*—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensberg and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

## HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1488 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. In 1497-8, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels until about 1511, and subsequently also by those of England and the Netherlands, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

*Natal* derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1838 and 1840 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

*Delville Wood.*—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

## GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports and Harbours are administered by Commissioners. The former debts of the Colonies now constituting the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Governor-General (*Cape Town and Pretoria*), The Right Honourable the Earl of

Clarendon, G.C.M.G. (1931) £10,000

Secretary, Rear-Admiral G. W. Halifax.

Comptroller, Capt. J. C. Windsor Lewis.

Administrative Secretary, J. H. Davis.

## EXECUTIVE COUNCIL.

(March 30, 1933.)

<i>Envoy Extraordinary and Minister Plenipotentiary, Washington, D.C., U.S.A., R. W. Close.</i>	
<i>Envoy Extraordinary and Minister Plenipotentiary—Paris, E. H. Louw.</i>	
<i>Envoy Extraordinary and Minister Plenipotentiary—Berlin, Dr. S. F. N. Gle.</i>	
<i>Commercial Counsellor for Northern Europe—Berlin, A. J. Bosman.</i>	
<i>Commissioner for the Union in East Africa—Nairobi, Col. Beresford Turner, C.M.G., D.S.O.</i>	
<i>Trade Commissioner, Montreal, D. de Wail Meyer.</i>	
<i>Trade Commissioner, Batavia, A. T. Breunau.</i>	
<i>Accredited Representative of the Union of South Africa to the League of Nations, D. Steyn.</i>	
<i>Hon. Trade Commissioners are also established at Rotterdam, Oslo, Genoa, San Francisco and Vancouver, and a Consul-General at Lourenco Marques (Major F. E. Pienaar, D.T.D., O.B.E.).</i>	
<i>Hon. Consul of the Union of South Africa, Gothenburg, G. Carlsson.</i>	
<i>Consul-General for the Union of South Africa, Hamburg, Capt. F. Brehmer.</i>	
<i>Hon. Commissioner of the Union of South Africa, Jerusalem, M. Haskel.</i>	
<i>Secretary, S.A. Legation, Brussels, E. F. Horn.</i>	
<i>Secretary, S.A. Legation, Stockholm, T. H. Bustace.</i>	
<i>Secretary, S.A. Legation, Lisbon, J. N. Theron.</i>	

## THE LEGISLATURE.

The Senate consists of 40 members. Eight are nominated by the Governor-General-in-Council

and 32 are elected, eight for each Province. Election for members is carried out according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat. Originally, under Section 24 of the South Africa Act, nominated Senators held their seats for a period of ten years, but this provision was amended by Act No. 54 of 1926, and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government. Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The House of Assembly consists of 150 elected members, 61 of whom represent the Cape of Good Hope, 16 Natal, 57 Transvaal, and 16 the Orange Free State. Members of both Houses must be British subjects of European descent. The total number of seats contemplated by the South Africa Act, §§ 32-33, is now reached, and the members assigned to each province will henceforth be based on a Union quota of European on all adults. The female franchise which was introduced under the provisions of Act No. 18 of 1930 is not utilised in the determination of the quota.

*President of the Senate, Sen. the Hon.*

*C. A. van Niekerk* ..... £1,200

*Speaker of the House of Assembly, Hon.*

*E. G. Jansen* ..... 2,000

## LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25. Each Council exists for a period of five years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

## Administrators of the Provinces.

<i>Cape</i> .....	<i>The Hon. J. H. Conradie</i>	£3,500
<i>Natal</i> .....	<i>The Hon. H. G. Watson, I.S.O.</i>	2,000
<i>Transvaal</i> .....	<i>The Hon. S. P. Bekker</i>	2,500
<i>Orange Free State</i> .....	<i>The Hon. C. T. M. Wilcocks</i>	2,000

## Provincial Secretaries.

<i>Cape</i> .....	<i>F. C. M. Voigt</i>	1,450
<i>Natal</i> .....	<i>A. E. Charter, O.B.E.</i>	1,450
<i>Transvaal</i> .....	<i>H. F. Pentz</i>	1,450
<i>Orange Free State</i> .....	<i>H. E. Irving</i>	1,450

## DEFENCE.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising:—

(i) *The South African Permanent Force*, which consists of:—(i) The South African Staff Corps. (ii) The South African Artillery. (iii) The South African Air Force. (iv) The South African Naval Service. (v) The South African Instructional Corps. (vi) The Special Service Battalion. (vii) The Pioneer Battalion. (viii) The South African Ordnance Corps. (ix) The South African Service Corps. (x) The South African Medical Corps. (xi) The South African Veterinary Corps. (xii) The South African Administrative, Pay and Clerical Corps. (2) *The Coast Garrison Force.* (3) *The Citizen Force.* (4) *The Royal Naval Volunteer Reserve.* (5) *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked

feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle. As an alternative citizens may enter for service in the South African Division of the Royal Naval Volunteer Reserve.

Provision is made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas, where facilities can conveniently be arranged.

The Union is divided into 5 commands. To each command has been allotted various units of different arms, to which the citizens entered for peace training are posted.

## EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922, a definition is given of the term "higher education." Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows:—The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*: (a) Education provided by universities and university colleges incorporated by law; (b) education provided by the South African Native College; (c) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education; (d) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (e) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses (c), (d) and (e) above, the Provinces have been relieved of all vocational education (technical, industrial and agricultural), and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following:—

1. *University of South Africa.*
2. *University of Capetown.*
3. *University of Stellenbosch.*
4. *University of the Witwatersrand.*
5. *University of Pretoria.*

II. Technical colleges which have been established under Act No. 30 of 1923 at Capetown, Durban, Witwatersrand, Port Elizabeth, East London, Pretoria, Pietermaritzburg, and Bloemfontein.

III. Industrial, trade, housecraft and agricultural schools (State and State-aided) at various centres throughout the Union.

IV. Child welfare and reformatories.

The average number of internal students at universities and university colleges for the calendar year 1935 was 7,892. The State expen-

ditute on higher education as above defined during the financial year 1935-36 was £903,321.

**Primary Education and Education other than Higher Education.**—The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State-aided. In Natal they are partly State schools and partly State-aided. In the Transvaal and Orange Free State they are in the main State schools. In all Provinces primary education is free.

**Number of State and State-aided Schools in the Union on Nov. 5, 1935.**—For European scholars, 4,672; for Non-European scholars, 4,419; total, 9,091.

**Number of Scholars and Teachers on Nov. 5, 1935.**—European scholars, 371,932; Non-European scholars, 497,948; total, 869,900. Teachers—In European Schools, 16,341; in Non-European Schools, 11,883.

**State Expenditure on Education in 1935-36.**—Cape, £3,830,922; Natal, £867,909; Transvaal, £3,001,327; Orange Free State, £922,401.

**1935.**—European, £279; Non-European, £1,070; total, £1,349.

**Number of Scholars.**—European, 23,737; Non-European, 42,417; total, 66,154.

**Number of Teachers.**—In European Schools, 1,345; in Non-European Schools, Europeans, 147; Non-European, 1,185; total, 2,530.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

**Superintendent-General of Education, Cape,** W. de V. Malan, B.A., Ph.D.

**Supt. of Education, Natal, F. D. Hugo, B.A.**

**Director of Education, Transvaal, G. A. C. Kuschke, M.A.**

**Director of Education, Orange Free State, S. H. Pellissier, B.A.**

### UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1935, are stated as under:—

Year.	Revenue.	Expenditure.
	£	£
1930-1931.....	28,563,005	24,249,960
1931-1932.....	27,740,746*	22,975,654†
1932-1933.....	28,441,852*	22,714,215†
1933-1934.....	37,624,903	27,281,728†
1934-1935.....	33,730,228	29,551,242†

\* Including primæ duty collected for the payment or part payment of export subsidies.

† Including export subsidies paid out.

### DEBT.

The Funded Debt of the Union at March 31, 1935, was £271,268,531 and the Floating Debt £2,846,870.

### PROVINCIAL FINANCE.

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925

Session of Parliament, and as from April 1, 1925, the sources of revenue available to the Provinces are:—

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province.

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) As from April 1, 1935, a special grant of £125,000 per annum to the Province of Natal, and £275,000 per annum to the Orange Free State Province is being made.

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans. Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31, 1924.

The ordinary Revenue and Expenditure for six years ended March 31, 1935, were as follows:—

Financial Year.	Revenue transferred or assigned	Subsidies	Total Ordinary Revenue.	Total Ordinary Expenditure
	£	£	£	£
1929-30.....	5,234,805	5,243,032	11,127,738	11,344,925
1930-31.....	4,919,680	5,358,871	11,065,471	11,486,560
1931-32.....	5,016,726	5,425,911	11,130,684	11,557,257
1932-33.....	5,000,017	5,397,738	11,070,345	11,497,747
1933-34.....	5,505,601	5,469,125	11,692,441	11,805,262
1934-35.....	6,551,426	5,505,025	12,787,228	12,611,346

† Includes special grants.

### Joint Stock Banks—Assets and Liabilities, 31st March, 1936.

Capital and Reserve.....	£13,143,000
Notes in Circulation.....	1,520,000
Deposits.....	133,635,000
Balances due to other Banks, Head Office and Branches.....	2,169,000
Bills and other Liabilities.....	15,682,000
Coin, Gold Certificates and Bullion in hand.....	2,731,000
Balances due by other Banks, Head Office and Branches.....	10,481,000
Securities.....	38,880,000
Bills under Discount.....	15,645,000
Advances.....	56,339,000
Other Liquid Assets.....	35,460,000
Other Assets.....	6,612,000

### PRODUCTION, TRADE AND INDUSTRY.

**Agriculture.**—The exports in 1935 of the principal articles of agricultural production were:—

Article.	Quantity.	Value.
Wool.....	259,791,037 lb.	£9,515,832
Mohair.....	10,628,782 lb.	361,486
Hides.....	24,349,880 lb.	481,190
Skins.....	40,468,765 lb.	941,128
Ostrich Feathers.....	68,952 lb.	28,252
Meatles.....	999,351,718 lb.	1,557,738
Fruit, fresh.....	...	12,313,173
Wattle Bark.....	1263,698,336 lb.	767,632

† Including nuts.

‡ Wattle bark and extract.

† As at Aug. 31, 1930. No later figures available.

**Manufactures.**—The development of local industries has been most marked during the three years preceding 1931, the scarcity of overseas supplies and consequent increase in prices serving as a very effective measure of protection under which new industries have sprung up, and existing industries largely extended their operations. Though the world-wide depression during the succeeding years arrested this development the industries are rapidly returning to normal production. The total output during the year 1925-26 was £91,536,926; 1929-30, £111,799,115; 1932-33, £90,948,493; and 1933-34, £111,391,507.

Amongst the new industries which have been established during the period of the War may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle-making; starch from maize; iron smelting; arsenic production (ceased producing in 1933); detinning of scrap tin; copper manufacture, &c.

**Mines and Minerals.**—Gold mining still continues the chief source of the country's mineral wealth. At the outbreak of war the diamond

mines closed down. The value of the output of the principal minerals of the Union in 1935 was:—

	£		£
Gold .....	176,532,830	Silver .....	135,933
Diamonds ..	2,171,267	Asbestos .....	226,861
Coal .....	3,539,796	Osmiridium ...	24,460
Copper .....	323,674	Corundum .....	36,552
Tin .....	136,359	Platinum .....	179,627

† Includes gold premium to the amount of £27,795,410.

The mineral production for the Union of South Africa was as follows:—

	Gold.
1922* .....	7,009,858 fine oz. £32,343,485
1931 .....	10,877,777 " 46,205,858
1932* .....	11,558,532 " 49,766,331
1933* .....	11,013,712 " 68,686,577
1934* .....	10,479,857 " 72,311,013
1935* .....	10,773,991 " 76,532,830

The average labour employed in the gold industry during December, 1935, Transvaal, was 32,967 Europeans and 285,551 natives and coloured.

	Diamonds.
1923 .....	2,053,095 metric carats £6,038,207
1931 .....	2,119,156 " 4,182,523
1932 .....	795,332 " 1,679,600
1933 .....	506,553 " 1,560,404
1934 .....	440,323 " 1,437,591
1935 .....	676,722 " 2,171,267

The average labour employed in diamond mining, including individual diamond digging, was in 1935: Transvaal, 3,103 Europeans, 11,128 natives and coloured; Cape, 2,085 Europeans, 8,592 natives and coloured; O.F.S., 1,088 Europeans, 322 natives and coloured; a total of 5,286 Europeans and 20,042 natives and coloured. The value of diamonds owned throughout the world was stated to be £600,000,000 in 1918, one-half being owned by residents in U.S.A.

	Coal.
	(Tons of 2,000 lb.)
1935 .....	
Transvaal .....	8,989,857 tons £2,115,165
Cape .....	4,214 " 2,624
O.F.S. .....	1,644,220 " 361,930
Natal .....	3,969,313 " 1,060,077
Totals .....	14,607,604 " £3,539,796

The average labour employed in coal mining in 1935 was: Natal, 533 Europeans, 11,585 natives and coloured; Transvaal, 966 Europeans, 13,340 natives and coloured; Cape, 8 Europeans, 68 natives and coloured; O.F.S., 127 Europeans, 3,283 natives and coloured; a total of 1,624 Europeans and 27,276 natives and coloured.

**Silver.**  
There are no silver mines in the Union. The output, valued at £135,933 in 1935, represents silver contained in gold bullion and base metal ores.

**Copper.**  
(Tons of 2,000 lb.)  
In 1935, 12,823 tons of concentrates were produced in the Transvaal, and 0 tons in the Cape Province. The total shipments of copper during the year amounted to 11,927 tons, valued at £323,674.

**Tin.**  
(Tons of 2,000 lb.)  
The Union figures for 1935 are 1,042 tons, valued at £136,359.

\* Premium included—1922, 1923, 1924-1932 (Dec.), 1933-1934, 1935—£2,567,501, £2,712,151, £4,057,191, £668,798, £21,903,301, £27,795,410 and £30,767,825 respectively.

## Other Minerals.

The value of the total mineral production of the Union for 1935 was £84,073,825, including gold premium. The value of miscellaneous products: quarry products, £134,263; lead, £58; magnesite, £3,336; graphite, £3,077.

## EXTERNAL TRADE.

The total value of the Imports and Exports in the five years 1930-1935 (exclusive of silver and copper specie) was as follows. Note amended figures (exports) include Gold Specie:—

Year.	Imports.	Exports.	Total Trade.
1930	£64,568,447	£83,409,477	£147,977,924
1931	52,975,203	71,829,504	124,804,827
1932	32,790,305	68,938,001	101,728,306
1933*	49,311,450	95,275,389	144,586,839
1934*	66,303,345	88,073,687	148,377,032
1935*	75,320,283	108,293,439	177,613,722

\* Including the premium on gold bullion and specie to the value of £66,059 in 1933, £40,849 in 1934 and £73,253 in 1935 for imports and £22,224,180 in 1933, £21,504,275 in 1934 and £28,621,750 in 1935 for exports.

## COMMUNICATIONS.

**Railways.**—The first railway in South Africa, namely, between the Point and Durban, was commenced by private enterprise on Feb. 26, 1859. This was followed shortly afterwards by the Cape which started the construction of a line, also under private enterprise, from Cape-town, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey, on March 31, 1859. The Point-Durban line was opened to public traffic in 1860, and the Cape line to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was completed in 1864. Little progress was, however, made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and on Jan. 1, 1877, Natal followed by acquiring the railways in that colony. Increased activity at once took place, and the construction of four lines was pushed inland from Cape Town, Port Elizabeth, East London, and Durban. Bloemfontein was connected with the Cape in 1890, two years later a line to Germiston established contact with the system already in operation in the Transvaal, and in 1895 the Natal-Transvaal lines were linked up.

The total open mileage of Government-owned lines at the end of March, 1936, was 13,129 miles (comprising Cape 5,229, Orange Free

State 1,633, Transvaal 3,356, Natal 1,509, and South-West Africa 1,462), of which 12,305 miles are 3 ft. 6 in. gauge and 884 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1936, amounted to £151,234,778. The gross earnings for the year ending March 31, 1936, were £30,049,854, and the net surplus, after payment of interest, £5,623,158. Working expenditure (excluding depreciation) amounted to £17,613,215, or 58.62 per cent. of the gross revenue, as compared with £16,329,318, or 60.43 per cent. of the gross revenue for the previous year. The *Cape to Cairo Railway*, projected by Cecil Rhodes, had advanced to Bulawayo by 1902, 1,362 miles from Cape Town and 3,600 miles from Cairo. Through communication by rail is now available from Cape Town to Port Francqui in the lower Congo, 3,300 miles, all 3' 6" gauge. The *Trans-Zambesi Railway*, from Dondo (on the Beira-Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland. This railway has since been extended to Blantyre, and has now been further extended to Chipoka on Lake Nyasa.

**Posts and Telegraphs.**—On March 31, 1936, there were 3,241 post and 3,078 telegraph offices open in the Union. During the year 1934-35 345,327,000 articles of mail matter, including 3,384,000 registered articles, addressed to places within and without the Union, were handled. Internal air mail services operate twice weekly between Capetown and Durban via Port Elizabeth and East London, connecting with the incoming mail steamers on Mondays, and between Johannesburg and Durban six times per week. An air mail service operates twice weekly to and from London (Croydon) via Rhodesia, Tanganyika, Kenya, Sudan, Egypt, Greece and France. Connexion is made with the internal services, Nyasaland, India and Australia en route. The number of money orders issued was 671,575, valued at £3,053,571 while 606,327 orders, value £2,626,204 were paid. 5,144,023 postal orders were issued, and 4,722,265 postal orders paid. The number of depositors in the Savings Bank was 5,144,023 with £16,261,692 standing to their credit. 6,251,579 inland telegrams (including press messages) were received and despatched during the year. There are 4 wireless telegraph stations in the Union, which during the year received from and transmitted to ships 33,409 messages, in respect of which £10,430 accrued to the revenue of the Department. The telephone system comprises 142,431 telephone instruments in the service of 116,240 subscribers, by whom approximately 228½ million (inclusive of 14½ million trunk) calls were made through departmental telephone exchanges. The combined cash revenue from Posts, Telegraphs and Telephones was £4,625,726, comprising Postal £2,005,654, Telegraphs £540,948, and Telephones £2,079,124. The combined cash expenditure totalled £3,365,591.

**Shipping.**—In 1935, 1,670 vessels (6,726,071 tons) entered from and 1,667 vessels (6,729,280 tons) cleared for foreign countries at the ports of the Union of South Africa.

#### RAILWAYS AND HARBOURS BOARD.

**Chairman,** Hon. O. Pirow, K.C., M.P., Minister of Railways and Harbours.

**Members,** A. Kuit, F. T. Bates, and D. Hugo.

**Secretary,** D. H. C. du Plessis.

The railways, ports, and harbours of the

Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

#### Southwest Africa. (Suidwes-Afrika.)

Administered under Mandate as an integral part of the Union of South Africa.

**Administrator,** Dr. D. G. Conradie, B.A., LL.D.  
**Secretary,** F. P. Courtney Clarke, B.A., LL.B.

**SOUTHWEST AFRICA** lies between S. lat. 17° 23' and the Orange River, with a narrow strip between 17° 30'–18° 20' S. lat. extending from 21° to 25° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. The estimated area of the country is 317,725 square miles, and the population according to the census taken in 1936 is 359,516, of whom 31,049 are Europeans. The native population in the Territory proper is 112,018, and that beyond the Police Zone is estimated to be 216,449, of whom 165,159 are estimated to be in Ovamboland. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the north, and is known as the Namib. Towards the east from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The boundaries are the Okavango and Kunene Rivers, in the north, and the Orange River, in the south, all perennial streams of considerable volume. On the Orange are the *Au-grabies Falls*, twice the height of Niagara; these are situate about 25 miles east of the eastern boundary, in Cape Province.

The native races are:—In the south, Hottentots. In the centre, Hereros and Bergdarmas, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the north, Ovambos. To the north and east there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokofeld (the north-western area) is very scantily inhabited by Hereros and Ovattjimbus. It is very mountainous, and in many places well supplied with water.

The Administration of the country is exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The territory is divided into 17 Districts ruled over by Magistrates and the representatives of the Government. The territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The constitution granted under Union Act No. 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman. The powers of legislation granted exclude the follow-

ing matters which are permanently reserved to the Union Government:—

(a) Native affairs or any matters specially affecting natives, including the imposition of taxation upon the persons, land, habitations or earnings of natives.

(b) Mines, minerals, mineral oils and precious stones; or the moneys derivable therefrom or payable to the administration in respect of licences for prospecting or winning the same or as share of the produce thereof or any taxation in connection therewith;

(c) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of employment of and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harbours administration;

(d) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory, and the payment of pensions, retiring allowances and financial benefits to such persons;

(e) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the practice or procedure to be observed therein;

(f) The administration, management and working of the postal, telegraph and telephone services;

(g) The establishment or control of any military organization in the territory;

(h) The movements or operations of any unit of the South African Defence Forces within the territory;

(i) The entry of immigrants into the territory or of other persons;

(j) Tariffs of customs and excise duties and the control and management of customs and excise;

(k) Currency and banking and the control of banking institutions.

Police, Civil Aviation, Public Education, Land or Agricultural Banks and Alienation of Government Land were reserved for a period of three years,\* after which period the Assembly may by resolution ask to assume control thereof.

In regard to Finance, the Assembly may not initiate any ordinance imposing taxation unless recommended to it by the Administrator.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration and connected with Union lines (De Aar to South-West Africa Border 343 miles). South-West Territory lines 1,484 miles, of which 354 are 2' 6" gauge, the balance being 3' 6" gauge; and privately owned lines 74 miles; a total of 2,034 miles.

The Capital of the Protectorate is Windhoek, which lies practically in the centre of the country at 5,500 ft. above sea-level. (Urban white population, 1936, 4,765.) Other inland towns are Keetmanshoop (Urban white population, 1936, 1,038), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otjiwarongo, Outjo, Warmbad and Maltaehoe; also Aus, Mariental, Tsumeb and Usakos. The ports are Walvis Bay (Urban white population, 1936, 517) and Lüderitz (Urban white population, 1936, 840).

\* The period of three years has expired, and a resolution was passed unanimously by the Assembly on April 27, 1932, asking the Governor-General in terms of the Constitution Act to declare the full competency of the Assembly to make Ordinances in respect of these subject-matters. This has, however, not yet (August, 1936) been done.

## Provinces of the Union of South Africa.

### CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 26° to 34° 50', and in E. long. from 16° 25' to 30°. The extent of the country is, N.E. to S.W. 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles.

#### Area and Population.\*

	Sq. miles.	Pop., 1926. (European only.)	Eur. Pop. 1936†

Cape Province.	277,169	706,799	789,293

In 1936 the European population numbered 789,293\* (males 395,421, females 393,872).

Of the non-European population in 1936, 10,862 were Asiatics, 2,041,179 were Bantu, and 680,897 were of mixed and other races (preliminary figures). Of the European population in 1921, 81,685 were primary producers, 38,370 industrial, 14,366 transport and communication, 45,142 commercial, 26,490 professional, 11,308 personal

service, 7,991 independent, 412,141 dependent, 13,116 others. Of the coloured population, the great majority are engaged in agricultural or domestic employments.

\* The figures for 1935 are merely provisional, except those for marriages.

† Partial Registration.

\* Including Walvis Bay.

† Preliminary figures.

*Religion.*—European only (1926 census).

Dutch Churches	410,227	Roman Catholics	28,023
Anglican	132,403	Baptists	10,149
Presbyterian	25,539	Other Christian	14,350
Congregational	4,494	Jews	23,984
Methodists	42,043	Other	868
Lutherans	10,781	No religion	3,514

*Education.*—Local School Administration is conducted by school boards and school committees, the unit of administration being the school district. The Province is divided into 111 school districts, each under the control of a School Board, a portion of the members being elected by the ratepayers and a portion partly nominated by the Provincial Administration and partly by the Local authorities. Education is compulsory for children of European parentage. The necessary grants are provided from Provincial Council revenues, education up to the age of 15 being free.

State and Aided Schools, Nov. 5, 1935, 2,290 European and 2,557 non-European. There are 154,028 European pupils and 270,545 non-European. Total number of teachers 13,212 (6,715 in European schools and 6,497 in non-European schools).

*Hospitals.*—The daily average number in all hospitals (1934) was 2,801; ordinary revenue £108,186, ordinary expenditure £397,988, Provincial subsidies, donations, &c., £198,947.

*Harbours and Works.*—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

*Administration.*—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 61 members (elected for five years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

*Local Government.*—There are 130 municipalities, each governed by a Mayor and Councillors, a certain number of whom are elected annually by the ratepayers. There are 94 Divisional Councils and 95 Village Management Boards and 22 Local Boards.

*Administrator*, Hon. J. H. Conradie .... £2,500

*Executive Committee*, J. I. Mann, S. F. Malan, B. Muller, A. B. Cunningham.

*Prov. Sec.*, F. C. M. Voigt, B.A., LL.B.

*Superintendent-General of Education*, W. de V. Malan, B.A., Ph.D.

*Secretary*, H. Z. van der Merwe, B.A.

**CAPTOWN.** Total population (1936), European 165,700 and Non-European 156,521 (preliminary Census figures).

Cape Town, a seaport, the legislative capital of the Union of South Africa, seat of the Cape Provincial Council, and the Mother City of South Africa, consists of a central portion and a chain of suburbs on either hand. The central portion lies in an amphitheatre, which extends down to Table Bay towards the north-east and is backed on the other sides by the precipitous face of Table Mountain, which rises to a height of almost 3,582 feet, and its outlying masses, Devil's Peak on the east, and Lion's Head and Signal Hill on the west. This part of the town is built on the slopes at the foot of these mountains and on the flatter ground below, extending

down, as already noted, to the shores of Table Bay.

The City is the seat of a university, which is situated on a magnificent site on the Grootte Schun estate, Rondebosch, and a cathedral, and amongst its educational institutions and places of interest numbers the South African Museum, an art gallery, a notable library containing rare MSS. first editions, &c., and the municipal botanical gardens. Several fine old buildings of the Dutch period still remain, some of the most important being the castle, begun in 1666, and to-day the oldest building existing in South Africa, Koopmans-de Wet Museum, an old Dutch house, dating from early in the 18th century, containing fine specimens of old Dutch furniture and antiques, and the Old Town house, containing a representative collection of valuable old Dutch and Flemish paintings.

Capetown is 5,979 miles from Southampton; transit by steamship 13-16 days, and by air eight days. There is a modern and well-equipped aerodrome, Wingfield Airport, six miles from the centre of the city. Capetown's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance.

**NATAL.**

The Province of Natal comprises an area of 35,284 square miles (including Zululand, 10,427 square miles), with a seaboard of 360 miles. In 1931 the European population was 177,449 (males 90,253, females 87,196), and the preliminary figures for 1936 revealed a European population of 189,867 (males 94,801, females 95,066). The birth and death figures for 1935 are merely provisional. The figures for 1934 are:—Births, 3,310; deaths, 1,748; marriages, 1,703.

In 1935 the European births registered numbered 3,470, deaths 1,821, and marriages 1,801. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

*Education.*—There is a University College at Pietermaritzburg which is affiliated to the University of South Africa. It has a constituent college at Durban with faculties of engineering, fine arts, and commerce. There is a Training College for European teachers in Pietermaritzburg, and several Training Colleges for non-Europeans throughout the province. In addition there were on Nov. 12, 1935—European: schools 493, scholars 29,105, teachers 1,722; non-European: schools 829, scholars 86,149, teachers 2,496. These are maintained or aided by Government. There is also a large number of private schools.

*Administration.*—The Provincial government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 5 years). There is an Executive Committee of 4 members.

*Administrator*, Hon. H. Gordon Watson, I.S.O.

*Executive Committee*, F. C. Hollander; W. M. Power; J. Macaulay; W. V. Dyer.

*Provincial Secretary*, A. E. Charter, O.B.E.

**PIETERMARITZBURG**, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (European and coloured), 36,023 in 1921. The 1936 preliminary Census figures for the popu-

lation of Pietermaritzburg are Europeans, 22,218; Non-Europeans, 26,851.

In Durban (pop., 1921, 153,855; 1926—Europeans only—72,928; the 1936 preliminary Census figures are: Europeans, 94,773; Non-Europeans, 164,331), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, L.W.O.S.T., the bar being no longer existent, for 1927 being 37 feet.

Natal, 6,800 miles; transit, 20 days.

#### ZULULAND.

*Zululand*, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amatopoland Protectorate*, created by proclamation of Nov. 25, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Babunango) was annexed to Natal on January 27, 1903.

#### THE TRANSVAAL.

In 1931 the European population numbered 696,120 (males 357,504, females 338,616) and in 1936, 815,537 (males 426,685, females 393,852). The figures for 1936 are provisional.

The Province of the Transvaal has a total area of 110,450 square miles, about 20,000 square miles lying within the tropics. The Census of 1921 showed a population of 2,087,636, of whom 1,159,430 were males and 928,206 females, and the census of 1936, a total of 3,301,016 (males 1,874,545, females 1,476,471). In 1935 there were 21,194 European births, 8,834 European deaths, and 9,677 European marriages. The birth and death figures for 1935 are merely provisional. The figures for 1934 are:—Births 19,327; deaths, 7,384; marriages 9,181.

*Religion.* The religious statistics for 1921 are:—

Churches.	Europeans (1926)	Others (1921).
Dutch Churches .....	322,088	49,578
Anglican .....	103,462	94,543
Presbyterian .....	32,938	12,407

Roman Catholics .....	28,142	14,490
Lutherans .....	6,165	136,335
Other Christians .....	32,557	64,437
Jews .....	38,802	4
Other Non-Christians ...	1,500	15,499
Other .....	4,365	1,013,417

On Nov. 5, 1935, there were 1,168 European and 738 non-European State and State-aided Schools in the Transvaal. The enrolment was 144,980 and 104,208; and the number of teachers 5,799 and 2,068 respectively.

*Administration.*—The government is administered by an Administrator, aided by a Provincial Council of 57 members (elected for 5 years). There is an Executive Committee of 4 members. Administrator, Hon. S. P. Bekker.

*Executive Committee*, J. M. van H. Brink; E. Goodman; F. W. R. Robertson; H. L. M. Leibbrandt.

*Provincial Secretary*, H. F. Pentz.

*Asst. do.*, D. G. Roux.

*Director of Education*, G. A. C. Kuschke, M. A.

*Sec. to the Education Dept.*, H. H. G. Kretz, B. A.

PRETORIA, pop. Europeans 76,229, and non-Europeans 51,561. This city, the Administrative Capital of the Union, is set amidst beautiful surroundings and wide, shady streets, charming residences and magnificent commercial and Government buildings, including the renowned Union Buildings in their impressive setting on Meintjes Kop. Ideal for residential purposes, the city is also the centre of the country's steel industry and offers unequalled opportunity for industrial development.

Pretoria is situated 35 miles to the north of Johannesburg, the centre of the Witwatersrand Goldfields.

Distance from London 7,200 miles; transit by rail and sea via Capetown, 15 days; 9 days by Imperial Airways.

#### ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 49,647 square miles, and is divided into 33 districts. The population at the last six censuses was:—

Year.	White.	Coloured.	Total.
1904 .....	142,679	244,636	387,315
1911 .....	175,189	352,985	528,174
1918 .....	181,678	...	...
1921 .....	188,556	140,271	628,827
1926 .....	202,985	...	...
1931 .....	205,375	...	...
1936* .....	199,037	567,813	766,850

In 1936, of the Europeans, 100,961 are males and 89,076 females.

The number of European births registered in 1935 was 5,009, deaths 1,952, and marriages 1,974. The birth and death figures for 1935 are merely provisional. The figures for 1934 are:—Births 4,599; deaths 1,778; marriages 1,916.

*Religion.*—Europeans only (1926 Census):—

Dutch Churches 163,504	Lutherans .....	893
Anglican .....	Roman Catholics ..	2,516
Presbyterian ...	Jews .....	5,753
Congregational ..	Other .....	5,545
Methodists .....		7,478

*Education.*—On November 5, 1935, there were 721 European and 295 non-European State and State-aided Schools in the Orange Free State Province. The enrolment was 43,839 and 37,046 respectively, and the number of teachers 2,015 and 822.

*Administration.*—The government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 5 years). There is an Executive Committee of 4 members.

*Administrator*, Hon. C. T. M. Wilcocks.

*Executive Committee*, J. O. du Toit; W. J.

Pretorius; C. T. van Schaikwyk, jr.; J. C. Buys.

*Provincial Secretary*, H. E. Irving.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 30,163 Europeans and 34,743 non-Europeans in 1936 (preliminary census figures). The city is an important railway centre, is developing rapidly, and continues to hold its place as one of the foremost cities in the Union. Many fine buildings have been erected, and a new Town Hall (costing £270,000) is now nearing completion.

Bloemfontein is distant from London 6,700 miles; transit, via Capetown, 12 days.

\* Preliminary figures.

## Colonies and Protectorates.

NOTE.—The Indian Empire, Burma, The Dominion of Canada, Newfoundland, The Commonwealth of Australia, The Dominion of New Zealand, and The Union of South Africa are shown separately in the preceding pages.

**ASCENSION.**

*Asst. do., H. L. Smith, C.B.E.* ..... 750  
*Auditor, R. L. Goodman* ..... 1,100

The High Commissioner in the Union of South Africa for his Majesty's Government in the United Kingdom holds office concurrently as His Majesty's High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland, the title being changed in 1934 from High Commissioner for South Africa (with the appointment of Sir William Clark).

**BASUTOLAND.**

(The Territory of Basutoland.)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The preliminary Census figures (1936) showed 558,091 natives, 1,458 whites, 1,081 coloured and 362 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle, sheep and goats, the mohair produced being of excellent quality. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged. Basutoland has been called "The Switzerland of South Africa" and contains amongst its natural wonders the *Malestunyan Falls* (670 feet).

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner. The chiefs adjudicate on cases between natives, with a right of appeal to the courts of District Commissioners, where all cases between Europeans and natives are brought. The final court of appeal in the Territory is the Resident Commissioner's Court, appeal from which lies direct to the Privy Council. The revenue is derived from Customs, native tax, income tax on Europeans, post-office, and licences. Telegraph offices have been opened at Butha Buthe, Leribe, Peka, Teyateyaneng, Maseru, Morija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 562 Government-aided native schools, with a total roll of 64,381; there are also 8 white schools. The education vote for 1934-35 was £41,800. The chief articles of export are wool and mohair, cattle and hides, the imports being chiefly blankets, groceries and hardware.

**BECHUANALAND.**

(The Bechuanaland Protectorate.)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Cappivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922), but was retransferred to S. W. Africa, Sept. 1, 1929. The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,185 Natives.

The climate is healthy during part of the year. Malarial fever is prevalent during February, March, and April, but with ordinary precautions is not seriously detrimental to health. The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 426,344 at the Census of 1921 (estimated to exceed 1,250,000 in 1936). Much of the country is thick bush. The High Commissioner has the power of making laws by

proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Tshakedi, Regent during the minority of Seretse (Bamangwato), of Molefi Pilane (Bakgatla), of Kgari Sechele (Bakwena), of Bathoen (Bangwaketse), of Seboko Mokgosi (Bamalete), and of Dibolaen W. Diltapo (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, *via* Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1901 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

#### SWAZILAND.

(The Swaziland Protectorate.)

Swaziland (called by the natives *Kwa Ngwane*) lies between the Drakensberg and Lebombo mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and Portuguese East Africa. The total area is 6,705 square miles, and the population (Census of 1936) 155,528 of whom 152,159 were native Ama-Swazi Bantus (or Swazis), 2,735 Europeans, and 634 coloured. Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the annual rainfall averaging 45 inches, the mean temperature being 64° Fahr. (50°-78°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching is carried on by several companies. There were about 406,227 head of cattle in the Territory at the end of 1935. In the winter season sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal.

The agricultural products are maize (the staple product), tobacco, millet, ground-nuts, beans, pumpkins, and sweet potatoes. Cotton

growing from jassid resistant seed is becoming important. The country possesses considerable mineral wealth, including gold, tin, coal, copper and asbestos. During the year ended Dec. 31, 1935, 181 tons of cassiterite tin, valued at £39,628 were exported.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. There are townships in the districts at Bremersdorp, Hlatikulu, Stegi and Goedgegun. There are schools for Europeans at various centres.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Mbabane and Bremersdorp (27 miles); Bremersdorp and Stegi (43 miles); Bremersdorp and Balegane (42 miles); Piet Retief and Hlatikulu (57 miles); Goedgegun to Hluti (33 miles) and Hluti and Gollie (26 miles). There are post offices and telegraph and telephone offices at all the chief centres.

S. B. Williams; (and one vacancy).

#### BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., comprising an area of about 19 square miles, with a population (1931) of 27,789 (11,353 white and 16,436 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or ordinary wells, and the inhabitants are normally dependent on the rainfall stored and preserved in tanks, but a new system of horizontal wells has recently been successfully installed. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to Canada. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians. Shipping entered and cleared 1935, 6,707.246 tons.

## BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 10' S. and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celébes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands Indies." The remainder of the island is under British protection.

## STATE OF NORTH BORNEO.

The territory of the State of North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population (1931) is 270,223, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan (the capital), on the east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 8 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 2 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There are Native Courts for Natives and Muhammadan law and custom.

The chief products are timber, tobacco, rubber, copra, cutch, birds'-nests, salt fish, damar, sago, coco-nuts, rattans, and all varieties of jungle and sea produce. The country is suitable for the cultivation of sugar, tapioca, coco-nuts, kapok, ground nuts, rubber, pepper, and gambier on a large scale. Gold has been found.

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior; there is a branch from Beaufort to Weston (20 miles). There are nine wireless stations. There is a State bank at Sandakan with an agency at Jesselton.

There is an Armed Constabulary numbering 500 all ranks, composed of Indians and Natives under European officers, armed with S.M.L.E. rifles and Lewis guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

## BRITISH GUIANA.

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1935, was estimated at 328,219, of whom 138,334 were East Indian immigrants. The birth-rate was 34·3, and the death-rate 20·6 per 1,000 of the population. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 178,544 acres (of which 67,914 acres are in sugar-cane and 70,882 in rice), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 9,304 feet above sea level. On the Potaro River (a tributary of the Essequibo) is the *Kaitetur Fall*, with a clear drop of 741 feet and a total fall of 822 feet, and on the Essequibo, the *Horse Shoe Falls* (discovered in 1934); a hitherto unknown fall, with a drop of some 500 feet was also discovered in 1934 on the Ipoke river, a tributary of the Kuribrong, this has been named the *Marina Fall*. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The climate is very equable. The mean temperature is 80·4°, its extremes during 86 years ranging between 68° and 96°, but these are very rare the usual extremes being 70° and 90°. In the interior the mean temperature is higher 82·6°, its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 97·86 inches distributed over 183 days of the year, and its range from 65·23 to 138·88 inches per year. In the interior the average recorded rainfall is 58·4 inches per year, ranging from 45·2 to 80·4 inches per year. The chief product is sugar, which forms 65 per cent. of the export trade. The leading exports are sugar (£1,443,008 in 1935), rum, molasses, diamonds, gold, timber, balata, bauxite, rice and coffee. There are about 8,601 aboriginal Indians living in their primitive state in the remote part of the Colony; they are occupied largely in fishing, hunting, and raising crops of cassava.

In 1926 the Secretary of State for the Colonies appointed a Commission with wide terms of reference, to consider the economic condition of the Colony. One of their recommendations was that the Constitution should be altered so as to provide that the Governor should have power to carry into effect all measures which he and the Secretary of State consider essential for the well being of the Colony. The British Government accepted the Commission's recommendation and the British Guiana Order in Council passed in 1928, (Amended in 1935) provided for the constitution of a Legislative Council in place of the Court of Policy and Combined Court which had been in existence since 1831. The Legislative Council consists of the Governor as President, of 10 Official Members and of 19 Unofficial Members. Executive and administra-

tive functions are exercised by the Governor and an Executive Council. There are 5,227 miles of post-office telephone wire, 1,430 of which are contained in 13 miles of aerial cable; in addition, there are 23 miles of submarine cable and 313 of telegraph lines, with 70 post-offices and postal agencies, a short-wave broadcasting stations, and 9 wireless stations, including one operated by Cable & Wireless, and one by Pan American Airways. There are 95 miles of railway.

## BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29' to 15° 53' 55" N. latitude and 80° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are approximately 174 m. and 63 m. respectively; it is bounded on the north and north-west by Mexico (Quintana Roo Province, formerly Yucatan); on the west and south by Guatemala; and on the east by the Caribbean Sea. The total area is about 8,867 sq. miles, with a population (Census 1931) of 51,347—25,524 males and 25,823 females. The climate generally is damp and hot, but not

unhealthily. The temperature ranges from 59 to 92 F. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. In September 1931 a disastrous hurricane devastated the capital of the colony, with a loss of nearly 1,000 lives, a Mansion House Fund being raised for the sufferers.

The greater part of the country is covered by forest, of which 72 per cent. is high rain forest, 15.5 pine forest and dry savannah, 5.5 wet savannah and mangrove forest, the remaining 7 per cent. being existing or recently abandoned cultivation. The wire grass and sedges of the dry savannahs make very poor pasturage for cattle. The North of the Colony and the southern coastal plain (10 to 12 miles wide) is nearly flat, and near the sea is low and swampy. The central mountain mass has a general altitude of 2,000 to 3,000 feet and 57 per cent. of the area of the Colony is over 1,000 feet in elevation above mean sea level.

The staple products are obtained from the forests, and include mahogany, cedar, and *chicle* (the basis of chewing gum). Agricultural crops that grow readily include sugar cane, coconuts, plantains, pineapples, mangoes, maize, rice, varieties of beans and peas. Bananas also grow well in certain localities but are subject to Panama Disease. All varieties of citrus fruits flourish, and in particular grape fruit, of which a very high grade is exported.

There are 76 primary schools in the colony, and 4 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1935 was 407,177 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 6 official and 7 unofficial members (5 elected and 2 nominated). The Governor is President of both Councils.

## BRITISH WEST INDIES.

The West Indies, so named in 1492 by Columbus who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (28,000 sq. miles), being Independent; Jamaica and its dependencies, British; and Puerto Rico, a dependency of the United States. II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are Independent, 12,300 British, 3,890 United States, 1,350 French, 430 Netherlands, and 90 Venezuelan.

Trade Enquiry Office in London, The West India Committee, 14, Trinity Square, E.C. 3.

## B. W. I. COMMISSION.

In 1932 a Commission was appointed by the Secretary of State for the Colonies to examine the possibilities of closer union between Trinidad and the Windward Islands and the Leeward Islands.

Chairman, Gen. Sir Charles Fergusson, Bt., G.C.M.G., K.C.B., D.S.O., M.V.O.  
Other Member, Maj. Sir Charles Orr, K.C.M.G.  
Secretary, S. MacNeill Campbell.

## THE BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1932 of 61,812, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, San Salvador or Watling Island, Rum Cay, Long Cay, Ragged Island and Bimini. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1935 being valued at £52,292. Tomatoes are cultivated in large quantities for shipment to Canada and the

United States. Mahogany, lignum-vitæ, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established. The imports are chiefly foodstuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members and an elective Representative Assembly of 29 members.

#### BARBADOS,

the most windward of the West Indian Islands, is situated in 13° 4' N., and longitude 59° 37' W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 66,000 acres being cultivated. The population (Census of 1921), was 156,312; estimated at 184,912 on Dec. 31, 1935. The Island has a healthy climate and is free from malaria. The principal exports are sugar, molasses, rum, cotton and building lime, and the imports rice, salted meat, corn, salted fish, butter, flour, and corn meal. Liberal provision is made for elementary education, and the Lodge School and Harrison College provide for higher education for boys, and Queen's College and Codrington High School for girls. Barbados alone of the W.I. Islands makes local provision for University training, Codrington College having been founded under the will of Christopher Codrington, who died in 1710. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1627. In 1885 it was constituted a distinct Government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1921, 13,486), on the shores of an open roadstead (Carlisle Bay).

#### JAMAICA,

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42'—18° 32' North lat. and 76° 11'—78° 23' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles. The island is divided into 3 counties (Surrey, Middlesex and Cornwall) and 14 parishes. At the census of April, 1921, the population numbered 858,118 (males, 401,973; females, 456,145); whites, 14,476; coloured, 157,223; blacks, 660,420; East Indians, 18,610; Chinese, 3,666; not specified, 3,693. The population was estimated at 1,121,823 in 1935.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 210 miles of

railway open. Telegraph stations and post offices are established in every town and in very many villages; accounts open in the Govt. savings banks (1935) £50,131 (£793,650). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, chiefly bananas, oranges and coconuts, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), of 10 Nominated Members, and of 14 elected by the people, being one for each parish of the island. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1921) 62,707; the next in importance are Spanish Town, pop. 8,694; Montego Bay, 6,580; and Port Antonio, 6,272. Chief exports (1935): bananas £2,174,406; sugar, £558,464; coffee, £155,452.

### THE CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, between 79° 44' and 81° 26' W. and 19° 15' and 19° 46' N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 100 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1934) 6,009. Shipbuilding and turtle-fishing are the principal industries.

The principal town is Georgetown, in Grand Cayman, population (1934) 1,321.

Revenue, 1934, £5,695; expenditure, £6,995. Imports, 1934, £23,145; exports, £13,315.

*Commissioner & Judge of the Grand Court,*  
A. W. Cardinal (with house and fees), £525

### TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568. Grand Turk is an important cable station. The islands are celebrated for producing the finest salt in the world.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

## THE LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat; and (5) the Virgin Islands, with Sombrio; all, except the last, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate. There is a General Legislative Council of 10 official and 10 elective members, with the Governor as President, possessing concurrent legislative powers with the local Legislature on certain subjects. The population of the federal colony at the Census of 1921 was 122,211 (estimated Dec. 31, 1935, at 138,200).

## (1) ANTIGUA AND BARBUDA.

Antigua is the seat of government and residence of the Governor-in-Chief of the Leeward Islands. It lies in 17° 6' N. lat. and 61° 45' W. long., and is nearly 108 square miles in area with a coast line of about 70 miles. Antigua was first settled by the English in 1632, and was granted to Lord Willoughby by Charles II. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is planted on a small scale and the island also exports molasses, tamarinds, pine-apples, and arrowroot. In March, 1898, the Crown Colony system of government was instituted. The population, with Barbuda (Census of 1921) was 29,767, estimated at 33,700 on Dec. 31, 1935.

	1924	1935.

Supt. of Public Works, Hon. J. P. Purnell-Edwards .....	£450 to 500

Chief Medical Officer, Hon. Dr. W. M.

McDonald, O.B.E. .... £650

Barbuda, formerly a possession of the Codrington family, is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long. 61° 42' W. Area, 62 square miles. Population, 900. The island is flat and is fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Acting Warden, C. H. Thibou (and quarters) £250  
Redonda is uninhabited.

## (2) ST. KITTS-NEVIS WITH ANGUILLA.

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they have a population (Dec. 31, 1933) of 36,888 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population Dec. 31, 1935, 18,805), the principal island, is the oldest colony in the West Indies; it is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Basseterre, is a port of registry.

Nevis (pop. 13,472) is separated from St. Kitts by a strait 3 miles wide and has an area of 50 sq. miles. Cotton and coco-nuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,566 feet. The chief town, Charles-town, is a port of entry.

Anguilla (population 5,645) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

## (3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20'—15° 45' N. lat. and 61° 13'—61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles, or 195,200 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The tempera-

ture varies, according to the altitude, from 55° to 85°. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, vanilla, bananas and fruit. The population was estimated at 46,298 on Dec. 31, 1934; included in this total are 400 Caribs, of whom about 100 are of pure blood. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President and 6 official and 6 non-official members, 4 of whom are elected, and 2 nominated by the Governor; a new Constitution providing for an unofficial majority, subject to certain safeguarding powers of the Governor, is now being brought into force. The principal towns are Roseau, on the south-west coast, population 9,000, and Portsmouth, population 2,500.

#### (4) MONTserrat

Is situated in 16° 41' N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 21 miles in length and 7 in breadth, comprising an area of 3½ square miles, with a population (1934) of 13,161. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island is mountainous, the rest well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1928. The chief exports are cotton-seed meal, cotton, cotton-seed oil, onions, limes and its products, tomatoes, and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709. There is a wireless station in the island.

#### (5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles.

Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1934 was about 6,000. There is good pasture for cows, sheep, and goats. Sugar cane and coco-nuts are grown; fishing and poultry-rearing are also carried on. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

#### TRINIDAD AND TOBAGO.

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 3'—10° 50' N. lat. and 60° 55'—61° 56' W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,862 square miles, and a population at the Census of 1931 (including Tobago) of 412,783, estimated at 439,994, on Dec. 31, 1935. The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 74,977), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 15,300), about 30 miles south of the capital; Princetown (pop. 5,303), and Arima (pop. 5,221). A remarkable phenomenon is the asphalt lake, 114 acres in extent, near the village of La Brea, from which (1935) 82,359 tons of asphalt (£1,092,982) were exported. The soil of Trinidad is rich and productive, the most important products being sugar, cocoa, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1935) were petroleum £13,321,708; cocoa £2,530,622; and sugar \$4,522,425. On Dec. 31, 1935, there were 15 companies actively engaged in the production of oil, the royalties payable on oil won from Crown Lands being \$505,278. Coal, iron, graphite and gypsum exist in small quantities; and traces of gold have been found in the Northern Range. On Dec. 31, 1935, there were 292 Elementary and Intermediate Schools, 45 being Government and 247 Assisted, Trinidad having 256 and Tobago 36, in addition to 7 colleges for higher education, which also receive a grant-in-aid. There are 118 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council, and a Legislative Council of 12 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected.

*Tobago* lies between  $11^{\circ} 8'$  and  $11^{\circ} 21'$  N. lat. and between  $60^{\circ} 30'$  and  $60^{\circ} 50'$  W. long., about 75 miles south-east of Grenada, 21 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados. The island is 26 miles long, and  $7\frac{1}{2}$  broad, and has an area of 116 square miles, with a population estimated (1935) at 27,029. It is one of the healthiest of the West Indies; the temperature varies from  $81^{\circ}$  to  $88^{\circ}$ . There are three towns in the island, viz., Scarborough (pop. 1,323), Roxborough (pop. 1,462), and Plymouth (pop. 803).

*Other Islands.* Corozal Point and Iencos Point, the N.W. and S.W. extremities of Trinidad, enclose the Gulf of Paria and west of Corozal Point lie several islands, of which Chacachacari, Huevos Monos and Monas Gaspar Grande are the most important. On Chacachacari is a Leper Settlement, the Resident Chaplain of which appeals for Sunday and weekly editions of British newspapers.

CAPITAL, Port of Spain (pop. 74,977); transit, 10 to 12 days to U.K.: 5 days to U.S.A.

## THE WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

*Governor and Commander-in-Chief, His Excellency Sir Selwyn MacGregor Grier, K.C.M.G. (1935)* .....£3,000  
 Transit to Grenada from London about 14 days.

### GRENADEA AND THE GRENADINES.

Grenada is situated between the parallels of  $12^{\circ} 30'$ – $11^{\circ} 58'$  N. lat. and  $61^{\circ} 20'$ – $61^{\circ} 35'$  W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 16 members, 8 of whom are officials; 3 nominated and 5 elected.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

Public revenue	.....£201,480	1933. £141,264
Expenditure	.....155,343	141,741
Public debt	.....293,657	172,875
Total imports	.....259,743	230,541
Total exports	.....198,930	193,069
<i>Colonial Secretary and Registrar-General, W. L. Heape</i>	.....(and quarters) £1,000	
<i>Chief Justice, C. M. Murray-Aynsley</i>	.....1,000	
<i>Colonial Treasurer, I. C. Beanbrun, O.B.E.</i>	.....£450 to 500	
<i>Attorney-General, C. C. Ross</i>	.....700	
<i>Chief Medical and Health Officer, Maj. H. E. Sutherland Richards</i>	.....750	
<i>Magistrates, I. G. Wakeley, M.C., S. Dist.; H. W. Steele, N. Dist., each</i>	.....£500;	
<i>V. F. Drayton, District Commr. of Carriacou</i>	.....(and quarters) £350 to 420	
<i>Chief of Police, Maj. E. E. Turner</i>	.....(and quarters) £450 to 500	

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

### ST. LUCIA,

the largest and most picturesque of the Windward group, situated in  $13^{\circ} 54'$  N. lat. and  $60^{\circ} 59'$  W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with

an extreme breadth of 14 miles. It comprises an area of 233 square miles, with a population (Dec. 31, 1935) of 64,959. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1935) were sugar, limes, lime-oil, coco-nuts, copra, cocoa, charcoal, bay rum, molasses, syrup, bananas, honey, and fruit. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 1922, 2,480). Port Castries, one of the finest in the W.I., is a coaling depôt. In 1935, 422 steamers (tonnage 1,109,202 entered Port Castries.

ST. VINCENT,  
an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population estimated (Dec. 31, 1934) at 53,622. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, copra, coco-nuts, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

# CAMEROONS.

(Cameroons under British Mandate.)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo was obtained by conquest by Franco-British forces during the War of 1914-18.

The approximate geographical limits of the German territory were 2°-12° 30' N. lat. and 8° 30'-16° E. long. and the area was about 187,596 square miles. By the Milner-Simon Agreement of July 10, 1919, the whole area was divided into a British sphere (about 34,081 square miles) and a French sphere (about 143,415 square miles) and in 1922 the territories were placed by the League of Nations under British and French Mandates. The Cameroons under British Mandate marches the whole distance of the Nigerian Eastern boundary, save for one short break. The population of the British sphere is 776,352.

The two narrow strips of territory reach from the Atlantic Ocean to Lake Chad, a distance of 700 miles, and lie diagonally between 4°-12° 30' N. lat. and 8° 30'-14° 45' E. long. The nature of the country varies to a remarkable extent, from the coastal mangrove swamps and thick forest regions to the grasslands at heights of 4,000 ft. to 7,000 ft. and more, and again to sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the peak of the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922.

Cameroons under British mandate is administered as part of Nigeria. The Northern areas are administered by the Residents of the adjoining Provinces of Adamawa, Bornu and Benue; the Southern section forms a separate Province, known as the *Cameroons Province*, with headquarters at Buea on the slopes of the Cameroon Mountain. Cattle breeding and the production of guinea corn are the chief occupations of the population of Dikwa, which consists mainly of Arabs and Kanuri. The inhabitants of the areas which for administrative purposes form part of the Adamawa Province, are mostly primitive hillmen whose chief occupation is agriculture.

Cameroons Province is rich in timber, and the volcanic soil of the lower slopes of the Cameroon Mountain is particularly fertile. The chief exports of the Province are cocoa, palm oil and kernels, rubber and bananas (fresh and dried), the banana industry being recently established with marked success; the chief imports are textiles, salt, iron-ware dried fish and other provisions, motor spirit and tobacco.

The sea ports Victoria and Tiko are connected with Buea by motor road. 154 vessels (294,330 tons) arrived in Victoria in 1935 and 65 (111,707 tons) entered Tiko.

Exports to U.K. ....	13,115	40,390

# CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55'-9° 50' N. lat. and 79° 42'-81° 53' E. long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1931) was 5,312,548 (including military and shipping), the most important element being the Sinhalese, descen-

dants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the island are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, rubber, products of the coconut palm, plumblago, cacao, cinnamon, citronella oil, cardamoms, areca nuts, and unmanufactured tobacco.

About one-fifth of the island is under cultivation, and the approximate areas in 1935, in acres, were:—Rice, 850,000; other grain, 105,000; tea, 557,000; coconuts, 1,100,000; rubber, 629,000; cinnamon, 26,000; cacao, 34,000; citronella, 33,000; and tobacco, 14,000. The live stock in 1935 included 1,542,000 horned cattle, 61,000 sheep, 203,000 goats, 37,000 pigs, and 1,100 horses. Among the more important industries are gold, silver, brass, ivory and tortoiseshell work, weaving, pottery, and metal and lacquer work, basket and mat making. Recently some match and soap factories have been established, and a fair proportion of the matches and soap required for local use is now manufactured therein. The manufacture of salt is a Government monopoly.

Many precious stones are found in Ceylon, the more important being the ruby and sapphire. Pearl fishing is carried on periodically in the Gulf of Mannar; in the N.W. of the island.

There are 951 miles of railway open, 834 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and 853 post offices, 403 money order offices, and 307 telegraph offices, with 10,351 miles of telegraph wire and 51,836 miles of telephone wire. In 1936 a Commission was appointed by the Colonial Office (at the request of the Ceylon Government) to enquire into and report on the financial position of and the future policy in regard to the Ceylon Government Railway.

The government of Ceylon is administered by a Governor, aided by a State Council consisting of 50 members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State (Chief Secretary, Legal Secretary and Financial Secretary). The Chairmen of the 7 Executive Committees are Ministers for the subject concerned. The Chief Secretary is in charge of External Affairs, Defence and the Public Services; the Legal Secretary and the Financial Secretary in charge of Legal and Financial Affairs. The Officers of State and the Ministers form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local

boards; and in the country districts the Ceylonese retain their village councils and tribunals for matters of minor importance.

*Ceylon Trade Commissioner in London, Dr. Paul E. Pieris, C.M.G., Ceylon House, Aldwych, W. C. 2.*

THE MALDIVÉ ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Male, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muslims. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coco-nut coir, and tortoiseshell.

*Sultan ("Lord of the Thousand Isles") Hasan Noor-ud-Din, elected Feb. 1, 1935.*

Colombo, distant from London (overland) 5,868 miles; transit, 17 days.

#### THE CHANNEL ISLANDS,

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Duketom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lihou (38), a total of 48,083 acres, or 75 square miles. The 1931 Census population of Jersey was 50,455, and of Guernsey, &c., 42,743 (Guernsey 40,585, Alderney 1,251, Sark 571, Herm 53, Jethou 2).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1935 was 86,334 vergées ( $2\frac{1}{2}$  vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and turnips, and of Guernsey bulbs, potatoes and oats, fruits and roots. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown,

presides over the *States* and over the Royal Court or judicial body. The islands possess a very large trade, the principal imports being coal and coke, and the chief exports being potatoes, tomatoes, flowers, and stone and granite. The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St. Peter Port, on the east coast.

The trade of the Channel Islands is principally with the United Kingdom.

#### CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33' and 35° 41', and E. long. 32° 20' and 34° 35'. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,572 square miles. The population at the census of 1931 was 347,959, of whom about 18 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal agricultural products are wheat, barley, animals, carobs (locust beans), olives, wine, raisins, potatoes, citrus and deciduous fruit, cumin, cheese, cotton, wool, silk, pulse crops and linseed. Of these carobs, potatoes, wine, citrus fruit, cumin,

raisins, cotton, mules and cheese are the most important exports. Mining products exported include pyrites, copper ore, asbestos, yellow ore, terra umbra and gypsum. In 1935 the wine export was 1,195,071 gals., and that of spirits 10,188 gals., the wine going to Egypt, the U.K., Malta, Eritrea, Italian Somaliland, and the Sudan, and the spirits to British East Indies, Egypt, Jibuti, and Syria. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. From March 10, 1925, until Nov. 12, 1931, the Government was administered by a Governor, aided by an Executive and a Legislative Council, the latter containing 9 official and 15 elected members, but after the disturbances which occurred in the Island during the autumn of 1931, the clauses (in the Letters Patent of March, 1925) dealing with the constitution of the Legislative Council were revoked, power to legislate being vested in the Governor pending a review of the constitutional future of the Island.

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a commissioner. This division also obtains for judicial purposes. The Law Courts were reconstructed in 1936 and there are now a supreme court, 6 assize courts, and 6 district courts. In the assize and district courts Cypriot judges take part, and it so happens that at present one of the supreme court judges is a Cypriot. There are also 3 Mussulman religious tribunals, styled *Sheri Courts*.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 23,507 in 1931; the other principal towns are Larnaca (population 11,725), Limassol (15,065), Famagusta (8,771), Kyrenia (2,049), Paphos (4,467), and Morphou (4,335).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and there are 71 miles of railway. There is a regular service of steamers between Cyprus and Egypt, Syria, Cilicia, Palestine, Smyrna, Istanbul, Greece, France and Italy.

#### FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'–53° S. lat. and 57° 40'–62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 4,618 sq. miles, and a population in 1935 of 2,432. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65° Fahrenheit. The islands are chiefly bog-land, and have proved suitable for sheep, 615,682 being carried in 1935; the output of wool is about four million lb. annually. The population is mainly British, and is principally engaged in sheep-farming. The chief

\* Exclusive of Grants-in-aid; † exclusive of share of Cyprus of the Turkish Debt charge (£92,800), and of Exp. from Grants.

exports are wool, tallow, hides and sheepskins; seal oil is also produced and exported. The only important settlement is Stauley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 5 official and 1 unofficial members, and a Legislative Council, of 4 official and 4 unofficial members.

CHIEF TOWN, Stanley. Population (1935), 1,200.

DEPENDENCIES.—*South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,094 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour. In the *South Shetlands*, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet. The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina  $3\frac{1}{2}$  years later. The other dependencies, of which the principal units are the *South Sandwich Islands* and *Graham's Land*, an island in the South Atlantic Ocean, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1935 amounted to £26,704. The local expenditure was £12,617, the surplus (after meeting administrative expenses at Stanley) being devoted to local research and development. The trade is considerable. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined, accounting for six-sevenths of the total catch in 1932-33.† In South Georgia 1 British and 1 Argentine company operated in 1935, the whales caught numbered 1,785, and the oil was valued at £468,998.

Stanley is distant from England about 8,130 miles; transit, 26 days from Liverpool. Telegrams by cable and wireless *via* Monte Video and *via* Bergen and U.K. direct.

\* Colony only.

† The total number of whales caught in the world in 1905 was 4,592; in 1910 it was 12,301 (oil production 284,320 barrels); in 1932-33 the catch was 28,668 (oil production 439,000 metric tons), and in 1934-5 it was 39,047 (oil 454,500 metric tons).

## FEDERATED MALAY STATES

(See MALAYA).

## FIJI.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,200 miles north of New Zealand. The gross area of the group, which extends 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long, is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanna Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 96°. Vegetation is remarkably luxuriant, the chief products being bread-fruit, bananas, plantains, pea-nuts, yams, and dalo (taro), coco-nuts, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, maize, fresh fruit and vegetables, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 7 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 13 nominated members, 6 European elected members, 3 native members, and 3 Indian elected members. Native administration is carried on through the chiefs under the Governor's supervision. The estimated population (Dec. 31, 1935) was 202,052 (99,953 native Fijians, 85,892 Indians, 4,938 Europeans, and some Polynesians and others).

Suva is 11,000 miles from London; transit from London, *via* Vancouver or San Francisco, about 30 days; *via* Panama, by direct cargo steamer service, with limited passenger accommodation, about 34 days; *via* Sydney, about 60 days.

## GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albrede, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 11, 1931, was 14,370, and that of the Protectorate 185,150. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form over ninety-six per cent. of the total exports; practically all of this crop is sent to Europe, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and beeswax are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are apparel, cotton goods, flour, kola nuts, oil, rice, soap, spirits, metals of all kinds, sugar, tea, wine, and tobacco. A Company of the R.W.A.F.F. (4 officers and 145 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force (numbering 150 officers and men), which performs both civil and military duties. There are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 4 official members (besides the Governor), and by a Legislative Council of 6 official members and 4 unofficial members, nominated by the Crown.

Harbour Master and Marine Superintendent, A. Skinner	£600 to 840
Auditor, A. G. Still	£600 to 920
Bathurst is distant from London 2,600 miles; transit about 10 days.	

## GIBRALTAR,

a rocky promontory,  $2\frac{1}{2}$  miles in length and  $\frac{1}{4}$  of a mile in breadth, 1,366 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade, and is becoming a popular tourist centre. During the year 1935 6,722 vessels (including 86 tourist steamers) entered, with a total tonnage of 11,963,848. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfumery. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian population (1935) was 15,735.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members; there is no Legislative Council.

# GOLD COAST.

The Gold Coast Colony, with Ashanti, the Northern Territories and Togoland under British Mandate, is situated on the Gulf of Guinea, between 3° 7' W. long. and 2° 14' E. long., and is bounded on W. by the French Ivory Coast, on E. by Togoland under French Mandate, on N. by the French Sudan, on S. by the sea. It extends about 334 miles along the Coast line and inland to an average distance of 440 miles or to 12° N. lat. The area of the Colony is 23,937 sq. miles, of Ashanti 24,379 sq. miles, of the Northern Territories 30,486 sq. miles, and of Togoland under British Mandate 13,041—a total of 91,843 sq. miles.

The climate of the Gold Coast is on the whole hot and damp, although rather cooler than that of most tropical countries within similar latitudes. By the aid of medical science and sanitation it is becoming less unhealthy. The population (July 1935) was: *Gold Coast Colony*, 1,741,031; *Ashanti*, 651,129; *Northern Territories*, 796,716; *Togoland*, 338,607; total, 3,527,483, excluding 3,078 Non-Africans. The natives are almost all Pagans, but there are many Muhammadans, and the number of Christians is steadily increasing. The Government assists the missionaries in educational matters and has established many schools of its own, and a college and school at Achimota, 6 miles from Accra, have been built and opened. Great efforts are being made to improve the sanitary condition of the coast towns. Accra, Kumasi, Sekondi (including Takoradi), Koforidua, Winneba, Cape Coast and Tamale are lighted by electricity, and there are

pipe-borne water supplies at Accra, Sekondi (including Takoradi), Cape Coast, Winneba, Kumasi and Tamale; a similar supply is being installed for Koforidua and Saltpond. 4,675 miles of telegraph land wire and 7,908 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 3,217 miles of underground and overhead line wire. There is a wireless station at Takoradi. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Accra (362 miles), with branches (590 miles in all). The mileage of motor roads maintained by the Public Works Department is 2,102 miles, and the mileage of metal and tarred roads now amounts to 500. There are some 3,900 miles of motorable roads which have been constructed and are maintained by the Chiefs. These roads are all motorable during the dry season and have opened up the country in all directions to motor traffic, and ferries have been installed and bridges built whenever necessary. In 1928 a harbour was opened at Takoradi.

The trade in 1935 was principally with the United Kingdom (57 per cent.), U.S. (13), Germany (9), Netherlands (4) and Italy (2 per cent.). The principal exports in 1935 were: cocoa, £5,203,959; gold, £2,635,527; manganese ore, £612,170; and diamonds, £546,094. The chief imports (1935) were cotton manufactures, machinery, iron and steel manufactures, tobacco (all kinds), motor vehicles, apparel, motor spirit, artificial silk manufactures, bags and sacks (empty), fish of all kinds, meat and rice.

The seat of government is Accra (population 69,057). The other principal towns are: Cape Coast (18,860), Sekondi (20,120), Kumasi (40,987), Tamale (16,783), Koforidua (12,724), Saltpond (6,369), and Winneba (10,990). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 15 official and 14 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

	1934-35.	1935-36.
Total revenue.....	£3,740,191	£4,407,603

Accra is distant from Liverpool, 3,920 miles; transit, 14 to 32 days.

#### ASHANTI.

Ashanti was placed under British protection on Aug. 27, 1896, and an Order of the King in Council (Sept. 26, 1901), defined the boundaries of Ashanti, annexed it to H.M. Dominions and provided for its administration under the Governor of the Gold Coast Colony. By a subsequent Order in Council (Oct. 22, 1906) the boundaries between the Gold Coast Colony and Ashanti and between Ashanti and the Protectorate of the Northern Territories were readjusted and defined, with due regard to tribal land and natural features. By a further Order in Council (Nov. 9, 1934) the limits of Ashanti were further defined, and the Governor vested with full power for its administration, the making of laws and the appointment of a Chief Commissioner, Judges, Commissioners, Justices of the Peace and other Officers. By the same Order Ashanti was brought under the constitution and (by Additional Instructions, Nov. 23, 1934) the Chief Commissioner was made a Member of the Executive Council of the Gold Coast.

Ashanti is administered by a Chief Commissioner, with an Assistant Chief Commissioner as relieving Officer, and a staff of 14 District and Assistant District Commissioners.

In January 1935 the *Confederation of Ashanti*, which was broken up and had remained inoperative for 35 years, was re-established with Nana Osei Agyeman Prempeh II. (a nephew of the late Nana Prempeh) at its head.

The area is 24,379 square miles, with a population (census of 1931) of 578,702 (including non-Africans, 624). Kumasi, the chief town, has about 39,820 inhabitants. In 1935-36 there were 6,754 children in the Government schools, and 3,340 in the mission schools; 23 students were in residence (1935-36) at the Agricultural and Forestry Training centre. Police force, 4 officers and 260 other ranks; prosecutions (1935-6) 4,118. There are 925 miles of motor roads. Agriculture is the staple industry. 82,595 tons of cocoa were exported in 1935-36. The gold output was 205,959 fine oz.; average number employed in mining industry, 214 Europeans and 7,679 Africans in 1935-36. In the western parts of the Dependency are rich forests of mahogany, cedar, &c., and trees yielding fruits, oil, rubber and gum copal; this area has been opened up by a trunk motor road from Kumasi to Pamu (130 miles) on the W. frontier via Sunyani (80 miles from Kumasi) with branch feeder roads from small villages. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, cocoyams, bananas, plantains, ground-nuts and (in the south) cocoa. *Chief Commissioner*, Maj. H. C. Stevenson, O.B.E., M.C. .... £1,800  
*Asst. Chief Commissioner*, F. W. Applegate 1,200

#### NORTHERN TERRITORIES.

The Northern Territories lie to the north of the parallel of 8° N. lat. and are bounded on the west and north by the French possessions, on the east by Togoland and on the south by Ashanti. They came under British Protection in 1901 and are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale, an Assistant Chief Commissioner and 15 District and Assistant District Commissioners. The total area is 30,600 sq. miles (including the Northern Section of the Mandated Territory of Togoland, 41,063 sq. miles), varying in type from the forests in the south of the Krachi district to the treeless plains of Bawku. By the census taken in 1931 the population was 727,275 (including part of Togoland, as above, 885,400). The principal occupations of the people are agriculture and animal husbandry. Maize, millet and guinea-corn are largely grown, but principally for local consumption, and with yams form the staple food of the people. Shea-butter and ground-nuts are exported to Ashanti, and tobacco and indigo are grown. The cattle industry is the principal source of wealth. There are said to be extensive auriferous areas and gold mining has commenced in the northern part. There are 2,128 miles of motor roads. Of the indigenous population the majority is pagan, but Muhammadanism is spreading. The Muhammadans have substantial mosques. There is a White Fathers' mission in the north of the Protectorate and an American Protestant mission and a Roman Catholic mission in the Mandated Territory. At Tamale there is a Government Middle boarding school which is fed by selected pupils from the Native Administration schools at Gambaga, Salaga, Wa, Bawku, Lawra and Sandema. There are hospitals at Tamale, Salaga, Yendi, Bawku, Navrongo, Lawra and Wa; and Native Administration dispensaries at Bole, Tumu, Walewale, Krachi and Garu. *Chief Commissioner*, W. J. A. Jones, ..... £1,600  
*Assistant Chief Commissioner*, E. O. Rake 1,200

## TOGOLAND.

(Under Mandate to France and Great Britain.)

The total area of the former German colony of Togoland is about 43,040 square miles, with an estimated population of 920,000. The British sphere adjoins the eastern frontier of the Gold Coast and is administered as part thereof. It consists of an area of about 13,041 sq. miles with a population estimated (1935) at 338,650, including 43 Non-Africans.

## HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands and of a portion of the mainland, situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 9' N. lat. and 113° 52'—114° 30' E. long., and bounded on the N. by the Shum Chun River.

*Hong Kong* is an island about 11 miles long and from 2 to 5 miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lyeemoon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; *British Kowloon* was subsequently acquired by the Peking Convention of 1860; and the *New Territories*, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with a population for 1934 of 944,492. The non-Chinese residents, excluding naval and military, numbered 20,908. A special Foreign Registration fee of 20 per cent. of the value of a motor vehicle is payable in respect of any vehicle not produced within the British Empire.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor, tobacco and motor spirit the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1934) 20,926,125 tons; (1935) 21,700,213 tons. A railway, of which 22¼ miles belong to the Government, runs from Kowloon to Canton; the length north of the Shum Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,809 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 85 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1935 there were 1,109 schools subject to Government supervision, attended by 75,010 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also an Urban Council in which are vested, *inter alia*, powers of making bye-laws in respect of certain matters of public health and sanitation.

CAPITAL, Victoria; population (1935), 377,659.

## JAMAICA.

(See BRITISH WEST INDIES.)

## KENYA.

*Kenya Colony and the Kenya Protectorate* are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland (35,812 sq. miles) was ceded by treaty in 1925; and on the north by an agreement with Ethiopia in 1908. On the west the Colony adjoins Uganda, the boundary being determined by an Order in Council in 1926 to include in Kenya an area on the west of Lake Rudolph and north of the River Turkwel, stretching from Mt. Elgon to Mt. Zulia (on the boundary of the Sudan), which was formerly part of the Uganda Protectorate. On the south Kenya adjoins the mandated Tanganyika Territory. Kenya Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana. The total area is 224,960 sq. miles, and the population is estimated at 3,084,351 (Europeans 17,997, Indians 36,462, Arabs 12,599, Goans 3,437, Africans 3,012,421).

The northern portion of this region is barren; the eastern portion, between Nairobi and the coast is fertile and there are not lacking extensive districts of great natural fertility in the interior, as well as on the coast. The Colony is divided for administrative purposes into 4 Provinces and 3 Extra-Provincial Districts which are subdivided into districts. The White (or European) area in the Highlands consists of about 7,000,000 acres in strips and blocks of land, convenient both for the railway and the natives reserves.

The telegraph and telephone system has 16,214 miles of wire. A cable connects Mombasa with Zanzibar, and a wireless station at Nairobi works direct with England. There is a coast wireless

station at Mombasa and communications with South Africa are also available by a Government land-line. A Nairobi-London radio-telephone service was opened in 1936. Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are State-owned; the railway, which is metre gauge, has a total route mileage of open lines of 1,622 miles, made up as follows:—*Main Line* (Mombasa—Kampala) 879 miles; *Principal Lines*—Nakuru Junction—Kisumu (121 miles), Tororo—Soroti (100 miles), Voi—Kahia Junction (92 miles); *Minor and Branch Lines*, Rongai—Lake Solai (27), Kisumu—Butere (43), Leseru—Kitale (41), Mbulumi—Namasagali (19), Kampala—Port Bell (6), Gilgil—Thomson's Falls (48), Nairobi—Nanyuki (145). The Kouza—Lake Magadi Line (51 miles) is worked but not owned by Government. In addition, the Administration operates a marine service on Lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 3,723 miles.

Kenya and Uganda are one administrative unit for purposes of customs, and the principal imports are cotton piece goods and manufactures, textiles and textile manufactures, motor cars, parts and accessories, motor spirit, cigarettes, cigars and tobacco, cutlery, hardware, instruments and implements; china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing apparel. The principal export from Kenya is coffee, next in order being maize, tea, sugar and gold.

	1934.	1935.
Revenue .....	£3,182,939	£3,304,351
Expenditure .....	3,180,795	3,252,784
Imports (Kenya & Uganda) .....	5,708,000	6,641,345
Exports (Kenya only) ...	1,920,000	2,978,307
Imports from U.K. (K. & U.) .....	2,149,407	2,742,906
Exports to U.K. (do.) .....	1,273,429	1,836,109

NAIROBI, the capital of the Colony, possesses a Cathedral (All Saints) and is the central station of the Kenya and Uganda railways and harbours. It has a non-native population of 22,000, of whom 5,530 are Europeans, and 16,500 non-natives. The native population of Nairobi is 28,000. There are about 2,200 European farmers throughout the Colony, mostly settled on the good coffee soil near Nairobi. Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population 50,000, of whom 800 are Europeans).

Governor and Commander-in-Chief, His Excellency Brigadier-General Sir Joseph Aloysius Byrne, G.C.M.G., K.B.E., C.B. (1931), and Duty Allow- ance £2,500, and Allowance as High Commissioner for Transport £1,000 .....	£5,000

#### LEEWARD ISLANDS. (See BRITISH WEST INDIES.) MALAYA.

British Malaya comprises the Colony of the  
Straits Settlements; the Federated Malay States  
of Perak, Selangor, Negri Sembilan and Pahang;  
and the Unfederated Malay States of Johore,  
Kedah, Kelantan, Trengganu, Perlis and Brunei.  
The total area is 53,196 square miles (Straits  
Settlements 1,356, Federated Malay States 27,540,  
Unfederated Malay States 24,300) and the total  
population was estimated (December 1935) to be  
4,611,450, of which there were 1,143,792 persons  
in the Straits Settlements, 1,813,891 in the  
Federated Malay States and 1,653,767 in the  
Unfederated Malay States, as compared with  
populations of 1,114,015 in the Straits Settle-  
ments, 1,713,096 in the Federated Malay States  
and 1,556,739 in the Unfederated Malay States  
as recorded in the 1931 Census. The total  
European population was estimated at 21,292  
persons.

#### Trade of British Malaya. (Merchandise only)

Imports from:—	1934.	1935.

Total	£63,477,767	£66,542,103

#### I. THE STRAITS SETTLEMENTS.

There are 4 Settlements—Singapore (including  
the Cocos or Keeling Island and Christmas  
Island); Penang (including Province Wellesley);  
Malacca; and Labuan (off the coast of Borneo).  
These Settlements have an entire area of about  
1,356 square miles, with an estimated population  
(1935) of 1,143,792.

The Government consists of a Governor,  
assisted by an Executive Council of 11 members,  
and a Legislative Council of 13 official and 13 un-  
official members, appointed by the Crown. Of  
the unofficial members 11 are nominated by the  
Crown and 2 are selected by the Chambers of  
Commerce at Singapore and Penang. The law  
in force is contained in local Ordinances and in  
such English Acts and Orders in Council as are  
applicable to the Colony. The Penal Code  
follows closely the Indian Penal Code. Criminal  
procedure is regulated by the Criminal Proce-  
dure Code which is based on the Indian Code.  
Civil procedure is regulated by Rules of Court  
made under powers conferred by the Courts  
Ordinance 1934 and based on the English rules  
of the Supreme Court. There is a Supreme  
Court which is a Court of record, and consists  
of (a) the High Court, which exercises original  
criminal and civil jurisdiction and appellate  
criminal and civil jurisdiction in appeals from  
subordinate courts; (b) the Court of Appeal,  
which exercises appellate civil jurisdiction.  
Assizes are held at Singapore and Penang every  
two months, and once a quarter at Malacca.  
The Supreme Court is composed of a Chief  
Justice and three or more Puisne Judges. An  
appeal lies from the Supreme Court to the  
Privy Council. There is also a Court of Criminal  
Appeal. The subordinate Courts are the District  
Courts, Police Courts, Marine Magistrates'  
Courts, and Coroners' Courts.

Straits Settlements lie well within the tropics  
very little north of the Equator and there is  
little variation in the temperature. There are  
no well marked dry and wet seasons, rain falling  
throughout the year. The climate of the colony  
is healthy.

The colony is provided with an excellent road  
system, the total length of metalled roads being  
963 miles, in addition to which 94 miles of  
gravel road, natural road and hill path are  
maintained. Most of the roads are capable of  
carrying heavy traffic. Singapore, Malacca and  
Province Wellesley have railway communication  
(Federated Malay States Railways) with the  
Federated Malay States, the Unfederated Malay  
States of Johore Kedah, Perlis and Kelantan,  
and with Bangkok. Communication by sea  
between the various Settlements is frequent and  
regular, and Singapore and Penang have regular  
sea services with every part of the world.  
Imperial Airways and the Royal Netherlands  
Airways each provide a regular bi-weekly ser-  
vice, the former plying between Singapore and  
London and the latter between Singapore and  
Amsterdam and between Singapore and the  
Netherlands Indies. In addition, a weekly  
service between Singapore and Java is operated  
by the Royal Netherlands Indies Air Mail

(K. N. I. L. M.). Qantas Empire Airways maintain a bi-weekly service between Singapore and Australia, thus completing the England-Australia Air Route. A regular weekly service between Penang and Hongkong (*via* Saigon) has since been established by Imperial Airways.

The trade of Singapore and Penang is principally in the collection and distribution of commodities for the countries of the Malayan Archipelago. The principal imports in 1934 were motor spirit (benzine), rice, tin ore, para rubber, cotton piece goods, petroleum (kerosene), cigarettes, fish (dried and salted), sugar, milk (condensed, evaporated, sterilised and thick cream), copra, pepper, sarongs (cotton), coal, machinery, areca nuts, sago and rattans. The principal exports (including re-exports) in 1934 were rubber, tin metal, motor spirit (benzine), copra, rice, petroleum (kerosene), fish (dried and salted), preserved pineapples, pepper, cotton piece goods, areca nuts, sago, rattans, sarongs (cotton), cigarettes, milk (condensed, evaporated, sterilised and thick cream) and sugar.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, to which it is joined by a causeway across the Straits of Johore, about three-quarters of a mile in width; its length is about 26 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 220 square miles, and a population (1935) of 587,321. Singapore was in the 13th and 14th centuries a Malay city of importance till it was destroyed by the Javanese about 1377. It then remained waste till the present Settlement was founded on January 30, 1819, by Sir Stamford Raffles, then Lieut.-Governor of Bencoolen, Sumatra. Singapore remained a dependency of Fort Malborough, Bencoolen, till 1823, when it was placed directly under the Government of India. The original lease by the Sultan of Johore and the Dato Temenggong, Chief of Singapore, of the site of a factory, in 1819, was followed in 1824 by the cession of the Island in perpetuity, this being accepted by the Dutch in the Treaty of Holland of the same year. The town of Singapore, situated on the south side of the island in lat. 1° 17' N. and long. 103° 50' E., with 445,719 inhabitants in 1931, is the seat of government for all the settlements.

The number of merchant vessels arrived and departed in 1935, exclusive of native craft, was 13,595, with a tonnage of 30,255,426. The total for the whole colony was 19,810, with a tonnage of 44,959,859. The total native craft arrived and departed at all four ports, Singapore, Penang, Malacca and Labuan, during the same year was 53,624 (tonnage, 1,964,820). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of £29,000,000 (£3,300,000). The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was \$3,500,000. Singapore is a free port; no duties are levied, but excise is collected upon the release for consumption of opium, tobacco, spirits, wines, malt liquors, and petroleum.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo (and 725 miles from Singapore) in 5° 23' N. lat. and 155° 15' E. long. Its area is about 35 square miles and its population is 7,702 (1935). It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited, and was incorporated in the Straits Settlements in 1907, becoming a separate Settlement in 1912. The island has a good harbour. The principal export is sago. Labuan is a market for much of the produce of the neighbouring coasts of Borneo and the Sulu Archipelago (sago, rice, sugar, cigarettes, para rubber, jelutong, copra, fresh fruit and vegetables, cattle and pigs). Cattle and goats are reared, and about 11,000 acres are under cultivation. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island.

Resident, R. W. Jakeman, M.C.S. (acting).

The Cocos-Keeling Islands were declared a British possession in 1857, and in 1878 were placed under the control of the Governor of Ceylon. On Feb. 1, 1886, they were placed under the Governor of the Straits Settlements, and in 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The 20 islands lie between lat. 11° 50' to 12° 45' S., long. 96° 50' E., 700 miles S.W. of Batavia. The largest is 5 miles by ½ mile. There are large coconut plantations, and copra, oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island, in the north-eastern part of the group. The population numbers (1931), 1,142.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 60 square miles and a population of 1,086 (1935). A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1935 was 147,929 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (pop. 1935, 201,651), on the eastern side of which is George Town, the port and capital, and the strip of mainland opposite, known as Province Wellesley (pop. 1935, 146,191). Penang Island, about 15 miles long and 11 broad, with an area of 110 square miles, is situated off the west coast of the Malay Peninsula, in lat. 5° 28' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula.

Province Wellesley is a strip of coast about 31 miles in length with an area of 290 square miles, ceded by the Raja of Kedah in 1800, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, rubber, and coconut plantations.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 640 square miles. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1511, and held by them till 1641, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession in pursuance of the treaty with the Netherlands, March 17, 1824, being exchanged for the British settlement of Bencoolen in Sumatra. The population in 1935 was 198,698.

## II. THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and each State is administered under the advice of a Resident subject to the instructions of the High Commissioner, who is also Governor of the

Straits Settlements. The Federal Government is under the immediate control of the Federal Secretary subject to the instructions of the High Commissioner. The total area of the Federation is 27,540 square miles, with a population in 1936 of 1,847,951. The principal towns are Kuala Lumpur (Sel.), pop. 118,521; Ipoh (Pk.), 55,382; Taiping (Pk.), 33,076; Seremban (N.S.), 24,323 and Klang (Sel.), 23,085.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control. The States are policed by a mixed force of Indians and Malays, officered by Europeans.

There are 1,068 route miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (121 miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Royal State Railways of Siam, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 22 hours, and that between Prai (Penang) and Bangkok 26 hours (compared with a sea journey of 4 days). The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan, Pahang and Kelantan, terminating at Tumpat. At Sungie Golok (Siamese Territory) this line is connected with the Royal State Railways of Siam. There are 2,901 miles of metalled roads, 174 miles of unmetalled roads, and 1,483 miles of bridle-paths, while the principal rivers are navigable for small boats.

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and tin predominates, figures given below show that other products are produced and exported in large quantities. Gold has always been found in small quantities, chiefly in Pahang, and about half a million tons of coal are mined annually in Selangor and used locally. The major agricultural crops are rubber, coconuts, oil palms, rice and pineapples, while considerable areas are under areca-nuts, coffee, tapioca, derris (tuba root), tea, gambier, tobacco, miscellaneous fruits and vegetables.

Principal exports from the Federated Malay States:—

	1934.	1935.
Para Rubber.....Tons	256,516	194,478
Para Latex.....Galls.	2,814,870	1,326,064

Gambier....."	283	265
Tuba Root....."	193	193
Gold.....Ounces	26,156	24,191

† 75s per cent. basis.

**Climate.**—Temperature shows little variation throughout the year. The days are sometimes oppressive, owing to the high humidity, but the nights are generally cool. The mean maximum shade temperature is about 90° F. inland, and rather lower on the coasts, while the mean minimum is about 72° F. inland and a little higher on the coasts. The average yearly rainfall varies from 65 inches in the driest parts to 165 inches in the wettest. There are no clearly defined wet and dry seasons, but there are well-marked seasonal variations in the rainfall. On the West Coast and inland the equinoctial seasons have higher rainfalls than are experienced during the S.W. and S.E. monsoons. The full force of the S.W. monsoon is not felt so far south, but violent squalls of short duration (known as "Sumatras") are not infrequent between April and September; they are more frequent and more intense at night than during the day. On the East coast, during the N.E. monsoon which prevails from November to March, heavy rains and strong winds are experienced. The remainder of the year being comparatively dry.

Kuala Lumpur is distant 8,500 miles from London; transit, 21 days (via Penang).

### III. OTHER STATES.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, Trengganu and Brunei:—

**JOHORE** lies at the extreme S. of the Malay Peninsula. It is bounded N. by Pahang, N.W. by Negri Sembilan and Malacca, S. by the Straits of Tebran and E. by the China Sea. The area is 7,678 square miles (about the size of Wales) and the population (census of 1931) was 505,309. In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer. In 1914, following an agreement of that date, a General Adviser was accepted. The Legislature consists of a Council of State to which European and Asiatic unofficial members are appointed. The judicial system resembles that of the Federated Malay States. Judges of Supreme Court of the Straits Settlements and of the Federated Malay States are *ex officio* Judges of the State of Johore and *vice versa*. Johore is primarily an agricultural country producing, as major crops, rubber, coconuts, tapioca and pineapples. The cultivation of African oil palm is also making progress. Tin ore and iron ore are exported in considerable quantity. The Johore State Railway runs for 120 miles through the middle of the State. There are 870 miles of metalled road.

	1934.	1935.
Revenue .....	\$16,650,594	\$17,162,127
Expenditure .....	11,692,115	18,439,798

The Capital, Johore Bahru, has a population of 97,634.

**Sultan, H.H. Sir Ibrahim, G.C.M.G., G.B.E.;** born, 1873; succeeded his father, 1895.

**General Adviser, W. E. Pepsys.**

**Chief Minister, Ungku A. Aziz bin A. Masjid.**

**State Secretary, Dato Mohd. Salleh bin Ali.**

**Judge, J. V. G. Mills.**

**Legal Adviser, R. Moor (acting).**

**Financial Commissioner, C. A. Vlieland (acting).**

**Commissioner, Lands and Mines, L. A. Allen.**

**Commissioner, Trade and Customs, N. F. H. Mather.**

**Assistant Adviser, Muar, F. K. Wilson (acting).**

**State Engineer, T. G. Husband (acting).**

**Principal Medical Officer, G. H. Garlick.**

**Postmaster-General, K. MacLennan.**

**Superintendent of Education, F. L. Shaw.**

**Controller of Labour, K. H. Bancroft (acting).**

**Protector of Chinese, S. M. Middlebrook.**

**Warden of Mines, C. F. S. Jameson.**

**Commissioner of Police, W. A. C. Haines (acting).**

**Superintendent of Surveys, C. T. M. Husband.**

**Conservator of Forests, A. E. Rambaut.**

**KEDAH**, between  $5^{\circ} 05' - 6^{\circ} 40' N.$ , lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1935 was 452,554, and the approximate area 3,648 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 22,680. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 45 British officials, mostly employed in the Public Works, Survey, Police, and Medical departments.

	1934-35.	1935-36.

*Sultan*, H.H. Sir Abdul Hamid Halimshah, K.O.M.G., succeeded 1881.

*Regent*, H.H. Tunku Sir Mahmud, K.B.E., C.M.G.  
*Raja Muda*, H.H. Tunku Badlishah, C.M.G.  
*British Adviser*, J. D. Hall, M.C.S.

**PERLIS**, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is about 52,723, of whom 41,469 are Malays. The capital is Kangar, a few miles up the Perlis River, but H.H. the Raja lives at Arau, which is on the main trunk line from Singapore to Bangkok. Rice is the principal crop, and tin ore and rice are the principal exports. The State came under British protection in 1909.

*Raja*, H.H. Tuan Syed Alwi, C.M.G., O.B.E.  
*British Adviser*, C. R. Howitt, M.C.S.

**KELANTAN** lies between  $4^{\circ} 32' - 6^{\circ} 15' N.$  and  $101^{\circ} 19' - 102^{\circ} 37' E.$  on the east coast of the peninsula, with a total length of about 118 miles and a breadth of 88 miles. The total area is 5,750 square miles; population (1931 Census) 369,411. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live-stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is in parts mountainous, but a railway (through to Singapore) has been constructed through the flatter part and good land is thus made accessible for planting. There are many rubber estates and the African oil palm is also cultivated. Tin and gold are found. The capital, Kota Bharu, 6 miles from the mouth of the Kelantan River, has a population of 14,843. Kuala Krai is the headquarters of the Southern Administrative District, and Pasir Puteh of the Eastern.

Expenditure .....	1,710,790	2,044,239
Public Debt .....	5,566,724	5,543,022

*Sultan*, H.H. Sir Ismail, K.O.M.G.  
*British Adviser*, A. C. Baker, M.C., M.C.S.

**TRENGGANU**, between  $3^{\circ} 53' - 5^{\circ} 51' N.$  and  $102^{\circ} 23' - 103^{\circ} 30' E.$ , lies south of Kelantan on the east coast of the peninsula. Area, about 5,050 square miles. Population (1931), 179,789. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and

tin mining. The principal exports are rubber, iron ore, tin ore, dried fish, cotton and silk, sarongs, copra, areca-nuts, manganese and wolfram. The capital, Trengganu, on the river of that name, contains 14,000 inhabitants.

	1934.	1935.
Revenue .....	\$1,699,319	\$2,196,949
Expenditure .....	1,405,157	2,033,841
Public Debt .....	4,060,000	3,600,000

*Sultan*, H.H. Sir Suleiman Badrul-alam Shah, K.O.M.G.

*British Adviser*, J. E. Kempe, M.C.S.

**BRUNEI** is a native State on the north-west coast of the island of Borneo. The total area is about 2,500 square miles, the population being 30,135 (April, 1931), of whom 26,972 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 2, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of 10,453. Native industries include fishing, cloth-weaving, brass foundries, and silversmiths' work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries; the exports are chiefly crude oil, cutch (mangrove extract), rubber, jelutong, and sago.

	1934.	1935.
Revenue .....	£75,252	£94,912
Expenditure .....	63,584	91,723
Debt (Dec. 31) .....	44,173	15,516
Imports .....	220,226	281,809
Exports .....	395,653	432,775

*Sultan*, H.H. Ahmed Tajudin Akhazul Khairi Waddin, *suc. Sept., 1924*; *Assumed full power (after minority) Sept. 19, 1931.*

*High Commissioner*, The Governor of the Straits Settlements.

*British Resident*, R. E. Turnbull, M.C.S.

Brunei is 5 hours by steamer from Labuan, and is distant 758 miles from Singapore (transit 4 days). There are wireless stations at Brunei, Labuan, Temburong, and Belait.

### MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of  $91\frac{1}{2}$  square miles. The colony includes also the adjoining island of Gozo, with an area of  $24\frac{3}{4}$  square miles; COMINO—the site of the *Sultan's* disaster in 1889 and several islets. The civil population of the whole group, on April 26, 1931, was 241,621. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese language, which is generally spoken by all classes, is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks

was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1930 (June, July, August and September) was 82°·7°. In winter the mean temperature was 51°·3°. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to 982, but its suburb, Rabat, has 9,050 inhabitants. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and a Lyceum; 92 elementary and infant schools, 4 central schools, 2 secondary schools, and 63 night schools; in addition there are garrison schools, a Dockyard school, and 41 private schools of which 12 receive grants-in-aid from the Government. English and Maltese are the only languages taught in the elementary schools.

The Letters Patent, dated Aug. 12, 1936, revoking the Malta Constitution Letters Patent of 1921 (as amended in 1933, 1934 and 1936) were proclaimed in Malta on Sept. 2, 1936. They provide for an Executive Council consisting of 5 *ex-officio* members and not less than 3 members nominated by the Governor.

The English language, as the official language of the British Empire, and the Maltese language, as the language of the people of Malta, are the official languages of Malta.

The English language is the official language of administration and the Maltese language is the official language in all the Courts of Law in Malta. Provision has been made by Ordinance for the use of the English language in any proceedings before any Court where any party or any accused person is a person who does not speak Maltese as the principal language to which he is accustomed. Where the proceedings are in a language not known to the party or parties or to the accused they are translated. In 1934, Maltese was substituted for Italian as the principal language of the Courts of Law.

The Maltese language is the language of general intercourse in the Islands.

In 1935 the Port of Valletta was entered by 2,152 vessels (tonnage, 4,330,273).

Malta is 2,280 miles by sea, and *via* Naples  
about 1,995; transit overland, 3½ days.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean,  
550 miles east of Madagascar, between 57° 17'–  
57° 46' E. long. and S. lat. 19° 58'–20° 33', and  
comprising an area of 720 square miles. The  
permanent population at the Census of 1931 was  
393,418, made up of Indians, Europeans (mainly  
French), and natives of mixed descent.

Mauritius was discovered between the years  
1507 and 1528 by the Portuguese, but they never  
formed any settlement on it. The Dutch visited it  
in 1598, and named it Mauritius, in honour of the  
Stadtholder, Prince Maurice of Nassau. In 1644  
they established a small colony on the shore,  
but in 1710 they abandoned the island, and in  
1715 the French took possession of it and changed  
the name to Ile de France. Under the French it  
became a great centre of trade, but in 1789 the  
seat of French Government in the East was  
removed to it from Pondicherry, and it was  
taken by a British force in 1810. The French  
language and French law have been preserved  
under British rule when the ancient name,  
Mauritius, was restored.

Of the total cultivated area of 174,041 acres,  
139,341 are under sugar, about 20,000 under fibre,  
and 14,700 under other crops; the necessities of  
life have all to be imported from abroad. Rice  
and grain are obtained from India, flour from  
Australia and India, oxen from Madagascar,  
and minor imports from South Africa and else-  
where; 88 per cent. trade of the island is with  
Great Britain and British Dominions. Being  
just within the tropics it has a hot climate; but,  
except in Port Louis and some of the low-lying  
districts, it is not unhealthy. The island is  
subject to cyclonic disturbances, and a hurricane  
in 1892 was particularly severe; a cyclone lasted  
from March 5 to 7, 1930, and did considerable  
damage to sugar plantations and buildings.

There is an excellent harbour on the N.W.  
coast, on which the capital, Port Louis, stands,  
and the annual trade of the island passes entirely  
through Port Louis. The shipping entered and  
cleared, in 1935, amounted to 1,268,627 tons. In  
1935 there were 155.75 miles of railway (158 of 4 ft.  
8½ in. gauge and 13 of 2 ft. 6 in.), 57 post-offices,  
53 telegraph offices and 5 telephone exchange  
offices in the island, with 596 miles of telegraph.  
Including block telegraph for the railway, and  
460 miles telephone wires (Government).

The Government is administered by a Governor,  
aided by an Executive Council of four official  
members, and of such other persons as the  
Governor, through instructions of the Secretary  
of State, may from time to time appoint, and a

Legislative Council of 27 members, eight being *ex-  
officio*, nine nominated by the Governor, and 10  
elected by a moderate franchise. Port Louis has  
two members, and each of the country districts  
one.

The inhabitants of European descent are  
mostly Roman Catholic. Education has two  
branches:—(1) *Superior or Secondary Instruction*,  
to which is attached the Government Royal  
College and the Associated Schools; (2) *Primary  
Instruction*, consisting of the Government  
schools and the grant-in-aid schools. The esti-  
mated expenditure on education for 1936–37 is  
Rs. 1,418,119.

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles north-east of  
Mauritius. Population (Census 1931), 8,202. Area,  
40 square miles. Cattle, beans, salt fish, and  
goats are the principal exports. The island is  
under the administration of a magistrate from  
Mauritius, who takes his orders from the  
Governor of Mauritius.

Magistrate, P. Rousset .....

(2) OTHER DEPENDENCIES. Most of the scat-  
tered groups of coral islands belonging to Great  
Britain in the Indian Ocean are administered by  
the Mauritius Government, being visited periodi-  
cally by two magistrates, whose duty it is to in-  
quire into the condition of the labourers, and  
settle any disputes which may be referred to  
them. The chief product is coco-nut oil. The  
most important is Diego Garcia (pop. 1931, 445),  
one of the Chagos Archipelago, which lies on the  
direct route from the Red Sea to Australia, and  
possesses a good harbour. The total population  
of the "Other Dependencies" (1931) is 1,457.

Transit from London to Mauritius, 30 to 35 days.

## NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Cameroons on the east. The Colony is a small strip of land running along the coast on either side of and including Lagos. The Protectorate Headquarters (Lagos) is in two main divisions, the Northern and Southern Provinces, coinciding with the former Protectorates of Northern and Southern Nigeria. The area of the whole territory (including the portion of the Cameroons under British Mandate) is about 372,674 sq. miles, and the population is 19,865,452.

By Order in Council of Nov. 1922 (amended 1928) there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 27 official members, 3 nominated official members, 3 elected members representing the municipal area of Lagos (Eric O. Moore, Dr. C. C. Adeniyi Jones, and T. A. Doherty), 1 elected member representing Calabar (C. W. Clinton) and 14 nominated unofficial members. The Governor continues to legislate for the Northern Provinces. The Northern and Southern Provinces are each administered by a Chief Commissioner, with Headquarters at Kaduna and Enugu; the Colony is administered by a Commissioner. The Protectorate is divided into 23 Provinces, each under a Resident.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, kola-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation comprising (1) a Western line from Lagos to Kano (704½ miles), and extension to N'Guru (143 miles), crossing the Niger by bridge at Jebba, with branches from Minna to Baro (111 miles), from Zaria to the Bauchi tin fields (Jos) (133 miles, light railway); from Zaria to Kaura Namoda (137 miles), and from Ifo to Idogo (27 miles). (2) an Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue at Makurdi with a branch line connecting from Kafanchan junction (mile 458) with the tinfields (Jos), 62¼ miles. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports (1935) were cotton goods (£2,534,216), provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, motor-cars and lorries, motor spirit, cement and bags and sacks; the principal exports were palm kernels (£1,245,004), palm oil (£1,656,159), tin ore (£1,456,752), cocoa (£1,583,827), ground nuts (£2,029,590), hides and skins (£773,706) and cotton lint (£579,925). The total imports from the British Empire were £5,782,351 in 1935.

	1934-35.	1935-36.
Revenue .....	£4,960,765	£5,995,921

Auditor, H. W. Drake (and £240 duty pay) 1,200

Director, Geological Survey, Capt. R. C. Wilson ..... (and £240 duty pay) 1,200

Port Engineer, Lagos Harbour Works, C. W. Carter ..... (and £230 duty pay) 1,150

Chief Inspector of Mines, W. J. Russell (and £240 duty pay) 1,200

Chief Veterinary Officer, Capt. W. W. Henderson ..... (and £240 duty pay) 1,200

Transit to Lagos from Liverpool, 14 to 15 days. Cable communication to Lagos. Inland telegraphs to all important places.

## NYASALAND PROTECTORATE.

This country, which was proclaimed a British Protectorate on May 14, 1891, comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi, covering a total land area of 37,506 square miles, with a population (Dec. 31, 1935) of 1,603,257, including 1,781 Europeans and 1,400 Asiatics. The chief towns are Blantyre (674 Europeans and 75,660 natives), Limbe and Zomba (the headquarters of the Government).

The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of tobacco is con-

siderable; tea, cotton and fibre are also exported in fair quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are three steamers. There is a 3' 6" gauge railway system extending from the port of Beira, in Portuguese E. Africa, to Salima on Lake Nyasa (525 miles), crossing the Zambesi River at Sena (199 miles) by the Lower Zambesi Bridge and passing through Blantyre (353 miles). Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,371. A road from Salisbury to Blantyre via Tete (Portuguese E. Africa) is open and is freely used during the dry season.

Mails to and from England are despatched every week via Cape Town and Beira and also (twice weekly) via Imperial Airways Line from Salisbury; a bi-weekly air service operates between Blantyre and Salisbury, linking up with Imperial Airways. Between Beira and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's Line via Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape via Salisbury. The telegraph lines extend northwards as far as Tukuyu, in Tanganyika. There are full-sized aerodromes at Chilika (21 miles from Blantyre), Zomba and Lilongwe, and landing-grounds have been prepared at most district headquarters.

## PACIFIC ISLANDS.

(Western Pacific High Commission.)

High Commissioner, His Excellency Sir A. F. Richards, K.C.M.G. ....	£1,400
(In addition to £3,250 as Governor of Fiji, and allowance of £150 as Consul-General for Western Pacific.)	
Secretary to High Commission, H. H. Vaskess (House Allowance £75) ..	£700 to 800
Chief Judicial Commissioner, His Honour O. C. K. Corrie, M.C. (In addition to £1,200 as C.J. of Fiji).....	400
Asst. Sec. to High Commission, R. H. Garvey .....	£450 to 600
Chief Clerk and Accountant, L. E. Anblor	£450 to 600

(1) The British Solomon Islands, protected since 1893, consist of Guadalcanal, Malaita, San Cristoval, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea, with a total area of about 15,000 square miles, and a population (1931) of 478 Europeans, 173 Asiatics, and 93,415 natives. The Santa Cruz Group and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's Group, were transferred by treaty from Germany. The revenue in 1935-36 was £58,465, and the expenditure £49,224; exports 1935-36 £198,358; imports, £150,163. The seat of government is Tulagi.

Resident Commissioner, Francis Noel Ashley  
(and £150 allowances) £1,300 to £1,400  
Secretary to Govt., N. S. B. Kidson... £500 to £600

(2) The Gilbert and Ellice Islands, formerly a Protectorate, were formally annexed to the Empire in November, 1925. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° E. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 58' E. longitude, consists of nine islands. Ocean Island (or Paanoga), in lat. 0° 52' S. and long. 169° 35' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1935) 280 Europeans, 536 Asiatics (495 on Ocean Island), and 32,993 Pacific Islanders. Revenue (1934-35), £52,683; expenditure, £53,983; imports (1935), £217,060; exports, £340,068.

Fanning Island, in lat. 3° 30' N., long. 159° 13' W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop. (1935), 42 Europeans, chiefly in connexion with Pacific cable station, 252 Pacific Islanders in copra industry and 20 Asiatics. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1926, and Christmas Island was included in 1919.

Resident Commissioner, J. C. Barley  
(and £400 allowances) £800 to £1,000

(3) The Tonga or Friendly Islands.—A protectorate over the Tonga Islands Kingdom was proclaimed May 18, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 250 square miles, and population (1935) of 434 Europeans, 352 half-castes, 30,724 Tongans, and 363 others—total 31,873. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Nukualofa, on the Island of

Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tubou II. in 1918. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared, owing to a tidal wave, in June, 1919. Revenue 1934-35, £61,654; expenditure, £55,515; imports (1935), £68,782; exports, £90,711. The total shipping entered and cleared in 1935 was 116,260 tons.

Agent and Consul, J. S. Neill, B.A., B.L.

(and duty allowance £200) £800 to £1,000

(4) *The Phoenix Islands* (McKean, Gardner Birnie, Hull, Enderbury, Phoenix, Canton, and Sidney), between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) *Pilearn Island*, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W. Pop. (1936), 202, descendants of the mutineers of H.M.S. *Bounty*. Chief Magistrate, R. E. Christian.

(6) There are also a large number of scattered groups and isolated islands.

### PALESTINE.

*Palestine*, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes, in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine has been under British administration since the conquest of the country by the forces of General Allenby in 1917. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923.

In 1936 a riot at Jaffa led to a general Arab strike, which in turn degenerated into a physical force movement accompanied by murder, arson, intimidation and attacks on the local and Imperial forces. In September, 1936, a Division of British troops was sent to Palestine to quell disorder and early in October the "strike" was declared to be at an end.

Previous to the strike a Royal Commission had been appointed (July 29, 1936) to enquire into the underlying causes of unrest, how the Mandate was being implemented, and what grievances, if any, existed under a proper construction of the Mandate. The Commission began work when order had been restored, its constitution being:—The Earl Peel, G.C.S.I., G.B.E. (*Chairman*); Rt. Hon. Sir H. Rumboldt, Bt., G.C.B., G.C.M.G., M.V.O. (*Vice-Chairman*); Sir L. Hammond, K.C.S.I., C.B.E.; Sir Morris Carter, C.B.E.; Sir Harold Morris, M.B.E.; Professor R. Coupland, C.I.E.

Palestine consists of a western maritime lowland, the mountain region of Judea (which forms the backbone of the district) and, on the east, the depression through which the Jordan wends its way from the Sea of Galilee (Tiberias) to the Dead Sea. The Dead Sea, 1,292 feet below the level of the Mediterranean, is 45 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet above mean sea-level, and contains 25 per cent. of salt.)

The area of Palestine West of the Jordan is about 10,000 square miles, with a population estimated (Dec. 31, 1935) at 1,308,000, of whom 837,000 are Moslems (including 66,000 nomad Beduins, who are mostly to be found in Beer-sheba district), 355,000 Jews, 105,000 Christians, and 11,000 members of other faiths. Since Sept. 1, 1920, about 255,000 Jewish immigrants have been recorded as having entered Palestine. In 1935, the record number of 64,145 persons were admitted, either as immigrants or as travellers who subsequently were allowed to register as immigrants, and of these 61,854 were Jews. The Jewish immigrants came principally from Poland (43 per cent.), Germany (14 per cent.), Rumania (6 per cent.), Greece (3 per cent.), Lithuania (3 per cent.), United States of America (2 per cent.), and the Yémen (2 per cent.). Immigrants who were neither Arabs nor Jews numbered 1,390, of whom 385 came from Great Britain.

Palestine is divided into 3 administrative districts, under District Commissioners. English, Arabic and Hebrew are the official languages of the country. The capital, *Jerusalem*, which occupies so prominent a place in the affections of the Jewish, Christian and Moslem peoples, had a population in Nov., 1931, of 90,503 (51,222 Jews, 19,894 Moslems, 19,335 Christians and 52 other religions); the population was estimated at about 115,000 in 1936. The principal historic sites are the Church of the Holy Sepulchre at Jerusalem which is visited annually by large bands of Christian pilgrims, principally of the Roman, Orthodox and Coptic churches; the Mosque, called the Dome of the Rock, built on the site of Solomon's Temple; the Wailing Wall, which is part of the outer wall of the Temple, now the Mosque Court; the Church of Nativity at *Bethlehem*, reputed to be the oldest Christian church in existence; and *Nazareth*, where Christ spent his childhood. Other large towns in Palestine are Tel Aviv (130,000), Haifa (85,000), Jaffa (75,000), Nablus, Hebron and Gaza (each about 18,000), Ramleh and Lydda (about 11,000), Acre, Nazareth, Safad and Tiberias (9,000), and Bethlehem (7,000). The Government of Palestine, on land provided by the Government and in accordance with plans prepared by the Government, is constructing for the Department of Antiquities at Jerusalem, a museum (the Palestine Archaeological Museum). Toward the cost of the construction, equipment, and endowment of this museum, Mr. John D. Rockefeller, Jr., made a contribution of \$2,000,000. In recognition of the serious damage done by soil erosion, a Department of Forests was set up in 1936 to deal with this problem and to affect improvement of deteriorated lands.

The railway system of Palestine consists of seven sections: *Haifa-Rafa*, continuing southward to El Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at El Kantara; *Haifa-Samakh*, continuing beyond Samakh to Damascus in the French mandated territory of Syria; *Haifa-Acre*; *Nassib-Maan*, E. of the River Jordan; *Jaffa-Lydda-Jerusalem*; *Nablus-Tulkarm* (goods traffic only); *Ras el Ein-Petah Tigna* (goods traffic only). The main junction of the Government Railways is at Lydda, the general offices being at Haifa. In 1936 the kilometrage operated was 999 kilometres, the freight handled amounting to 1,032,443 tons, and the passengers carried numbering 2,485,155. The

gross railway revenue was £P813,085 and the working expenses £P632,964.

The chief ports are Haifa and Jaffa. The Haifa Harbour was completed in August, 1933. The water area enclosed by the main and lee breakwaters is 278 acres; about 90 acres dredged to 37 ft., 65 to 30 ft., and 25 in the oil dock area to 33 ft.; a depth of 31 ft. is provided alongside the main quay. Haifa is in direct communication with Damascus, Amman and El Kantara. At Jaffa there is no harbour for ocean-going steamers, which anchor in the open roadstead west of a reef of low-lying rocks about a mile from the shore; cargo is loaded and discharged at Jaffa by means of lighters. In 1935, 3,750 vessels (5,563,517 tons) engaged in foreign trade entered the ports, and 3,702 (5,534,777 tons) cleared. There are branches of Barclays Bank, Anglo-Palestine, Banco di Roma, and Ottoman Bank in the principal towns.

The country is generally fertile, oranges and grape-fruit are produced on a large scale and form the principal export crops. Olives are extensively cultivated, mainly for the production of olive oil which is used in the manufacture of soap and for edible purposes. Wheat, barley, sorghum, vegetables, grapes and figs are grown on a large scale for local consumption, and there is considerable interest in the development of deciduous fruits. Factories producing intoxicating liquors, soap, edible oils, cigarettes, cement, hosiery, leather articles, &c., are established on a large scale to meet local requirements and for export. At the end of 1935, factories and workshops numbered 5,400, with an estimated capital of £P7,000,000, and 35,000 workers were employed.

In 1934-35 there were 350 Government (Arab) schools with 36,005 Moslem and Christian pupils, 190 private Moslem schools with 11,788 pupils, 179 private Christian schools with 19,594 pupils (besides a number of Latin and Greek Catholic schools concerning which no figures are available), and 493 public and private Jewish schools with 51,359 pupils. Public examinations up to B.A. standard are conducted by the Palestine Board of Higher Studies. There are also training colleges for teachers, technical, trade, law and agricultural schools, and a Hebrew University (with faculties of Humanities and Science).

#### TRANSJORDAN.

*Emir*, H. H. Abdullah ibn Hussein, G.C.M.G., G.B.E., born 1882; second son of King Hussein of Hejaz, appointed April, 1921.

Transjordan consists of the 4 Districts of Maan, Kerak, Balqa, and Ajlun, and is under the same Mandate as Palestine. It is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Saudi Arabia, and has access to the Red Sea at Akaba. No census has yet been taken, but it is estimated that the total population is 300,000, of whom 130,000 are settled, 120,000 semi-nomads, and 50,000 nomads; the great majority are Moslems. The area is unknown, as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudowwara, where it enters Saudi Arabia and continues to Medina. There is a Legislative Council of 6 official and 16 elected members, constituted in 1929.

### RHODESIA, SOUTHERN.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, its political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,344 square miles, and the population as at Census of May, 1936 (preliminary figures) numbered 55,425 Europeans and 5,366 Asiatic and Coloured Persons. The native population was estimated at 1,228,650 as at Dec. 31, 1935. The total number of European births in 1935 was 1,205 (a rate of 22.31 per 1,000) and of deaths 563 (10.43 per 1,000), the marriages numbering 645 (23.89 per 1,000). Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor appointed by the Crown, with an Executive responsible to Parliament. The Constitution provides for the establishment, under certain conditions, of a Legislative Council.

Municipal self-government has been established in Salisbury, Bulawayo, Umtali, Gwelo, Gatooma and Que Que.

On Jan. 24, 1936, the Convention of Representatives of Southern and Northern Rhodesia at Victoria Falls adopted a resolution that the early amalgamation of Southern and Northern Rhodesia, under a constitution conferring the right of complete self-government, was in the best interests of all the inhabitants of both Colonies.

The Rhodesian Railway system begins at Vryburg in the Cape Province and in conjunction with the railways of the Union of South Africa, provides communication from Cape Town through Bechuanaland, Southern and Northern Rhodesia to the Belgian Congo and to Portuguese East Africa (port of Beira). The total mileage of the system is 2,708 miles, of which 1,356 miles are operated within the boundaries of Southern Rhodesia. In the Colony there are several branch lines tapping the chief mining areas. Road motor services with a route mileage of 1,468 miles (Sept. 30, 1935) supplement the railways in outlying areas. According to the Census of motor vehicles taken on Dec. 31, 1935, there were 11,105 motor cars, 2,431 commercial vehicles, and 973 motor cycles in Southern Rhodesia.

On Dec. 31, 1935, there were 238 Post Offices in the Colony, including 48 Money Order and Savings Bank Offices. For 1935, postal revenue was £268,864 and expenditure £209,552. The total wire mileage of the telegraph and telephone system is 36,520 miles. Deposits in the Post Office Savings Bank at the end of 1935 amounted to £498,876.

The Colony possesses 20 well-equipped and well-staffed Government hospitals, 1 mental hospital and 3 leprosy hospitals. In 1935 the establishment of Government medical officers, &c., was 35 doctors, 2 school dentists and 1 analyst. The total number of private medical practitioners registered in the Colony on Dec. 31, 1935, was 152, while dental surgeons numbered

41. There were 211 nurses employed in general hospitals, and 19 in the mental hospital. There are also 20 up-to-date maternity homes, subsidised by the Government and the Beit Trustees. In the Government bacteriological laboratories extensive facilities exist for the investigation of disease. Medical facilities for the benefit of natives exist in the form of native sections attached to Government European Hospitals, small native hospitals, on mines and at other outlying centres. In the native reserves there are also medical missions and dispensaries. Further schemes for the extension of medical facilities for natives are under consideration.

The rights to the rich mineral deposits of Southern Rhodesia, originally acquired by the British South Africa Company, were purchased by the Government in 1933 for £2,000,000. The value of the gold production since occupation (1890) to Dec. 31, 1935, was £94,537,986. The output for 1935 amounted to £5,089,962, including gold premiums valued at £2,019,206. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, platinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crops are maize and tobacco. The total area under cultivation in 1935 was 480,477 acres (maize 266,426, tobacco 41,006, ground nuts 6,609 and legumes and fodders 88,220 acres). The export of citrus fruit in 1935 was 120,102 boxes. Cattle (2,460,878 on Dec. 31, 1935) thrive well; an export trade in chilled beef is being built up. Dairy products sold include butter 1,393,593 lb., milk 1,453,017 gallons, cheese 333,260 lb., and eggs 841,142 dozen. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and candle factories, cement and lime works, and many other undertakings.

The British South Africa Company has relinquished all rights and interests in the land in Southern Rhodesia except in the estates which it was already developing and working on July 30, 1923. Considerable efforts have been made by the Government during recent years to increase the number of new European settlers on the land, which is cheap, and may be had on very favourable terms. A Land and Agricultural Bank makes loans to settlers on easy terms of repayment. Land has been set apart for tribal settlement (Native reserves).

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools, and in addition there is a primary teachers' training centre. For European children there are 75 Government and Government-aided schools (1 vocational, 12 secondary and 62 primary). For children in rural areas, where the population is too scanty for a school, very successful correspondence classes have been inaugurated to supplement the aided governess schools. The total number of European children in all types of schools at the end of 1935 was 20,144. There are nine

schools for children of mixed race, with 1,040 pupils, and native education conducted by mission agencies with Government aid is provided in 1,327 schools, with 101,874 pupils. Grants in aid of native education in 1935-36 amounted to £52,730, the total educational (other than native) expenditure being £310,847 in the calendar year 1935.

#### Ministry (Sept. 1936).

<b>Prime Minister and Minister of Native Affairs, Hon. G. M. Huggins, F.R.C.S., M.P. ....</b>	2,500
<b>Minister of Finance and Commerce, Hon. J. H. Smit, M.P. ....</b>	2,000
<b>Minister of Mines and Public Works, Capt. Hon. W. S. Senior, M.C., M.P. ....</b>	2,000
<b>Minister of Agriculture and Lands, Capt. Hon. F. E. Harris, D.S.O., M.P. ....</b>	2,000
<b>Minister of Justice, Hon. R. C. Tredgold, K.C., M.P. ....</b>	2,000
<b>Minister of Internal Affairs, Hon. Sir Percival Fynn, C.M.G., M.P. ....</b>	2,000

**Medical Director, Dr. A. P. Martin, M.B.**  
**Director of Education, A. R. Mackenzie, M.A.**  
**Chief Native Commissioner, C. Brullock.**  
**Chief Justice, Sir Alexander Fraser Russell.**

**High Commissioner for Southern Rhodesia in London, S. M. Langan O'Keeffe, C.M.G., Rhodesia House, 429 Strand, W.C.2 (allowance £1,200) .....** £2,000

**SALISBURY**, the capital, is situated on the Mashonaland plateau, altitude 4,880 ft. (population as at Census, 1936, 32,784, including 11,386 Europeans). **BULAWAYO**, the largest town in Matabeleland, altitude 4,460 ft. (population 29,482, including 12,329 whites). Other centres are Umtali, Gwelo, Gatooma, Que Que, Wankie, Fort Victoria, Selukwe, and Hartley.

#### RHODESIA, NORTHERN.

Northern Rhodesia lies to the North of the Zambezi, its neighbours being Tanganyika Territory and the Belgian Congo on the north, Nyasaland and Portuguese East Africa on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country comprises an area of 290,323 square miles, and with the exception of the Luangwa, Zambezi and Kafue Valleys, consists of a tableland varying from 3,000 to 4,500 feet, with greater altitudes in N.E., and especially in the vicinity of Lake Tanganyika. The estimated

European population in December, 1935, was 10,000; the native population was estimated (Dec. 31, 1935) at 1,366,425. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,500,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, coffee, wheat, oil seeds, and citrus. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 489,600, and European-owned 115,000. Copper, zinc, vanadium, lead, gold, mica, coal, tin and cobalt have been discovered, and scientific prospecting is being carried on over large areas. The vast copper deposits in the northern part of the Territory have attracted much capital, the three large producing mines, the Roan Antelope, Nkana and Mufulira, being responsible for the annual production of some 143,000 tons of copper, a portion of which is now refined at Nkana; the Nkana copper also contains silver and gold. Zinc is also produced on a considerable scale at Broken Hill, which mine also carries large reserves of lead and vanadium ore. Many species of game are to be found, and good sport at a moderate cost is available for the big-game hunter. The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambezi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 42 post offices, 15 of which are money order offices. The main telegraph and telephone route lies alongside the railway from Victoria Falls Bridge to the Congo border, with branches from Ndola to Luanshya, Ndola to Nkana, and from Nkana to Mufulira; Fort Jameson is connected with the Nyasaland system, and Kasama and Abercorn with the Tanganyika system. Aero-nautical wireless stations at Mpika and Broken Hill are equipped for communication with aircraft in flight (900 metres wave length) as well as for point-to-point communication on short wave. Short wave equipment has been installed at Abercorn, Fort Jameson, Livingstone and Mongu. All wireless stations maintain a public service.

The administration of the Territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 16 members, with a majority of official members. The seat of Government is at Lusaka (opened May 28, 1935). The country is divided into 5 Provinces for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Kasama, Fort Rosebery, Ndola, Luanshya, Nkana and Mongu.

## ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in  $15^{\circ} 55'$  S. lat. and  $5^{\circ} 42'$  W. long. It is  $10\frac{1}{2}$  miles long,  $6\frac{1}{2}$  broad, and encloses an area of 47 square miles, with a population (Census 1931) of 3,995. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it *circa* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry has been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension (Resident Magistrate, L. S. Bartlett), an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from

St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated  $7^{\circ} 55' 55''$  S. lat. and  $14^{\circ} 25' 5''$  W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1502, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is  $7\frac{1}{2}$  miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; in 1936 the population was about 190. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 6 members, the Governor alone making all ordinances.

Sarawak Government Agent in England, A. A. Rennie. Offices, Millbank House, Westminster, S. W. r.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 442,900, composed of various races. The government of Sarawak was obtained in 1842 from the Sultan of Brunei by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent state, and under an agreement of 1888 the State has been placed under British protection. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelibgkang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles). The government consists of a hereditary sovereign and a Supreme Council of 11 (4 European and 7 Malay officers), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 90, appointed by the sovereign.

The country produces sago, gutta-percha, india-rubber, bees-wax, illipe nuts, birds'-nests, oil, gold, silver, antimony, tobacco, rice, rattans, coal and pepper. The large petroleum field at Miri and Bakong, in the Baram district, is now a valuable asset; oil exports (1928) 598,389 tons; (1929) 734,454 tons; (1930) 645,399 tons; (1931) 520,879 tons; (1932) 520,004 tons; (1933) 568,664 tons; (1934) 646,655 tons; (1935) 666,299 tons.

CHIEF TOWN, Kuching. Population (1931), 25,000. Distance from London, 8,700 miles; transit, 25 to 30 days. There are 17 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and

Kuching for Singapore every Saturday. There is also direct communication with Sibiu and Miri.

## SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 92, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 156½ square miles, of which Mahé occupies nearly 56 square miles; the most important of the dependencies are the Amirantes, Farquhar Islds., Coetivy, Astove and the Aldabra Group. The population was estimated (Dec. 31, 1935) at 29,803. At the census of 1931 the population of Mahé was 21,977, Praslin 2,476, La Digue, 1,225, other islands 1,736. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 4° S. of the Equator, the islands are healthy, the death-rate in 1935 being 14·09 per 1,000. There are 27 Roman Catholic and Church of England primary schools; there are also 2 secondary schools.

The principal exports are copra, essential oils, and guano. Aldabra, one of the dependencies of the Seychelles, and about 630 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 4 members (2 *ex-officio* and 2 nominated official and 2 unofficial), and by a Legislative Council of 3 official and 3 unofficial members.

Letters from London *via* Marseilles, 24 days; to London, 21 days.

## SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles, and a population (1931) of 66,422, of whom 420 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes; a babel of tongues is thus to be heard in the streets of Freetown. The total area of the Colony and Protectorate is about 28,000 sq. miles, and the total population about 1,770,000. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 6° 55' and 10° N. lat., and the extreme breadth from east to west is 208 miles, between 10° 15' and 13° 16' W. long. Its estimated area is 24,000 sq. miles, and its population about 1,672,636. For administrative purposes the Protectorate is divided into 2 Provinces, under Provincial Commissioners, assisted by a Senior District Commissioner, and 28 District and Assistant District Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, diamonds, gold, iron ore, kola nuts, palm oil, piassava, ginger, platinum, bennised, hides, rice and pepper. The value of the palm kernels exported in 1935 reached £583,645. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital (population 1931. 55,359), possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 83 miles in length extends in a north-easterly direction from Banya to Makeni. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are (1935) 1,947 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

## SOMALILAND.

(The Somaliland Protectorate.)

Somaliland occupies the "North-Eastern Horn" of the African continent, jutting out into the Indian Ocean along the south of the Gulf of Aden. The coastal area is divided between Great Britain, France and Italy (Eritrea and Italian Somaliland), while the interior is part of Ethiopia.

The British Somaliland Protectorate, declared in 1884, contains about 68,000 sq. miles, its boundaries being defined by treaties with Ethiopia, France and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 344,700. The Protectorate garrison is now confined to a Camel Corps, 400 strong, and a Police force of 550. The chief products are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden.

## STRAITS SETTLEMENTS.

(See MALAYA.)

## TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY (formerly German East Africa, 1884-1918) occupies the east central portion of the African continent, between  $1^{\circ}$ - $11^{\circ}$  45' S. lat. and  $28^{\circ}$  50'- $40^{\circ}$  38' E. long. The Territory is bounded on the N. by Kenya and Uganda; on S.W. by Lake Nyasa, Nyasaland and N. Rhodesia; on S. by Portuguese E. Africa; on the W. it is bounded by the Belgian mandated territory of Ruanda-Urundi and the centre line of lake Tanganyika; on the E. the boundary is the Indian Ocean. Tanganyika ("Great Meeting of the Waters") has a coastline of about 500 miles and an estimated area of 360,000 square miles. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The greater part of the Territory is occupied by the Central African Plateau from which rise many mighty mountains, including *Mt. Kilimanjaro*, the highest point in the Continent of Africa (19,720 ft.), and *Mt. Meru* (14,960 ft.). The Rovuma, Rufiji, Pangani, Wami and Kingani rivers flow into the Indian Ocean; the Mara and Kagera into Victoria Nyanza; the Malagarasi into Lake Tanganyika; the Songwe into Nyasa; and the Saisi and Lupa-Songwe into Lake Rukwa.

The native population consists mostly of tribes of mixed Bantu race. In 1935, the native population of Tanganyika Territory was estimated at 5,138,080. The total white population is about 8,455. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

The amount allocated to education in 1936 was £87,311, further sums being contributed by native administrations. In 1935 there were 91 Government African schools, with 8,105 children in average attendance, and 3 Government Indian schools (av. 600) and 4,834 Mission schools with average attendance of 140,000 pupils and 47 Indian schools (av. 2,600). There are also European schools maintained by or in receipt of financial assistance from the Government. The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

The total area under forests is about 4,455 square miles, of which 4,020 square miles are included in the Government Forest Reserves; 156 square miles await reservation, about 172 square miles are privately owned, and 107 square miles are native communal forest reserves. The principal export crops are sisal-hemp, cotton, coffee, ground-nuts, rice, sesame, copra, beeswax, and ghee; tea, tobacco and kapok, are being produced in increasing quantity. Sisal and tea are produced entirely by non-natives: coffee, maize, and tobacco by both natives and non-natives. Over 90 per cent. of the cotton is grown

by natives. Cassava, sweet potatoes, millets, sorghums, peas, beans, bananas and other tropical fruits are grown mainly for native consumption.

In 1935 there were 4,792,780 cattle, 1,911,641 sheep and 2,566,277 goats in the Territory. The value of the principal minerals produced in 1935 was—gold £369,507; salt £38,607; tin ore £32,596.

The chief exports are sisal, sisal ropes, cotton, coffee, ground-nuts, hides, skins, copra, grain, simsim, beeswax, ghee, diamonds and gold; the chief imports being cotton piece goods, iron and steel manufactures, motor vehicles, foodstuffs, machinery, building materials, kerosene and motor spirit, sugar, rice, spirits, and cigarettes.

The following units of the King's African Rifles are stationed in the Territory:—The Headquarters of the Southern Brigade, the Brigade Signal Section, the Brigade Supply and Transport Corps, the 1st and 6th Bns. and a company of the 2nd Bn., totalling about 1,000 native soldiers and 35 European officers. There is a Police Force of 1,840 of all ranks.

There are two railways of metre gauge in the Territory. The Tanga Railway from Tanga to Arusha via Moshi (272 miles). The Kenya and Uganda Railways connect with this railway at Kahe Junction. The Central Railway from Dar-es-Salaam to Kigoma (774 miles), with a branch line from Manyoni (365 miles) to Kinyangiri (94 miles) via Singida, and a branch line from Tabora (524 miles) to Mwanza (236 miles) on Lake Victoria. Steamers run on Lakes Victoria, Nyasa and Tanganyika. Dar-es-Salaam is in telegraphic communication with many inland centres, and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Mbeya, Dodoma and Moshi are ports of call for Imperial Airways Mail Service, London to Capetown. There are 131 post offices and postal agencies (101 of which have telegraphic facilities), and 138 telegraph offices. Telephone exchanges are established and trunk telephone communication is in operation between various centres in the Territory, and also with Mombasa and Nairobi.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mikindani, and Kilwa, all of which are accessible to ocean-going vessels. In 1935, 523 steamers (exclusive of coastal boats) of 2,399,047 tons entered, and 522 steamers of 2,394,047 tons cleared at the various ports from places beyond the Territory. 2,683 dhows (60,697 tons) entered and 2,721 (60,864 tons) cleared at the various coast ports.

Under an Order of the King in Council (July 22, 1920) the Territory is administered by a Governor, who is assisted by an Executive Council of 6 nominated members and by a Legislative Council of 13 official and 10 non-official nominated members.

### TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat.  $32^{\circ} 6' S.$  and long.  $12^{\circ} 2' W.$ , discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. The main island is about 2,000 miles W. of the Cape of Good Hope, 4,000 miles N.E. of Cape Horn, and about 1,500 miles S.S.W. of St. Helena. It was the resort of British and American sealers from the middle of the 18th century, and in 1760 a British naval officer visited the group and gave his name to Nightingale Island. On August 14, 1816, the group was annexed to the British Crown and a garrison was placed on Tristan da Cunha, but this force was withdrawn after a few months, Corporal William Glass (died 1853) remaining at his own request, with his wife and two children. This party, with two masons imported for the purpose of housing the garrison, formed the present settlement. In 1827 five coloured women from St. Helena, and afterwards others from Cape Colony, joined

the party. The inhabitants are of mixed blood, but the British strain is predominant. In 1885 many of the able-bodied men were drowned through the upsetting of a boat, and in 1886 a grant of stores and provisions was made by Parliament. In 1921 the inhabitants numbered 127 and in 1936 the number was 180; they are stated to be very long-lived. The principal settlement (Edinburgh) is in a fertile tract in the north-west of the island, its name being in honour of a visit from the Duke of Edinburgh in 1867. The inhabitants raise crops and possess cattle, sheep and pigs.

From the death of Corporal Glass until 1933 the oldest inhabitant acted as Governor: in 1933, a council of four was set up (with one of its members as Chairman), the chairman, or chief, acting as island spokesman and conducting marriages in the absence of a chaplain. There is also a women's council for matters affecting women and children. Communication with the outside world is infrequent and the occasional visits of steamers are the only opportunities afforded to the inhabitants for the replenishment of comforts. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

*Resident Chaplain, Tristan Da Cunha, Rev. Harold Wilde.*

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and  $\frac{3}{4}$  m. wide, and rises in two peaks, 960 and 1,205 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in  $40^{\circ} 20' S.$  and  $9^{\circ} 44' W.$ , lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

### THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn from Mt. Zulia, on the Sudan boundary, along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory; and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie Victoria Nyanza (part), Lake Edward (part), Lake George, Lake Albert (half), Lake Kioga, Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Sudan commences. Total area, 93,981 square miles, including 13,620 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Eastern*, comprising the districts of Busoga, Bugwere-Bugishu, Budama, Teso, and Karamoja.

(2) *Northern* (Bunyoro, Acholi, Lango, and West Nile).

(3) *Western* (Toro, Ankole, and Kigezi).

(4) *Buganda* (Mengo, Masaka and Mubende) with islands in Lake Victoria.

The whole Protectorate is under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H.H. Sir Daudi Chwa, K.C.M.G., grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native Council, and each county and district chief also has his *Lukiko* to assist him in local government and in the administration of justice. In *Buganda* (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by paramount chiefs, as well as in most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local British courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland, Zanzibar, and Tanganyika Territory. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a battalion of the King's African Rifles stationed in the Protectorate.

The total population of Uganda (Census of May 1931) is given as 3,553,534, composed as follows: Natives, 3,536,267; Asiatics, 14,150; Europeans, 2,002, and others, 1,116; estimated (Dec. 1934) at 3,640,636 (Natives 3,623,591, Asiatics 15,086, Europeans 1,951). About 2,000,000 natives speak Bantu languages, the most important of which is *Luganda*, the language of the Baganda tribe, after whom the Protectorate is named. *Swahili* is also widely spoken. There are a few pygmies living near the Semliki river and the Mufumbiro mountains; the rest of the natives belong to the Nilotic, Hamitic and Sudanese groups. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers; their efforts have for some years been supplemented by Government, which has also established a University College for natives at Makerere, Kampala.

The Customs Services are now merged in those of Kenya (*q.v.*). The export trade is mainly in cotton (£2,822,739 in 1935), coffee, chillies, oil-seeds, sugar, ivory, tin ore, and hides and skins. The trade is chiefly with Great Britain, the United States, India and Japan.

The main line of the Kenya and Uganda Railways and Harbours extends from Mombasa and Nairobi, via Tororo and Jinja, to Kampala. There are branches from Tororo to Soroti, from Mbulamuti to Namasagali on Lake Kioga, and from Kampala to Port Bell on Lake Victoria. The Railway Administration maintains a regular steamer service on Lake Kioga between Namasagali and Masindi Port; and on Lake Victoria

between Jinja, Port Bell, Entebbe, Kisumu and Tanganyika Ports. A weekly service is maintained on Lake Albert and the Nile between Butiaba and Nimule (connected by motor road with Juba in the Sudan) during the season (October to February), and a fortnightly service between Butiaba and the Belgian port of Kaseuni. A through service is thus provided by the Railway Administration from Mombasa to the Sudan and the Belgian Congo. 1,011 miles of all-weather main roads radiating from Kampala to the principal administrative centres is maintained by the Public Works Department, and about 5,260 miles of excellent roads are kept up by the Native Administrations. The Post and Telegraph system is amalgamated with those of Kenya and Tanganyika. Aerodromes exist at Entebbe, Jinja, Tororo, Masindi and Mbarara, and seaplane alighting areas at Entebbe, Jinja, Port Bell and Butiaba. There are hotels at Kampala, Jinja, Tororo, Masindi, Fort Portal, Kabale, Mbarara, Masaka and Mubende.

The headquarters of the British administration is at ENTebbe; the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province). There is an Executive Council of 7 ex-officio members and a Legislative Council of 6 ex-officio and 4 unofficial members. The Governor presides over both Councils.

The unit of currency is the shilling, and the lower coinage is on a cental basis.

### ZANZIBAR.

(The Zanzibar Protectorate.)

*Sultan, H. H. Seyyid Sir Khalifa bin Harub, O.B.E., K.O.M.G., born Aug. 26, 1879; succeeded Dec. 9, 1911.*

*Heir-Presumptive, Seyyid Abdallah bin Khalifa, born Feb. 12, 1910.*

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tungi Bay and north as War-sheikh; but since the cession of the coast-line from Ruvuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1904 respectively, they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head), the islands of Lamu, Manda, Patta, and Siu. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

The population of Zanzibar and Pemba (Census of 1931) was 235,428, the area of the former being 640 square miles, and of the latter 380 square miles.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at £474,513 in 1935) and produce quantities of copra (exports in 1935, £120,352). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed. Of late years its importance as a port of transhipment and distributing centre has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast. There are 241 miles of roads throughout the Protectorate suitable for motor traffic.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, petroleum and piece-goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally.

Tonnage of ocean-going steamers which entered the port in 1935, 2,859,364; and 2,677 dhows

(51,688 tons). Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

Zanzibar is distant 6,850 miles; transit, 20 days.

### CONDOMINIUMS.

#### THE ANGLO-EGYPTIAN SUDAN.

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36' N. lat., and reaches from French Equatorial Africa about 21° 49' E. (at 22° 45' N.) to the north-west boundary of Eritrea (Italian) in 38° 35' E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 950 miles. The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Ethiopia; on the south lie Kenya Colony, the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa and Libya (Italian).

The estimated area is about 969,600 sq. miles, with a population of about 5,800,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 6,800 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The *Gambela enclave* (within the boundaries of Ethiopia) is leased as a trading post.

The Nile enters at Nimule, in Equatorial Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,716 miles, and from its sources to the confluence its length may be reckoned at 1,810 miles, giving a total waterway of 3,526 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*.

**Government.**—The Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports *via* the Red Sea ports may not exceed those levied in Egypt. The Sudan is divided into 9 provinces (*Mudiriyyas*) under governors (*Mudirs*). Each province is subdivided into districts with one (or more) District Commissioners in charge of each. Native administrative officials are employed under the District Commissioners. Most districts are subdivided into areas of Native Administration under the control of Native Authorities. *Civil Justice* is administered by a Chief Justice and puisne judges. There are also Province and District Judges. The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Mamurs of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie. Courts of Sheikhs or Chiefs in all parts of the country have varying powers of limited jurisdiction in accordance with native customs. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The *Police* are locally enlisted and are under Provincial administration.

**Education.**—In addition to *khatwas* there are 96 elementary vernacular schools attended by 12,267 pupils, and 11 *Intermediate schools*, where instruction is given in English as well as Arabic, attended by about 1,064 pupils; a *secondary school* at Khartoum (Gordon College), a *teachers' training school* at Bakht Er Ruda, near Ed Duiem, and *technical or trade schools*, at Omdurman and Atbara. There are also 28 *elementary vernacular schools for girls*, and a *training college for girls' teachers*.

**Production.**—The principal grain crop is *dura* (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Both Egyptian and American-type cotton have been successfully established, and increasing quantities are being produced annually. The *Gezira Irrigation Scheme* at present (1936) enables an area of nearly 800,000 acres to be cultivated between the Blue and White Niles, and one-quarter is under cotton. The necessary water is stored by the Sennar Dam on the Blue Nile, about 160 miles south of Khartoum. Cotton cultivation in the irrigated area is managed by a syndicate, and

is one of the largest cotton-growing schemes in the world (187,740 feddans in 1935-36). The Sudan is the chief source of the world's supply of gum arabic. Salt is produced by evaporation at Port Sudan to supply the whole needs of the country and for export. Other products include sesame, senna leaves and pods, garad (tanning pods), ground-nuts, dates, chillies, lulu nuts, timber, melon seed, dom-nuts (vegetable ivory), maize, beans and peas, cattle and sheep, ghee (clarified butter), hides and skins, trochus and mother-of-pearl shell, beeswax and honey, and gold.

**Communications.**—The railways and steamers throughout the country are administered by a Government department. During the past few years nearly 500 miles of new railways have been built, while other transport has been revolutionised by the opening up of a network of motor roads spreading all over the country during the dry season. In 1935 there were 2,021 miles of railways open for traffic. The gauge is 3 ft. 6 in. Since the opening of the eastern railway the Red Sea port of Port Sudan receives much of the trade which formerly passed northwards. A line from Sennar Town, crossing the Sennar Dam, was completed during 1929, and affords an alternative route (498 miles) for produce of the Southern provinces to Haiya Junction, 126 miles W. of Port Sudan. There are over 3,000 miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September, but communication with the Kenya and Uganda Railways is maintained throughout the year by means of a motor service over the Juba-Nimule road, which connects with the regular fortnightly sailings of the Sudan Nile Service and the Uganda Lake Albert Service. Frequent services are also provided over the Juba-Aba Road, connecting with the road system of the Belgian Congo. During the dry season (December to March) private enterprises also operate motor car services between Juba and Kampala (600 miles) and Juba and Nairobi (800 miles). In the interior of the country there are other dry season motor roads. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 5,737 miles in 1928. There are 80 stationery and 16 travelling Post and Telegraph offices, and 21 wireless telegraphy offices.

**Finance.**—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

	1934.	1935.
Revenue .....	* £3,774,911	* £4,098,413
Expenditure .....	3,749,488	3,993,113
Total Imports .....	3,945,149	5,369,879
Total Exports .....	3,848,679	4,567,279
Imports from U.K. ....	972,802	1,687,897
Exports to U.K. ....	2,084,116	2,137,184

The principal export is cotton, the value of which, together with cotton-seed, amounted in 1935 to £2,750,734; gum arabic, £676,322.

Governor-General, H.E. Sir George Stewart Symes, K.C.M.G., K.B.E., D.S.O. (1933).

Private Sec. and Comptroller, G. E. R. Sandars, M.B.E.

A.D.C., Capt. N. P. H. Tapp.

\* Inclusive (since 1929) of net receipts and expenditure, Sudan Railways.

## GOVERNOR GENERAL'S COUNCIL.

*Ex-Officio Members*, the Civil Secretary; the Financial Secretary; the Kaid El'Amim, *see* Sudan Defence Force, *post*; and the Legal Secretary.

*Additional Members*, R. K. Winter, C.M.G.; E. D. Pridie, D.S.O., O.B.E.; H. B. Emley.

## SUDAN AGENCY.

*Sudan Agent (Civil)*, M. S. Lush, M.C.

## DEPARTMENTS.

*Advocate-General and Official Administrator*, C. H. A. Bennett.

*Director of Agriculture and Forests*, A. Lowden.

*Advocate-General*, M. Hillary, D.S.O., O.B.E.

*Chief Justice*, J. P. Gorman,

*Chief Secretary*, J. A. Gahan, C.M.G.

*Director, Dept. of Economics and Trade*, E. M. Roper.

*Director of Customs*, R. C. Cundrey.

*Warren, Gordon College*, C. W. Williams, M.B.E.

*Sec. for Education*, R. K. Winter, C.M.G.

*Principal Secretary*, F. D. Rahman, M.C., A.C.A.

*Finance Director*, M. J. W. R. Baker, O.B.E.

*Grand Kadi*, Sheikh Mohammed Noaman El Garim.

*Chief of Police and Public Security Branch*, J. C. Penny, M.C.

*Registrar General of Lands and Director of Lands*, H. A. Evans, M.C.

*Local Secretary*, L. H. Bell, C.B.E.

*Mufti*, Sheikh Ahmed es Sid el Fil, C.B.E.

*Director of Posts and Telegraphs*, Lt.-Col. J. I. Toulmin, C.B.E., D.S.O.

## London Office.

(Wellington House, Ruckhingham Gate, S.W. 1.)

*Controller*, A. B. B. Howell, M.B.E.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town contains a large mosque for Mohammedans, a cathedral, and the Gordon College, with extensive Government buildings. Population 46,676. Opposite Khartoum, on the Blue Nile, is Khartoum North (18,449), and on the White Nile is Omdurman (110,959), the former Mahdist capital.

## THE NEW HEBRIDES.

The *New Hebrides Group*, in the South Pacific Ocean, situated between the 13th and 21st degrees of South latitude and the 166th and 170th degrees of East longitude, of an area of roughly 5,700 square miles, are administered by a British-French Condominium Government in accordance with the provisions of the Anglo-French Convention of 1906, later modified by the Anglo-French Protocol of 1914. The executive consists of a British and a French Resident Commissioner assisted by a staff of officers. The population is estimated at 43,000 (British Nationals 178, French Nationals 909, French Protected Subjects (Lonkinese, &c.) 882, Natives, estimated at 40,000 to 60,000). Principal products, copra, coffee, cotton, cocoa, maize, wool, sandalwood and shell. Joint revenue, 1935, £23,008; expenditure, £26,102. Total imports, 1935, £115,492; total exports, £130,937. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia; there is a two-monthly service with France, *via* Panama. *British High Commissioner*, Sir Arthur Richards, K.C.M.G.

*French High Commissioner*, M. Saidous.

*British Resident Commissioner*, G. A. Joy.

(Allowances £100) £800 to £1,000

*French Resident Com.*, M. Casimir (*acting*).

*President of Joint Court*, Señor Manuel Bosch Barrett.

*British Judge (vacant)*.

*French Judge*, M. Jeanson (*acting*).

## FIRE LOSSES IN THE UNITED STATES.

(Estimated by the *Journal of Commerce*, 1889-1915, and since 1915 by the *National Board of Fire Underwriters*, 85 John Street, New York.)

In the following table the losses for 1906 include the losses from fires following the disastrous earthquake in San Francisco. The *Loss of Life* caused by fires is estimated to amount to 10,000 persons annually. The *Fire Losses in New York (1935)* are stated at \$8,731,595; Chicago (1935) \$3,712,061; Montreal (1935) \$2,026,745; in London, Eng. (1935) \$5,296,025.

Year	Loss.	Year	Loss.	Year	Loss.	Year	Loss.

\* In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 1930 (1,422,533) is included for that year in the figure for "Other races," and its inclusion accounts for most of the increase between 1920 and 1930. It is estimated that the 1920 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. If these are deducted from the 1920 total, there is obtained what might be termed an adjusted figure, 94,120,374, which is more closely comparable with the 1930 figure for the white population.

## BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40.5 per cent. of the total population. The birth registration area was established in 1915; it included at that time 31.1 per cent. of the total population. In 1933, for the first time, each area included the total population of Continental United States. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1925 and 1930 to 1935—

CALENDAR YEAR	BIRTHS.*		DEATHS.*	
	Number.	Rate per 1,000.	Number.	Rate per 1,000.
1925	1,878,880	21.5	1,219,019	11.8
1930	2,203,958	18.9	1,343,356	11.3
1931	2,112,760	18.0	1,322,587	11.1

1933	2,081,232	16.6	1,342,106	10.7
1934	2,167,636	17.1	1,396,903	11.0
1935 <sup>b</sup>	2,154,890	16.9	1,392,512	10.9

## IMMIGRATION AND EMIGRATION.

From 1820 to 1936, 38,018,550 alien immigrants landed in the United States. In the fiscal year ended June 30, 1936, 36,329 immigrant and 154,570 non-immigrant aliens were admitted, a total of 190,899. During the same year, 35,817 emigrant and 157,467 non-emigrant aliens departed, a total of 193,284. The net decrease for the year was 2,385.

## MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorce.

YEAR.	MARRIAGES	DIVORCES GRANTED.		
	Total.	To Wife.	To Husband.	* Total.
1916	1,040,684	74,893	33,809	114,000
1930	1,126,856	137,309	52,554	191,591
1931	1,060,914	132,612	49,591	183,664
1932	981,903	117,375	42,335	160,338

\* No inquiry conducted concerning Marriage and Divorce since 1932.

\* The totals include divorces for which no detailed statistics were obtained.

\* Exclusive of still-births. a Provisional.

## PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude  $25^{\circ}$ - $49^{\circ}$  North and longitude  $67^{\circ}$ - $124^{\circ}$  30' West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 miles on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone Platte, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium; the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,496 feet above sea level, and the lowest point of dry land is in Death Valley, 276 feet below sea level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

## GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to twenty-first Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, Aug. 26, 1920, Feb. 6, 1933, and Dec. 5, 1933), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

## THE EXECUTIVE.

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the first Monday after the second Wednesday in December following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the sixth day of January by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. Under the XXth Article of the Constitution the terms of the President and Vice-President end at noon on the 20th day of January of the years in which such terms would have ended if the Article had not been ratified, and the terms of their successors then begin. In case of the removal or death of both President and Vice-President, a statute provides for the succession, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of not exceeding \$25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the advice and consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

## THE PRESIDENT.

*President of the United States (1933-1941).* Franklin D. Roosevelt, of New York, born at Hyde Park, New York, Jan. 30, 1882; A.B., Harvard University, 1904; Columbia University Law School, 1904-1907; member of New York Senate, 1910 to March 17, 1913 (resigned); Assistant Secretary of the Navy, 1913-1920; elected Governor of New York in 1928; and re-elected in 1930; in charge of the inspection of United States naval forces in European waters, July-Sept., 1918, and of demobilization in Europe, Jan.-Feb., 1919. Re-elected President, Nov. 3, 1936. Democrat.

1. *Vice-President*, John Nance Garner, of Texas (born Nov. 22, 1869), elected Vice-President Nov. 8, 1932; re-elected Nov. 3, 1936. Democrat.

## THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State*, Cordell Hull, of Tennessee (born 1871), appointed March 4, 1933.
3. *Secretary of the Treasury*, Henry Morgenthau, Junior, of New York (born 1891), appointed Jan. 1, 1934.
4. *Secretary of War*, Harry H. Woodring, of Kansas (born 1890), appointed Sept. 25, 1936.
5. *Attorney General*, Homer Stillé Cummings, of Connecticut (born 1870), appointed March 4, 1933.
6. *Postmaster-General*, James A. Farley, of New York (born 1888), appointed March, 1933.
7. *Secretary of the Navy*, Claude Augustus Swanson, of Virginia (born March 31, 1862), appointed March 4, 1933.
8. *Secretary of the Interior*, Harold L. Ickes, of Illinois (born 1874), appointed March 4, 1933.
9. *Secretary of Agriculture*, Henry Agard Wallace, of Iowa (born 1888), appointed March 4, 1933.
10. *Secretary of Commerce*, Daniel Calhoun Roper, of South Carolina (born 1867), appointed [March 4, 1933].
11. *Secretary of Labor*, Frances Perkins, of New York, appointed March 4, 1933.

## THE CONGRESS.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 281,000. The Senate consists of 96 members. The salary of a Senator is \$10,000 per annum, with mileage at 20 cents per mile each session. The House of Representatives consists of 435 representatives besides a delegate from Alaska, a delegate from Hawaii, one resident commissioner from the Philippines, and a resident commissioner from Porto Rico. The salary of a Representative is \$10,000 per annum, with mileage as for Senators. By the XIXth Amendment sex is no disqualification for the Franchise.

## THE SEVENTY-FOURTH CONGRESS.

(Noon of Jan. 3, 1935 to Noon of Jan. 3, 1937.)

<i>President of the Senate</i> , John Nance Garner, <i>Tex.</i> .....	\$15,000
<i>Speaker of the House of Representatives</i> , William B. Bankhead, <i>Ala.</i> .....	15,000

## LIBRARY OF CONGRESS.

(National Library),

Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now \$165,000); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which was in 1866 (then 40,000 volumes; now over 550,000 volumes) deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers. The Library of Congress now contains 5,220,794 volumes (gain in 1935-36, 228,284). The building was first occupied in 1897. Considerable additions (and an annexe now being constructed) have brought the total cost to approximately \$18,717,000, and the floor space to 1,544,930 square feet (35½ acres). The book stacks, including the new constructions and annexe, contain a little over 4¼ miles of shelving. The library is maintained by Congress, the appropriation for 1936-37 being \$2,504,025. An auditorium for chamber music (the gift of Mrs. E. S. Coolidge) was opened in 1925, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

<i>Librarian of Congress</i> , Herbert Putnam, LL.D. ....	\$10,000
<i>Chief Assistant Librarian</i> , (vacant)	
<i>In Charge of Reference Work</i> , William Adams Slade .....	5,400

<i>Executive Assistant</i> , Allen R. Boyd .....	\$5,400
<i>Secretary</i> , Jessica L. Farnum .....	3,800

## THE SMITHSONIAN INSTITUTION

The Mall, Washington, D.C.

<i>Secretary</i> , C. G. Abbot.	
<i>Asst. Secretary</i> , A. Wetmore.	
<i>Administrative Assistant to the Secretary</i> , H. W. Dorsey.	
<i>Treasurer</i> , Nicholas W. Dorsey.	
<i>Editor</i> , Webster P. True.	

## Board of Regents.

*Chancellor*, The Chief Justice of the U.S.  
*Chairman, Executive Committee*, F. A. Delano.

Government and privately supported Bureaux under direction of Smithsonian Institution.

## National Museum.

<i>Assistant Secretary in Charge</i> , Alexander Wetmore.	
<i>Associate Director</i> , J. E. Graf.	
<i>Head Curators</i> , Leonard Stejneger, R. S. Bassler, C. W. Mitman, Frank M. Setzler (acting).	

## National Gallery of Art.

*Director*, R. P. Tolman (acting).

## Freer Gallery of Art.

(A unit of the National Gallery.)

*Curator*, John E. Lodge.

## Bureau of American Ethnology.

*Chief*, M. W. Stirling.

## International Exchanges

*Secretary (in Charge)*, C. G. Abbot.

*Chief Clerk*, C. W. Shoemaker.

## National Zoological Park.

*Director*, William M. Mann.

## Astrophysical Observatory.

*Director*, C. G. Abbot.

## Division of Radiation and Organisms.

*Director*, C. G. Abbot.

*Asst. Director*, Earl S. Johnston.

## NATIONAL COMMISSION OF FINE ARTS.

Navy Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

*Chairman*, Charles Moore, *Detroit, Mich.*

*Members*, Gilmore D. Clarke, *N.Y.*; Lee Lawrie, *N.Y.*; John M. Howells, *N.Y.*; Eugene F. Savage, *N.Y.*; Charles L. Borie, Jr., *Pa.*; Henry R. Shepley, *Mass.*

*Secretary and Executive Officer*, H. P. Caemmerer.

## THE JUDICATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., where a State is a party to the suit, and with

appellate jurisdiction from inferior Federal Courts and from decisions of the highest Courts of the States. (2) The *Circuit Courts of Appeals*, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The *92 District Courts*, each served by a District Court Judge.

### THE SUPREME COURT

(U.S. Supreme Court Building, Washington, D.C.).

*Chief Justice*, Charles Evans Hughes,

N.Y., born 1862, *apptd.* 1930 ..... \$20,500

*Associate Justices* (each \$20,000).

### DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

### THE ARMY OF THE U.S.

The present maximum authorised strength of the Regular Army is: Commissioned officers 12,588; warrant officers 784; enlisted men (approximately) 165,000, exclusive of the Philippine Scouts. The actual strength of the entire active Army of the United States on June 30, 1936, including retired personnel on active duty at the time, was 166,121, of whom 12,125 were commissioned officers, 784 warrant officers, and 153,312 were enlisted men. These figures include the 6,436 enlisted men of the Philippine Scouts. The Army is made up entirely of volunteers.

### PRINCIPAL WARS OF THE U.S.

### U.S. WAR PENSIONS.

(Civil War, and War with Spain &c., but exclusive of World War Pensions.)

Year.	Number of Pensioners on Roll.			Total Payments.
	Soldiers.	Widows, &c.	Total.	
1900	752,510	241,019	993,529	\$138,462,130
1909	599,580	218,335	817,915	229,889,986
1930	256,988	207,269	464,257	219,203,541
1931	255,033	196,400	451,433	234,419,721
1932	251,144	186,707	437,851	232,509,429
1933	242,153	174,687	416,840	234,996,328
1934	217,540	158,401	375,941	137,179,263
1935	213,798	151,618	365,416	154,556,041
1936	223,388	147,261	370,649	279,545,695

The total disbursement in pensions (exclusive of World War) since the War of Independence to June 30, 1936, is \$9,342,456,897, of which \$7,887,575,217 has been paid on account of the Civil War. *World War Pensions.*

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals. (See "Ordinary Expenditures" under "Finance," post.)

By Executive Order of July 21, 1930, the Veterans' Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Soldiers, were consolidated in accordance with the Act of Congress, approved July 3, 1930, by the President. The combined organisation is known as the *Veterans' Administration*, under the direction of Brigadier-General Frank T. Hines, formerly Director of the Veterans' Bureau, now Administrator of Veterans' Affairs, Washington, D.C.

### THE NAVY OF THE U.S.

On October 1, 1936, the Navy of the United States consisted of the following seagoing vessels: 8 battleships, not "over-age"; 7 battleships, "over-age"; 16 heavy cruisers, not "over-age"; 1 heavy cruiser, "over-age"; 10 light cruisers, not "over-age"; 3 aircraft carriers, not "over-age"; 1 aircraft carrier, "over-age"; 10 destroyers, not "over-age"; 17 destroyers "over-age" (including 4 light mine layers); 24 submarines, not "over-age"; 55 submarines, "over-age"; 4 mine layers; 28 mine sweepers; 17 eagles; 15 submarine chasers; 3 gunboats; 8 river gunboats; 2 converted yachts; 8 destroyer tenders; 6 submarine tenders; 1 seaplane tender; 9 seaplane tenders (small); 3 repair ships; 1 floating dry dock; 4 store ships; 3 colliers; 18 oilers; 2 ammunition ships; 5 cargo ships; 2 transports; 28 ocean going tugs; 2 hospital ships; 6 submarine rescue vessels; 10 miscellaneous (auxiliaries), and 25 old unclassified vessels.

On the above-mentioned date there were under construction: 2 heavy cruisers, 9 light cruisers, 3 aircraft carriers, 6 destroyers, 17 submarines and 2 gunboats. In addition to the foregoing construction, the following have been authorized but not appropriated for—1 transport; the following have been appropriated for but are not yet under construction—2 destroyers and 1 submarine.

Information as to characteristics, costs, &c., concerning naval vessels mentioned above, may be found in *Ships' Data, U.S. Naval Vessels*, which may be obtained from Superintendent of documents, Government Printing Office, Washington, D.C., price 60 cents.

*Note:* Age ("not 'over-age'" and "over-age") as of the end of 1936.

## EDUCATION.

## State School Systems.

In 1933-34 the total number of children in the United States 5 to 17 years of age was 32,392,749, of whom 26,434,193 (13,448,113 boys and 12,986,080 girls) were enrolled in public elementary and secondary schools, and 2,691,033 were enrolled in private elementary and secondary schools, and 103,021 in private commercial and business schools. The average daily attendance in the public schools was 22,458,190, the average length of school term was 171.6 days, and the average number of days attended by each pupil enrolled was 145.8 days. In 1933-34, 847,120 teachers (161,949 men and 685,171 women) were employed. The average annual salary of all teachers was \$1,227. The total number of buildings used as school houses was 241,428, and the estimated value of all public school property was \$6,624,771,206.

The total revenue receipts for school purposes, excluding balances on hand, was \$1,810,652,093. Of this amount, \$22,058,583 was received from permanent school funds and from the rent of school lands, \$402,500,724 from State taxes or State appropriation, \$1,317,898,716 from local tax or appropriation, and \$68,194,070 from all other sources, State and local. The total payments, excluding payments of bonds, were \$1,720,105,229. This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, \$59,276,555; for salaries of superintendents, supervisors, principals and teachers, \$1,103,705,671; and for all other purposes, \$557,123,003.

## Compulsory Attendance Laws.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

## Universities, Colleges and Professional Schools.

Of the 1,166 universities, colleges, and professional schools, 287 are public institutions and 879 under private control or management. The total number of instructors in both private and public institutions was 91,375 (69,270 men and 22,105 women). The public institutions enrolled 400,598 undergraduate and graduate students (249,084 men and 151,514 women). The private institutions enrolled 518,578 undergraduate and graduate students (321,430 men and 197,148 women). In chemical engineering, 7,533 students were enrolled; in civil engineering, 8,699; in electrical engineering, 11,906; in mechanical engineering, 11,903; and in mining engineering, 1,708.

The total number of baccalaureate degrees conferred in 1933-34 was 119,853 (76,786 men and 43,067 women); 1,167 honorary degrees were conferred.

The schools of theology enrolled 11,477 students and reported 1,637 graduates; law schools, 36,445 students and 8,577 graduates; schools of medicine, 24,741 students and 5,507 graduates; schools of dentistry, 7,554 students and 1,912 graduates; schools of pharmacy, 7,813 students and 1,073 graduates; and schools of veterinary medicine, 1,409 students and 221 graduates.

## Teachers' Colleges and Normal Schools.

In 1933-34, 252 teachers' colleges and normal schools reported to the United States Office of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 214 are public institutions, and 38 are private institutions; 161 are teachers' colleges, 150 are public, and 11 are private institutions (schools granting a degree after four years' work beyond high school); 41 are State normal schools; 13 are city normal schools; 13 are county normal schools; and 27 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 10,560. The total number of students enrolled was 136,184 (45,203 men and 90,978 women). Of this total enrolment, 131,499 students are in normal training courses. The number of graduates from the normal training courses was 33,942. 16,303 bachelor's degrees were also conferred, 5,555 on men and 10,748 on women. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 77,427. The total receipts for normal schools (1933-34) were \$43,681,581. The total number of volumes in the libraries was 4,572,182.

## Nurse Training Schools.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Office of Education. In 1930-31 the number of such schools reporting was 1,844. The number of pupils enrolled in these schools in 1930-31 was 100,419 and the number graduated 18,623. Of the schools reporting, 66 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 428,472 beds, and the average daily number of patients is 325,319. In 1930-31 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals two-thirds of the schools required 8 hours of duty daily in 1930-31. In hospitals for the insane, about a fourth required 12 hours duty, a fourth 10 hours, and less than a third, 8 hours.

The remuneration granted the pupils in general hospitals is usually less than \$200. In the first year 45 per cent. of the schools pay less than \$10 per month, and more than 50 per cent. pay from \$10 to \$15 per month during the second and third years. About 15 per cent. pay no remuneration at all. In the schools in hospitals for the insane the remuneration usually exceeds \$400. In the first year of the course 48 per cent. of the schools pay between \$25 and \$50 a month.

More than 89 per cent. of all the nurse training schools in general hospitals offer a three-year course. In hospitals for the insane, about 80 per cent. of the schools offer a three-year course, and the remaining schools offer a two-year course. 87 per cent. of the general nurse training schools require four years of high school work for admission.

Of the nurse training schools reporting, about 10 per cent. are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

**Public High Schools.**

In 1933-34, 23,214 public high schools reported to the Office. The total number of teachers in these secondary schools was 227,727\* (87,703 men and 140,024 women). The total number of pupils enrolled in these schools was 5,340,563 (2,644,230 boys and 2,696,333 girls). The total number of coloured pupils included in the preceding figures is 189,087. In the first year of the course 1,702,817 pupils were enrolled, in the second year 1,435,636, in the third year 1,150,868 and in the fourth year 1,051,242 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 1,216,182 pupils were enrolled. The number of graduates reported was 806,510 (382,871 boys and 423,639 girls).

There were 16,574 regular high schools that reported a four-year curriculum. In these four-year high schools there are 3,360,444 pupils enrolled (1,659,668 boys and 1,700,776 girls). In addition, there are 1,948 junior high schools, with 1,220,101 pupils (610,650 boys and 609,451 girls); 3,938 junior-senior high schools, with

\* Includes 10,404 men and 29,629 women teachers in junior high schools.

1,236,846 pupils (607,478 boys and 629,368 girls), and 753 senior high schools, with 740,549 pupils (370,824 boys and 369,725 girls).

**Private Elementary and Secondary Schools.**

In 1933 there were 11,515 private elementary and secondary schools, 8,297 of which reported. Of these 582 were for pupils of secondary grade, 5,697 were for pupils below secondary grade, and 2,018 had both elementary and secondary departments. These 8,297 schools enrolled 2,443 nursery, 37,506 kindergarten, 1,716,548 elementary, 270,128 secondary, and 4,837 junior college students. If all schools had reported it is estimated the enrollment would have been 2,324,281 elementary and 345,277 secondary. The schools reported had 68,307 teachers (40,132 elementary, and 19,175 secondary). About 90 per cent. of the elementary schools, including departments, and 80 per cent. of the secondary schools, were under the control of religious denominations, the greater number being under the Roman Catholic church. Of the 2,600 secondary schools and departments over 1,020 were boarding schools and many were for either boys or girls exclusively.

**FINANCE.**

**ORDINARY RECEIPTS AND EXPENDITURES CHARGEABLE AGAINST THEM.**  
(On the basis of daily Treasury statements.)

Year.	Receipts (a).	Expenditures (b).	Year.	Receipts (a).	Expenditures (b).

## PRODUCTION AND INDUSTRY.

*Agriculture.*—The total land surface, excluding Island possessions and Alaska, is 3,903,266,640 acres, of which, in 1935, 1,054,515,111 acres were farms (513,913,969 acres improved). The total number of farms in 1935 was 6,812,350.\* The gross value of farm products of the United States in 1935 was \$8,010,000,000, as compared with \$6,681,000,000 in 1934. Crops in 1935 were valued at \$3,445,000,000, live-stock products (including animals sold or slaughtered) at \$4,585,000,000.

Farm value of principal crops in 1934 and 1935:—

Crop.	1934.	1935.
Corn (Maize).....	\$1,203,893,000	\$1,356,961,000
Wheat.....	416,368,000	517,464,000
Oats.....	260,560,000	377,516,000
Barley.....	79,994,000	106,130,000
Cotton Lint.....	595,615,000	590,124,000
Seed.....	148,981,000	148,160,000
Tobacco.....	224,699,000	237,011,000
Potatoes.....	181,857,000	231,233,000
Sweet.....	61,805,000	58,555,000
Truck Crops.....	259,670,000	304,435,000
Hay.....	774,468,000	653,876,000
Apples.....	106,451,000	118,534,000
Farm Gardens.....	144,814,000	188,161,000
Animal Products:		
Cattle and Calves†	553,568,000	614,110,000
Hogs.....	520,162,000	888,289,000
Sheep and Lambs†	100,024,000	122,287,000
Chickens.....	220,124,000	321,642,000
Eggs.....	432,491,000	581,575,000
Milk.....	1,517,416,000	1,725,292,000

*Minerals.*—The total value of all mineral products of the U.S. in 1935 was \$3,688,000,000; the value of metallic minerals produced was \$721,000,000 (pig iron, \$358,145,499; copper, \$63,295,000; gold, \$124,115,915; and silver, \$33,080,576), and of non-metallic minerals (1935) the total value was \$2,950,000,000 (bituminous coal, \$699,900,000; Pennsylvania anthracite, \$267,600,000; petroleum, 993,942,000 barrels of 42 gallons, value \$994,000,000; natural gas, \$422,000,000; cement, \$114,942,212).

## MANUFACTURES.

The manufacturing establishments enumerated at the biennial Census of 1933 numbered 141,769, the value of their products being \$31,358,840,338, as compared with a value in 1931 of \$41,038,402,307.

\* Number of farms by sizes not available as yet for 1935.  
† Includes value of Government purchases in the Emergency Drought Purchase programme as follows:—cattle and calves, 1934, \$108,600,000, 1935, \$5,941,000; sheep and lambs, 1934, \$7,221,000.

The leading manufacturing States, ranked according to value of products, are New York, Pennsylvania, Illinois, Ohio, Michigan, and New Jersey.

## Leading Areas ranked by the Value of their Manufactured Products for 1931 and 1933.

## Leading Industries (Ranked by Value of Products) in Principal Industrial Areas for 1933.

*New York City Area.*—Women's clothing not elsewhere classified; Printing and publishing, newspaper and periodical; Men's, youths and boys' clothing (except work clothing) not elsewhere classified; Bread and other bakery products; Printing and publishing, book, music and job; Meat packing, wholesale; Petroleum refining; Cane-sugar refining; Gas, manufactured, illuminating and heating.

*Chicago Area.*—Meat packing, wholesale; Steel-works and rolling-mill products; Petroleum refining; Printing and publishing, newspaper and periodical; Printing and publishing, book, music and job; Foundry and machine-shop products; Bread and other bakery products; Confectionery; Electrical machinery, apparatus and supplies.

*Philadelphia Area.*—Petroleum refining; Knit goods; Printing and publishing, newspaper and periodical; Cane-sugar refining; Bread and other bakery products; Men's, youths' and boys' clothing (except work clothing) not elsewhere classified; Worsteds goods; Foundry and machine-shop products; Meat packing, wholesale. The "Radio apparatus and phonographs" industry is one of the leading industries in this area, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

*Detroit Area.*—Motor vehicles, not including motorcycles; Motor-vehicle bodies and motor-vehicle parts.

*Boston Area.*—Worsted goods; Boots and shoes, other than rubber; Leather, tanned, curried and finished; Bread and other bakery products; Printing and publishing, newspaper and periodical; Printing and publishing, book, music and job; Meat packing, wholesale; Electrical machinery, apparatus and supplies; Foundry and machine-shop products not elsewhere

\* Industrial Area: one or more important industrial counties. Each such area takes its name from the principal city or cities located therein.

† Revised.

classified. "Cane-sugar refining" and "Soap" are also among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

**St. Louis Area.**—Meat packing, wholesale; Motor vehicles, not including motorcycles; Petroleum refining; Chemicals not elsewhere classified; Malt liquors; Electrical machinery, apparatus and supplies; Bread and other bakery products; Boots and shoes, other than rubber; Printing and publishing, newspaper and periodical. The "Boot and shoe cut stock, not made in boot and shoe factories" and the "Tobacco, chewing and smoking, and snuff" industries are among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

**Pittsburgh Area.**—Steel-works and rolling-mill products; Blast-furnace products; Foundry and machine-shop products; Glass; Electrical machinery, apparatus and supplies; Coke-oven products; Bread and other bakery products; Structural and ornamental metal-work, not made in plants operated in connection with rolling mills; Canned and dried fruits and vegetables, preserves, jellies, fruit butters, pickles and sauces.

**San Francisco-Oakland Area.**—Petroleum refining; Motor vehicles, not including motorcycles; Canned and preserved fruits and vegetables, preserves, jellies, fruit butters, pickles and sauces; Smelting and refining, lead; Meat packing, wholesale; Printing and publishing, newspaper and periodical; Bread and other bakery products. "Cane-sugar refining" and "Cigarettes" are also among the leading industries,

but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments.

**Cleveland Area.**—Steel-works and rolling-mill products; Motor-vehicle bodies and motor-vehicle parts; Foundry and machine-shop products not elsewhere classified; Electrical machinery, apparatus and supplies; Meat packing, wholesale; Blast-furnace products; Printing and publishing, newspaper and periodical.

**Los Angeles Area.**—Petroleum refining; Meat packing, wholesale; Bread and other bakery products; Printing and publishing, newspaper and periodical; Rubber tyres and inner tubes; Women's clothing not elsewhere classified; Foundry and machine-shop products not elsewhere classified. The production of motion pictures is also one of the leading activities in this area.

**Buffalo Area.**—Flour and other grain-mill products; Chemicals not elsewhere classified; Motor-vehicles, not including motorcycles; Steel-works and rolling-mill products; Feeds, prepared, for animals and fowls; Motor-vehicle bodies and motor-vehicle parts; Meat packing, wholesale.

**Providence-Fall River-New Bedford Area.** Cotton goods; Worsted goods; Dyeing and finishing textiles; Silk and rayon goods; Jewellery.

**Baltimore Area.**—Steel-works and rolling-mill products; Men's, youths and boys' clothing (except work clothing) not elsewhere classified; Tin cans and other tinware not elsewhere classified; Meat packing, wholesale. The following are among the leading industries in this area, but their rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of the data for individual establishments: Cane-sugar refining;

Petroleum refining; Smelting and refining copper.

**Cincinnati Area.**—Meat packing, wholesale; Paper; Motor-vehicles, not including motor-cycles; Soap; Tobacco, chewing and smoking, and snuff; Steel-works and rolling-mill products.

**Milwaukee Area.**—Liquors, malt; Meat packing, wholesale; Foundry and machine-shop products not elsewhere classified; Boots and shoes, other than rubber; Motor-vehicle bodies and motor-vehicle parts; Knit goods; Electrical machinery, apparatus and supplies; Bread and other bakery products. The Motor Vehicles industry is one of the leading ones in this area, but its rank cannot be given without the possibility of disclosing (by comparison with Census reports) approximations of data for individual establishments.

**Bridgeport-New Haven-Waterbury Area.**—Non-ferrous metal alloys and non-ferrous metal products, except aluminium, not elsewhere classified; Electrical machinery, apparatus and supplies; Hats, fur-felt; Foundry and machine-shop products not elsewhere classified; Ammunition and related products; Gold, silver and platinum, refining and alloying.

**Motor Vehicle Industries.**—The value of the complete passenger cars and business vehicles manufactured in 1933 was \$882,987,000; of chassis, \$45,663,000; of bodies, parts and accessories, \$733,154,000, and of tyres and tubes \$254,221,000. The number of complete passenger cars (excluding taxicabs) produced was 1,535,940, of complete business vehicles (including taxicabs) 221,330, and of chassis, 90,743; while 45,461,000 tyres and 42,904,000 inner tubes were also manufactured in 1933. The motor vehicle factories, the parts and accessories and tyre factories gave employment to 296,590 wage earners, who received \$306,844,000 in wages in 1933.

The number of motor vehicles registered in 1935 in the U.S.A. was 26,221,052 (1934 registrations, 24,933,403).

The taxes, including gasoline taxes, levied on motor vehicles by the Federal, State, and Municipal Governments in 1935 amounted to \$1,286,158,000 (1934 figure, \$1,201,108,000). The number of motor vehicles, exclusive of those shipped as "parts for assembly," exported in 1933 was 108,127. Number of motor vehicles exported in 1934 was 237,880; in 1935 272,761 (exclusive, in each case of shipments to Alaska, Hawaii and Porto Rico—5,957 for 1934, and 9,396 for 1935).

## INDUSTRIAL RECOVERY IN THE U.S.A.

The economic crisis through which the United States was passing when Mr. Franklin Roosevelt took office early in 1933 demanded bold measures, which the new President at once put into operation. He first restored confidence in the banks; next he abandoned the gold standard; and then he inaugurated a gigantic plan to regenerate trade.

The *Industrial Recovery Act* provided for the expenditure of nearly £800,000,000 on public works, and empowered the President to regulate commerce, prevent over-production, and eliminate unnecessary competition.

General Hugh Johnson, its Administrator, persuaded, and in some cases forced, employers to draw up codes fixing rates of wages and hours of labour. Large sums were spent on public works and Congress later voted more money, over 2,000,000 men being added in one year to the employed.

General Johnson resigned in September, 1934, and a committee was appointed to administer the scheme, which Mr. Roosevelt described as "a permanent feature of our modernised industrial structure," and it received the Republic's emphatic approval at the elections in the autumn.

**PUBLIC ROADS.**—On Dec. 31, 1934, there were approximately 3,000,000 miles of rural roads. The mileage of State highways was 324,312, of which 271,614 were surfaced. In 1934 the expenditures for State highway purposes were \$843,631,000.

**SHIPPING.**—On June 30, 1934, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 296 sailing vessels of 460,177 gross tons; 2,535 steam vessels of 11,173,539 gross tons, and 216 motor vessels of 708,283 gross tons—total, 3,047 vessels of 12,341,999 gross tons. (The total in 1933 was 3,130 vessels of 12,571,615 gross tons.) In the year ended June 30, 1936, sailing and steam vessels of 65,205,125 tons entered at the various ports of the U.S.; of this total 21,807,919 tons were American and 43,397,206 tons foreign. The tonnage cleared from the various seaports was 65,511,890, of which 21,517,428 tons were American and 43,994,462 tons foreign.

**POSTS, TELEGRAPHS AND TELEPHONES.**—On June 30, 1935, there were 45,687 post offices in the U.S. handling 22,331,752,165 "pieces" of mail matter, of which amount 22,116,146,330 were domestic and 215,605,835 foreign. The telegraphs and telephones are not operated by the U.S. Government.

## WEIGHTS, MEASURES AND CURRENCY.

The *Weights and Measures* in common use are shown on page 584. The Metric System of Weights and Measures is permissive, but is little used. The unit of currency is the dollar of 100 cents. The rate of exchange with sterling will be found on p. 574.

## INDIAN POPULATION.

On January 1, 1935, the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 330,861. The leading Indian States are as follows: Oklahoma, containing 95,942, Arizona 44,524, New Mexico 35,157, S. Dakota 26,966, California 23,814, Montana 15,418, North Dakota 10,465, Washington 13,420, Wisconsin 12,223, and Minnesota 15,382. The seeming decrease in the total population and the population of Oklahoma since 1931 was caused by the change in the estimated figure for the Five Civilised Tribes of Oklahoma, and not by an actual decrease in population. For further

explanation see page 49 of the Annual Report of the Commissioner of Indian Affairs, June 30, 1931. Total disbursements authorised for the fiscal year ended June 30, 1935, for Indian Service from regular funds are \$19,157,064. Approximately \$18,500,000 was used from emergency funds for construction, soil conservation, water development, roads, &c. In addition to this the sum of about \$6,617,300 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1928, amounted to \$1,716,815,123, of which \$920,106,386 was tribal, and \$796,708,737 individual.

### RECLAMATION.

Bureau of Reclamation, Interior Dept., New Interior Building, 18th and 19th Streets (between C. and E. Streets), N.W., Washington, D.C.

Employees: Washington Office, 100; Field (approximately) 6,000. Expenditures for fiscal year ended June 30, 1936, more than \$24,000,000.

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of 47 irrigation projects in 15 arid and semi-arid States of the far West. Twenty-seven projects, comprising an irrigated area of about 1,604,000 acres, are under construction or operation, and the major works aid in serving an additional 1,285,000 acres under private canals purchasing stored water from the Government reservoirs, making a total irrigated area of nearly 3,000,000 acres. The funds for this work have come from repayments by the water users, from oil leasing and other mineral operations, from the sale of public lands, and by allotments and direct appropriations. The money expended is returned to the fund by graduated payments of settlers.

The Bureau has built 18,730 miles of canals, ditches and drains (including 178,200 canal structures). There have been constructed 109 storage and diversion dams with an aggregate volume of 30,434,000 cubic yards, including the Boulder Dam (727 feet high), Arizona-Nevada, on the Colorado River, the highest dam in the world; Owyhee Dam (405 feet high), Oregon, on the Owyhee River; Arrowrock Dam (354 feet high), Idaho, on the Boise River, and the Elephant Butte Dam (306 feet high), New Mexico, on the Rio Grande. The Bureau has built 283 tunnels, 1,728 miles of road, 156 miles of railroad, 4,282 miles of telephone line, 43 power plants, and 3,878 miles of transmission lines. The construction cost to June 30, 1936, was \$262,000,000 (exclusive of \$112,000,000 for Boulder Canyon). This work has involved the excavation of 402,320,000 cubic yards of materials, and the Bureau has used 12,100,000 barrels of cement.

On Sept. 11, 1936, the President of the U.S. started the operation of the first generator at the Boulder Dam power house on the Colorado River, the turbines of which will have an ultimate rated capacity of 1,835,000 h.p.

Nearly 840,000 persons are living on the 46,500 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, 2,860,000 acres were harvested in 1935, producing crops worth more than \$106,000,000, or an average of \$37.30 per acre.

Public land farm units on the several projects are opened for settlement from time to time as

canals are extended to make irrigation water available. Under present law, soldiers and sailors of all wars have a preference right of 90 days to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing, The Commissioner, Bureau of Reclamation, Dept. of the Interior, Washington, D.C.

The Bureau issues settlement and other booklets. An annual report is also issued, and other publications from time to time, relating to various phases of the work.

An engineering library of about 7,000 manuscripts and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested. The Bureau maintains also a photographic file of about 40,000 negatives of scenes on the projects from the beginning of construction through the period of settlement and development, and also has available for distribution, 12 motion picture films (16 and 35 mm.) relating to reclamation.

### GOVERNMENT PRINTING OFFICE,

North Capitol and G Streets, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The buildings have a floor space of 22 acres, and, together with the machinery and equipment which they contain, represent an expenditure of approximately \$10,100,000. The annual cost of operation and maintenance is about \$18,750,000, including the Public Documents Division. There are about 5,500 persons annually employed in the various divisions of the office, which operates on a 40-hour week at a total yearly compensation of about \$12,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments, emergency relief activities, and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 165 linotype machines, 11 intertype machines, 2 Ludlows, 2 material casters, 100 monotype keyboards and 130 monotype casting machines, which produced about 1,000,000,000 ems of type in the fiscal year 1936. The 185 presses of the office are credited with 4,626,000,000 chargeable impressions, not including 220,000,000 on money order forms and 1,950,000,000 on postal cards. During the year the office handled approximately 100,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 14,100,000 square inches of electrotypes and stereotypes, and 660,000 square inches of half-tones and line-cuts, supplied blank paper to other Government establishments at a cost of \$1,700,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, A. E. Giegengack, N.Y. \$10,000

## Territories and Principal Island Possessions of the United States.

The territories and the principal islands and island groups under the sovereignty of the United States of America comprise: the Territory of Alaska (which includes all of the Aleutian Islands east of longitude  $167^{\circ}$  east of Greenwich); the Territory of Hawaii (including Ocean or Kure Island, and Palmyra Island); Kingman Reef, (about 1 sq. mile); Johnston or Cornwallis Island and Sand Island (about 1 sq. mile in all); Midway Islands; Wake Island; Guam; the Philippine Islands; Howland, Baker and Jarvis Islands (about 3 sq. miles in all); American Samoa (including the island of Tutuila, the Manua Islands, and all other Islands of the Samoan group east of longitude  $171^{\circ}$  west of Greenwich together with the Swains Island); Puerto Rico; the Virgin Islands of the United States, and Navassa Island (2 sq. miles).

Under the provisions of an Act of Congress approved March 24, 1934 (48 Stat. 456), and the Proclamation of the President (No. 2148) of November 14, 1935, the status of the Philippine Islands as a Commonwealth, dates from November 15, 1935. During the period of the Commonwealth (see Section 10 (a) of the above act), sovereignty over the Philippine Islands rests with the United States.

The Canal Zone is under the jurisdiction of the United States.

There are certain small guano islands, rocks, or keys which, in pursuance of action taken under the Act of Congress, August 18, 1856, subsequently embodied in Sections 5570-5578 of the Revised Statutes, are considered as appertaining to the United States.

## HAWAII.

The Hawaiian (or Sandwich) Islands form a Territory of the U.S. and consist of a chain of 20 islands in the N. Pacific Ocean between  $18^{\circ} 55'-22^{\circ} 16'$  N. lat. and  $154^{\circ} 4'-160^{\circ} 30'$  W. long.

The total area is 6,407 sq. miles and the population (1936) was 393,277 of whom 89,065 were aliens.

For Administrative purposes the Territory of Hawaii is divided into four counties. The island of Oahu is known as the city and county of Honolulu. The other counties are Hawaii, including the island of that name; Maui, including the islands of Maui, Kahoolawe, Lanai and all of the Molokai except the leper settlement; and Kauai, including the islands of Kauai and Niihau. The leper settlement on Molokai constitutes a fifth county, Kalawao, which is under the control of the Board of Hospitals and Settlement. The estimated population of the Territory of Hawaii on June 30, 1936, was:—

County	Pop. (1936).
City and County of Honolulu ...	216,861
County of Hawaii .....	77,833
County of Maui .....	60,081
County of Kauai .....	37,985
County of Kalawao .....	517

393,277

The islands were discovered by Capt. James Cook, R.N., in 1778 (he was killed there in 1779) and formed a kingdom under native rulers until Queen Liliuokalani was driven from the throne in 1893,

a republic being proclaimed in 1894. In 1898 the group was annexed by the U.S., being organized as a Territory on June 14, 1900. The Governor is appointed by the President of the U.S. There is a Senate of 15 and House of Representatives of 30 members, the Territory sending a Delegate to Congress at Washington, D.C.

The group is of volcanic origin and contains many craters, Haleakala on Maui being the largest in the world. Kilauea and Mauna Loa, on Hawaii, are active volcanoes, with Mauna Kea (13,823 ft. above mean sea level) extinct. The islands are very fertile, and rice, cane sugar, pineapples, coffee, bananas and other tropical and sub-tropical products are abundantly grown.

Exports to U.S. .....	98,695,969
Imports from U.S. .....	78,924,776

Governor (1934-1938), Joseph B. Poindexter, assumed office, March 1, 1934.

CAPITAL, Honolulu, on the island of Oahu, population (1936) 145,875. Hilo, on the island of Hawaii, has a population of 15,885.

## THE PHILIPPINE ISLANDS.

President of the Commonwealth of the Philippines, Don Manuel Quezon, elected Sept. 17, 1935, assumed office, Nov. 15, 1935 (for 5 years).

The Philippine Islands are situated between  $4^{\circ} 40'-21^{\circ} 10'$  N. lat. and  $116^{\circ} 40'-126^{\circ} 34'$  E. long., and are distant about 500 miles from the south-east coast of the continent of Asia.

The total land area of the group is 114,400 square miles, of which total 103,288 square miles are contained in the eight largest islands, the 7,075 other islands having a combined area of 11,112 square miles. At the Census of 1930 the population was ascertained to be 12,604,100, almost all of Malayan stock, of whom (in 1928) 8,724,965 are Roman Catholic, 4,000,000 are Aglipayan, 200,000 are Protestant, (and 1918) 443,037 are Muhammadan, 508,596 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

In 1935 the islands received "Dominion Status" and a President was elected. There is a Senate of 24 members, elected for 6 years, and a Chamber of 94 Deputies elected for 3 years. Under the Constitution of 1934 the Dominion will achieve full independence not later than 1944.

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1565 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in

1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

On Aug. 31, 1928, the Philippine Scouts, which form a part of the United States regular Army, consisted of 88 officers and 6,239 enlisted men. On the same date the regular Army in the Philippines (other than the scouts) consisted of 512 officers and 3,788 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Oct., 1928, consisted of 397 officers and 6,119 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

The expenditure on education in 1931 amounted to \$17,027,378 for public schools only; the University had an enrolment of 7,533 students, and there were 1,099,306 pupils enrolled in the public schools. The principal exports are sugar, abaca (Manila hemp), coconut oil, copra, tobacco, embroideries, desiccated coconut, lumber and timber, copra meal and maguey; the imports being cotton and its manufactures, iron and steel and their manufactures, mineral oils, meat and dairy products, automobiles and accessories, wheat flour, silk and its manufactures, paper and its manufactures, and coal.

Receipts.....	\$27,500,000
Expenditures.....	26,999,000
Debt (June 30, 1933).....	87,183,000
1934-35.	
Total Imports.....	\$83,607,000
Total Exports.....	110,404,000
Imports from U.S. ....	43,541,000
Exports to U.S. ....	91,313,000

*Towns.*—Capital, Manila, in the island of Luzon; population (1932), 341,034. The next largest towns are Cebu (80,000), Legaspi (35,000), Iloilo (44,000), Laong (42,000), and Zamboanga (25,000); there are several others with populations from 25,000 to 40,000.

U.S. High Commissioner, Frank Murphy, assumed office at Manila, as Governor 1933; as High Commissioner, Nov. 15, 1935.

#### GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26' N. lat. and 144° 39' E. long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population of 30,391, of whom 18,994 are classed as native, 651 of the naval station, and 746 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many

Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

#### WAKE AND MIDWAY ISLANDS.

*Wake Island*, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 2,000 miles from Hawaii on the direct route to Hong Kong.

*Midway Islands*, with a total area of 28 sq. miles and a population (1930) of 35, lie in the N. Pacific about 1,200 miles from Hawaii. The group is administered by the U.S. Navy Dept.

#### PUERTO RICO.

*Puerto Rico* (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50'–18° 30' N. lat. and 65° 30'–67° 15' W. long., with a total area of 3,435 square miles and a population of 1,721,531 at the census of 1935. Three fourths of the population are of Spanish descent and about one fourth coloured. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,399 miles distant from New York, and 963 miles from Key West. Puerto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508, and he was made Governor of the island in 1509. It continued a Spanish possession until Oct. 18, 1898, when the United States took formal possession as a result of the Spanish-American War. It was ceded by Spain to the United States by the Treaty ratified April 11, 1899. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, and yams are also grown. The trade is principally with the U.S. About 350 miles of railroad were in operation in June, 1936, and there are good harbours at San Juan and Ponce. The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years. The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor. The Governor also appoints all inferior judges. Great improvement has been made in the progress and welfare of the Island during the present century—the Island is self-supporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are in force. The capital, San Juan, had 137,215 inhabitants in 1935, other towns being Ponce (97,779), Mayaguez (69,655), Arecibo (63,012), Rio Piedras (52,146), Caguas (48,585), Bayamón (32,151).

#### TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutuila, Anunui, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square

miles and a population of 10,055 in 1930, distributed (1930) as follows:—Tutulla and Annu'u, 7,809; Ta'u, 1,243; Olosega, 438; Ofu, 466; Rose Island, uninhabited; and Swain's Island (annexed May 13, 1925), 99.

*Tutulla*, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only export of importance.

#### VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1930 of 23,028. *St. Thomas* (28 sq. miles) has a population of 9,834; *St. Croix* (84 sq. miles) has a population of 11,413, the capital being Christianstad (or Bassin); *St. John* (20 sq. miles) has a population of 765, the capital being Cruz Bay. *St. Croix* exports sugar; *St. Thomas* is famous for its bay rum.

**CAPITAL**, *St. Thomas*, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

*Governor*, Laurence W. Cramer.  
*Government Sec.*, Robert Herrick.

#### THE PANAMA CANAL.

The administrative organisation for the canal is known as "The Panama Canal." Its headquarters are at Balboa Heights, Canal Zone, with the *Governor of the Panama Canal* (Colonel Clarence S. Ridley, U.S.A.) at its head.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000 of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by

the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

From 1903 up to June 30, 1935, the United States Government had spent \$576,017,491 on construction, maintenance and operation of the canal; \$42,751,455 on fortifications, making a total of \$618,768,945 (this includes \$40,000,000 paid to the New Panama Canal Co. of France for acquisition of property, and \$20,000,000 paid to the Republic of Panama in connexion with the Canal Zone under Article 14 of the Treaty of November 18, 1903). Interest paid on Canal loans for the same period totalled \$78,238,984. Receipts recovered by the United States Treasury were \$404,663,101. These figures do not include payments to the Government of Colombia (as provided for under the Treaty of April 6, 1914), or \$5,000,000 per annum in fiscal years of 1923 to 1927, inclusive. Net balance expended out of the general fund of the United States Treasury and proceeds of bonds sold to June 30, 1935, \$292,344,828.

Including only ocean-going vessels, 300 Panama Canal net tons measurement or over against which tolls were collected, the volume of traffic passing through the Canal during each of the fiscal years since the Canal was opened to traffic has been as follows:—

Fiscal Year.	No. of Transits.	Canal. Net Tons.	Cargo Tons.
1915	1,058	3,791,770	4,888,400
1916	744	2,391,433	3,093,335
1917	1,738	5,791,236	7,054,720
1918	1,989	6,563,864	7,525,768
1919	1,948	6,116,877	6,910,097
1920	2,393	8,538,804	9,372,374
1921	2,791	11,405,550	11,595,971
1922	2,665	11,411,482	10,828,507
1923	3,908	18,601,298	19,566,429
1924	5,158	26,142,021	26,993,167
1925	4,592	22,847,527	23,956,549
1926	5,087	24,763,075	26,030,016
1927	5,293	26,210,623	27,733,555
1928	6,253	29,436,697	29,615,651
1929	6,289	29,822,122	30,647,768
1930	6,027	29,963,670	30,018,429
1931	5,370	27,773,037	25,065,283
1932	4,352	23,613,370	19,798,986
1933	4,122	22,803,798	18,161,165
1934	5,234	28,550,953	24,704,009
1935	5,180	27,805,588	25,309,527
1936	5,382	28,024,477	26,505,943

The canal is fifty statute miles long (44·88 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks, and transit from sea to sea occupies about 8 hours (passage through locks 4 hours). The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

The Salaries and Allowances of Officers of H.M. Diplomatic, Commercial and Consular Services are fixed in accordance with the scale shown below:—

## Salaries and Allowances.

Rank.	Salary.	Representation Allowances.	House Rent Allowances.
<i>Diplomatic Service.</i>			
Counsellors .....	1,200-1,500	300-1,100	300-525
1st Secretaries .....	800-1,000	250-700	250-437
2nd Secretaries .....	300-600	150-650	150-262
3rd Secretaries .....			
<i>Commercial Diplomatic and Consular Services.</i>			
Commercial Counsellors .....	1,700	300	250
Commercial Secs., Grade I. ....		300	250
Insp.-Gen. of Consulates .....	1,200-1,500	300	250
Consuls-General .....		300	250
Commercial Secs., Grade II. ....	800-1,000	250	200
Consuls .....	500-800	100	100-200
Commercial Secs., Grade III. ....	600-700	100-250	100-200
Consuls, Grade II. ....	600-700	100-250	100-200
Vice-Consuls .....	300-600	50-250	100-200

ABYSSINIA, *see* Ethiopia.

## AFGHANISTAN.

(Fustunsha.)

*King of Afghanistan*, H.M. Mohamed Zahir Shah, born Oct. 15, 1914, acceded Nov. 8, 1933 (on the assassination of his father, King Nadir Shah); married Nov. 7, 1931, a daughter of Sardar Ahmad Shah Khan, and has issue two sons and a daughter: H.R.H. Prince Mohamed Akbar Khan, b. Aug. 10, 1933; H.R.H. Prince Ahmed Shah Khan, b. Sept. 23, 1934; H.R.H. Princess Bilgis, b. 1932.

*Minister in London*, Ali Mohammad Khan, 31 Princes Gate, S.W. 7.

Afghanistan lies on the N.W. frontier of India. The estimated area is 245,000 sq. miles, and the population is estimated (1933) at about 11,000,000. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashs, who belong to the Shia sect. The national tongue is Persian, but Pushtu is spoken in the south-east.

Afghanistan is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfiar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand

agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures.

Afghanistan is divided into five major provinces, Kabul, Mazar, Kandahar, Herat, and Qataghan-Badakhshan (including Nuristan—formerly Kafiristan—and Wakhan), and five minor provinces, the Eastern, Southern, Farah, Chak-hansur, and Maimana. Each province is under a Governor (called in major provinces *Naib-ul-Hakumah*, and in minor provinces *Hakim-i-Ala*).

Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. The War Minister (Sirdar Shah Mahmud Khan, brother of the late King) has reorganised the Army, which is recruited by annual calls; service is for two years with the colours and eight with the reserve. The peace strength is about 60,000. A small Air Force is maintained. Factories for munitions, and for various commercial products, have been erected in Kabul.

Under the Constitution of Oct. 31, 1931, there is a Senate of 40 nominated members and a National Assembly of 120 elected members, with a Grand Assembly (*Loe Jirgeh*) which is summoned on important occasions. The administration is entrusted to a Council of Ministers.

The laws of Afghanistan are based on the "Shariat," or Islamic law, and tribal custom. Steps are being taken to develop education, and there are three colleges in Kabul, employing English, French and German mediums of instruction respectively, and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep, including the Karkuli, and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapis lazuli, and gold are found.

The following roads are fit for motor traffic, except after snow or heavy rain, but are mostly unmetalled.—Kabul-Khyber; Kabul-Gardez; Kabul-Kandahar-Chaman; Kandahar-Farah-Herat (sometimes impassable, owing to lack of bridges); Kabul-Bamian; Kabul-Mazar-i-Sharif-Khanabad (opened in 1933) and Mazar-i-Sharif-Maimana-Herat.

Goods are still conveyed by pack animals, but motor transport is rapidly taking the place of pack transport as the chief means of conveyance. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (210 miles), and the road from Kandahar to Chaman (70 miles). The exports to India are

mainly timber, carpets, fruits, raw wool, skins and *ghis*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. There is a large export of wool to Persia and Russia, cotton and silk goods, petrol, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £3,250,000. There are taxes on land and animals, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrullah Khan, seized the throne by a *coup d'état* and temporarily held the reins of government at Kabul, but the Amir's third son, Amanullah Khan, soon after declared himself, and was recognised as King. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were made by King Amanullah and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. A Trade Convention was concluded and Afghanistan adhered to the International Postal and Telegraphic Union.

The languages of the country are Pushtu and Persian.

**CAPITAL**, Kabul (about 80,000). Dar-ul-Aman was designated as the future capital in 1923, but little progress is made in development. The chief commercial centres are Kabul and Kandahar (60,000). Other provincial capitals are Herat (30,000), Mazar-i-Sharif (20,000), and Khanabad (5,000).

**FLAG**: Green, red and black, with white device in centre.

#### BRITISH LEGATION.

(Kabul)

*British Envoy Extraordinary and Minister Plenipotentiary*, Lt.-Col. W. K. Fraser-Tytler, C.M.G., M.C. (1935).

*Counsellor*, Maj. W. R. Hay, C.I.E.

*Military Attaché*, Major A. S. Lancaster.

*Surgeon*, Capt. H. W. Farrell.

*Secretary*, K. W. Parkes, I.C.S.

*Oriental Secretary*, Khan Bahadur Sikandar Khan.

*British Consul at Jalalabad*, Risaldar Major Sher Ali Khan,

*British Consul at Kandahar*, Khan Bahadur Saiyed Siddiq Hasan.

#### ALBANIA.

(Shqipëria.)

*King of the Albanians*, Zog I, born Oct. 8, 1895; elected *President*, Jan. 31, 1925; proclaimed *King*, Sept. 1, 1928.

*Prime Minister* (Oct. 22, 1935), Mehdi Frashëri.  
*Minister for Foreign Affairs*, Dr. Fuad Aslani.

*Minister in London*, Monsieur Lec Kurti.

*Legation*, 72, Pont Street, S. W. 1.

*1st Secretary*, Catin Sarrçi.

*2nd Secretary*, Dervish Duma.

*Consul-General in London*, Edwin Cripwell, 129, Finsbury Pavement, E. C. 2. [Met. 8615.]

Albania, on the East coast of the Adriatic Sea, has a total area of 11,000 sq. miles: total population (Census of 1930) 1,003,104. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania was Scanderberg the Great (1444-1467). On Dec. 3, 1913, the Conference of Ambassadors elected Prince William of Wied as Prince of Albania, but he abandoned the throne in Sept. 1914, having been in power only six months, and during the Great War the country was invaded by troops of the Central Powers and of the Allies, and remained in a state of anarchy. After the Armistice a National Council at Durazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country was reaffirmed and guaranteed by the Supreme Council of the Allies. The provisional government was in power until 1920, when a revolt overturned it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan. 21, 1925, under which Albania became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 1, 1928, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zogu, the President, who assumed the title of Zog I, King of the Albanians; the Senate then ceased to exist, and a High Council of State was formed of 10 members appointed by the King; the House of Representatives consists of 56 members, elected for 4 years.

The country is generally mountainous with heights of more than 6,000 feet. Industry is primitive, agriculture and sheep and goat rearing being the principal occupations, and olives and olive-oil, grains and tobacco the principal products. There is some mineral wealth (bitumen, oil, lignite, copper, iron), which remains largely undeveloped. The Italian State Railways hold a concession to exploit oil, which has been found in satisfactory quantities near Berat. Wells have been sunk and a pipe-line laid down between the oil-field and Valona. Exports of oil figured in the customs statistics for the first time in Jan.-March Quarter, 1936 (9,030 tons, unrefined--value 180,000 gold francs). There are passable motor roads between the principal centres. The harbour at Durazzo, which has a mooring frontage of 450 metres, can

accommodate vessels up to 7 metres draught alongside the quays; elsewhere in the harbour there is anchorage in 4 metres of water; the channel giving access to the harbour has a depth of 7·5 metres.

*Durazzo—Vice-Consul (local rank of and Secretary)*, Lieut. Com. W. B. C. Weld-Forester, R.N. (ret.).

*Pro-Consul*, F. W. Borman.

## ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel. The franchise was enlarged after a bloodless revolution in April, 1933. The language of the country is Catalan. Andorra, the Capital, has about 700 inhabitants.

FLAG: Three horizontal bands, azure, yellow, red; crown on yellow band.

## ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists

of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, Dahna, and Rub' Al Khali deserts), and the total population is believed to be about 5,000,000. The various Arab States are shown below:—

## THE KINGDOM OF SAUDI ARABIA.

(al Mamlaka al Arabiya as-Sa'udiya.)

*King of Saudi Arabia*, H. M. Abdul Aziz Ibn Abdul Rahman al Faisal Al Saud, G.C.B., G.C.I.E., born 1880. Sultan of Nejd, 1917; King of the Hejaz, Jan. 8, 1926; King of Nejd, 1927; King of Saudi Arabia, Sept. 17, 1932. *Heir Apparent*, H.R.H. Prince Saud Ibn Abdul Aziz Al Saud, G.B.E., born 1905.

*Minister in London*, His Excellency Sheikh Hafiz Wahba, 42 Eaton Place, S. W. 1. (Sloane, 3898.)

*1st Sec.*, M. Mahmood Riyad Zada.

*2nd Sec.*, M. Youssef Salama.

The Kingdom of Saudi Arabia, so named since Sept. 20, 1932, is a personal union of two countries, the Sultan of Nejd being also King of the Hejaz.

In the 18th century Nejd was an independent State and the stronghold of the Wahhabi sect. It subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and in 1926 accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

By Treaty signed May 20, 1927, Great Britain recognized the complete independence of the Kingdom.

*Nejd* ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half-breeds, the majority being Muhammadans of the Wahhabi movement. There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Riyadh (30,000), and the principal trading centres are Hufuf, on the Persian Gulf littoral (30,000), Shaqra, Anaiza, Buraida (20,000), Hail (20,000), and Hauta (Central). The only ports (Persian Gulf) are Qatif and Qair, which are suitable only for sailing craft. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahhabis.

The *Hejaz* ("The Boundary"—between Nejd and Tihamah) extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of El Wedj, Yambu', Rabigh and Jeddah (the chief

port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the Hejaz Railway. The *Oasis of Khaiwar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina* (Al Medina, "The City"), 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Jeddah, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets. The course of the *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Bagdad Railway at Aleppo; the portion of the railway south of Maan, in Transjordan, is not at present in commission.

*Asir* ("The Inaccessible") extends, geographically, from a line drawn inland from Birk on the southern limit of Hejaz to the northern boundary of Al Yemen, some 12 miles N. of the port of Midi. Its breadth extends about 180 miles eastwards to Bisha in the north and to the boundary of the Beni Yam in the south. According to Arabian geographers, Asir is part of Al Yemen. The territory includes the Farsan Islands. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The two capitals are Abha (Asir Surat) and Jizan (Asir Tihamah).

The total of the subsidies paid to King Ibn Saud during the years 1917 to 1923 is approximately £542,000 subject to the following conditions:

- (1) That Ibn Saud refrained, and restrained his adherents from aggressive action against the Hejaz, Kuwait, and Iraq.
- (2) That he afforded co-operation in the matter of the *Haji* pilgrimage to Mecca by maintaining the safety of pilgrim routes to his territory.
- (3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy, and to co-operate with them in promoting their own policy, which had for its object the maintenance of peaceful conditions in Arab countries and the promotion of the economic interests of both parties.

By the *Treaty of Jeddah* (May 20, 1927) Great Britain recognized Ibn Saud as an independent ruler, King of the Hejaz and of Nejd and its Dependencies.

**SAUDI ARABIAN FLAG:** Green square, white device on square: "There is no God but God, Muhammad is the Prophet of God."

**CAPITAL,** Riyadh, population about 30,000.

**BRITISH LEGATION** (Jeddah).

*British Envoy Extraordinary, Minister Plenipotentiary and Consul-General,* Sir R. W. Bullard, K.C.M.G., C.I.E. (1936).

*Jeddah—Consul,* A. S. Calvert (with local rank of 1st Secretary) (Chargé d'Affaires).  
 „ *Vice-Consuls,* H. M. Eyres (with local rank of 2nd Secretary); J. B. T. Judd (with local rank of 3rd Secretary); Khan Bahadur Ihsanullah.  
 „ *Pro-Consul,* Cyril Ousman.  
 „ *Indian Medical Officer,* Dr. Abdul Hamid.

#### THE PRINCIPALITY OF KUWAIT.

*Ruler,* Sheikh Sir Ahmad al-Jabir as-Subah, K.O.L.E., C.S.I., born 1885, acceded March, 1921.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Saudi Arabia (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 60,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. There are numerous shipyards where carrying dhows are built for other Arabian ports. From the carrying trade in the Indian Ocean and along the East African coast Kuwaiti dhows brought back an estimated sum of 10 lakhs of rupees in the season 1935-36. The port was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903. The trade of Kuwait (1934-35) was valued at £277,034 for imports, and £80,154 for exports. The Principality has suffered considerably during the last decade by the Trade Blockade imposed against her by Saudi Arabia, which, in order to encourage her own ports, has forbidden all imports into her territories from Kuwait. The Kuwait Oil Company has begun boring at Bahra, on the north side of Kuwait Bay. Imperial Airways call 4 times weekly.

**FLAG:** Red, with white lettering.

*British Political Agent,* Capt. Gerald de Gaury, M.C.

#### THE SULTANATE OF OMÂN.

*Sultan,* H. H. Saiyid Said bin Taimur, born Aug. 13, 1910, suc. Feb. 10, 1932.

Omân (area undefined; estimated pop. 550,000) is a Muhammadan State in S.E. Arabia. Its seaboard is nearly 900 miles long, and extends from Tibbat (on the W. side of Cape Mussandam) round Ras Rajir (200 miles N. of Socotra) with the exception of a small strip of the E. coast of the Mussandam Peninsula from Dibbah to Khor Kalba, which is in the administration of the minor chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Great Desert, but of late years the Omanis have become autonomous and are now subject to the Imam of Oman.

The interior is for the most part mountainous, the high country extending down to the sea coast in a series of arid rocky heights, though vegetation exists on the higher mountains. N.W. of Muscat the sea coast littoral tract is fertile and prosperous, and date groves extend along it for over 100 miles. This strip is known as the *Batinah Coast*. The remainder of the coast, with one notable exception, is barren and forbidding and rarely visited by Europeans.

*Gwadar*, a port on the Makran Coast, and a small tract of country round it, also owns allegiance to Muscat. It is the last remnant of the Omani possessions on the Persia side of the Gulf. The population is almost entirely Baluch, with a sprinkling of other elements—Indians (Hindu

and Khoja traders), Persians, &c. The Sultan is in treaty relations with the Government of India, who have a Political Agent at his capital. The Sultan is pledged not to cede territory to any Power but the British Government.

The capital, Muscat (with the sister town of Matrah) has an estimated population of 12,500. Muscat has a considerable trade (Imports 1935-36, Rs. 3,837,835; exports Rs. 3,264,948.) Dates and dried fish are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports.

*Muscat—British Consul and Political Agent,*  
Major R. P. Watts, I.A.

#### THE KINGDOM OF YEMEN.

*King of the Yemen, Yahya Muhammad Hamid-din, born 1869.*

*Heir Apparent, Prince Seif al Islam Ahmed, son of the King.*

Yemen, "the land on the right hand" (of Syria) and the *Arabia Felix* of the ancients, occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. Under Turkish rule, it was divided into the vilayet of Sana, Taiz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is Hodeida which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The trade from Yemen perhaps exceeds that of the remainder of Arabia. The Imam is the head of the Zeidi sect of the Shiah Division of the Muhammadan religion. On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans, and also the Tihamah, or coast lands, from S. of Hodeida to Sheikh Said. From 1920 to 1928 the Imam of Yemen made several encroachments on the Aden Protectorate, to which he laid an historical claim, but in the latter year he was ejected from the district of Dhala by an action from Aden in support of the Protectorate tribes, and in 1934 he withdrew from the remaining portion of the Protectorate held by him as a preliminary condition to the signature of a Treaty of Friendship with the British Government (Feb. 11, 1934) whereby he was recognised as King of the Yemen. About 60 miles to the south of Sana is the town of Zabid, an ancient seat of learning.

FLAG: Red, with white inscription.

CAPITAL, Sana; population, about 40,000; the seaport of Hodeida has about 50,000 inhabitants.

#### BAHRAIN.

*Ruler, H. E. Shaikh Sir Hamad bin 'Isa Al Khalifah, K.C.I.E., C.S.I.; acceded Dec. 9, 1932; proclaimed Feb. 9, 1933.*

Bahrain ("Two Seas") is a group of islands (Manamah, Muharrag, Sitra, Nabi Saleh and some uninhabited islets) half way up the Persian Gulf near the Arab Coast (El Hasa). Bahrain is the headquarters of extensive pearl fisheries and a distributing centre for the adjacent mainland. Pearls are the principal export,

varying in value from 1 to 2 millions sterling per annum. The principal imports are rice, cottons, dates, sugar and spices. The Bahrain Petroleum Company have been prospecting and have met with success since they commenced operations. The area is 213 sq. miles and the people (about 115,000) are Muslims. Bahrain has been in treaty relations with the Government of India since 1820. In 1880 the Ruler engaged not to make treaties with any other state, and in 1923 the active control of affairs was handed over to the present ruler.

CAPITAL, Manama; population, about 25,000.

*British Political Agent, Lt.-Col. Gordon Loch, C.I.E., I.A.*

*Assistant, Lieut. J. B. Howes.*

*Indian Assistant, Khan Bahadur Abdul Haiy Elhashmy.*

#### QATAR.

*Sheikh of Qatar, Abdulla ben Jasim, acceded 1913.*

El Qatr, a Sheikdom in the Persian Gulf covering the peninsular of Qatr from Khor el Odaid to Hasa, has been in alliance with Great Britain since 1882. The area is about 8,000 sq. miles, with a population of 20,000 to 30,000.

CAPITAL El Bida.

#### THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadharim, an ancient people of Arabian stock (Hadoram was the son of Joktan, *Genesis* x, 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hud) and Shibam (Qabr Salih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The most important Coastal Chief is the *Sultan of Shehr and Mokalla* (H.H. Sultan Saleh bin Ghalib Al Qu'aiti, who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Saiwun and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Qa'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

#### TRUCIAL COAST.

Six principalities on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-al-Khaimah to Odaid, are bound under treaties with the Government of British India for the prevention of piracy and slavery, and for the cessation of hostilities at sea. The six *Trucial Chiefs* are the Sheikhs of Shargah, Abu Dhabi, Ras el-Khaimah, Dabal Ummel, Qawein and

Ajman, and their territories have a combined area of about 6,023 sq. miles with a population of 75,000 to 85,000. The ports are Abu Zabi and Diba, other centres being Shargah, Baraimi and Ras el Khaimah. The British Political Resident in the Persian Gulf at Bushire is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. The trade of the coast ports largely consists in exports of pearls to India *via* Bahrain.

### ARGENTINE REPUBLIC.

(República Argentina.)

*President* (1932-1938). General Augustín P. Justo, assumed office, Feb. 20, 1932.

*Vice-President*, Dr. Julio Roca.

*Minister for Foreign Affairs*, Dr. Carlos Saavedra Lamas.

*Interior*, Dr. Ramón Castillo

*Finance*, Dr. Roberto M. Ortiz.

*Justice and Public Instruction*, Dr. Carlos de la Torre.

*Agriculture*, Dr. Miguel Ángel Cárcano.

*War*, General Basilio Pertiné.

*Marine*, Capt. Eleazar Videla.

*Public Works*, Dr. Manuel R. Alvarado.

*Ambassador in London*, His Excellency Señor Dr. Don Manuel Malbran, G.B.E., 11 Lowndes Square, S.W. 1.

*Counsellor*, Señor Don Carlos Miguens, C.B.E.  
*First Secretary*, Señor Dr. Don Pablo Santos Muñoz.

*2nd Secretaries*, Señor Dr. Don Mariano A. Barrenechea; Señor Dr. Don Carlos Exchagüe.

*Attaché and Legal Adviser*, Señor Dr. Don Ricardo Q. Blamey Lafone.

*Agricultural & Commercial Counsellor*, Señor Dr. Don Rodolfo García Arias.

*Naval Attaché*, Capt. Mario Fincati.

*Commercial Attaché*, Señor Don A. M. Flores-Pirán.

*Consul-General*, Señor Don Mario Molino Salas, River Plate House, 12 South Place, Moorgate, E.C. 2.

There is a Consulate-General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport, and Glasgow; and Vice-Consulates at Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough, and Swansea.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. (For the statue of Christ the Redeemer see Chile.) On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by

the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahía Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 12,372,965 (provisional figures) in 1935. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1925 the immigrants numbered 101,576, and the emigrants numbered 169,226. The climate is moderate. Spanish is the language of the country.

*Government*.—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 158 members. Members of Congress receive \$18,000 (paper) *per annum*.

*Production*.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were (1930) 32,211,855 cattle, 44,413,221 sheep, 9,858,111 horses, 1,039,420 mules (1930), 5,647,396 goats (1930), and 3,768,738 pigs (1930). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1935 the exports of wheat were 3,860,043 metric tons, oats 376,521, casein 17,064, cotton 36,329 tons, linseed 1,777,632, maize 7,051,463 metric tons, butter 6,780 tons, wool 136,461 tons, sheepskins 19,780 tons, chilled meat 348,531 tons, frozen meat 30,651 tons, frozen mutton and lamb 49,881 tons. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields produced 943,845 cubic metres in 1935; the output of private companies was approximately 1,328,775 cubic metres in 1935.

**Communications.**—There were (1934) 25,128 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 75,250 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres, neighbouring Republics and Europe and North America. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. In 1935, 2,859 vessels (10,403,111 net tons) entered at all ports; of the total, 4,077,069 net tons were British.

**Defence.**—The Navy consists of 2 battleships, *Moreno* and *Rivadavia* (reconstructed in 1925), 5 destroyer leaders, 4 destroyers, 4 coast defence ships and auxiliary vessels, 2 light cruisers (7,000 tons) and 3 submarines. Strength about 800 officers and 14,000 men. The Army is organised in 5 divisions, and numbers about 2,600 officers, 4,200 N.C.O.s and 27,000 men on a peace footing. Each division would consist of about 40,000 men on a war footing. In 1936 the military air force consisted of 2 Reconnaissance Groups, 2 Fighter Groups and 2 Light Bomber Groups; there is an aircraft factory at Cordoba.

**Education.**—*Primary* Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. *Secondary* Education is controlled by the National Government in National Colleges, numbering 51 in 1929, with 17,600 students, average annual fees \$45 (paper); in Normal Schools, numbering 86 in 1923, with 30,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are *National Universities* at Cordoba, Buenos Aires, La Plata, and Tucuman, and Faculties at Santa Fé, Rosario and Paraná.

	1934. Actual.	1935. Actual.
Revenue.....	\$729,500,000	\$878,000,000
Expenditure.....	730,500,000	851,600,000

#### The Argentine Debt.

According to figures published by the Corporation of Bond and Shareholders of Buenos Aires the Public Debt at June 30, 1935, stood as follows:—

Federal (Paper Pesos).....	\$3,362,948,937
Provincial (Paper Pesos).....	1,151,736,038
Municipal (Paper Pesos).....	491,806,778

#### BRITISH CHAMBER OF COMMERCE.

Calle Bartolome Mitre 441, Buenos Aires.  
Buenos Aires is 7,160 miles from Southampton; transit, 14 to 19 days by steamship (Germany and Italy 14 days; Britain 17 to 19 days), 4 days by combined Zeppelin and Air Mail service and a weekly Air Mail service of 6 days to Berlin-Stuttgart and Toulouse.

ARMENIA. See Soviet Union.

#### AUSTRIA.

(Oesterreich.)

*President of the Federation* (Dec. 6, 1928), Herr Wilhelm Miklas, born Oct. 25, 1872; re-elected President, Oct. 9, 1931.

#### MINISTRY.

(Nov. 3, 1936.)

*Federal Chancellor (also in charge of the Federal Minister of Defence)*, Dr. Kurt von Schuschnigg.  
*Minister for Foreign Affairs*, Dr. Guido Schmidt.  
*Vice-Chancellor*, Marshal Hulgerté.  
*Justice*, Dr. Pilz.  
*Education*, Dr. Hans Perntner.  
*Finance*, Dr. Neumayr.  
*Commerce and Communications*, Professor Taucher.  
*Agriculture and Forestry*, Herr Peter Maundorfer.  
*Social Welfare*, Herr Rott.

#### State Secretaries:

*Defence*, General Wilhelm Zehner.  
*Federal Chancery*, Herr Guido Zernatto.  
*Foreign Affairs*, Dr. Guido Schmidt.

*Minister in London*, Baron Georg Franckenstein, 18 Belgrave Square, S.W. 1.  
*Counsellor*, Ludwig von Blaas.  
*Attaché*, Count Heinrich Meran.  
*Consul-General*, Sir Charles D. Seligman.

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary, was the largest Empire, next to Russia, on the continent of Europe, situated between 42°–51° N. lat. and 9° 30'–26° 20' E. long. It embraced an area of 240,456 sq. miles, and a population (1914) of nearly 53,000,000. At the conclusion of the

Great War, the territories of Austria were reduced to an area of 32,175 square miles. At the Census of 1934 the population was 6,762,687. Before the armistice of Nov. 11, 1918, the Hungarians, Czechoslovaks, Poles, Jugoslavs and Rumanians had seceded from the "Dual Monarchy." The Emperor Karl "withdrew from the exercise of government" by proclamation Nov. 11, 1918), and a Republic of "German Austria" was declared Nov. 12, 1918.

Under the *Treaty of St. Germain* (Sept. 10, 1919) the political neighbours of Austria are Germany and Czechoslovakia on the N.; Italy and Yugoslavia on the S.; Switzerland on the W., and Hungary on the E.

Under the Constitution of November, 1920, Austria became a Republican Federation of eight Provinces:—

Province.	Area (sq. miles).	Population 1934.
Vienna .....	7,560	1,861,856
Lower Austria .....		1,612,011
Upper Austria .....	4,627	906,025
Carinthia .....	3,679	407,529
Styria .....	6,320	1,016,585
Salzburg .....	2,765	248,188
Tyrol .....	4,881	351,888
Vorarlberg .....	1,010	157,338
Burgenland (West Hungary) .....	1,533	297,642
Total.....	32,175	6,759,062

A Legislature of a Bundesrat and Nationalrat were also constituted, a government formed, and a President elected; Vienna was later formed into a separate Province. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October, 1923; March, 1927, and November, 1930, and a similar Government was returned on each occasion. Since March, 1933, Parliamentary Government has been abolished. Under the new Constitution (May 1, 1934) Austria ceased to be a Republic and became a Federal State on corporative lines. Reorganisation of the State on these lines has been proceeding during the year 1936.

The prevailing religion is Roman Catholic.

*Defence.*—During the War of 1914–18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St. Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Federal Army is by voluntary enlistment for twelve years.

*Education.*—Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 1927. Secondary education is provided in gymnasias, and real-schools and there are universities at Vienna, Graz and Innsbruck.

*Finance.*—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation.

The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct. 1922, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24'22). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one-half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The League of Nations Loan was successfully converted early in 1935 from an average of 6·3 per cent. to 4·7 per cent. The High Commissioner, Dr. Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec. 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr. Zimmerman left Vienna in July, 1926. The issue of uncovered bank-notes was stopped on Nov. 18, 1922, and the Austrian crown was stabilised at about Crs. 345,000 = £1. In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper Crowns), the rate of exchange in Sept., 1931, being 34'56 *sch.* = £1 sterling. For the last few years, however, the Austrian *schilling* has remained remarkably stable, at from 26'40 to 27'18 to £1. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to Austria. The favourable condition of the Austrian State lasted until 1929, but in 1930 there was a small deficit on working account and in 1931 measures were passed to reduce expenditure and increase revenue.

	Million Schillings.	
	1934.	1935.
Receipts.....	1,947'99	1,894'7
Current Expenditure.....	2,064'37	1,948'5
Working Deficit .....	116'38	53'8
Capital Expenditure .....	109'59	103'0

Since 1930 Austria has been continuously affected by the general trade depression which caused an increase in the number of unemployed, a falling off in production and foreign trade, and a decline in the revenue. A definite improvement was already noticeable in 1935, and has been maintained during 1936. The economic position of the country has moreover been materially improved by its growing popularity as a tourist country. In May, 1931, the leading bank, the Oesterreichische Credit Anstalt, got into difficulties and had to be supported by the Government. In order to relieve the strain

on the Austrian National Bank, the Bank of England advanced £4,300,000 to the Austrian Government on June 16. In August, 1931, the Austrian Government applied to the League of Nations to make an enquiry into its situation, and experts were sent; at the Conference of Lausanne (1932) the offer was made to facilitate the raising of a loan of not more than 300,000,000 sch. for Austria, under certain conditions, to which the Austrian Government subsequently agreed, and this loan was issued in August, 1933. Early in 1936 arrangements were made whereby the outstanding foreign creditors of the Credit Anstalt were finally settled by a cash payment amounting to 60 million Schilling, and arrangements for the payment of twenty annuities of 2 million Schilling.

*Million Schilling.*

	1934.	1935.

Total Exports .....	880.3	907.0
Imports from U. K. ....	51.2	54.4
Exports to U. K. ....	47.1	39.2

*Communications.*—In 1933, there were 4,200 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1924, but the new State is land-locked.

*Industries.*—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

*CAPITAL*, Vienna, on the River Danube. Pop. (1934) 1,860,308; other large towns are Graz (152,706), Linz (108,884), and Innsbruck (56,401).

*FLAG*: Three horizontal bands, red, white, red.

(BRITISH LEGATION.)

(Metternichgasse 6, Vienna III.)

*Consul-Chancellor*, A. Bomhals.

*Chancellor*, N. Sondervorst.

A Kingdom of Western Europe, with a total area of 11,750 square miles and a population, Dec. 31, 1933 (including Eupen and Malmédy) of 8,247,950. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium, in violation of the terms of the treaty; the main object of this act was to turn the French frontier defences and reach Paris before French resistance could be organized, but the Germans were foiled by the heroic defence of the forts at Liège, which gave the French and English armies time to establish contact and block the way to Paris. The invaders, however, ultimately over-ran nearly the whole of Belgium, and the Belgian army was entrenched during the remainder of the war period behind the river Yser. The Germans were ousted from the country shortly before the armistice of Nov. 11, 1918. About 60,000 persons

were added in 1919 and 1920 by the cession of Moresnet and Malmédy and the district of Eupen. In addition, the Grand Duchy of Luxembourg joined Belgium in an economic union when it ceased after the war to form part of the German *Zollverein*.

Belgium is inhabited by two distinct races, the Flemish, of Germanic stock, and the Walloons, of Latin stock. Flemish is spoken in the provinces of West Flanders, East Flanders, Antwerp, Limburg, and the northern half of Brabant, and French in the provinces of Hainaut, Namur, Luxembourg, Liège, and the southern half of Brabant. The town of Brussels is bilingual, and the upper classes everywhere speak French. The official languages are both Flemish and French, and also German in the districts acquired after the war. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 41 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Scheldt and the Meuse. Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

**GOVERNMENT.**—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 167 senators (with the exception of 40 elected by the provincial councils and 20 elected by the senators themselves) and 203 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; i.e., to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber was elected in 1925. The present Chamber (elected in May, 1936), consists of 63 Catholics, 23 Liberals, 70 Socialists, 16 Frontists (extreme Flemish Nationalists), 9 Communists and 22 "Rexist." Deputies receive 42,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Municipal Councils, elected on a somewhat more liberal franchise.

**PRODUCTION.**—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons,

Charleroi, Liège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

**DEFENCE.**—The Army is based on the system of compulsory service, the total annual class being, in 1936, 44,000. To this figure must be added reservists recalled for service (4,200) and long-service soldiers (23,817), making a total of 74,200, with 4,414 officers (1936). The average length of service of the annual class is 10 months and 10 days. The Army consists of 3 corps (each of 2 divisions), 1 cavalry corps (of 2 divisions), and 1 division of special frontier troops. The ground anti-aircraft defence and the air units and their organisation are grouped under one command, but form part of the Army.

**EDUCATION.**—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. After considerable opposition, Ghent University, which had in the past given its teaching and transacted its business in French, was in 1930 turned into a purely Flemish institution. It had already been made bi-lingual in 1923.

#### FRANCES

Revenue (1936 Budget) .....	10,429,397,000
Expenditure (1936 Budget) .....	10,402,335,000
Debt (Sept. 30, 1935) :—	
Internal .....	33,023,000,000
External .....	22,157,000,000
Imports (1935) .....	17,325,005,000
Exports (1935) .....	16,146,213,000
Imports from U.K. (1935) .....	1,376,046,000
Exports to U.K. (1935) .....	2,405,563,000

The imports in 1935 were: manufactured articles (4,655,951,000 francs), raw materials (8,858,895,000), foodstuffs and beverages (3,449,131,000), and live animals (43,997,000); the exports were: raw materials (6,853,956,000 francs), manufactured articles (8,074,028,000), foodstuffs and beverages (872,565,000) and live animals (66,144,000).

**COMMUNICATIONS.**—In 1935 there were 5,147 kilometres of normal gauge railways, 4,851 of which were operated by the National Railway Company; the length of light railways (narrow gauge) at the end of 1935 was 4,761 kilometres, 4,720 kilometres (of which 1,290 are electrified) being in operation. In 1935 there were 10,486 kilometres of telegraph line, and 2,386,378 kilometres of underground telephone wires. The navigable rivers and canals have a length of 1,842 kilometres (1935), and there are 10,473 kilometres of State and provincial roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1935) of 107 vessels (368.88 tons), in addition to which there were (1935) 280 fishing boats. In 1935, 17,014 vessels entered at Belgian ports (tonnage 27,614,666). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieupoort, Blankenburg and Zeebrugge.

The Capital, BRUSSELS, had a population (Dec. 31, 1933) of 891,422 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp,

the chief port (439,012); Ghent (217,197), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (164,908) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

FLAG: 3 vertical bands, black, yellow, red.

#### THE BELGIAN CONGO.

*Governor-General*, His Excellency Pierre Ryckmans, appointed Sept. 1934.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°–31° E. and lat. 5° N.–13° S, the colony comprises an area of 909,654 sq. miles, with a native population (1933) of 9,383,883. The European population (Jan., 1936) was 18,683, of whom 12,654 were Belgians, 1,147 Portuguese, 1,075 Italians, 982 British, 600 Greeks, 523 Americans, 320 French, 392 Dutch, 154 Swiss, 120 Russians, and 716 others of various nationalities.

The Congo State is administered by the Minister of the Colonies at Brussels, who is assisted by a Colonial Council of 14 members, of whom 8 are nominated by the King, 3 by the Senate and 3 by the Chamber. The Governor-General in Leopoldville is assisted by a Government Council of nominated members.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 349 miles in length. A narrow-

gauge line runs from Boma to Tchela in the Mayumbe (86 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (170 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (446 miles) links up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port-Franqui Railway (702 miles) commenced in 1923 and opened in 1928 makes it possible to travel by train direct from Cape Town to the river Kasai, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Kindu-Kongola (223 miles), Aketi-Boundo (95 miles), Charlesville-Makumbi (56 miles) and Manono-Mayumba (32 miles), making a total for the Colony of 2,772 miles. A new line has been completed from Katanga to join the recently completed Benguela Railway in Portuguese Angola, and work has been started on a line from Stanleyville to Lake Albert which will provide the last link to direct river and rail communication between the Cape and Cairo. Regular air services are established from Boma to Leopoldville, Leopoldville to Stanleyville and Leopoldville to Port Franqui (fortnightly services in conjunction with Belgian European mail); there is an Air Service each week to Europe, run alternately by Sabena (Belgian) and a French Company (the latter continue the journey to Elisabethville, Broken Hill and Madagascar); the Belgian Company runs a fortnightly service to Elisabethville in conjunction with their own planes from Europe; there is thus a weekly service to Elisabethville and once a fortnight the planes continue to Broken Hill. Motor roads total 26,572 miles, while 2,100 miles of new roads are in course of construction in the Colony. The most important motor road is the *Route Royale Congo-Nil* (563 miles) from Djamba, on the Rubi, to Redjaf, on the Nile. Another runs from Bukama (*via* Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai (625 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. Extensive radium deposits exist in the Katanga, where there are enormous deposits of copper. Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. The chief exports are palm-kernels and palm-oil, cotton, cocoa,

gum-copal, rubber, ivory, copper, gold, tin, radium, and diamonds. Capital, Leopoldville (pop. 1,654 whites). Principal towns, Matadi (399 whites); Elisabethville (pop. 2,844 whites); Jadotville 1,449 whites; Stanleyville (630 whites); Coquilhatville (363 whites).

*Ruanda and Urundi* (ceded July, 1919) formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Niauxa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

#### BHUTAN.

See "Countries within the Indian Sphere of Influence" (p. 789).

**BOKHARA.** See Soviet Union.

#### BOLIVIA.

(República Boliviana.)

*President*, David Toro; assumed office, May 17, 1936.

*Envoy Extraordinary, and Minister Plenipotentiary in London*, (Vacant)—*Legation*, 16 Grosvenor Place, W. 1.

*Consul-General*, Señor Don Mamerto Urriola-goitia, 16 Grosvenor Place, W. 1

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is officially estimated at 514,400 square miles (other estimates giving an area of 708,165 square miles), with an estimated population (1932) of 3,066,815. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The National Congress consists of a Senate of 16 members elected for 6 years, and a Chamber of Deputies of 73 members elected for 4 years.

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are

now worked chiefly for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, India rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state, but are being fostered by protection and the present exchange control restrictions. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, wheat, coal and petrol. There are (1934) 1,314 miles of railways in operation, and the construction of a line from Cochabamba to Santa Cruz, in two sections of 115 and 110 miles respectively is in the preliminary stages and is held up for lack of funds, 61 miles only being completed. There are 4,000 miles of telegraph wire, and wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosí. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia) is now completed. There is through railway communication with Buenos Aires from La Paz. Communication with Peru is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (744 miles), and a line from La Paz to the province of Yungas (34 miles of which are completed) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries, but is held up indefinitely for lack of funds. A line from Potosí to Sucre, the legal capital, is now nearing completion.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105,000.

Revenue (1935) .....	Rs. 30,929,568
Expenditure (1935) .....	73,087,797

Consul-General in Liverpool, Senhor J. P. da Fonseca Guinãres Faro.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. Brazil extends between lat. 5° 10' N. and 33° 45' S. and long. 34° 45' and 73° 59' 22" W., being 2,327 miles from north to south, and 2,321 from west to east, with a coast-line on the Atlantic of 3,577 miles. The Republic comprises an area of 3,298,870 square miles, with a population (1933) of 44,002,095.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in São Paulo; the *Serra Geral* (Caparaó 9,393 feet) between Minas Geraes and Espírito Santo, the *Serra do Mantiqueira* (Itatiaya, 9,163 feet), and the *Serra do Espinhaço* (Itacolumi, 5,748 feet), in the south-east of Minas Geraes; the *Serra do Paranã*, between Goyaz and Minas Geraes, the *Serra dos Aymores*, which divide Espírito Santo from Minas Geraes; and the *Serra da Gurgueira*, *Branca* and *Araripe*, which envelop Piauí.

Brazil is unequaled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes

to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Napo* and *Marañon*, the *Putumayo* or *Ica*, *Rio Branco*, *Rio Negro*, and *Japurá*; its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajós*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araucaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Gulf of Pará. The *Parnahyba* flows from the encircling mountains of Piauí into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguaçu, which unites with the Upper *Paraná* at the Brazil-Argentine-Paraguay boundary, are the majestic Falls of the *Iguaçu*, and on the *São Francisco* are the no less famous falls of *Pau do Afonso*.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. Constitutional Government, under the Constitution of 1891, was suspended after the revolution of 1930. Elections for a Constituent Assembly were held in May, 1933, and the Assembly promulgated a new Constitution (July 16, 1934). Dr. Getúlio Vargas, who had been Chief of the Provisional Government since 1930, was elected President and assumed office on July 20, 1934. Universal suffrage has been granted under the new Constitution. The President is elected for 4 years, and is ineligible for the succeeding term. He is assisted in his executive duties by the Ministers of State. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 252 members; members of both houses are paid.

The language of the country is Portuguese, foreign languages being read and spoken in the following order—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry; in 1932 cattle were estimated at 42,539,200, swine (21,615,000), sheep (10,661,000), horses (6,573,000), and goats (5,231,000). The chief products of the country are coffee, maize, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *hevea-naté*, rubber and tobacco: the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaus; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces,

Pernambuco being the centre of the sugar-producing zone. The exports include also meat, indies, maize, beans, and *heavenly* (tea). The principal imports are machinery, wheat, iron and steel products, codfish, fuel oils, linen piece-goods, wool yarns, jute, and coal and coke.

Foreign trade of Brazil, 1935:—

Country.	To Brazil.	From Brazil.
U.S.A. ....	£6,406,280	£13,013,000
Germany ....	5,608,320	5,451,000

France ....	935,300	2,672,800
Argentina ....	3,553,700	1,618,700

DEFENCE.—The peace effective of the Army is about 54,910 all ranks. The Navy consists of 2 dreadnoughts, 1 battleship, 11 destroyers, 1 tender, and 4 submarines.

EDUCATION.—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were 2,069,370 pupils in 1933. Secondary and Technical education is carried out by Federal, State and Municipal authorities. All private schools are slowly passing under the control of the Board of Education. In 1931 a Ministry for Education and Health was created; it has commenced an extensive scheme of reorganization of the teaching system throughout the country. Higher education (11,661 students in 1928) is carried out by Federal and State governments at the State University of Rio de Janeiro, and at the University Colleges at Manaus (Amazonas) and Curitiba (Paraná) and other private colleges.

COMMUNICATIONS. On December 31, 1933, there were 20,659 miles of railway open. Length of telegraph lines 96,243 miles. In 1933 steam and sailing vessels of 46,905,828 tons (of which 9,140,725 were under the British flag) entered Brazilian ports.

Three Foreign Air Lines (Pan-American, Air France and German Condor) touch Brazil, and the (German) Zeppelin Line runs a summer service from Europe. There are also 2 National Air Lines (in São Paulo and Rio Grande do Sul).

Chancery, 3 Queensbury Place, S.W. 7.

Secretary of Legation, P. B. Morfot.

Commercial Counsellor, N. R. Rousseff.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugoslavia and Greece, on the east by the Black Sea, and on the south by Greece and Turkey. The total area is stated at 39,824 square miles, with a population (June 30, 1932) of 5,911,700. The prevailing religion of the Bulgarians is the Eastern Orthodox Church (83 per cent.); Muhammadans (Pomaks) (14 per cent.) and various others (3 per cent.). For secular purposes, the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the Treaty of Neuilly, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

GOVERNMENT.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranie* of representatives (1 per 20,000 inhabitants), elected for a maximum term of four years by adult manhood suffrage. Members receive 12,000 leva a month and free railway travel.

PRODUCTION.—About 75 per cent. of the population is engaged on farming small holdings, the principal crops being wheat, rye, barley, oats, maize, tobacco, oleaginous seeds, beans, sugar beet, fodder, fruits, vegetables and cotton. The live-stock includes sheep, cattle, pigs, horses, asses and mules. Rich and extensive brown and black coal deposits, certain of which (mainly State-owned mines) produce about 2,500,000 tons yearly for home needs. There is a large variety of thermal and mineral springs, several of which have been modernised. Certain areas are well mineralised with copper, lead, zinc, iron, manganese, &c., but only copper and lead are mined and treated on a commercial scale. There are large deposits of bituminous

shale and indications of petroleum. Alluvial gold is found in many places. Local industry is encouraged by tariff protection and other inducements, and includes foodstuffs and beverages, cotton and woollen textiles, electrical goods, ceramics, metal-working, chemicals, leathers, paper and woodwork. The principal imports are raw, semi-manufactured and finished textiles, metals and manufactures, industrial and agricultural machinery, implements and tools, chemicals, tanning materials, mineral and vegetable oils, greases, fats, gums, wax, paper, hides, leather, glassware, china and porcelain, drugs and medicines, colonial goods, sawn timber, rubber. The principal exports are cereals and flour, bran, tobacco, eggs, beans, poultry and dairy produce, sunflower seed and cake, vetches, goat, sheep and lamb skins, attar of roses, live-stock, nuts, fruits, silk cocoons, charcoal, hardwoods, copper matte and lead ore.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 560,000 passed into the ranks of the Army. By the Treaty of Neuilly the Bulgarian Army was limited to 30,000 all ranks.

EDUCATION.—Elementary education is obligatory up to 4th Standard, and free up to 7th Standard. 1,721 elementary schools, 103 high schools (including American, French, German and Italian schools). Illiteracy is rapidly decreasing. There are many technical and commercial schools. Sofia has a State University, a Free University, and Art, Music and Military Academies.

COMMUNICATIONS.—On Dec. 31, 1933, there were 12,169 miles of road open, 4,452 miles under construction, and 913 miles traced. Of roads in actual use 4,678 miles were State and 6,228 miles Communal. There were 1,665 miles of normal and 276 miles of narrow gauge railway open. On Dec. 31, 1932, there were 578 post and telegraph offices, 560 telephone exchanges with 18,966 subscribers (8,000 in Sofia). The principal Black Sea ports are Varna and Bourgas; and Rusechuk, Svistov, Vidin and Lom on the Danube. In 1933 vessels cleared at Black Sea ports numbered 5,802 (2,183,707 tons), 10,517 vessels cleared at Danube ports (1,855,786 tons).

## CHILE.

(República de Chile.)

President (1932-1938), Señor Don Arturo Alessandri; installed Dec. 24, 1932.

Ambassador in London, Señor Don Augustin Edwards, G.B.E., LL.D., 3 Hamilton Place, Park Lane, W.1.

Chancery, Carrington House, Hertford Street, W.1.

Counsellor of Embassy, Don Luis Renard.

Secretary of Embassy, Dr. Don C. Manuel Pereira.

Commercial Counsellor, Don Julio Bittancourt.

Commercial Attaché, Don Santiago Monk.

2nd Secretary, Don J. A. Gandarillas.

Consul, Don Humberto Videla, 76 Victoria Street, S.W. 1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 25' and 55° 59' S., and long. 66° 30' and 75° 48' W. Extreme length of coast-line about 2,800 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, however, lowers considerably towards its southern extremity. The Andes form a boundary with Argentina, and at the head of a trail leading from Chile to Argentina has been erected a statue of *Christ the Redeemer*, 26 feet high, made of bronze from old cannon, to commemorate the peaceful settlement of a boundary dispute in 1902. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 16 provinces and 3 territories (Aysen and Magallanes) and the aggregate area is estimated at 285,100 square miles. In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000.

The population in June, 1936, was estimated at 4,528,677. Included in the total are four racial divisions; (a) Spanish settlers and their descendants; (b) indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish-Indians; and (d) European immigrants, who were represented in 1935 by 23,439 Spaniards, 11,070 Italians, 5,292 British, 10,861 Germans, 5,007 French, 1,345 Syrians, 1,374 Swiss, 4,064 Yugoslavs, 272 Danes and 1,343 Russians. In

1935, the births amounted to 34·1 per 1,000; marriages 7·3, and deaths 25·0 per 1,000.

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipu* (April 5, 1818), achieved the independence of the nation. Under the present Constitution (Aug. 30, 1925), which superseded that of May 25, 1833, the President is elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of 143 Deputies. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll.

PRODUCTION, &c.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, Chile pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is increasing yearly. Excellent wines are produced, and the Government is taking steps to develop their exportation. The live stock includes (1930) 2,387,940 cattle, 6,263,482 sheep, 788,831 goats, and 331,156 swine, 441,027 horses, 31,414 mules and 37,455 donkeys. The mineral wealth is considerable, the country being extremely rich in copper-ore, iron-ore and manganese ore. The production of bar copper in 1935 was 259,930 tons, Chile being the second greatest copper producing country in the world. The rainless north yields more especially nitrate of soda, iodine, borate of soda, copper, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper, iron, manganese and silver; and the south, iron and coal (1,899,936 tons of coal were mined in 1935). In 1932 the production of nitrate was 450,400 tons, the exports of this fertilizer being in the same period 269,800 tons. Early in 1930 a law was passed constituting a national nitrate company, to be called *Compania de Salitre de Chile* (*Cosach*), with a capital of £75,000,000 with State participation, to take over the whole of the nitrate industry, the export tax being abolished, and its place in the budget taken by a fixed payment to the Government during the first three years, and after that by the Government's share in the company's profits. By decree of Jan. 1, 1933, the dissolution of the *Cosach* was enacted, and on June 15, 1934, a new company came into existence, the Nitrate Company of Tarapacá and Antofagasta. This concern consists of 34 companies comprised in *Cosach*, and with the Anglo-Chilean Nitrate Corporation and the Lautaro Nitrate Company, Ltd., constitutes the new organization of the Chilean industry. The sales of all these companies are effected through a central body known as the *Nitrate and Iodine, Sales Corporation*. There are smelting-works for copper and silver, tanneries, corn and saw-mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage, paper and cigarette factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to

Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, oats, borax, frozen meat, wheat, copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery, and motor vehicles.

COMMUNICATIONS.—There were (1935) 5,471 miles of railway working, of which 1,703 miles are British controlled. In 1935 there were 15,718 miles of telegraph, 1,006 post-offices, and 4,690 miles of telephone, with 14 public wireless stations. The mercantile marine (1935) numbers 119 vessels (148,497 tons). In 1935 713 vessels (2,138,992 tons) entered Chilean ports from abroad, and 15,388 coasting vessels (18,050,918 tons); legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 19th to 45th year must serve in the army for a training period. The peace effective of the active army is 13,000 (1935). The Air Force has a peace strength of 70 machines with 249 officers and 2,250 other ranks. The navy consists of 1 battleship (recently renovated), 1 ironclad, 3 cruisers, 11 destroyers and 10 submarines, with a complement of 632 officers and 7,217 other ranks.

EDUCATION is free, and in July, 1920, elementary education was made compulsory; there are 4,301 schools, attended by 479,761 children out of a total on the registers of 662,706. There are 3 Universities (2 in Santiago and 1 in Concepcion). The National Library contains about 450,000 volumes. The language of the country is Spanish and the religion is Roman Catholic.

Lien-Hwei; Tao Yung.

Consul-General, London, Tan Pao-Shen, 49 Portland Place, W.1.

## \*ESTIMATED AREA AND POPULATION.

Territory.	Square miles.	Population.
China .....	2,083,000	482,000,000
Dependencies:—		
Mongolia .....	1,360,000	3,000,000
Sinkiang (Turkestan) .....	551,000	3,000,000
Tibet .....	463,000	3,000,000
Total.....	4,457,000	491,000,000

The estimated foreign population of China was as follows in 1931: British, 13,344; Japanese, 260,621; Russian, 56,479; American, 8,637; Portuguese, 2,368; German, 3,444; French, 8,651; the total being 370,393. Out of a total of 7,921 foreign firms in China, 725 were British, 1,141 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French (in 1923). The total number of Chinese abroad is estimated (1930) at 6,372,043.

Chinese civilisation is the oldest in the world, and its government, based upon that of the family, remained unchanged in its root idea until the revolution of 1911-12, by which the autocracy of the Emperor and the power of the bureaucracy were merged into a Republican form of government. For more than 2,000 years the Emperor was the supreme head of the State legislating by edict in matters great and small. In the seventeenth century the *Ming Dynasty* was overcome by the *Manchus* from the north, who have now become almost entirely absorbed by the conquered race. The conditions and practices of the autocracy were preserved by the Manchus, but for many years the civil service had become the power in the Empire and the central authority was but loosely exercised over the provincial and district administration. Many reforms were initiated or promised in the last few years of the Imperial rule, and an executive body was actually created, while a legislature was promised. At the close of the year 1911 the party of the reform forced the Imperial dynasty to a "voluntary" abdication, and a Republic was proclaimed.

China became a Republic on Feb. 12, 1912, with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tuchun*) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government in all important questions, and especially so in foreign affairs. The *Treaty of Kiakhta*, 1915, between China, Russia, and Outer Mongolia recognises the *Hutukhta Khan* as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. *Mongolia* has since developed into an independent self-governing republic.

\* Estimates of the populations of China vary considerably. The *League of Nations Annuaire Year Book*, 1926, gives a total for China (including Manchuria and Jehol, Mongolia, Sinkiang and Tibet) of 420,000,000.

On Oct. 1, 1930, *Wei-hai-wei*, the island of *Liu Kung* and certain other islands, leased to Great Britain in 1898, were restored to China. The area comprised in the lease was about 285 square miles, with a population of about 170,000. On Jan. 15, 1931, the Belgian concession at Tientsin was also formally restored to China.

The revolution of 1911 brought out a victorious general in the person of Yuan Shih-kai, but from his death in 1916 until June 1928 his subordinates and their successors fought for supreme power. Presidential elections were held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect. The Emperor (who had lived in the Imperial Palace since his enforced abdication) was stripped of his title and driven out of the Capital in 1924, and such government as existed in 1927 was centred in Peking (for Northern China), while the *Kuomintang* (People's National Party) was represented by a Nationalist Government at Canton (for Southern China). In June 1928 Peking was captured by the Nationalists, and the capital of the country was transferred to Nanking, and on October 10, 1928 (the anniversary of the outbreak of the Revolution at Wuchang in 1911), Chiang Kai-shek, the commander-in-chief of the victorious Nationalist armies, was installed as President of the Republic. The constitution promulgated in 1928 provides for government by five Councils (*Yuan*) Executive, Legislative, Judicial, Examination and Control.

EDUCATION.—In 1924 there were 190,000 schools in operation, with 6,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The foreign trade of China is stated as follows in *Standard Dollars*.

Year.	Net Imports.	Net Exports.	Excess of Imports.
1930	2,041,000,000	1,394,000,000	647,000,000
1931	2,234,000,000	1,416,000,000	818,000,000
1932	1,632,000,000	768,000,000	864,000,000
1933	1,245,000,000	612,000,000	733,000,000
1934	1,029,000,000	535,000,000	494,000,000
1935	919,211,000	575,809,000	343,402,000

The import of Indian opium is now prohibited.

## External Trade, 1935.

In Standard Dollars = 0.715 Haikwan Taels.

Country.	To China.	From China.
Great Britain .....	\$98,232,000	\$49,463,000
India .....	25,480,000	20,345,000
Hong Kong .....	20,259,000	94,893,000
Malaya .....	10,313,000	12,907,000
France.....	13,352,000	29,245,000
Germany.....	103,385,000	28,926,000
Japan .....	139,593,000	62,959,000
U.S.A. ....	174,930,000	136,410,000
U.S.S.R. ....	7,000,000	4,238,000

The principal imports in 1935 were:—

Article.	Standard Dollars.
Metals and Ores .....	\$7,443,000
Machinery .....	65,853,000
Raw Cotton, &c. ....	45,184,000
Dyes and Paints .....	37,612,000
Chemicals .....	37,443,000
Cotton goods.....	20,603,000
Woolens.....	20,415,000
Fishery products .....	19,028,000
Tobacco .....	11,301,000
Coal and Fuel .....	9,200,000

The principal exports in 1935 were:—

Article.	Standard Dollars.
Animal products and Poultry .....	80,256,000
Oils, Tallow and Wax .....	57,280,000
Seeds .....	49,001,000
Metals and Minerals .....	43,575,000
Raw Silk .....	36,142,000
Tea .....	29,624,000
Hides, Skins, &c.....	23,629,000
Raw Cotton .....	21,732,000

**COMMUNICATIONS.**—Of the total area of China about half consists of table lands and mountainous districts where communication and travel are difficult and dangerous. In the remaining districts the principal means of communication from E. to W. is afforded by the rivers, and from N. to S. by the Great Canal.

**Railways.**—The length of the railways is less than 8,000 miles, inclusive of the Manchurian lines, or less than one-fifth (per 100 sq. miles) of those available in Turkey.

**Shipping.**—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1932 the total tonnage of the 161,592 vessels and junks entered and cleared at Chinese ports was 135,409,496 tons. Of ocean shipping entered and cleared in 1935 (73,000 vessels, 48,106,000 tons), 13,341 (8,542,000 tons) were British; 5,105 (9,197,000 tons) Japanese; and 1,557 (3,711,594 tons) U.S.A. In 1935 the shipping entered at the port of Shanghai was 17,417,540 tons; cleared 16,609,263 tons.

**Telegraphs** connect Peiping with Europe and Tibet and the line being extended to Lhasa. There are about 53,000 miles of land lines and several high-power wireless installations. Telephones, Municipal and long-distance, are in general use in the settled and trade areas, and wireless telephony has been installed in the large centres.

**Maritime Customs.**—The Chinese Maritime Customs consists of about 1,000 Europeans, a large proportion of whom are British subjects, and some 8,000 Chinese, all under the control of the *Inspector-General* (Sir Frederick Maze). By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed; but the change has not materially affected the powers hitherto exercised by the *Inspector-General*. In addition to the collection of dues at the Treaty Ports, this service is responsible for the payment of the Indemnities and foreign Loans secured on the Customs; it also manages the Lighthouse Administration, is closely associated with conservancy operations, and keeps a small fleet of cruisers to enforce its regulations. The *China Customs Revenue* in 1935 was

\$315,519,712 (£23,335,312). The *Salt Revenue* in 1935 was \$184,209,300.

**Post Office.**—The Chinese Post Office was established by Imperial Decree in 1866 and placed in the hands of Sir Robert Hart, the great *Inspector-General*, who developed it on modern lines. It remained a branch of the Maritime Customs until the death of Sir Robert Hart in 1911, when it was transferred to the Ministry of Communications and a Foreign Co-Director. Letters can be sent all over China at the uniform rate of 5 cents per 20 grammes. The number of Post Offices and Agencies (1932) was 12,828. In 1932, 738,979,000 postal packets and 6,000,000 parcels were handled.

#### BUDGET (1934-1935).

	Standard Dollars.
Ordinary Expenditure .....	\$773,470,000
Ordinary Revenue .....	751,687,000
External Debt (Jan. 1, 1931) .....	£153,000,000

At Jan. 1, 1935, according to the official statement of the Ministry of Finance, the total internal debt was \$871,237,000 (including arrears of capital and interest).

#### OUTLYING TERRITORIES.

**Mongolia**—estimated area about 1,360,000 square miles—population 3,000,000 to 5,000,000 (of whom the greater number are Buddhists).

In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledges the suzerainty of China over Outer Mongolia.

**Outer (North-West) Mongolia** covers an area of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtysh and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides and skins, and gold. The chief centres are Urga (Kuren), or Ulan-Buotr-Khoto, "Town of the Red Knight"; Uliassutai, and Kobdo, all of importance as trading centres on the main caravan routes. Part of Outer Mongolia has declared itself independent of its suzerain as the Republic of *Tannu Tuva*. The districts affected lie between the Sayan and Tannu Ola ranges, the capital of the Republic being Chem Belder (or Krasny, "Red Town").

**Inner Mongolia** covers an area of about 1,000,000 square miles and includes the *Gobi* ("Desert"), or *Sha-mo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho river. In the north-east of Inner Mongolia rises the Keru-luu, which flows into the Dalai Nor in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The

centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi, the general direction of the caravan routes being from south-east to north-west. The principal centres are: Kalgan, Kuku-khoto, Kuku-erghi, Dolon-Nor and Biru-khoto. In the north-east, Keru-Jun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga, in N.W. Mongolia.

*Tibet* (area, 750,000 square miles; pop. 3,000,000) borders on British India. (See p. 790.)

*Chinese Turkestan* (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes *Zungaria* and Chinese *Tartary*, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi. (See p. 790.)

The *Paracels*, a group of islets and reefs in the South China Sea (about 150 miles E. of Cochin China) and the *Pratas*, a cluster of islands to the S.E. of the Paracels, are Chinese-dependencies.

CAPITAL OF THE CHINESE REPUBLIC, Nanking. Population (1931), 1,300,000.

*Nanking*, selected as the capital of China in 1928 in place of Peking, is the principal city in the province of Kiangsu, and the seat of the provincial government of Kiang-nan (embracing the three provinces of Kiang-su, Kiang-si and Ngan-hui). About 1000 A.D. it was named Kiang nan, but in 1368 this was changed to Nanking ("Southern Capital.") The city is built on the south bank of the Yangtse Kiang river, about equidistant from Canton and Peiping, and is connected by railway (102 miles) with Shanghai. *Peiping*, the former capital, had an estimated population of 1,300,000 in 1921.

*Shanghai* comprises (a) the *International Settlement* administered by the Shanghai Municipal Council (for the defence of which British Forces were despatched), the estimated population being (1934) 1,148,821 (Foreigners, 48,325; Chinese, 1,100,496); (b) the *French Concession*, an independent administration, population (1934) 498,193 (Foreigners, 28,899; Chinese, 479,294); and (c) the *Shanghai City, Chapei and Nantao* areas surrounding these settlements, population (1934) 1,902,762, (Foreigners, 10,474; Chinese, 1,892,288)—a grand total for Shanghai of 3,550,376.

The population of the principal ports and trade marts is estimated as follows:—Amoy, 240,000; Canton, 870,000; Changsha, 700,000; Chefoo, 250,000; Chingkiang, 220,000; Chungking, 700,000; Foochow, 400,000; Hangchow, 600,000; Hankow (including Wuchang and Han-yang), 800,000; Ichang, 110,000; Mengtsz, 200,000; NANKING, 1,300,000; Ningpo, 300,000; Shanghai, 3,550,376; Shasi, 150,000; Soochow, 300,000; Swatow, 200,000; Tientsin, 1,400,000; Tsingtau, 400,000; Wansien, 300,000; Wenchow, 700,000; Wuchow, 100,000; Wuhu, 140,000.

FLAG: Red, with blue canton bearing a white sun.

BRITISH EMBASSY, PEIPING (Peking).

*Ambassador Extraordinary and Plenipotentiary*, His Excellency Sir H. M. Knatchbull-Hugessen, K.C.M.G. (1936) £5,250 *Counsellor* (*Charge d'Affaires*), R. G. Howe. 1st Secretary, D. J. Cowan, O.B.E., M.C. 2nd Secretary, B. E. F. Gage. 3rd Secretary, G. P. Young. *Chinese Counsellor*, Sir E. Teichman, K.C.M.G., C.I.E.

*Commercial Secretary* (Grade II), J. C. Hutchison, O.B.E. *Commercial Secretary* (Grade II), (*Hong Kong*), G. C. Felham. *Financial Adviser*, E. L. Hall-Patch. *Naval Attaché*, Capt. H. B. Rawlings, O.B.E., R.N. *Military do.*, Lt.-Col. W. A. Lovat Fraser, O.B.E. *Air Attaché*, Wing-Commander H. S. Kerby, D.S.O., A.F.C. *Chaplain*, Rt. Rev. F. L. Norris, D.D. *Consul*, N. Fitzmaurice, C.I.E. *Chinese Sec.*, A. L. Scott (*acting*). *Accountant*, E. Williams. *Archivist*, A. T. Cox, M.B.E. *Clerical Officers*, A. Veitch; E. L. Watkins; P. A. North. *Cypher Officers*, C. M. Alport; K. O'B. Harding; H. Tubb. *Commandant, British Embassy Guard*, Major Dennis Chesney, O.B.E.

BRITISH CHAMBERS OF COMMERCE IN CHINA AT Amoy, Canton, Chefoo, Chiukiang, Chungking, Foochow, Hankow, Harbin, Mukden, Newchwang, Ningpo, Peking, Shanghai, Swatow, Tientsin, and Tsinan-fu.

Peking, distant 11,770 miles; transit, 39 days (or by Siberian Railway 13 to 14 days).

## COLOMBIA

(República de Colombia).

President (1934-1938), Dr. Alfonso Lopez, born Jan. 31, 1885, assumed office Aug. 7, 1934.

Envoy Extraordinary and Minister Plenipotentiary in England (vacant).

Legation, 26 Loundes Street, S.W. 1.

Chargé d'Affaires (ad interim), Señor Don Saturnino Restrepo.

Counsellor, Señor Don Jorge Garcés.

Consul-General (ad interim), Señor Don Saturnino Restrepo, 12 Cadogan Place, S.W. 1.

Consul-General in Liverpool, Señor Don Antonio Salgar de la Cuadra, North House, North John Street.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population (Census 1928) of 7,851,000, of whom more than one-half are whites and half-castes.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 Simon Bolivar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic. There is a Congress of two Chambers, Senate (56 members) and Chamber of Deputies (112 members).

There are three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caquetá and Putumayo. The Patia flows through the famous Minima Gorge of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guatara) is spanned by the Rumichaca Arch, or Inca's Bridge, of natural stone. On the Funza is the Great Fall of Tequendama, 480 feet in height.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in enormous quantities, and in the year 1935 the output was 17,562,000 barrels; it is possible that new oilfields will shortly be opened near the Venezuelan frontier. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, petroleum, gold, bananas, and hides.

The standing army consists of about 10,000 men. Railroads are in their infancy, about 2,040 miles being open in 1934, with 23,206 (1931) miles of telegraph; there are also (1934) 2,980 miles of national roads, in addition to departmental (some macadam) and "dirt" roads (passable by motors in dry weather only). There is a daily passenger and mail service between Bogotá and Barranquilla and a bi-weekly service in concert with Pan-American Airways to the U.S. New York can be reached in 2 days and mail is delivered in England 9 days after leaving Bogotá. There are wireless stations at Barranquilla, Bogotá, Medellin, Cali and Cúcuta.

Roman Catholicism is the established religion, but all religions are tolerated.

Spanish is the language of the country.

Revenue (Budget).....	PEROS 62,489,964
Expenditure .....	61,092,152
Debt, Dec. 31, 1935*:-	
National .....	\$184,590,201

CAPITAL, Bogotá. Population (1928), 235,421; Medellin (120,044), Barranquilla (139,974), Cartagena (92,494), Manizales (81,091), and Cali (122,847).

FLAG: Three horizontal bands, yellow (twice the width of the others), blue, red.

\* \$16,051,332 of the National Debt is in the form of a short term loan by a banking group (Nat. City B of N.Y., First Nat. B. of Boston, and Lazard's of Paris and London). Colombia suspended payment of interest on the National foreign debt in March, 1933, but resumed service in July, 1933, on the basis of current year's coupons to be paid one-third in cash and two-thirds in scrip, which is to be amortized in 4 years, and is non-interest bearing.

§ Average exchange (1934) 21/4 = £1; (1935) 22/11 = £1.

Distant 6,200 miles; transit, to Bogotá (via New York) 18 days.

## COSTA RICA.

(República de Costa Rica.)

President (1936-40), León Cortés Castro. Assumed office May 8, 1936.

Minister of Foreign Affairs, Manuel Francisco Jiménez.

Minister in London (vacant).

Consul-General, London, Virgilio Chaveri Ugalde, 33 36 King William Street, E.C. 4.

Consul, John C. Eggers.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus, between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (Jan. 1, 1936) of 577,833. The Republic lies between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America. Under the Constitution of 1927 there is a single chamber Congress of 43 members, elected for 4 years.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1935) are coffee (£1,130,665), bananas (£304,756), cacao, gold and silver bullion, skins and hides, fresh fruit and timber. The imports (in 1935, 38·6 per cent. from United States, 10·57 from United Kingdom, 22·6 per cent. from Germany) are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise.

The chief ports are Limon, on the Atlantic coast, through which passes the bulk of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1935, 495 vessels (1,265,807 tons) entered at Costa Rican ports. About 420 miles of railroad were open in 1929. In 1934 there were

215 post offices and 215 telegraph offices (12 wireless), with (1930) 2,612 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

## CUBA.

(República de Cuba.)

President of the Republic, Dr. Miguel Mariano Gómez. Assumed office, May 20, 1936.

Minister for Foreign Affairs, Señor Dr. Don José Manuel Cortina.

Minister in London, Señor Dr. Don Pedro Martínez Fraga.

Legation, 20 Wilton Crescent, S.W. 1.

1st Secretary, Señor Dr. Don Roberto Gonzalez de Mendoza.

Consul, Señor Don Julio A. Brodermann.

Consul-General, Liverpool, Señor Don Antonio A. Ross.

Cuba (the largest of the "West India" Islands) lies between 74° and 88° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 3,961,725 (Dec. 31, 1933).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. [The island was under British rule for one year, 1762-1763, when it was returned to Spain in exchange for Florida.] The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880-1886. The government of Spain was marked by a generally corrupt administration, complicated by in-

\* Pre-War Gold Francs.

ternal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated, with a Congress of two Chambers, a Senate of 37 members elected for 9 years and a Chamber of 128 Deputies elected for 6 years. In 1933 a revolution was followed by provisional government until May, 1936, when a constitutional government was elected.

Of the total area of 28,000,000 acres, there were (1935) 2,500,000 acres under sugar, about 500,000 acres under tobacco, sweet potatoes and ~~bananas~~. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are sugar and tobacco; sugar crop (1935) 2,554,267 tons; the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges. 3,800 miles of railroad are open and about 6,000 miles of telegraph line; there are about 2,200 miles of roads.

Spanish is the language of the island.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 18, 1918, as the Czechoslovak Republic, and ten days later the Národní Výchor (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are Austria and Hungary on the S., Germany and Poland on the N., Germany on the W., and Poland and Rumania on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Bratislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vereezka)—a total area of about 54,877 sq. miles, with a population (Census of 1930) as under:—

Bohemia .....	7,106,766
Moravia and Silesia .....	3,565,010
Slovakia .....	3,329,793
Subcarpathian-Russia .....	725,357

Total..... 14,729,536

Of the total population it is estimated that 65·5 per cent. are Czechs and Slovaks, 23·3 per cent. Germans, 5·5 per cent. Magyars, 3·4 per cent. Ruthenians, and 0·5 per cent. Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate (150 members) and a Chamber of Deputies (300 members), is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. The Constitution guarantees religious and political freedom. About 80 per cent. of the people are Roman Catholics.

By the Peace Treaty Czechoslovakia acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined, while the whole country is rich in mineral and thermal springs. Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs the country is now almost self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of 10½ millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Except in Slovakia and Ruthenia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours.

Czechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, *via* the Danube, to the Black Sea.

#### DANUBE COMMISSIONS.

The International Danube Commission (Headquarters, Vienna) was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bavaria, Bulgaria, Czechoslovakia, France, Great Britain, Hungary, Italy, Rumania, Württemberg, and Yugoslavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Württemberg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the European Commission of the Danube (Headquarters, Galatz), created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); a new and deeper canal is under construction to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where trans-shipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues.

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin (where a bridge is projected which will link Rumania with Yugoslavia) and Orsova (Iron Gates), in Rumania; Russchuk, Vidin and Lom Palanka, in Bulgaria; Belgrade, the capital of Yugoslavia; Buda-Pest, the capital of Hungary; Bratislava in Czechoslovakia; Vienna (the seat of the Commission), and Linz, in Austria;

\* The National Currency is the Czechoslovak Crown or Koruna (Kč.), replacing the former Austrian crown.

Passau and Regensburg, in Bavaria; and Ulm, in Württemberg.

The financial situation of the European Commission is shown below:—

	Gold francs

### DANZIG.

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the *Treaty of Versailles*, the City of Danzig with the surrounding territory (constituting a total area of about 726 sq. miles, with a population estimated at 400,000) was set up as a Free City, under the protection of the League of Nations, Poland undertaking to conduct her Foreign Affairs. The Free City was constituted Nov. 15, 1920, with an executive Senate of 12 members and an elected Legislature of 72 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. In Jan., 1922, the Free City entered the Polish Customs Union. The principal exports are coal, timber, cereals, cement, bacon, eggs, mineral oils and sugar, and the imports herrings, iron ore, machinery, scrap-iron, artificial manures, fats, foodstuffs and textiles. The tonnage of ships entered in 1935 was 2,843,757 tons, and of those cleared 2,858,714 tons.

The language of the State is German.

FLAG: Red, with gold crown over two white crosses near staff.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 45' N. lat. and 8° 5'—15° 12' E. long., with an area of 16,576 square miles, and a population (Nov. 5, 1935) of 3,706,000.

The throne is hereditary in the house of Schleswig-Holstein-Sonderburg-Glücksburg. There is a Diet (*Rigsdag*) of two Chambers, the Senate (*Landsting*) of 76 members, elected for 8 years, and the Folketing of 149 members, elected for 4 years.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

One-third of the population live exclusively by agriculture, and about one-half by manufactures and trade. The chief products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter; manufactures are, for the most part, for home consumption. The principal imports are coals, mineral oils, timber, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, coffee, tea, cereals, feeding stuffs, oil seeds, and colonial produce. In 1935, 1,335,000 hectares were under corn crops, 50,000 sugar beet, 388,000 forage roots, and 386,500 hay crop. In July, 1935, the live stock numbered 521,000 horses, 3,072,000 cattle, 179,000 sheep, and 3,036,000 swine. The crops in 1935 included 10,719,000 hkg. (hkg. = 100 kilogrammes) of oats, 11,074,000 of barley, 2,839,000 rye, 8,517,000 mixed corn, and 3,993,000 of wheat. The chief exports are agricultural produce, including barley, bacon, hams, butter, eggs, hides, skins, horses and cattle. Sea-going mercantile marine (1935) 563 steamers, with a gross tonnage of 629,107. There are (1935) 5,156 kilometres of railway and 21,095 km. of telegraph line.

**DEFENCE.**—The Army consists of about 12,000 trained men, the vote for 1934-35 amounting to Kr. 32,000,000. The Navy consists of 3 coast-defence ironclads and 1 completing, 3 small cruisers, 20 torpedo-boats (built and building), 8 submarines (built or building). Vote, 1934-35, Kr. 22,000,000.

**EDUCATION** is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen and Aarhus.

#### BRITISH CONSULAR OFFICES.

Copenhagen—Consul for Denmark, E. G. Cable (with local rank of Commercial Secretary, Grade II).

„ Vice-Consul, Johan B. Dano, M.B.E.

„ Pro-Consul, Leslie E. Tudor.

Aalborg—Vice-Consul, N. H. Hansen.

Aarhus (Jutland)—Vice-Consul, H. von der Hude.

Esbjerg—Vice-Consul, L. Christensen.

Frederikshavn—Vice-Consul, Sophus Korup, M.B.E.

Horsens—Vice-Consul, Peter Nielsen.

Kolding—Vice-Consul, Christian F. Eff, M.B.E.

Lemvig—Vice-Consul, S. A. Kier.

Odense (Funen)—Vice-Consul, Thorbjørn E. G. Muus.

Randers—Vice-Consul, Victor H. Nisted

Farøe (Thorshavn)—Consul, V. Lutzen.

DANISH-BRITISH ASSOCIATION COMMITTEE FOR TRADE DEVELOPMENT, Vesterport, Copenhagen, V.

BRITISH IMPORT UNION (*Dansk Forening af Importører af Britiske Varer*), Rådhuspladsen 45 (Absalonsgaard), Copenhagen—Sec., S. Weikop.

#### Outlying Possessions.

The outlying possessions and colonies of Denmark have about 43,000 inhabitants. The FARØE, or Sheep Islands (540 sq. m., pop., 1935, 25,700), capital, Thorshavn, are governed by a *Lagting* of 25 members, and send representatives to the *Landsting and Folketing* at Copenhagen. GREENLAND (ice-free portion about 34,000 sq. m., total area about 838,000 sq. m., population, 1930, 16,866), is divided into 3 provinces (South, North and East). South Greenland (cap., Godthaab) has a *Landsraad* of 12, and North Greenland (cap., Godhavn) of 11 members. The trade of Greenland is a Government monopoly.

Copenhagen, distant 728 miles; transit, 36 hours.

#### DOMINICAN REPUBLIC.

(República Dominicana.)

President, General Don Rafael L. Trujillo, sworn in, Aug. 16, 1930; re-elected 1934.

Vice-President, Señor Dr. Don Jacinto B. Peynado.

Envoy Extraordinary and Minister Plenipotentiary in London, Señor Dr. Don Max Henriquez-Ureña, 67 Eaton Place, S.W. 1.

Chancellor of Legation, Señor Don Hernán Henriquez.

Consul-General, Robert H. Kulka, Sheli-Mex House, 3 Savoy Place, W.C.2.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America. The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians almost to the point of extermination for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti, and this accounts for the present large proportion of negroid blood in both countries. A short time after its discovery Santo Domingo became the "jumping-off point" for other adventurers proceeding from Spain to the newly-found mainlands of the western hemisphere, thus greatly diminishing the importance of the island and causing an exodus to those places.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out in 1844, when the Dominican Republic was definitely proclaimed by the natives, and has so remained except for an interregnum of two years (1861-1863) when the Spaniards again took possession, but were eventually forced to withdraw.

On November 29, 1926, American military forces landed in Santo Domingo and a Military Government was proclaimed. From October 21, 1922, a Provisional Dominican Government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of foreign obligations, which continue to be administered by an American official. Congress consists of a Senate of 12 members, elected for 4 years, and of a Chamber of Deputies of 24 members, also elected for 4 years.

The Dominican Republic comprises an area of about 19,322 square miles, with a population of 1,478,121 (Census of 1935). An extensive system of motor highways, totalling nearly 900 miles of first-class roads, has been built, and as a result of recent repairs they are now in excellent condition for motoring. There are about 1,400 miles of second-class roads and cart roads. The streets of the capital (the name of which was changed in January, 1925, from Santo Domingo to Ciudad Trujillo) have been repaired and asphalted. There is a direct road from Ciudad Trujillo City

to Port-au-Prince, the capital of Haiti, enabling the journey from capital to capital to be made in one day. There are about 150 miles of public railway, and a telephone system connects practically all the towns of the republic. There are six wireless stations, and the All America Cable Company maintains an efficient service with all parts of the world. Radio Communications of America have a wireless station in Ciudad Trujillo.

Sugar, cocoa beans and coffee are the most important crops, and tobacco is grown in fair quantity. Other products are mahogany, furniture woods, lignum-vitæ, log-wood, dividivi, cotton, wax, honey, maize, hides, turtle-shell and starch.

Of the total import trade in 1935, 48.44 per cent. came from the United States, 4.56 per cent. (rice) from British India, and 6.81 per cent. from the United Kingdom. British trade is hampered by distance (as compared with the U.S.), by lack of resident British merchants and industrial undertakings, and by indifferent and slow steamship services from Europe.

**CAPITAL**, Ciudad Trujillo (formerly called Santo Domingo), on the Ozama, founded in 1495 by Bartolomeo (brother of Christopher) Columbus; population (1935) estimated at 70,000. Santo Domingo City was partially destroyed by hurricane September 3, 1930: rebuilding proceeded rapidly and the effects of the storm have almost disappeared. Other centres are Santiago de los Caballeros (30,000) and San Pedro de Macoris (20,000). The language of the country is Spanish.

**FLAG**: Red and blue, with white cross.

#### ECUADOR.

(República del Ecuador.)

*Provisional President of the Republic*, Señor Don Federico Paéz, assumed office, 1935

*Minister in London*, (vacant).

*Chargé d'Affaires and Consul-General in London*, Sr. Eduardo Wright, 21 Cavendish Square, W. 1.

*Attaché*, Señor Hernán Palares Zaldumbide.

*Consuls at Liverpool, Birmingham, Hull, Glasgow, and Cardiff*.

An equatorial State of South America, extending from lat. 1° 38' N. to 6° 5' S., and between 60° 20' and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Viceroyalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822). Under the Constitution of 1929 there is a bi-cameral legislature, Senate (33 members) and Chamber of Deputies (56 members).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,500,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), Illimiza (17,405 ft.), Carihuairazo (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,600 ft.), and Sincholaque (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. The *Witch-broom* disease, which appeared (1921) in the cocoa plantations, has had a disastrous effect on the agricultural wealth of the country. The average yearly output previous to 1921 was one million quintals (of 100 lb.) as compared with 335,052 quintals in 1929, 387,424 in 1930, 283,183 in 1931, 300,468 in 1932, 239,227 in 1933, and 350,930 in 1934.

Its chief products are cocoa, petroleum, rice, vegetable ivory, bananas, cotton, coffee, india-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, petroleum, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textile machinery, foodstuffs, and manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The *Galápagos* (Tortoise) Islands (2,870 square miles) belong to Ecuador.

In October, 1926, an American Financial Mission arrived in the country and their recommendations have been enacted as laws. A new customs tariff, prepared by the Mission, came into force on July 1, 1927, and produced (in thousands of Sucres):—1928, 19,638; 1929, 19,869; 1930, 16,365; 1931, 13,387; 1932, 9,418; 1933, 9,797; 1934, 15,326; 1935, 31,274. Several amendments were made to the Tariff in 1935 increasing the duty on numerous articles by 50 per cent., and surcharges are imposed on goods from countries with unfavourable trade balance. Preferential tariffs were also established.

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador

for a period of 25 years in return for a loan of 8,800,000 *sucre*s, which sum was applied towards the establishment of a Mortgage Bank. Congress of 1931 rescinded this contract, and the monopoly is now administered direct by the Government.

The language of the country is Spanish.

Egyptian Ambassador in London (vacant).

Offices of Embassy, Bute House, 75 South

Audley Street, W. 1.

Counsellor, Abd El Rahman Hakky Bey.

Secretary, A. Kerim Safwat.

Attaché, Mohamed Hamada.

Commercial Attaché, Dr. E. M. Eweis.

Archivist (vacant).

Probationer do., Rashad Mourad.

Consul, Hussein Mohamed.

\* A *Waqf* is an institution of Muhammadan Law similar to the "trust" of English Law. When property is made *Waqf* it is dedicated expressly or implicitly to some charitable or religious object, or for the benefit of private individuals. The nearest British equivalent is "The Public Trustee."

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, and (c) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Galatin and Zebargel (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the coast 10 kilometres N.W. of Sollüm to the latitude of Siwa and thence due S. along the 25th meridian to the parallel of 22° N. (the N. boundary of the Sudan) at Uweinat Mountain. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E. long.) to the head of the Gulf of Aqaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddäns* (12,431 square miles) and the area of lakes at 641,000 *feddäns* (1,039 sq. miles), a total of 8,308,000 *feddäns* (13,470 sq. miles); but within the boundaries above-mentioned is enclosed an area of about 363,181 sq. miles. The population (Census of 1927) numbered 14,168,756, distributed as under:—

Division.	Population.	
	1927 Census.	1927 Census.
<b>LOWER EGYPT:—</b>		
Alexandria.....	444,617	570,314

Nomads.....	32,663	35,462
TOTAL.....	12,750,918	14,168,756

Of the total population in 1927 males numbered 6,369,517 and females 6,348,738; in 1927, males numbered 7,036,298 and females 7,096,996 (Nomads being excluded in each case).

(†) Dahkla and Kharga Oases. †† Including Siwa Baharia and Farafra.

**Physical Features.**—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouth. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. (A new pyramid, making 4 in all, was discovered by Prof. Selim Hassan in Feb. 1932). Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great backbone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wadis from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 50 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the wadis, and running water (mostly brackish) is found at a few points.

**Native Population.**—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellah*=ploughman, or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,942 in the total of the Census of 1917 (including 926,432 local subjects of foreign origin). A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and

107,364 Sudanese and Berbarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Faym. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

**Foreign Population.**—At the Census of 1927 the foreign residents were 225,600, of whom 76,264 were Greeks, 56,462 Italians, 34,169 British, 24,332 French and Tunisians, and 38,373 others.

**Religions.**—At the Census of 1927 there were 12,969,260 Muhammadans, 1,181,910 Christians (Roman Catholics 116,660, Orthodox Church 999,170, others 66,080; the Coptic Church numbered 890,892, of whom 24,015 were R.C. and 870,877 Orthodox), 63,550 Jews and 3,144 other religions. The chief Muhammadan religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti el Di-yâr el Masriya*.

**Government.**—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811 and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arâbi *Pasha*) assumed alarming proportions and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation.

During the Great War a British Protectorate over Egypt was declared (Dec. 18, 1914) and Khedive Abbas Hilmi was deposed. He was succeeded by Hussein Kamel, with the title of Sultan, and died Oct. 9, 1917, being succeeded by his brother Ahmed Fuad. The British Protectorate terminated on Feb. 28, 1922, and Sultan Ahmed Fuad was proclaimed king of Egypt. Following closely on the accession of the present King, Egypt became a sovereign state by the *Anglo-Egyptian Treaty*, signed in London (Aug. 26, 1936); the military occupation by British troops was terminated and Ambassadors were to be duly accredited at the Courts of St. James's and Cairo. Provision was made in the Treaty for a reconsideration of its terms in 1956.

#### Rulers of Egypt since 1811.

Name.	Born.	Reigned.
Mohammed Aly ( <i>Vali</i> ) .....	1769	1805-1848
Ibrahim ( <i>Vali</i> ) .....	1789	1848
Abbas I " .....	1813	1848-1854

Ismail ( <i>Khedive</i> ) .....	1830	1863-1879
Mohammed Tewfiq ( <i>Kh d'ue</i> ) .....	1852	1879-1892
Abbas II ( <i>Khedive</i> ) .....	1874	1892-1914
Hussein Kamel ( <i>Sultan</i> ) .....	1853	1914-1917
Fuad I ( <i>King</i> ) .....	1868	1917-1936
Farouk I ( <i>King</i> ) .....	1920	1936-

**Legislature.**—Legislative power is exercised by the King in concurrence with the Parliament within the limits laid down in the Constitution established by Royal rescript of April 19, 1923, and general elections took place for a Parliament, consisting of two houses, which first assembled March 15, 1924. Parliament (*Barlaman*) consists of a Senate (*Maglis Al-Shuyukh*) of 100 members of whom three-fifths are nominated by the King, the remainder being elected (for 10 years) on the basis of 1 Senator for every 180,000 inhabitants; and of a Chamber of 150 Deputies (*Maglis Al-Nuwab*) elected (for 5 years) on the basis of 1 for every 60,000 inhabitants.

**Executive.**—The executive power is exercised by the King through his Ministers within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

**Local Government.**—The chief towns constitute governorships (*muhāfzas*), and the remainder of the occupied country is divided into provinces (*mudiriya*), which are subdivided into districts (*markaz*), each under a *namāz*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganised in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

**Defence.**—The Army comprises 3 Infantry Brigades (11 battalions), 2 squadrons of Cavalry, 4 Artillery batteries, 1 Company of Garrison Artillery, 1 motor machine gun battery and 1 Engineer company. Service is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professors, students, Government employees, &c.) are exempt and exemption may also be purchased for £Eao, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army. The effective strength of the Army in 1935 was 12,405. There is a small Air Force of 2 squadrons (18 aeroplanes). Under Article 8 of the Treaty of 1936 the defence of the Suez Canal Zone is maintained by British Troops until such time as the Contracting Parties agree that the Egyptian Army is in a position to ensure by its own resources the liberty and entire security of navigation of the Canal.

There is no Navy in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The Egyptian Police (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 359 officers and 6,162 men. There are also 60,859 *ghafirs*, or native night-watchmen.

**Education** on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1932-33 there were 1,369 *Maktab*s (indigenous native schools) under Government inspection, with 135,316 pupils. The Government primary

schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There are Colleges of Medicine, Law, Education, Engineering, Fine Art, Commerce, Veterinary Science and Agriculture at Cairo, and evening classes for workmen. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. The State University, founded in 1908, had 2,949 students (267 of them women) in 1933-34.

**Agriculture.**—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile. In 1934 the land was held as to 5,317,000 *faddāns* by 2,330,000 native owners, and as to 520,000 *faddāns* by 6,740 foreign owners. The principal crops grown during *Saif* (summer) are cotton, rice, sugar cane, and sorgho (a variety of maize). *Nili* (flood) part of *Saif*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July; the principal crops are maize and rice. *Chilwi* (winter) commences in November and ends in June; the principal crops are cereals, bersem (a variety of clover) and mainly in Upper Egypt—beans, lentils, onions and helba. The total cotton crop exported in recent years:—

Year.	Kantars.	Year.	Kantars.
1924-25	7,273,974	1930-31	8,015,400
1925-26	7,964,645	1931-32	6,212,401
1926-27	7,652,189	1932-33	4,844,512
1927-28	6,041,499	1933-34	8,411,068
1928-29	8,070,000	1934-35	8,197,832

**Live Stock.**—In 1934 the cattle numbered 924,208, buffaloes 887,566, horses 33,798, mules 17,601, donkeys 762,216, sheep 1,400,000, goats 688,361, and camels 155,271.

**Minerals.**—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

**Manufactures and Industries.**—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

**Railways.**—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shaila, the First Cataract. At this point a steamer connexion runs to Wādī

Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollûm, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1933, was 3,422 miles (including 155 miles of branch line and 778 miles of siding). 34,556,928 passengers and 5,402,092 metric tons of merchandise were carried during 1933-34, the gross receipts being £5,046,700 and the working expenses £3,339,700. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 883 miles of light railways exploited by public companies.

**Caravan Routes.**—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

**Shipping.**—For the SUEZ CANAL see page 934.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Ior, Abu Zenima, Zeitia, Jemsa and Hurgahda in the Gulf of Suez, and Safage, Qosseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depôt at Suez. In 1934, 9,012 mercantile steamers (32,222,376 tons) entered Egyptian ports.

**Posts and Telegraphs.**—There were in 1934 4,520 post offices and stations. There were on March 31, 1931, 223,000 miles of telegraph and 220,000 of telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarrâf* (village tax-collector).

	1934-35.	1935-36.
Revenue .....	£31,661,500	£32,215,000
Expenditure .....	31,632,431	28,056,000
	1934.	1935.
Imports .....	£29,304,000	£29,233,000
Exports .....	31,056,000	35,604,000
Imports from U.K. ...	£6,754,000	7,870,000
Exports to U.K. ...	11,470,000	12,738,000

**Debt.**—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment

of the coupons as they become due, while it also holds a reserve fund (£1,800,000), the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 30, 1934 and 1935:—

Debt.	1934.	1935.
Guaranteed Debt, 3 per cent. ....	£3,071,000	2,846,500
Privileged Debt, 3½ per cent. ....	30,633,980	30,633,980
Unifid Debt, 4 per cent. ....	55,250,460	55,250,460
Total .....	88,955,440	88,730,940

The Cost of the Debt (in the Budget for 1935-36) inclusive of £594,626 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899, which were guaranteed on the Egyptian Tribute, was stated at £4,195,079.

CAIRO, the capital (population 1927, 1,064,567), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalili, the Hamzâwi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population 1927, 573,023), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World." Alexandria now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1927 the towns of Tanta (90,014), Port Said (104,603), Mansura (63,696), Assiut (57,132), Faiyûm (52,372), Zagazig (52,351), and Damanhur (51,709), also exceeded 50,000 inhabitants.

The language of the country is Arabic.

CAPITAL, Cairo.

FLAG: Green, with a white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the horns.

BRITISH DIPLOMATIC AND CONSULAR OFFICERS.  
(The Embassy, Kasr-el-Doubara, Cairo.)

British Ambassador, His Excellency Sir Miles Wedderburn Lampson, K.C.M.G., C.B., M.V.O. (1936) ..... £10,400

Counsellor, D. V. Kelly, C.M.G., M.C.

Oriental Secretary (with local rank of Counsellor), W. A. Smart.

1st Secretary (Head of Chancery), J. C. Sternad-Bennett, C.M.G., M.C.

1st Secretary, Arthur Yencken, M.C.

1st Secretary, H. L. d'A. Hopkinson.

Commercial Secretary (Grade I), G. H. Selous, O.B.E.

Assistant Oriental Secretaries with local rank of 1st Secretary), H. R. D. Gybbon-Monypenny, O.B.E.; A. N. Williamson-Napier.

2nd Secretary, F. K. Roberts.

Assistant Oriental Secretary (with local rank of 2nd Secretary), T. C. Ravensdale.

*Commercial Sec. (Grade II), A. J. N. Cumberbatch, M.B.E.*  
*Temporary Secretary, F. Pattman, M.B.E.*  
*Hon. Attaché, Maj. D. McCallum, M.C.*  
*Aides-de-Camp, Lieut. G. A. D. Taylor; Flight-Lieut. J. Heber Percy.*  
*Liaison Officer, G. W. Courtney.*  
*Archivist and Accountant, H. E. R. Warton.*  
*Clerical Officer (acting Temporary Secretary), F. Pattman, M.B.E.*  
*Assistant Archivist, H. L. B. Coe.*

*Suez—Vice-Consul, D. J. N. Irving.*

There are *Consular Agents* at Assiut, Aswan, Beni Suef, Damanhour, Ismaïlla, Mansura, Mehalla Kebir, Minia, Sohag, Tanta, and Zagazig.

H.B.M. SUPREME COURT  
 (sitting at Cairo, Alexandria and Port Said).

*Judge, Sir Wasey Sterry, C.B.E., (also Judge of H.B.M. Prize Court, Alexandria).*  
*Crown Prosecutor, C. H. Perrott.*

BRITISH CHAMBER OF COMMERCE OF EGYPT,  
 6 Rue de l'Ancienne Bourse, Alexandria, and  
 5, Rue Borsa el Gedida, Cairo.

CAIRO is 2,520 miles from London; transit *via* Trieste, 5 days; *via* Marseilles, 6 days.

## ESTONIA.

(Eesti Vabariik.)

*Head of the State, M. Konstantin Päts, born Feb. 11, 1874; appointed Oct. 21, 1933.*  
*Foreign Affairs, Dr. Friedrich Akel.*

*Minister in London, M. August Schmidt. Legation, 167, Queen's Gate, S.W. 7.*  
*Counsellor of Legation, Otto Artur Grant.*  
*Commercial Counsellor, V. Raud.*

Estonia, the most northerly of the Baltic States, was proclaimed an independent Republic Feb. 24, 1918, and was recognized by the Supreme Council of the Allies Jan. 26, 1921. It is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea, and on the E. by Lake Peipus and the U.S.S.R. (along a line roughly parallel with the eastern shore of the lake). The islands of Dago, Osel and other smaller islands in the Baltic form part of the Republic. The total area is about 18,632 sq. miles (within the boundary settled by agreement with the U.S.S.R.), with a population (Jan. 1, 1936) of 1,129,801 (80 per cent. Lutherans, 18 per cent. Orthodox Catholics). Agriculture and dairy farming are the chief industries, engaging 59 per cent. of the population. The value of the agricultural production in 1934-35 was

£7,500,000, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon, and eggs the chief products of dairy farming. There are important manufactures, including cotton, woollen, paper, timber, matches and distilling. There were (1935) 451 miles of broad gauge and 420 miles of narrow gauge railway in operation.

The Legislature consists of a single-chamber Assembly (*Riigikogu*) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being the Head of the State. (The Constitution is in process of change.) The supreme organ of the Judiciary is the State Court of Justice in Tallinn.

There is a University at Tartu and a Technical Institute at Tallinn.

## FINLAND

(Suomi.)

*President, Pehr Evind Svinhufvud, born 1861, assumed office, March 1, 1931.*  
*Prime Minister, Kyösti Kallio.*  
*Foreign Affairs, R. Holsti.*

*Minister in London, G. A. Gripenberg.*  
*Legation, 37 Smith Square, Westminster, S.W. 1.*  
*Counsellor of Legation, P. O. I. Hjelt.*  
*Naval Attaché, Commander H. Gröndahl.*  
*Commercial Secretary, R. Smedslund.*

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent

sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,926 square miles, with a population (1934) of 3,762,026, of whom 89·4 per cent. were Finnish-speaking, 10·1 per cent. Swedish-speaking, 0·2 per cent. refugees and 0·3 per cent. others (mainly Lapps, leading a nomadic life in the north). Nearly all the inhabitants are Lutherans. The *Aland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 557 square miles, population about 27,850), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo); the university of Helsinki (founded 1640 at Turku and removed to Helsinki in 1828) had 6,632 students (1936). There are 1 technical and 3 commercial high schools. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres) are a great source of wealth; there is no European country so wealthy in forests except Russia, the exports of sawn timber in 1935 being 1,036,221 standards; wood pulp, cardboard and paper, and dairy produce are also exported. There are (1935) 3,350 miles of railroad and a well developed telegraph and telephone system. There is railway connexion with Sweden and U.S.S.R., and passenger boat and aeroplane connexion with most of the countries of Western Europe, and telephone connexion with most countries of the world. The merchant fleet (1935) consists of 543 steamers (424,873 gross tons), 160 motor vessels (29,590 gross tons) and 210 sailing vessels (68,058 gross tons).

Service in the Army is universal and compulsory, the peace effective being about 25,000 all ranks; there is also a volunteer organisation of Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate of 22 members, with a Diet of 4 estates elected by the people; but under the Constitution of Jan. 1, 1907, there is a single Chamber (*Eduskunta*) elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finland was for some years a Prohibitionist country, the only one in Europe, but after popular vote Prohibition was repealed by law as from April 5, 1932.

Finnish and Swedish are the official languages.

Consul-General (attached to the Embassy), M. J. Knecht.

Consul attached to the Embassy, M. G. Boughnet.

Consulate-General, 51 Bedford Square, W.C. 1.

Consul-General, M. Billeraud.

Consul-General at Liverpool, M. Nicault.

There are also Consuls at Southampton, Newcastle-upon-Tyne, Cardiff, Glasgow, and in Jersey.

The most westerly State of Central Europe, extending from  $42^{\circ} 20'$  to  $51^{\circ} 5'$  N. lat., and from  $7^{\circ} 45'$  E. to  $4^{\circ} 45'$  W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 307,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the Treaty of Frankfurt (May 10, 1871) amounted to 5,602 square miles; that regained by the Treaty of Versailles (June 28, 1919) to 5,819 square miles, making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March, 1931) of 41,834,923 (inclusive of Alsace and Lorraine).

1933 .....	682,680	661,082
1934 .....	677,365	634,525

France has always been attractive to foreigners, of whom (1931) 2,890,893 were resident there, including (in 1921) 470,873 Italians, 415,546 Belgians, 303,141 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT.—The monarchical system of government was overthrown by the French Revolution (1789-1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20-June 20, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the Senate of 314 members (elected by indirect vote for 9 years, one-third being renewable every 3 years) and the Chamber of Deputies of 615 members (elected by direct vote for 4 years). Members of the Legislature receive 62,000 francs a year and travelling facilities over the railways.

PRODUCTION.—The chief agricultural products are wheat, barley, maize, oats, potatoes,

beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The agricultural production is shown in the following table:—

	Production (Metric Tons).	
	1934.	1935.
Wheat .....	9,211,000	7,587,000
Rye .....	838,000	736,000
Barley .....	1,140,000	1,110,000
Oats .....	4,160,000	4,700,000
Potatoes .....	15,700,000	...

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent (1,700,000,000 gallons of wine were produced in 1934), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1934 amounted to 510,000,000 gallons. The live stock (1934) included 15,700,000 cattle, 9,530,000 sheep, 7,050,000 pigs, 2,840,000 horses, and 1,400,000 goats. The mineral resources include coal, pig iron, copper, lead, silver, antimony and salt. Under Article 50 of the Treaty of Versailles, the coalfields of the Saar Basin were ceded to France for 15 years, at the end of which time the inhabitants decided by a plebiscite to return to Germany. In 1931 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached 47,607,000 tons of coal in 1934. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The National Army of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. The peacetime strength of the Metropolitan Army (1933-34) was 352,057 all ranks, including the (Military) Air Force (39,984). The Naval Air Force (for Coast Defence) is included in the Naval personnel. In the War of 1914-1918 over 20 per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis and Morocco). The French Navy was manned in 1932 by 57,527 officers and other ranks. For strength see p. 414.

Armistice Monument.—In the Forest of Compiègne is a Carrefour de l'Armistice, from which the Clairière de la Victoire leads to the Armistice Monument, unveiled Nov. 11, 1922. The monument marks the spot where the Germans signed the armistice terms presented by Marshal Foch, and bears the inscription  *Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir.*

EDUCATION.—The educational system is highly developed. Central Administration comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. Local

*Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the *préfet*, charged especially with primary education. By the Law of July, 1904, all congregational institutions are to be suppressed within 10 years, and many were at once closed, some being taken under lay management. (i.) *Primary: Secular, comp. and free.* Age 6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary:* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For women, a similar organisation, course 5-6 yrs. Sèvres school and the Sorbonne Association are well known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) There are 17 *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix (1409), Algers, Besançon (1485), Bordeaux (1441), Caen (1432), Clermont (1808), Dijon (1722), Grenoble (1339), Lille (1530), Lyon (1808), Montpellier (1225), Nancy (1572), Paris (1150), Poitiers (1431), Rennes (1735), Strasbourg (1567), and Toulouse (1230), with 83,000 students in 1933.

*COMMUNICATIONS.*—The length of the *Routes Nationales* in 1931 was 49,809 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône, the navigable waterways having a length of (1932) 6,190 miles. The system of railroads in France is very extensive; they are almost entirely *côncédés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on January 1, 1933, was 26,076 miles, of which 1,263 miles are electrified. The length of telegraph wires (1933) was 224,000 miles, and of telephone lines 134,000 miles, with 1,350,000 subscribers.

*Shipping.*—The French mercantile marine in 1935 consisted of 1,479 vessels of 3,025,136 gross tons. During the year 1934 the tonnage of French and foreign vessels entering French ports amounted to 52,582,973 tons, of which 13,925,978 tons were French; while the total clearances amounted to 44,242,004 tons, of which 12,260,605 tons were French. The chief ports are Marseilles, Le Havre, Cherbourg, Bordeaux, Boulogne, Dunkirk, Rouen, Calais and Nantes. The Rhône is navigable for 1,200-ton vessels from the sea to Switzerland.

*Alsace-Lorraine.*—High Commissioner, M. Mirhan (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the Treaty of Frankfurt (May 10,

1871), after the Franco-Prussian War. At the close of the War, 1914-1918, the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxembourg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles; the population in March, 1931, was 1,898,376. Principal towns, Strasburg (pop. 181,465), Mulhouse (99,534), and Metz (78,767).

**Algeria.**—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council of 15 official members and a Superior Council of 60 members. The three departments of Algeria send each one Senator and three Deputies to Paris. Algeria lies between 4° 36' W. to 6° 16' E. longitude, 37° 6' N. to an undetermined S. limit, about 30° N., covering an area estimated at 222,120 square miles, with a population (1931) of 6,553,451, of whom 920,788 were Europeans and 5,632,663 natives. The revenue in 1933 was estimated at francs 1,035,423,000, and the ordinary expenditure at francs 1,242,031,000. The bulk of the trade is with France, the exports to France amounting in 1932 to francs 3,340,000,000 (total exports fr. 3,747,000,000), and the imports from France to fr. 3,065,000,000 (total imports fr. 3,747,000,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1932 there were 3,026 miles of railroad open for traffic; and in 1932 the number of ships engaged in foreign trade entering Algerian ports was 4715, of a net tonnage of 7,485,143 tons. The principal town is Algiers, the capital (municipal population, 1931, 257,122), a most important coaling station and much frequented as a health resort; other large towns are Oran (163,743), Constantine (104,902), Bona (68,778), Sidi-bel-Abbas (45,902), Phillipville (47,750), Mascara (31,449), and Tlemcen (46,060). Governor-General, M. Jules Carde (1930).

**CAPITAL.** Paris, on the Seine. Population (1934), 2,891,020; there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceeded 100,000 at the Census of 1931—Marseilles 800,881, Lyons 579,763, Bordeaux 262,990, Nice 219,549, Lille 201,568, Toulouse 194,564, St. Etienne 191,088, Nantes 187,343, Strasburg 181,465, Le Havre 165,076, Toulon 133,263, Rouen 122,957, Nancy 120,578, Roubaix 117,190, Clermont-Ferrand 103,143, Reims 112,820, Mulhouse 99,534, Limoges 92,577, Dijon 90,869, Grenoble 90,748, and Amiens 90,211 exceed 90,000, and 34 others exceed 50,000.

**FLAG:** The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

In ASIA.—*French India* includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Yanam, in the Godavery delta; and Mahé, on the Malabar coast—the total area being 200 square miles, with an estimated population (1931) of 300,000. The trade of Pondicherry and Karikal in 1933 was valued at Fr. 108,615,000 for imports, Fr. 127,418,000 for exports.

*French Indo-China* (Administrative Capital, Saigon) comprises the possession of Cochinchina and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898-9 the port of Kwang-Chow-Wan was also acquired on lease from China. *Governor-General of French Indo-China*, M. René Robin, appointed Feb. 27, 1934.

*Cochin-China*, a French Colony, ceded to France by the King of Annam in 1868, has an estimated area (including the Condor Islands) of 24,000 square miles and a population (1931) of 4,500,000. The capital and principal seaport is Saigon (124,000). The trade was valued in 1932 at 553,300,000 francs (imports) and 812,000,000 francs (exports). *Governor*, M. Pagés, appointed 1934.

*Cambodia*, a French Protectorate since 1863, has an estimated area of 70,000 square miles and a population (1931) of 2,800,000. The capital is Pnom Pneh (100,000). The trade was valued in 1932 at £1,750,000 (imports) and £2,350,000 (exports). *King of Cambodia*, Sisowath Monivong, b. 1875, acceded Aug. 9, 1927. *French Resident-Superior*, M. Silvestre, appointed 1933.

*Annam*, a French Protectorate since 1884, has an estimated area of 58,000 square miles and a population (1931) of 5,130,000. The capital is Hué (40,000), the seaports being Tourane (27,000) and Qui-Nhon. *Emperor of Annam*, Bao Dai, b. 1913, acceded Nov. 6, 1925. *French Resident-Superior*, M. Graffeuil, appointed 1934.

*Tonkin*, a French Protectorate since 1883, has an established area of 43,000 square miles and a population (1931) of 8,000,000. The capital is Hanoi (124,000), the principal seaport being Haiphong (122,000). The trade was valued in 1932 at 363,000,000 francs (imports) and 180,000,000 francs (exports). *French Resident-Superior*, M. A. Tholance.

*Laos* (which includes the protected Kingdom of Luang Prabang), a French Protectorate since 1893, has an estimated area of 100,000 square miles and a population (1931) of 950,000. The capital is Vientiane (10,000). *French Resident-Superior*, M. Eutrope.

*Kwang Chou-Wan*, leased from China for 99 years in 1898 (territory increased in 1899), has

area of about 250 square miles and a population (1931) of 200,000. The capital is Port Bayard (10,000). The trade was valued in 1932 at £1,030,000 (imports) and £690,000 (exports). *French Resident-Superior*, M. Des Tastes, appointed 1934.

**IN ASIA MINOR.**—The French mandatory sphere of Syria has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (see also pp. 987-8).

**IN AFRICA.**—*Algeria* (see p. 938) is an integral part of France. *Morocco* (see pp. 967-8) is a French (and partly Spanish) protectorate.

*Tunis* has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and a population (Census of 1931) of 2,410,622 (Europeans 195,293, including 91,247 French civilian population, 91,178 Italians). The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1932 the imports were valued at 1,771,500,000 francs and the exports at 861,000,000 francs. Tunis, the capital, has a municipal population of 202,405 at the Census of 1931; other towns are Sfax (39,970), Bizerta (23,206), Susa (25,324), and Kairwan (21,532).

*Bey of Tunis*, Sidi Ahmed Bey, b. 1862, succeeded July 10, 1929.

*French Resident-General*, M. Peyrouton, appointed July 23, 1933.

The *Federation of French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,799,159 square miles and a population (Census of 1931) of 14,575,973 (Europeans 21,088). The capital of the Federation is Dakar (Senegal), which had a population (1931) of 53,982 (Europeans, 6,559). The trade of the Federation of French West Africa in 1932 was 575,049,000 francs (imports) and 447,337,000 francs (exports), the principal exports being ground-nuts (almost entirely from Senegal), palm kernels, palm oil, cocoa, cabinet woods, bananas, gold and cattle. French West Africa consists of *Senegal* (77,814 sq. miles, pop. 1,638,255), capital, St. Louis; the trade of Senegal in 1932 was 330,299,000 francs (imports) and 108,021,000 francs (exports), the principal exports being ground-nuts; *Mauritania* (322,344 sq. miles, pop. 323,819); *French Guinea* (96,805 sq. miles, pop. 2,236,968); *Ivory Coast* (189,023 sq. miles, pop. 3,878,232); *Dahomey* (47,144 sq. miles, pop. 1,112,000); and the inland colonies of *French Sudan* (582,437 sq. miles, pop. 3,564,159) and the *Niger* (483,526 sq. miles, pop. 1,821,226). The territory of Upper Volta was appportioned in 1934 to French Sudan, the *Niger Colony* and *Ivory Coast*. *Governor-General of French West Africa*, M. J. Erevié, ppta. 1930.

**Mandated Territories.**—Between Dahomey and the Gold Coast Colony lies the French sphere of the former German colony of *Togoland* (20,464 sq. miles, pop. 750,000), and between (British)

*Nigeria* and the French Congo the French sphere of the former German colony of *Kamerun* (143,415 sq. miles).

*French Equatorial Africa* (capital, Brazzaville), consists of the *Gabon* (106,181 sq. miles, pop. 387,000), capital, Libreville (pop. 4,500); *Middle Congo* (93,000 sq. miles, pop. 661,000), capital, Brazzaville (pop. 4,000); *Ubanghi-Shari* (190,000 sq. miles, pop. 1,200,000) capital, Bangui (pop. 13,500) and *Chad* (482,000 sq. miles, pop. 1,202,000) capital, Fort Lamy (pop. 6,000). The chief ports of French Equatorial Africa are Port Gentil, Libreville and Pointe-Noire, the trade of 1932 being valued at 222,000,000 francs (imports) and 121,000,000 francs (exports). A railway connects the Atlantic port of Pointe-Noire with Brazzaville. *Governor-General of French Equatorial Africa*, M. Silvestre, appta. 1935.

*French East Africa* consists of *French Somaliland* (9,000 sq. miles, pop. 70,000, including 700 Europeans), capital, Jibuti (pop. 11,500). French Somaliland is separated from the *Adeu Protectorate* by the Straits of Bab-el-Mandeb and occupies the coast of N.E. Africa round the Gulf of Tadjura, extending about 80 miles inland (Ethiopia). A railway from Jibuti crosses the S. boundary and runs *Wid* Dire-dawa to Addis Ababa, the capital of Ethiopia.

*Madagascar* (228,000 square miles, pop. 3,853,293), 240 miles distant from the S.E. coast of Africa, is the third largest island in the world and has been a French Protectorate since 1890. In 1896 the Hova dynasty was suppressed and Queen Ranavalona III. (born 1861, died 1916, who had reigned since 1883) was exiled to Algeria, the administration being entrusted to a Governor-General. Agriculture and cattle-raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 102,000; other towns are Tamatave (the chief port) 23,000, Majunga, 22,000, Diego-Suarez, Mananjary, Tuléar, Andoveranto and Vohémar. The trade of Madagascar was valued (1933) at *Fr.* 374,298,000 (imports) and *Fr.* 320,098,000 (exports). The local revenue and expenditure (1934) were balanced at *Fr.* 270,530,000. There is a debt of about *Fr.* 32,219,000. *Governor-General of Madagascar*, M. Léon Cayla, appta. Feb. 10, 1930.

Dependencies of Madagascar are the *Comoro Archipelago* (capital, Zanzizi), consisting of the islands of Great Comoro, Anjouan, Mayotte and Mohilla and of certain islets, the total area being about 800 sq. miles, with a population (1931) of 130,000. In the Mozambique Channel are *Juan de Nova*, *Europe Island* and *Bassas da India*, the last being uninhabited. Other dependencies are *La Réunion* (formerly *Ile de Bourbon*), about 420 miles E. of Madagascar, in occupation since 1643. Area about 1,000 sq. miles, population (1931) 200,000; capital St. Denis (27,000); trade (1933) *Fr.* 146,139,000 (imports) and *Fr.* 117,085,000 (exports). Assigned to the administration of Réunion are the distant islands of *St. Paul* (2 sq. miles), *New Amsterdam* (27 sq. miles) and *Kerguelen* (with Macdonald and Heard Islands), containing whaling and fishing stations (1,100 sq. miles). The *Crozet Islands* (200 sq. miles) and *Adelie Land*, in the Antarctic Zone, are also dependencies of Réunion.

IN AMERICA.—Off the south coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadeloupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. Included in Cayenne is a group of islands (St. Joseph, Ile Royal, and Ile du Diable) known as Iles du Salut. On *Devil's Isle* Major Dreyfus was imprisoned from 1894-1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 450,000.

SOUTH CHINA SEAS.—In April, 1933, France occupied certain small islands (Spratly, Amboina Cay, Itu-Abu, Deux Iles group, Loaita and Thi-Tu) between  $7^{\circ} 52' - 11^{\circ} 29'$  N. lat. and  $111^{\circ} 55' - 114^{\circ} 25'$  E. long.

IN OCEANIA.—New Caledonia (7,200 sq. miles, pop. 50,500, capital Noumea) is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvée, &c.), the Huon Islands and Futuna and Alofi. The Society Islands (Tahiti, Moorea, &c., capital Papeete) have an area of about 650 square miles, and a population of about 14,000; the Marquesas (Nukahiva, Hivasa, &c.), 500 sq. miles, pop. 2,500; Leeward Isles (Huahiné, Raiatée, Tahaa, Bora-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Rurutu, Raiavavae, Rimatava, &c.); Rapa Island; Makatea; Clipperton Island; and Maiao Island.

### GERMANY.

(Deutsches Reich.)

*Leader (Führer) and Chancellor of the German Reich, Adolf Hitler, born April 20, 1889; assumed office, Aug. 2, 1934.*

*Representative of Leader, Herr Hees.  
Minister for Foreign Affairs, Freiherr von Neurath.*

*Interior, Dr. Frick.  
Air, Hermann Goering.  
Propaganda, Dr. Goebbels.  
Agriculture and Food, Dr. Darré.  
Justice, Dr. Gürtner.  
Economy, Dr. Schacht (acting).  
Posts and Communications, Freiherr von Eltz-Rübenach.  
Labour, Herr Seldte.  
Finance, Count Schwerin von Krosigk.  
Defence, Marshal Freiherr von Blomberg.  
Science and Education, Herr Rust.  
Church, Herr Kerrl.*

*Ambassador in London, Herr von Ribbentrop.  
Embassy, 9 Carlton House Terrace S.W. 1.  
Counsellor, Prince Otto von Bismarck.  
1st Secretaries, Dr. Harald Bielfeld; Baron Adolf Marschall von Bieberstein.  
2nd Secretaries, Dr. Wolfgang Gans Edler Herr zu Putlitz; Dr. Eduard Brucklmeier.  
3rd Secretary, Herr Oscar Schlitter.  
Attaché, Dr. H. Sigismund Sizzo Fitz Randolph.  
Military Attaché, Major-General Leo Freiherr Geyr von Schweppenburg.  
Asst. do., Major Horst Kitschmann.  
Naval Attaché, Rear-Admiral Erwin Wassper.  
Air Attaché, Major-General Ralph F. A. Weninger.*

*Assistant Commercial Attaché, Dr. Walter Maria Weber.*

*Attaché, Herr Friedrich Wilhelm Achilles.*

*Consular Department of the Embassy, 9 Carlton House Terrace, S.W. 1.*

AREA AND POPULATION.—The area of Germany is approximately 132,200 square miles, as against 208,800 square miles in 1914. By the *Treaty of Versailles* the "Reichsland" of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France; parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Denmark; and Moresnet and Malmédy to Belgium. Danzig and territory became a Free State. After a plebiscite, part of Upper Silesia passed to Poland. Memel and district went to Lithuania. After a plebiscite, the Saar district was returned to Germany in 1935. The Colonies, which had extended over 1,035,086 sq. miles in Africa, 96,200 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,239 sq. miles, with a population estimated in 1914 at 15,000,000—were renounced; and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions to Japan, Australia and New Zealand. The population of Germany on June 16, 1933, was 66,030,000 (with Saar district), of whom 32,086,000 were males and 33,944,000 were females. Births in 1935 numbered 1,261,273 and deaths 791,912, births being 13.9 per 1,000 of population, deaths 11.8 per thousand. Religious confessions in the present area were in 1933:—Protestants 40,865,151, Roman Catholics 21,172,087, Jews 499,682, others 2,646,614. On June 16, 1933, 40.4 per cent. of all persons with earning occupations were engaged in industry, 28.9 per cent. in agriculture, 18.4 per cent. in trade and communications, 8.4 per cent. in the public services, the professions, &c., and 3.9 per cent. in domestic service. There are (1933) 53 large towns with over 100,000 inhabitants, with a population of 19,931,000, or 30.2 per cent. of the total population.

NATURAL RESOURCES.—Forests cover 12,917,976 hectares, consisting to about three-quarters of coniferous trees, and are the basis of a flourishing wood and wood-products industry. Although a great part of North Germany is sandy and infertile, natural conditions in general favour agriculture. Grown are rye, wheat, spelt, oats, barley, buckwheat, maize, potatoes, beans, leguminous and root plants, including sugar-beet, hops, vegetables, fruits, vines, flax, hemp, rape, and tobacco. The livestock and dairying industries have attained a high degree of perfection. Mineral wealth includes coal, iron, manganese, copper, lead, zinc, tin, nickel, quicksilver, gold, silver, sulphur, antimony, cobalt, arsenic, bismuth, wolfram, uranium, graphite, alum, boracite, pyrites, petroleum, potash, amber, semi-precious stones, and china clay; and salt, brine-springs, and medicinal waters are abundant. The minette iron mines of Lorraine were lost by the Peace Treaty of 1919, and as the remaining iron ore is low-grade and in part technically unsatisfactory, Germany is mainly dependent upon import.

**CONSTITUTION AND POLITICS.**—At the outbreak of war, Aug. 1914, Germany was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor." On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. In Jan. 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female). Under the new Constitution of August 11, 1919, the federal legislature consisted of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate states. Ministries were dependent upon the support of parliamentary majorities. The people had the right of initiative and the referendum. Bills dealing with economic questions or social issues arising thereout were first to be submitted to an advisory Economic Council (*Reichswirtschaftsrat*), which was, however, abolished, and was replaced in 1935 by a Reich Economic Chamber.

Between the Revolution of 1918 and 1932, the government of the Reich and of most of the states was almost continuously conducted by Cabinets supported by the middle and moderate-Left parliamentary parties, of which the Social-Democrats and the Catholic Centre were the largest. The extreme Conservative-Nationalist parties and the Communists were in opposition. Successive elections practically obliterated the moderate-Conservative People's Party and the Democrats, while the Centre and Social-Democrats remained relatively stable, and the Communists gained. Largely at the expense of the middle parties, the National-Socialistic (Hitlerite) party rapidly increased, gaining its first successes at the Reichstag Election of Sept. 1930. In June, 1932, an ostensibly non-party (in reality ultra-Conservative) Cabinet was formed with Herr Franz von Papen as Chancellor. Under a form of martial law the Socialist-Centre Cabinet of Prussia was expelled from office, and the Reichstag was twice dissolved. In an election of July 31 the *Nationalsozialistische Deutsche Arbeiterpartei* (National Socialist German Workers' Party, or *Nazis*) gained 230 seats, but in the later election of November 6 their number fell to 196. Papen was succeeded in November by General von Schleicher. On January 30, 1933, a joint Nazi-German-National Cabinet was formed with Adolf Hitler as Chancellor, Papen as Vice-Chancellor, and the German-National leader Hugenberg as Minister of Economy. This Cabinet change rapidly took the dimensions of a "National Revolution" of exclusively National-Socialist colour. Hugenberg and his party associates were driven from office, and Herr Hitler's Cabinet, after a victorious Reichstag election in March, pursued a radical policy consisting of abrogation of the Constitutional guarantees, expulsion from office of non-Nazis and monopolisation of all well-paid official posts by Cabinet partisans, expulsion of non-Nazis from profitable positions in private business and replacement with Nazis, persecution of and violence against Jews, Liberals and Socialists, and centralisation of control over the states by the creation of "statthalterships." Elections of

plebiscite character in 1933 and 1934 yielded governmental majorities of approximately nine-tenths, and the competences of the federated states were further restricted in 1934, and finally the states' sovereignty was transferred to the Reich. Manifestations of discontent, and an anti-governmental plot, led in June, 1934, to the deaths of over 70 persons, thereamong a member of the Cabinet, Herr Roehm, the former Chancellor General Schleicher and his wife, the ex-Prime Minister of Bavaria, and several generals. President von Hindenburg died on August 2, 1934, and the presidential office was fused with the Chancellorship, Herr Hitler taking the title of "Leader" (*Führer*). Serious conflicts between the government and the Evangelical and Roman Catholic Churches occurred in 1934 and 1935. In 1936 domestic politics fell into the background, and were replaced by international issues arising out of the Reich's denunciation of the Locarno Pact, Rearmament, and the violent propaganda feud with Russia. An agreement designed to remove causes of misunderstanding with Austria was concluded. Active official propaganda was conducted for the return of the colonies.

**EDUCATION.**—Education is in the competence of the states, and according to the Constitution is in principal compulsory until the eighteenth year, but this principle is not uniformly in force. Since 1933 educational policy has been decided exclusively by the Reich. Public elementary schools number (census of 1931-32) 52,961, whereof 29,032 evangelical, 15,259 Catholic, and 8,287 mixed, with 7,590,073 pupils. Intermediate schools (9 to 10 years course) number 1,472, with 229,671 pupils; continuation and special occupational schools, 29,652, with 2,507,000 pupils; superior schools (between elementary-intermediate school class and universities), 2,858, with 822,600 pupils. For higher education are 25 universities; also high schools: 10 technical, 2 forestry, 3 agricultural, 2 veterinary, 2 mining, 5 commercial, 11 pedagogic, and 19 philosophic-theological, with (1928) 112,300 students, whereof 13,100 women. There are 12 high schools and academies for the graphic arts, and 10 high schools and academies for music.

**DEFENCE.**—By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31, 1920, was not to comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the Treaty, the German *Naval Forces* must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers were to be broken up or devoted to commercial purposes. Under the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1918), and was interned in Scapa Flow, where it was scuttled by its crews. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval *Air Forces*. After prolonged negotiations for international regulation of armaments, Germany, on Oct. 14, 1933, withdrew from the Disarmaments Conference and from the League of Nations. The increase of the regular Army and Navy and the construction of an Air Fleet proceeded secretly during the first two years of

\* Under the so-called *Aryan Paragraph*, which grants full citizen rights only to Aryans.

Nazi rule, and in March 1935, Germany denounced the Treaty regulations, and declared her intention to maintain a conscript army of 36 divisions. The reconstruction of the German Air Force was also officially admitted. An agreement establishing a ratio between German and British naval force, was later concluded. In 1936, the term of compulsory service was lengthened from one to two years.

COMMUNICATIONS.—The total length of the Railroads at end of 1933 was 58,184 kilometres, of which 53,694 kilometres, whereof all except 917 kilometres were full-gauge, belonged to the German Railroads Corporation, which under the *Daves Reparation Scheme* of 1924 acquired all the lines taken over by the Republic from the states in 1921. The number of registered automobiles (July 1, 1936) was 945,083, motor cycles 1,184,081, and motor lorries 270,992. Since 1933 1,000 kilometres of new motor-roads have been opened to traffic. Length of Telegraph and Telephone Lines (1934), 384,000 kilometres; telegrams transmitted 21,812,000; post, telegraph, and telephone offices, 63,129; telephone subscribers, 3,044,900; letters carried, 5,569 millions; value of cash-on-delivery orders, 1,611 mill. m.; money orders, 2,245 mill. m. The number of employés in the service of posts, telegraphs, and telephones was 362,850. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17'65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons; 1929, 357,600 tons; 1933, 62,600 tons, 1935, 210,900 tons. In September, 1936, 627,200 tons were under construction. On January 1, 1935, shipping had increased to 3,727,000 gross tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg on the Pregel; Kiel, on the Baltic; Emden on the Ems; and Lübeck, on the Baltic. Arrivals at all ports were: 1913, 34,396,691 net tons; 1935, 40,337,000 net tons. Traffic in the Kiel Canal in 1934 was: vessels 43,842, net tonnage 16,352,000. Air communication is in the hands of a German Lufthansa Co., a German-Russian Air Communications Co., and, for trans-oceanic voyages, a German Zeppelin Co., in which the Lufthansa Co. participates. Total traffic on regular routes in 1931 was: distance flown 15,956,600 kilometres, against 14,263,200 kilometres in 1934; passengers carried 209,875, against 164,846; freight 3,892 tons against 3,218 tons; mails 1,401 tons, against 772 tons.

SOCIAL LEGISLATION.—The German scheme of social legislation gives all subordinate bread-winners a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The Infirmity Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, laundresses, dressmakers, semp-

stresses, housekeepers, overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices, schoolmasters, school-mistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911. A law establishing Federal Unemployment Insurance for all persons subject to Sickness Insurance and also for seamen, which is financed by equal contributions from employers and employed, came into force on Oct. 1, 1927. During the industrial depression 1930-32 Social Insurance finance suffered badly owing to the decline in receipts and the increase in cost of unemployment relief. Premiums were correspondingly increased and benefits reduced. By 1935 the main branches of Insurance again showed surpluses of revenue over expenditure. The National Socialistic government replaced the Trades Unions and the Employers' Associations with a "German Labor Front"; introduced in June, 1935, Compulsory Labour Service for men and (in principle) for women; and partly restricted the right of choice of occupation and residence.

PUBLIC FINANCES.—The state financial structure was radically altered after the War. The Reich appropriated the chief direct taxes, including income tax, which had formerly been collected by the states and municipalities; and the states lost the profits from their railways, which were taken over by the Reich. The Reich was thereby compelled to contribute to the state and municipal revenues, mainly out of the yield of income and turnover taxes. The promised definitive regulation of the Reich and state financial relations has not been effected, but the Reich's subventions to the state were reduced in 1936. Between 1918 and 1924 all public budgets were in confusion in consequence of the currency depreciation. The currency reform of Nov., 1923, reacted favourably on Finance, and the Reich Budget of 1924-25 was balanced, having been materially relieved by the automatic wiping-out of the internal Debt by currency depreciation. Under a later valorisation law, holders of public loans were partially compensated, getting 12½ per cent. of the original gold value when they had acquired before July, 1920, and 2½ per cent. when they had acquired later. The latter ("new") holdings were converted in 1934 into Reich interest bearing bonds. Since 1926-27 all Reich budgets have closed with deficits. The net Budget Estimates for 1934-35 (in which are not included the separately financed Railways and Posts) were:—

	1,000,000 Reichs-marks.
Revenue .....	6,458
Expenditure .....	6,458

The Budgets for 1935-36 and 1936-37 were sanctioned by the Cabinet in regular form, but the totals and the details were kept a secret.

### The German Debt.

The debt of the Reich, home and foreign, was returned at 14,735 million reichsmarks on June 30, 1936. It is officially admitted that this figure, which shows an increase of only 3,233 million marks since Jan., 1933, when the Nazi Party attained power, is incorrect. It omits very large extra-budgetary liabilities contracted for rearmament and work-creation. The real debt is conjectural. Official and Press utterances put it at between 5,000 and 7,000 million marks above the scheduled 15 milliards; private estimates are very much higher. This supplementary debt mainly consists of bills, the liability for which has been obfuscated by interposing semi-public credit institutions between the Reich and its armaments contractors, as well as corporations entrusted with the conduct of public works for the reduction of unemployment. For Oct. 31, 1935, the whole public debt was returned at 16,661 million marks, whereof: Reich 14,142 million marks, states 2,284 million marks, Hanse city-states 605 million marks, and municipalities 936 million marks, but the Reich figure includes no extra-budgetary debts.

The suspension of Reparation payments at the initiative of President Hoover from July 1, 1931 on, materially relieved the Reich Budget. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds. A new *Reparations Scheme* was agreed to by Germany and the Allies in August, 1924, providing for annual payments rising to 2,500 million gold marks. In 1930, by an agreement come to at the Hague, Reparations were again revised. Germany agreed to pay during a term of 37 years annuities averaging 1,989 million marks, and thereafter until 1987-88 annuities varying between 1,711 million and 898 million marks. Under a further agreement, concluded at Lausanne in July, 1932, Reparations were abolished, with the exception of a conditional German liability to deliver 3 milliard marks of 5 per cent. bonds.

**FOREIGN DEBTS.**—A short-term foreign debts crisis began in July, 1931, owing to sudden withdrawals of credits to German banks, for which the Reichsbank was unable to deliver gold or exchange. Under a "standstill agreement" of February, 1932, Germany was protected against any further substantial withdrawals of credits, but she was to pay and transfer the interest thereon. A Government census for February 29, 1932, showed public and private indebtedness to abroad at 20,623 million marks, whereof 10,153 millions short-term (maturing before March, 1933), and 10,470 millions long-term. In addition were foreign claims in the shape of holdings of German domestic securities and real property, which brought the total indebtedness to an estimated 25½-26½ milliard marks. Of the 20,623 millions debt proper, 3,125 millions were liabilities of the Reich (mainly Dawes and Young loans), 1,215 state and municipal debts, 6,706 millions bank debts, and 8,785 millions debts by Agriculture,

Industry and Communications. The chief creditor countries were:

	Total Claims. Marks.	Whereof Long-Term. Marks.
U.S.A. ....	8,392,000,000	5,165,000,000
Netherlands .....	3,575,000,000	1,974,000,000
Switzerland .....	2,761,000,000	1,146,000,000
Great Britain.....	2,415,000,000	1,129,000,000
France .....	956,000,000	482,000,000

As consequence of repayments and of depreciation of the creditor-countries' currencies, the foreign debt had declined by Sept. 30, 1933, to 14,841 m.m., whereof 7,436 m.m. long-term and 7,405 m.m. short-term; and the service for 1934 had fallen to 834 m.m. interest and 309 m.m. amortisation. By Jan. 1936, the debt had fallen to 13 milliard marks, half of which was long-term, half short-term. Of the total debt decline in 1930-35 4 milliards was due to currency depreciations. The devaluation of gold-bloc currencies in Sept., 1935, led to a further debt reduction of approximately 1,200 million marks. In June, 1932, Germany defaulted on her whole foreign long-term debt by prohibiting transfer into foreign currencies for its service. In July an agreement was come to with the bondholders whereunder 50 per cent. of the interest but no amortisation instalments should be transferred until the end of 1933, the full service of the Dawes Loan, however, being maintained. In June, 1934, was again declared a default on transfer of the service of the whole foreign long-term debt, but on threats of reprisals Germany consented to continue transfer of the interest of the Dawes and Young loans. The debt service was also in part secured by Clearing or Payment agreements with individual foreign countries, including Great Britain.

**CURRENCY AND CREDIT.**—In 1919-23 the mark currency rapidly depreciated. In November, 1923, was put through a *Currency Reform*, consisting in the creation of a *renten-mark*, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 billion paper-marks to 1 gold mark. The Reichsbank was reconstituted under the Reparations settlement of 1924. Currency conditions were satisfactory until the debts-withdrawal crisis of July, 1931, which led to restriction on payments to abroad. The nominal stability of the reichsmark at gold parity was maintained; but the Reichsbank's reserves (gold and foreign exchange) fell between May, 1931, and October, 1936, from 2,576 to 69 million marks. Owing to the foreign and home run, the Darmstaedter-und-National and some other banks failed. In 1932 confidence began to return. Bankruptcies, after reaching a maximum of 1,425 in October, 1931, declined by September, 1936, to 176 and the number of bill protests fell heavily. Prices began to recover after April, 1933, the wholesale-prices index in September, 1936, being 104'3, the cost-of-living index 124'4.

**EMPLOYMENT.**—Employment is subject to sharp seasonal fluctuations. In 1922, under the influence of the inflation-activity of industry, the number of unemployed fell to 16,000. After the currency stabilisation, unemployment in general increased, but in the prosperous year 1927 fell to 250,000, after which it rose rapidly to 6,128,000 in February, 1932. In September, 1935, it was down to 1,714,000, in September, 1936, to 1,035,000.

**AGRICULTURE.**—Agriculture is the leading German occupation. The cultivated area in 1936 (omitting forests) was 28,747,100 hectares, of which 4,513,916 h. were rye, 2,084,340 h. wheat, 2,778,479 h. oats, 1,635,189 h. barley, 2,792,572 h. potatoes, and 399,914 h. sugar-beet. The meadow area was 5,359,629 h. Owing to high wheat duties and other protective measures, the area under and yield of wheat have greatly increased, whereas cultivation of rye has declined. As against an average wheat crop of 3,700,000 metric tons in 1911-14 (on the present area), the estimated crop of 1936 was 4,622,500 tons; and in wheat Germany is now self-sufficing. Area under orchards is 103,742 h., vineyards 82,110 h. The livestock census of December, 1934, showed: horses 3,360,423, cattle 19,198,358, pigs 23,169,598, sheep 3,482,605. Agriculture has been financially weakened by the price-fall, and has debts totalling 12,500 million m. Owing to the failure of the fodder crop of 1934 and to restriction of import, a serious scarcity of pork, bacon, butter, margarine, lard and eggs occurred in 1935 and 1936.

**INDUSTRY.**—Industry is highly developed in all the larger German states. Prussia leads in coal-mining, iron and steel, metalwares, machinery, and electro-technical articles, but manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as chemicals and brewing. Bavaria produces machinery, jewellery, scientific instruments, pottery, wood-products, paper, leather, textiles, and beer. Special manufactures of Saxony are machinery, yarns and cloth, knitted goods, hosiery, furs, pottery, glass, and musical instruments. Württemberg has manufactures of textiles, paper, leather, firearms, clocks, and tobacco; Baden of chemicals, jewellery, and cigars. The toys industry of Thuringia is important.

A policy of self-sufficiency in industrial raw materials is being pursued. The consumption of imported materials is being reduced by compelling the use of synthetic materials (light oils, fibre textiles, &c.), or home-produced natural substitutes (aluminium, &c.) and the production of materials is being encouraged by means of state credits, bounties, monopolies and price regulation. Between 1933 and 1936 the area under flax rose from 4,900 hectares to 44,100 h.; under hemp from 200 h. to 5,700 h. Output of fibre textiles material rose from 7 million kilos in 1934 to an estimated 40 million k. in 1936, and will reach 70 million k. in 1937.

Intense industrial activity prevailed during the inflation years 1919-23, and after a reaction a new high level was reached in 1927, after which production in the finishing branches somewhat declined, while the heavy branches, including iron and steel, enjoyed prosperity throughout 1928 and 1929. In 1930, under the influence of the world-depression, a rapid decline in the output of all branches began. At the beginning of 1932, industrial production was 40.9 per cent. below that of the last prosperity years. A trade revival began in September, 1932, and made rapid progress. Production figures are:—

	1927. Metric Tons.	1935. Metric Tons.
Coal.....	153,597,600	143,014,941
Pig-iron.....	13,102,500	12,539,415
Ingot steel.....	16,305,300	16,095,653

The year 1936 witnessed a pronounced boom in the heavy industries, in particular iron and steel, and in motor-cars and machine-tools. In the autumn steel production could not keep pace with the demand.

**FOREIGN TRADE.**—Foreign-trade policy has been increasingly Protectionist. Immediately after the War, import duties on many articles were sharply raised; and in 1925 a new part tariff increased the duties on numerous industrial articles, and restored the foodstuffs duties, which had been suspended in August, 1914. Thereafter the duties on foodstuffs were repeatedly raised, and supplemented by compulsion to mill native grain, and by import prohibitions and restriction and price-regulation. The Nazi Government created a Reich Nutrition Corporation, which has powers of regulation and control.

In consequence of the depletion of the Reichsbank's reserves and of inability to finance import fully, the import of raw materials was put under state control in March, 1934; and in September state control was extended to all import. For the different groups of goods were created 26 "supervision boards," which examine proposed import transactions and on approving, issue "exchange certificates" guaranteeing foreign currency for payment of the exporter. The boards also control internal trade in, and prices of, imported goods. This system was made more rigorous in July, 1935, since when import without certification is for most goods impossible.

Germany's chief imports, in approximate order of value, are: oil-fruits, fruit, cotton, wool, dairy products, yarns, mineral oils, coffee, fodder, hides, eggs, cloth, tobacco, copper, furs, iron-ore, and wood. Chief exports: heavy iron and steel goods, textiles and clothing, machinery, chemicals and dyes, electrical apparatus, non-ferrous metal-wares, paper and wares thereout, leather and wares thereout.

The foreign-trade balance was increasingly passive until 1927, whereafter import surpluses declined. Equilibrium was reached in 1929. The years 1930 and 1931 witnessed large and increasing active balances, causes being the cessation of credit-financed import, the reduced demand, owing to the depression, for foreign raw materials, the increasing independence of foreign foodstuffs, and the repayments of foreign debt. The years 1927-31 witnessed a shift of £350,000,000 gold from the passive to the active side of the trade balance. In 1934 the balance was passive, but in 1935 and 1936 export surpluses were again attained. The movement of imports and exports (including Reparation deliveries in kind) was:—

	Imports. Marks.	Exports. Marks.
1927 .....	14,228,000,000	10,801,000,000
1931 .....	6,632,000,000	9,600,000,000
1933 .....	4,203,000,000	4,871,000,000
1934 .....	4,451,000,000	4,167,000,000
1935 .....	4,159,000,000	4,270,000,000

Trade with Great Britain:—

	1934. Marks.	1935. Marks.
Imports from .....	205,700,000	256,200,000
Exports to .....	382,900,000	347,900,000

**SECURITIES MARKETS.**—All stock exchanges were closed between July 11 and Sept. 3, 1931, and between Sept. 18, 1931, and April 12, 1932.

The official securities index, based on 100 for average quotations of 1924-26, showed for Aug., 1936: for stocks, 101.79; for fixed-interest securities, 96.05.

## FEDERATED STATES.

## PRUSSIA.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq. miles and a population on June 16, 1933, including the Saar, since regained, of 40,745,550. *Heligoland* (an island of 130 acres, with a population of about 4,000 in 1933), which had been taken from Denmark by a British naval force September 5, 1807, was ceded to Germany (in exchange for rights in East Africa) June 18, 1890; the island forms part of the Schleswig Holstein Province of Prussia.

	1,000,000 Reichs-marks.
Budget (net), 1936-37 .....	1,936
Debt (Dec. 31, 1935) .....	1,211

The whole of the old *Funded Debt* of Prussia was taken over by the Republic under the arrangement for transfer of the Prussian State Railways.

**CAPITAL**, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin (340 sq. miles) with a population on June 16, 1933, of 4,242,501.

Other largest cities are Cologne, on the Rhine (756,605), Breslau, on the Oder (625,198), Essen, on the Ruhr (654,461), Frankfurt, on the Main (555,857), Düsseldorf, on the Rhine (498,600), Hanover, on the Leine (443,920), Dortmund, on the Emscher (540,875), Wuppertal (408,602), Gelsenkirchen (332,545), Königsberg (316,072), Bochum (314,546), Magdeburg (306,895), Stettin (270,747), Altona (241,970), Kiel (218,335), Halle, on the Saale (209,169), Oberhausen (192,345), Kassel (175,179), Krefeld-Urdingen (165,305), Aachen (Aix-la-Chapelle) (162,774), Wiesbaden (159,755), Hagen (148,314), Erfurt (144,879), Solingen (140,162), Mülheim, on the Ruhr, (133,279), Hindenburg (130,433), München-Gladbach (126,631), Saarbrücken (130,686), Münster (122,210), Bielefeld (121,035), Harburg (112,593), Gleiwitz (111,062), and Reimschell (101,188).

## BAVARIA.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'—50° 34' N. lat. and 9° 01'—13° 50' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 sq. miles, and the population on June 16, 1933 (excluding Saarpfalz), 7,681,584. The Thuringian Duchy of Coburg was incorporated in Bavaria in 1921.

	1,000,000 Reichs-marks.
Budget (net), 1935-36 .....	564

**CAPITAL**, Munich, on the Isar. Population (1933), 735,388. Other large towns are Nurnberg, N.W. of Munich (410,438), Augsburg, on the Wertach-Lech (176,575), and Ludwigshafen, on the Rhine (107,344).

## SAXONY.

The Republic of Saxony has an area of 5,856 English square miles, with a population on June 16, 1933, of 5,196,652. Its chief towns, after the capital, are Leipzig (pop. 713,470) the

great book-market; Plauen (pop. 113,855), and Chemnitz (pop. 350,734), the Manchester of Saxony.

## GREECE.

(Hellas.)

King of the Hellenes, George II., G.C.M.G., born July 20, 1890; acceded Jan. 11, 1923 (on the abdication of his father, King Constantine I.); deposed March 25, 1924; restored to the Throne (after a Plébiscite) Nov. 3, 1935; married Feb. 27, 1921, Princess Elisabeth of Rumania (born Oct. 12, 1894), who was granted a divorce at Bucharest, July 6, 1935, on the ground of desertion.

## THE MINISTRY (Oct. 12, 1936).

Prime Minister, Minister of Foreign Affairs,  
 Minister of War, Marine, and Air, General J. Metaxas.  
 Deputy Prime Minister and Minister of Finance,  
 M. K. Zavitsianos.  
 Minister of Interior, M. Th. Skylakakis.  
 Public Assistance and Hygiene, M. A. G. Koryzis.  
 Communications, M. A. Oeconomou.  
 Justice, M. G. Logothetis.  
 Agriculture, M. G. Kyriakos.  
 Public Instruction, M. K. Georgacopoulos.  
 Railways, M. Spyridonos.  
 Public Safety, M. Maniatakis.  
 National Economy, M. A. Hadjikyriakos.  
 Permanent Under-Secretary for Foreign Affairs,  
 M. N. Mavroudis.  
 Under-Secretary of Press and Tourism, M. Th. Nikoloudis.  
 Governors-General:—  
 Macedonia, N. Tsiouras.  
 Thrace, Kavdas.  
 Epirus, Kyrimis.  
 Crete, M. Sfakianakis.

Envoys Extraordinary and Minister Plenipotentiary in London, Monsieur Charalambos Simopoulos.

Legation, 51 Upper Brook St., W. 1.  
 Counsellor, M. A. G. Politis.

Sec. of Legation, M. A. Romanos.

Hon. Attaché, M. P. Argenti.

Commercial Counsellor, M. S. Z. Constantinidi.

Press Attaché, M. Chr. S. Hourmouzios.

Consul-General, M. Tryphon Triantafyllakos,  
 7, Park Lane, W. 1.

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 50,271 sq. miles and a population (census of May 15, 1928) of 6,204,684.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. On Oct. 11, 1935, it was again declared a Kingdom, and a plébiscite held on Sunday, Nov. 3, 1935, caused the return to the Throne of King George II. Prior to Aug. 4, 1936, the legislature consisted of a Senate (*Gerousia*) of 120 members, and of a Chamber of Deputies (*Vouli*, or *Boule*) of 250 members elected for 4 years by universal manhood suffrage, women being electors for local government purposes only. On Aug. 4, 1936, owing to political difficulties and the menace of Communism, dictatorial powers were assumed by General Metaxas and his Cabinet, parliamentary government being thus suspended.

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of Macedonia and Epirus, Crete (2,950 sq. miles, pop. 336,151), and certain Aegean Islands increasing the area to 43,522 sq. miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of Thrace (including the monastic republic of Mount Athos), and the islands of Imbros and Tenedos. Greece received under the Treaty of Sevres a mandate for the occupation and administration of the town and district of Smyrna, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and Smyrna was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the Treaty of Lausanne (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Aegean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Production.—Agriculture is the principal industry and employs more than half the population, the most important product being tobacco, which accounts for nearly half the total exports of Greece. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are

cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of tobacco, wine, olives, olive oil, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, sponges and carpets.

*Defence*.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consists of 1 armoured cruiser, 1 cruiser minelayer, 8 (4 modern) t.-b.-d., 7 torpedo-boats, and 6 submarines, with 5 patrol vessels (small torpedo boats).

*Education* is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

*Finance*.—The debt in 1912 was 1,040,900,000 *drachmæ*, and the Balkan Wars of 1912-13 added 354,960,000 *drachmæ*, the Great War added 1,028,000,000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachmæ*. On March 31, 1935, the total was stated at 44,985,383,411 *drachmæ*, (375 dr. to £1). The amount provided for fractional payment of the service in the budget of 1935-36 was 1,624,257,881 dr.

*Communications*.—There were (1928) 1,993 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 5,000 tons. The post offices number 1,146, telegraphs, 4,960 miles. The mercantile marine consists (1934) of 584 steamships (1,522,577 tons) and (1933) 701 sailing ships (56,064 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Calamata, Laurium, Cavalla, and Canca (Crete).

#### GUATEMALA.

República de Guatemala.

*President* (1931-1943), General Jorge Ubico, born Nov. 10, 1878, assumed office Feb. 14, 1931. *Minister of Foreign Affairs*, Licenciado Alfredo Skinner Klée.

*Minister in London* (vacant).

*Charge d'Affaires and Consul-General in London*, Señor Dr. Don Francisco A. Figueroa, 344 Maudslow House Chambers, 11 Queen Victoria Street, E.C. 4.

1st. Sec., Señor Don Francisco Azurdia Soto.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. Long. from 88° 12' 49' to 92° 13' 43', and comprises an area of 45,452 square miles, and an estimated population (March 31, 1934) of 2,245,593. There is a single chamber legislative assembly of 67 members and a Council of State of 7 members. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Dec., 1917. The country is well watered by numerous rivers; the climate is hot and very malarious near the coast, temperate but enervating in the higher regions. The rainfall in the capital is 57 in. per annum. 737 miles of railway were open for traffic in 1932. There were 4,079 miles of State telegraph and 4,172 of State telephone working on Dec. 31, 1934. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, *chicle* (chewing gum), hides, honey, timber and gold. Spanish is the language of the country.

- 1936-37.

#### HAITI.

(République d'Haiti.)

President, Stenio Vincent, assumed office Nov. 18, 1930; re-elected May 15, 1936.

Foreign Affairs, M. Georges N. Leger.

Minister in London, M. Ernest G. Chauvet.

Consul, W. Haines, 23 Denmark Street, W.C.2.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands. Formerly a French colony it was proclaimed independent on Jan. 1, 1804, and is governed under a Constitution ratified in 1932. The legislature consists of a Senate (15 members) and a Chamber of Deputies (36 members). The President is elected by the legislature for a period of six years. In 1925 a treaty was entered into with the U.S.A. whereby certain public services of the Republic were to be controlled by U.S. officials. The Treaty expires in 1936. On Oct. 1, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Service, were withdrawn, and the *Garde d'Haiti* was completely Haitianised and turned over to Haitian officers on Oct. 1, 1934. The last Company of the U.S. Marines left Haiti Aug. 15, 1934, after an occupation of 19 years. The financial service remains under U.S. control; there is a Fiscal Representative and a Deputy Fiscal Representative appointed by the President of Haiti upon the nomination of the President of U.S.A.; the Fiscal Representative has under his control the customs service, and may employ not more than 18 Americans. The internal revenue service was turned over Oct. 1, 1934.

The area of the Republic of Haiti is estimated at 10,204 square miles, with a population estimated (Jan. 1, 1927) at 2,300,200 inclusive of white foreign residents and military forces of the United States. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sisal, sugar, honey, gums, and oil-seeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost

annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain are piece-goods, jute bags, hardware, and agricultural tools. There are about 135 miles of railway. In 1933-34 the entries and clearances at Port-au-Prince were 718 vessels (1,743,392 tons). French is the official language of the country, but most of the people speak a debased dialect known as Creole French.

#### HONDURAS.

(República de Honduras.)

President (1933-1937), Dr. Tiburcio Carías Andino, assumed office Feb. 1, 1933.

Consul-General in London, Señor Don Basilio de Telepnef, 15 Union Court, Old Broad St., E.C.2.

Honduras, one of the five Republican States of Central America, lies between lat. 13° 10' and 16° N. and long. 83° 40' and 88° 40' west, with a seaboard of about 400 miles on the Caribbean Sea and an outlet, consisting of a small strip of coast some 60 miles in length on the Pacific. Its frontiers are contiguous to those of Guatemala, Nicaragua and El Salvador. The Republic contains a total area of approximately 44,375 square miles and a population of 961,650 (census 1935) of mixed Spanish and Indian blood. There is a strong negro element in Northern Honduras. The country is very mountainous, being traversed by Cordilleras, but possesses well watered fertile valleys and wooded tablelands. The climate varies with the altitude, being tropical throughout the year in the coastal belts and temperate and healthy in the uplands.

Originally discovered and settled by the Spaniards at the beginning of the sixteenth century, Honduras formed part of the Spanish American Dominions for nearly three centuries until 1821 when independence was proclaimed.

Under the revised Constitution of 1936 the Legislature consists of a single Chamber Assembly of 39 members elected by popular vote in the ratio of one deputy per 25,000 inhabitants. The executive authority is vested in the President who is assisted by a Council of six Ministers. The Republic is divided into 17 departments and one territory, La Mosquitia, which is

\* 5 Gdes. = \$1 (U.S.).

† Includes Gdes. 5,000,000, representing purchase price of the capital stock of the Banque Nationale de la République d'Haiti.

inhabited by Indian tribes and largely unexplored.

The chief industry is the production of bananas which constitute about 80 per cent. of the total exports of the country. The number of stems exported in 1935 amounted to 13,829,880, valued at U.S. \$6,914,940. Other agricultural products include coffee, coconuts, tobacco, sugar, beans, maize, rice and tropical fruits. Cattle raising is practised in the districts of Olancho and Yoro, and it is estimated that the country carries 500,000 head of horned cattle. There are large tracts of uncultivated land.

The mineral resources of the country are reputed to be considerable, though still largely unexploited. Silver, which is the chief mineral, to the value of U.S. \$1,450,250 and gold valued at U.S. \$430,338 was extracted in 1935.

893 miles of railway are in operation on the North Coast and serve chiefly the banana plantations in that area and the Caribbean ports. Apart from a few hundred miles of roughly metalled motor highways the roads are for the most part tracks fit only for mule and ox-cart. Aviation on the other hand is highly developed. There is an airport at the capital and some 70 landing fields throughout the country. A local air-line maintains passenger and freight services between the principal towns of the Republic. There are some 5,000 miles of telephone lines, 4,000 miles of telegraph lines and 550 post-offices.

The chief ports are Puerto Cortés, La Ceiba, Tela and Truxillo on the North Coast, through which passes the bulk of the banana trade with the United States and Europe, and Amapala situated on Tiger Island in the Gulf of Fonseca on the Pacific side.

The language of the country is Spanish.

Minister in London, M. Constantin de Masirevich, 35 Eaton Place, S.W. 1.

Offices of Legation and Passport Office, 46 Eaton Place, S.W. 1

By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, after having been declared a Republic on Nov. 17, 1918. The area of present-day Hungary is about 36,179 sq. miles, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugoslav Kingdom (*q.v.*) and of Slovakia and Ruthenia to Czechoslovakia (*q.v.*). The population (almost entirely Magyar) was 8,683,740 (Dec. 1930). The political neighbours are Czechoslovakia on the N., Yugoslavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count M. Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workers' Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Feidel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris.

On March 1, 1920, Admiral Nicholas von Horthy of Nagybánya was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct. 22 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but

there is a large Protestant minority. The parcelling out of the great estates, which was forcibly attempted during the Karolyi régime, has been continued to a small extent, but on an economic basis; a land-reform bill aiming at "a more equitable distribution of landed property," was carried out in 1920-1925, reducing by 10 per cent. the total area of large estates.

A single chamber National Assembly (introduced Jan. 4, 1920), was replaced in Dec., 1926, by a Parliament composed of a Chamber of 245 Deputies (*Képviselet*) elected by universal suffrage, and an Upper Chamber (*Felsőház*) of 241 members, which corresponds in a modified form to the Chamber of Magnates as it existed before the revolution of 1918.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

No part of Hungary touches the sea. The length of navigable rivers is 689 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

#### ICELAND.

(Island.)

King, Christian X. (see Denmark).

Prime Minister, Hermann Jonasson.

President of Althing, Jon Baldvinsson.

Iceland is a large volcanic island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was estimated at 115,870 in 1935.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1904 the assembly (*Althing*) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods tobacco, spirits, hardware, and timber. Total imports (1935): £1,923,250; exports, £1,981,083. Iceland is in direct telegraphic and wireless short wave telephonic communication with Great Britain.

**CAPITAL,** Reykjavik. Population, 34,321.

Consulate-General, 50 Kensington Court, W. 8.

Iran—as Persia is now called—comprises an area of 628,000 sq. miles, with a population estimated in 1933 at 15,000,000, of whom about 2,000,000 are nomads.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. Caravans and pack-animals are also being superseded by motor transport of passengers and goods on all main roads. There are 334 miles of railway open, including 80 miles in the North from Aliabad Shahi to Bander Shah, and 159 miles in the South from Bander Shahpur to Salehabad.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Iran have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced, but several cotton spinning mills and sugar factories have recently been installed as well as a jute factory, a cement factory, and a modern silk spinning and weaving mill. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Iranians are mostly Shiah Muhammadans; but there are many adherents of Bahaism (an eclectic form of Deistic religions), and Armenian Christians. The laws and popular education were formerly based on the precepts of the Koran, but efforts are being made to approximate them more closely to European models. Iran is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution, which set up a Legislature of 2 houses, a Senate of 60 Members (half nominated, half elected) and a Constituent Assembly of 136 Members, elected for a year. He was succeeded in 1907 by his son Muhammed Ali Shah, who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasir-ul-Mulk, until 1914). As a result of the energy of Prime Minister H. H. Reza Khan the authority of the Persian Government was re-established over almost the whole country by means of a disciplined army of 8,000 cavalry and 23,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars. On Oct. 31, 1925, the Shah Sultan Ahmed, who had been absent from the country for some time, was deposed by the National Assembly which handed over the government to the Prime Minister, Reza Khan Pahlavi. On Dec. 13, 1925, the Constituent Assembly elected Reza Khan Pahlavi, Shah of Persia. The Shah took the oath on Dec. 15 and was publicly proclaimed, and was crowned on April 25, 1926.

The revenue is mainly derived from land tax, Crown lands, customs, duties and from monopolies of sugar, opium, matches, tea and tobacco. The oil royalties are kept apart from the general revenue. Part of the proceeds from the sugar and tea monopolies is earmarked for the construction of railways; the actual expenditure out of the fund for administration and

construction of the North to South Railway was stated at *Rials* 642,917,562 on March 20, 1934. British commercial interests in Iran exceed those of any other country, the trade between the British Empire (including India) and Iran amounting to 39.5 per cent. of the total trade of the country (1933-4), inclusive of oil.

The leading imports into Iran are cotton fabrics, tea, sugar, motor vehicles, railway material and industrial machinery; the principal exports are heavy oils, petrol, carpets, opium, gum, fruits, cotton and rice. All foreign trade was in Feb. 1931 declared to be a State monopoly, and restrictions on imports and on exchange transactions were imposed; the control on foreign exchange transactions was removed in 1933.

	1935-36.
Revenue (Budget) .....	<i>Rials</i> 751,123,000
Expenditure (Budget).....	750,827,000
Foreign Debt (Dec. 31, 1934).....	£1,048,351

	1933-34.
Imports.....	<i>Rials</i> 841,736,350
Exports .....	1,817,257,421
Imports from Brit. Empire .....	342,160,822
Exports to Brit. Empire .....	708,102,355

*Defence.*—Iran now possesses an army, well equipped on modern lines, of approximately 80,000 all ranks and a small fleet in the Persian Gulf.

*Foreign Relations.*—By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests.

In March, 1921, Persia signed a treaty with the U.S.S.R. which provided (*inter alia*) for mutual diplomatic and consular representation, restored to Persia Firuzeh and Ashurada, annulled all concessions previously granted to Russians in Persia, handed over the Russian Discount and Loan Bank to the Persian Government, cancelled all Persian debts to Russia, denounced all previous Russo-Persian treaties, abolished the "capitulations" as regards Russian subjects in Persia, and denounced all treaties made between Russia and third Powers regarding Persia. Further treaties were signed in 1927 and 1931.

In 1922 the Iranian Government engaged a number of American advisers (under Dr. Mills-paugh) for the supervision and direction of the country's finances. Considerable strides were made by the country under this new régime, a balanced budget and a programme for gradual development of the country's resources having been evolved; Dr. Mills-paugh's contract came to an end in 1925. A State Bank was started in 1929 under German control; a certain number of Belgians have been employed from time to time in the Ministry of Finance and in the Customs Administration. In 1933 the German manager of the State (National) Bank was replaced by an Iranian and in 1934 the appointments of Belgians in the Customs Administration was terminated. An Agricultural and Industrial Bank was recently inaugurated by the Government for the purpose of encouraging and assisting industrial and agricultural activities.

In May, 1928, the capitulatory régime came to an end; at the same time a new Tariff

Convention was signed, giving Iran Tariff autonomy.

CAPITAL, Tehran, population (1933) 360,351; other large towns are Tabriz (219,949), Isfahan (100,140), Meshed (139,350), Shiraz (120,000), Kerman (60,000), Resht (20,000), Hamadan (100,000) and Yazd (55,000).

FLAG : White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

#### BRITISH LEGATION.

(Tehran.)

Envoy Extraordinary and Minister Plenipotentiary, H. J. Seymour, C.M.G.

(1936)..... £4,750  
(Counsellor (Chargé de Affaires), N. M. Butler, C.V.O. (acting).

2nd Secretary, P. N. Loxley.

3rd Secretary, D. P. Reilly.

Oriental Secretary (with local rank of 1st Secretary), A. C. Trott.

Assistant do., F. H. Gamble.

Commercial Secretary (Grade II), S. Simmonds, M.B.E.

Military Attaché, Maj. G. D. Pybus, I.A.

Physician, D. S. Davies, M.A., M.D., F.R.C.S.

Archivist, R. E. Bishop.

#### BRITISH CONSULAR OFFICES.

Tehran—Consul (with local rank of 1st Secretary), C. H. Summerhayes, M.B.E.

" Vice-Consul, C. A. Gault.

Ahwaz—Consul, A. J. Gardener.

Mohammerah—Vice-Cons., Capt. J. E. A. Bazalgette, M.B.E.

Bushire—Consul-General, Lt.-Col. T. C. W. Fowle, C.B.E.

" Consul, Major C. C. L. Ryan.

" Vice-Consuls, F. H. Todd; Maj. H. J. H. Symons, M.C., I.M.S.

Kerman—Consul, Maj. C. H. Lincoln, O.B.E., I.M.S.

Kermanshah—Consul, J. F. R. Vaughan-Russell.

Meshed—Consul-General, Lt.-Col. C. K. P. Daly, C.I.E.

" Vice-Consul, Capt. A. C. Stewart.

Shiraz—Consul, A. E. Watkinson.

" Vice-Consul, W. H. Young (acting).

" Pro-Consul, Abdul Ahad Khan, Khan Bahadur Wazizadeh.

Tabriz—Consul, R. W. Urquhart, O.B.E.

Zabul—Vice-Consul,

Birjund—Vice-Consul, Jemadar Fazal Haqq.

Zahedan—Vice-Consul, Maj. H. G. Rivett-Carnac.

BRITISH CHAMBERS OF COMMERCE at Bushire and Mohammerah.

Transit to Tehran, 6 days by rail *via* U.S.S.R. ; 7½ days by rail *via* Istanbul and Nisibin (and on by car) ; 18 days by sea to Beirut (and on by car) ; 4 days by air to Baghdad (and on by car).

#### IRAQ.

(Mesopotamia.)

King of Iraq, Ghazi I., born March 21, 1912, acceded (on the death of his father King Faisal I.) Sept. 8, 1933; married, Jan. 25, 1934, Princess Aliyah, daughter of King Ali of the Hejaz.

Crown Prince, H. R. H. Prince Faisal, born May 2, 1935.

#### CABINET.

(After Coup d'Etat, Oct. 30, 1936.)

Prime Minister and Minister of the Interior, Seyyid Hikmat Suleiman.

Minister for Foreign Affairs, Seyyid Naji al Asil.

Finance, Seyyid Jafar Abu'l Timman.

Economic Affairs and Communications, Seyyid Kamil al Chadirchi.

Defence, Brigadier Abdul Latif Nuri.

Justice, Seyyid Salih Jabur.

Education, Seyyid Yusuf Izz-ed-Din Ibrahim.

Minister in London, Seyyid Ali Jawdat al Ayoubi.

Counsellor of Legation, Seyyid Ata Amin, C.V.O.

Legation, 22, Queen's Gate, S.W. 7.

Iraq, or Mesopotamia, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Bagdad). Under the Treaty of Lausanne, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration was entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov. 1920 and in Aug. 1921 the Emir Faisal (3rd son of ex-King Hussein of the Hejaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. In March, 1924, a Constituent Assembly met in Bagdad, and passed an organic law and an electoral law for the election of a Chamber of Deputies. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and a Chamber of Deputies of 108 members elected by manhood suffrage. The first Parliament under this Constitution was opened by King Faisal on July 16, 1925. An application for admission to the League of Nations came before the Assembly in 1932, and Iraq was freed from all Mandatory control through admission to the League on October 3, 1932. On June 30, 1930, a new Treaty was signed at Bagdad by the High Commissioner and the Prime Minister. This Treaty is of 25 years' duration from the entry of Iraq into the League, and regulates the relations between Great Britain and Iraq during that period on the basis of an alliance between two equal and independent States.

On Oct. 30, 1936, a successful military coup d'état led to the resignation of the Cabinet of Yashin el Hashimi, and the King called upon Seyyid Hikmat Suleiman to form a Ministry. A manifesto issued to the people was signed by Al Fariq Bekir Sidqi, as "Commander of the Nationalist Reform Force."

The total area of Iraq is about 116,000 sq. miles, the distance from Basra in the south

to Mosul in the north being approximately 500 miles. Population (estimated 1931):—

Bagdad vilayet .....	1,356,231
Basrah vilayet.....	760,740
Mosul vilayet .....	740,106

Total ..... 2,857,077

Bagdad includes the Bagdad, Samarra, Diyala, Kut, Diwaniyah, Hillah and Dulaim Divisions (*Liwas*); Basra includes the *Liwas* of Basra, Amara and Muntafik; and Mosul includes Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of Assyria, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1931 1,029,833 Sunni Muhammadans, 1,612,533 Shiite Muhammadans, 110,885 Christians, 72,783 Jews, and 31,043 other religious.

The country is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and during the British occupation notable improvements were effected; the Irrigation Department is at present confining itself to small and immediately remunerative schemes, but plans are in preparation for several large works of development on both rivers, the cost to be met from oil royalties receivable from the Iraq Petroleum Company. Apart from the valuable revenues to be derived from oil the wealth of the country depends upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley, beans, rice, dates and Indian corn; wheat averages 461b. per acre, barley 621b., and rice over 1,000lb. Cotton growing has proved a disappointment after a promising beginning, and the area now under cotton is negligible. Much headway has been made in popularising the local use of the indigenous tobacco plant. A concession for the exploitation of the oil in the Bagdad and Mosul vilayets was granted to the Turkish Petroleum Company (now the Iraq Petroleum Company), in March, 1925, and was extensively revised in 1931. The Company, which is International in construction, completed two pipe lines to the Mediterranean in 1934. One terminal is at Haifa and the other at Tripoli. The first section of the line was opened by the King of Iraq on Jan. 14, 1935. The total length from Kirkuk to Haditha, and of the branches to the terminals on the coast at Tripoli (Syria) and Haifa (Palestine) is 1,150 miles, and the cost is estimated at £10,000,000. The field went into production late in 1934. For the year ending March 31, 1936, royalties amounting to £598,000 were paid to the Iraqi Government. Another concession has been granted covering the West of the Tigris to the B. O. D. Company, with effect from April 20, 1932. The Khanaquin Oil Company (a subsidiary of the Anglo-Iranian Oil Company) holds a concession which is confined to the Transferred Territories (an area on the N.E. frontier transferred from Persia to Turkey in 1913-14), which is an adaptation of the D'Arcy concession held by the A.I.O.C. The Khanaquin Oil Company have opened a refinery near to Khanaquin town which produces sufficient petrol, kerosine and crude oil for the needs of Iraq.

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (425 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzeroum in the Dumlü Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

*Communications and Trade.*—The country is being rapidly opened up and communications improved and secured, particularly in the hitherto inaccessible northern districts. The port of Basra is well equipped and able to handle expeditiously all sea-borne trade. Continuous dredging of the Shatt-al-Arab has provided a navigable channel of 22½ feet at low water (as compared with 9 feet before dredging was begun) giving easy access to the Port at all times. The desert route between Bagdad and the Mediterranean was opened up in 1923 and is now a main traffic artery. Surveys have been completed for a projected railway line between Bagdad and Haifa. The chief imports are textiles, sugar and tea, and the chief exports are dates, wool and grain.

*The Bagdad Railway.*—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, *via* Bagdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Iraq), and Mosul, and thence S. down the right bank of the Tigris to Bagdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the desert W. & S. of Mosul). The line crosses the Euphrates at Jerablus and is open to goods and passenger traffic as far as Tell-Kochek on the Syro-Iraq frontier. Railheads at Tell-Kochek and Kirkuk are connected by a motor service, and through bookings by this route from Europe to Bagdad are obtainable. The first through train from Basra to Bagdad left Basra on Jan. 13, 1920; since the War lines have been laid from Bagdad to Kerbala and Bagdad to Kirkuk. The line to Kirkuk will be extended to Mosul. The total length of line now open is 922 miles.

*Capital.*—The chief city is Bagdad, the former capital of the Abbassid dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Bagdad has an estimated population of over 261,000, other towns being Basra, 52,000, and Mosul (opposite the site of Nineveh), 97,000.

Total revenue .....	1934-35	1935-36
.....	£5,009,369	£5,328,966
Including Customs .....	1,867,051	2,077,188
Total expenditure .....	4,164,425	5,406,109
Total Imports .....	6,104,844	7,239,672
Total Exports .....	4,785,338	5,248,522
Imports from U.K. ....	1,541,732	2,058,025
Exports to U.K. ....	1,504,052	1,119,705

## BRITISH EMBASSY.

(Bagdad.)

*Ambassador Extraordinary and Plenipotentiary*,  
 Sir Archibald J. Kerr Clark Kerr, K.O.M.G.  
 (1935) ..... £7,985  
*Counsellor*, C. H. Bateman, M.C.  
*1st Secretary*, H. E. L. Montgomery, M.C.  
*3rd Secretary*, P. M. Crosthwaite.  
*Hon. Attaché*, J. Kirkwood.  
*Oriental Secretary* (with local rank of 1st Sec.),  
 Capt. V. Holt, M.V.O.  
*Commercial Secretary* (Grade III), J. P. Summer-  
 scale.  
*Archivist*, E. Farmer, M.B.E.  
*Clerical Assistants*, A. J. T. Allen; R. D. Joshua.  
*Asst. Archivist*, J. Lamb, M.B.E.

## BRITISH CONSULAR OFFICES.

*Bagdad*—*Consul*, C. A. W. Were.  
 „ *Vice-Consul*, E. P. Wiltshire.  
 „ *Pro-Consuls*, E. C. Rose; T. H.  
 Quraishi.  
*Basra*—*Consul*, D. F. H. Brickell, M.B.E.  
 „ *Pro-Consul*, G. Davies.

*Diana Rowanduz*—*Vice-Consul*, J. P. G. Finch.

BRITISH CHAMBERS OF COMMERCE, Bagdad  
 and Strand Road, Basrah.

Bagdad is 340 miles by air from Cairo, Egypt.  
 Motor convoys carrying mails run twice weekly  
 between Bagdad—Haifa (the normal route for  
 letter post).

## ITALY.

(Regno d'Italia.)

*King of Italy and Emperor of Abyssinia*,  
 Victor Emmanuel III, born November 11,  
 1869; married, Oct. 24, 1896, Princess Helen of  
 Montenegro; succeeded to the throne July 29,  
 1900.

*Heir Apparent*, H.R.H. Humbert, Prince of  
 Piedmont, born Sept. 15, 1904; married, Jan. 8,  
 1930, Princess Mary of Belgium.

CABINET (June 30, 1924; reconstructed 1925,  
 1929, 1932, 1933, 1934, 1935 and 1936).

*Prime Minister and Minister of Interior, War,  
 Navy, Air and Corporations*, \*Signor Benito  
 Mussolini (Il Duce).

*Minister of Foreign Affairs*, Count Galeazzo  
 Ciano di Cartellazzo.

*Colonies*, Onorevole Mario Lessona.

*Justice*, Prof. Senatore Arrigo Solmi.

*Finance and Treasury*, Senatore Paolo Thaon  
 di Revel.

*National Education*, Senatore Cesare de Vecchi  
 di Val Cismon.

*Public Works*, Onorevole Giuseppe Cobolli-Gigli.

*Agriculture and Forests*, Onorevole Edmondo  
 Rossoni.

*Communications*, Onorevole Stefano Antonio  
 Benli.

*Press*, Onorevole Dino Alfieri.

*Ambassador in London*, His Excellency Dino  
 Grandi, 4 Grosvenor Square, W. 1.  
*Counsellor*, Signor Guido Crolla.

\* Signor Benito Mussolini (born 1874) is the leader of  
*Fascism* (which has been in power since the "March to  
 Rome," Oct. 22, 1922), the *Fascisti* representing a revolu-  
 tionary movement against the inactivity of post-War  
 Italian statesmen. The uniform of the movement is a  
 black shirt, and the name is derived from *fascio* or  
 band (cf. the *fascies* of the Roman lictor) in which the  
 movement was organised.

*1st Secretary*, Nobile Cristoforo Fracassi dei  
 Marchesi di Torre Rossana.

*2nd Secretaries*, Don Giulio del Balzo dei Duchi  
 di Prezenzano; Signor Aubrey Casardi.

*3rd Secretaries*, Signor Alberto Brugnoli; Signor  
 Michele Lanza.

*Attaché*, Nobile Gaetano De Facci Negrati.

*Naval Attaché*, Commander Bruno Brivonesi.

*Military Attaché*, Colonel Umberto Mondadori.

*Air Attaché*, Capt. Colonnello Attilio Calderara.

*Commercial Counsellor*, Signor Giovanni Battista  
 Ceccato.

*Chancellor*, Signor Giuseppe De Grossi.

*Royal Consul-General*, Signor Andrea Rainaldi,  
 68 Portland Place, W. 1.

A Kingdom in the South of Europe, consisting  
 of a peninsula, the large islands of Sicily and  
 Sardinia, the island of Elba, and about 70 minor  
 islands (with certain dependencies hereinafter  
 noted). It is bounded on the N. by Switzerland  
 and Austria, on the S. by the Mediterranean,  
 on the E. by the Adriatic and Yugoslavia, &c.,  
 and on the W. by France and the Ligurian and  
 Tyrrhenian Seas. The total area of the kingdom  
 of Italy in 1914 was 110,623 sq. miles, and by  
 the *Treaty of Versailles* (June 28, 1919) Italy  
 gained from Austria-Hungary the Trentino  
 (about 4,000 sq. miles) and Trieste (with about  
 1,000 sq. miles of the Adriatic Sea-board).

The total area of the Kingdom of Italy was  
 estimated (Dec. 1927) at 119,743 square miles,  
 with a population at the census of April 21,  
 1931, of 41,176,671 (estimated at 42,438,104  
 in August, 1936). There is a large settled and  
 floating population of Americans and English in  
 Italy, and it is estimated (1933) that 10,000,000  
 Italians are resident in other countries.

By a treaty signed at Rome (Jan. 27, 1924), the  
*Free State of Fiume* came to an end. Yugo-  
 slavia's sovereignty over Port Baros and the  
 Delta is established by the treaty, and Italy  
 acquired the town and harbour works of Fiume,  
 together with a narrow strip of hinterland. Italy  
 agreed to lease to Yugoslavia the Thaum di Revel  
 quay at a rental of one gold lira for 50 years, the  
 railway station being established as an inter-  
 national frontier station. Fiume is now the  
 capital of the newly created Italian Provincia del  
 Carnaro, and has the status of an Italian provin-  
 cial town.

The Italian peninsula is traversed throughout  
 its length by the chain of the Apennines; the  
 Alps form its northern limits, dividing it from  
 France, Switzerland, Germany, Austria and Yugo-  
 slavia. *Mont Blanc* (15,782 feet), the highest  
 peak of the Alps, is in the French Pennine Alps,  
 but within the Italian borders are Monte Rosa  
 (15,217 feet) and several peaks from 12,000 to  
 14,000 feet. The chief rivers are the Po, the  
 Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accom-  
 plished under the House of Savoy, after an  
 heroic struggle from 1848-1870, in which the  
 great patriots Mazzini (born 1805, died 1872) and  
 Garibaldi (born 1807, died 1882) were the  
 principal figures. It was completed when Lom-  
 bardy was ceded by Austria in 1860 and Venice  
 in 1866, and through the evacuation of the  
 Papal States by the French in 1870. In 1872 the  
 King of Italy entered Rome, and that city was  
 declared to be the capital. The government  
 was that of a constitutional monarchy with a  
 legislature of two houses—the *Senate* (of 385  
 life members appointed by the King), and the

**Chamber of Deputies** of 536 members (elected by adult manhood suffrage). Under the reforms instituted by Signor Mussolini an entirely new and complex form of government has been built up—the Fascist “syndical-corporative” state. The Senate and Chamber are retained, but the latter are called the “National Assembly of Corporations” and are elected *en bloc*, a list being drawn up by the Fascist Grand Council and submitted to the electorate for acceptance or rejection as a whole. The basis of the composition of the list is roughly equal representation of capital and labour, the essence of the “syndical-corporative” idea being that the State should take charge of the economic development and functioning of the country.

**PRODUCTION.**—Agriculture (including the growing of grapes, olives, chestnuts and rice) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are produced in the South, chiefly in Apulia; while fruit abounds and is largely exported; wheat production has been greatly stimulated under the Fascist régime. The cultivation of the silkworm forms an important industry. Italy is poor in mineral resources. The production of sulphur is important and among other minerals produced are ironpyrites, mercury, lead, zinc, aluminium, potassic salts and iron ores. Marble is quarried in considerable quantities. Salt and tobacco are Government monopolies.

The principal exports are rayon fibres and waste, cotton tissues, lemons, cotton yarns, cheeses, almonds, fresh fruit, hemp, tomato preserves, wollen tissues, rice, raw thrown silk, rayon tissues, oranges and mandarines, motor vehicles, wines. The imports chiefly consist of coal, cotton, wool, machinery and apparatus and their parts, timber, raw hides, wheat, oleaginous seeds, coffee, cellulose, fresh and prepared fish, iron and steel scrap, copper, mineral oils and residues. The manufactures are woollen, cotton, silk, rayon hemp, and linen yarns and tissues, iron and steel and their products, ship-building, gloves, motor vehicles, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

**DEFENCE.**—The Army is organised into 13 Army Corps, and consists of 30 Infantry Divisions, 3 Mobile Divisions, 3 Motorised Divisions and a Mechanised Brigade. In addition there are 5 Alpini Divisions, several Regiments of Bersaglieri and 4 Tank Regiments as Army and Corps Troops. In the autumn of 1936, owing to extra classes called up for the period of the East African campaign not having yet been demobilized, the peace strength was approximately 750,000. Signor Mussolini announced on August 30, 1936, that in time of war a total of 8 million could be called to the colours. This total includes the Navy, the Air Force and the National Militia. The National Militia forms part of the Land Forces of Italy. It is in process of reorganisation and considerable expansion. Its rôle includes the reorganisation of the territorial defence of Italy, the supply of Blackshirt units to regular Army Corps, and the pre- and post-military training of, theoretically, every able-bodied male Italian.

On May 24, 1915, Italy declared war on Austro-

Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 milliards of lire (£1,220,000,000). During the War of 1914-1918, over 15 per cent. of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The Navy includes 2 old Dreadnought battleships, 17 modern and a number of old cruisers, 15 flotilla leaders, 78 destroyers and torpedo boats, 8 ocean-going, 5 mine-laying, 24 medium and 30 small submarines, 4 mine-laying destroyers, a large number of small high-speed motor torpedo craft and a variety of gunboats and auxiliary vessels. In addition Italy has under construction 2 battleships of 35,000 tons, 2 cruisers, 4 large and 10 smaller destroyers and 17 small submarines, while 2 old Dreadnought battleships are undergoing extensive reconstruction. The peace-time personnel of the Italian Navy is about 52,000 all ranks. Spezia, Pola and Taranto, the chief naval and military ports of the kingdom, are strongly fortified. The Air Force consists of bombing, battle and reconnaissance flights, &c., with (June 30, 1934) a total of 1,861 aeroplanes. The personnel for 1935 was 25,861 (all ranks), the expenditure for 1933-34 being 780 million lire.

On October 3, 1935, Italy invaded Abyssinia, and on May 5, 1936, entered Addis Ababa, the Emperor having fled.

**EDUCATION.**—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

**COMMUNICATIONS.**—On June 30, 1935, there were 10,672 miles of railway open for traffic, 1,545 being electrified and 933 in course of electrification; the post-offices (1935) numbered 11,352, and there were (1935) 41,300 miles of telegraph line. The sea-going commercial marine (1935) consisted of 1,059 steamers (2,288,722 gross tons), 217 motor vessels (515,340 gross tons), 1,471 sailing vessels (89,176 gross tons) and 746 sailing vessels with auxiliary motor (54,160 gross tons). In 1934 225,888 ships (90,300,786 net tons) entered Italian ports; the clearances were 224,546 (89,754,158 net tons).

 Rome, transit, 44 hours.

## ITALIAN COLONIES, &amp;c.

*Libia Italiana*.—Tripoli and Benghazi, on the northern coast of Africa, were occupied by Italy in 1911-12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred by Turkey to the King of Italy. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. Libia Italiana has a total area of 810,000 square miles, with a population of about 1,000,000; Oueinat, the highest peak in the colony, was ascertained (1933) to exceed 6,000 ft. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be expected every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, i.e., at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli; a four-sided arch erected to the Emperor Severus and a Roman market place were uncovered in Leptis Magna in 1931-32. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 60,000), and of Cyrenaica (or Barca), Benghazi (population 35,000). The trade of Tripolitana was stated in 1933 at 185,083,000 lire (imports) and 29,711,000 lire (exports) and of Cyrenaica at 125,000,000 lire (imports) and 10,250,000 (exports). *Governor of Libia*, General Italo Balbo, *apptd.* Nov. 1933. *Lieut. Governor of Cyrenaica*, General Rodolfo Graziani, *apptd.* March, 1930.

*Italian East Africa* consists of Abyssinia (annexed after conquest in 1936), Eritrea and Italian Somaliland.

*Abyssinia* is an inland country in North Eastern Africa, bounded on the North by the Italian Colony of Eritrea; on the South by Kenya and Uganda; on the West by the Sudan; and on the East by French and British Somaliland, the northern and eastern neighbours cutting it off from access to the Red Sea, from which it is distant about 40 miles along the greater part of the Eritrean boundary. The area is estimated at 250,000 square miles, with an estimated population of 6 to 8 millions, of whom less than one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakil and Somalis on the east. Abyssinia is volcanic and mountainous, with several lofty peaks, the highest being Mount Kollo (14,100 ft.) and Abuna Josef (13,780 ft.), with many others above 10,000 ft. The country is reputed to contain some mineral wealth; iron is not uncommon, and gold is washed in various streams, while mica, platinum, salt, salt-peter, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, coffee, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

The Abyssinians are Christian (a branch of the Coptic Church). The principal pursuits are agriculture and cattle breeding, the chief exports being coffee, civet, wax, hides and gold. A railway links Addis Ababa, the capital, *via* Dire Dawa, with Jibuti, 486 miles away. The principal towns besides Addis Ababa are Dire Dawa, Harar, Goré, Jimma, Debra Markos (the capital of Gojam), Adua (the capital of Tigré), Gondar, Sayo, Aksum, Antaló, Dembecha and Ijube. There are ancient architectural remains at Aksum, Gondar, and Ankober.

*Viceroy of Abyssinia*, Marshal Graziani.

*Eritrea* is a Red Sea colony, and extends from Ras Kasar, 18° 2' N., to Ras Demoiira, 10° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on S.E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 640,000, of whom about 3,500 are Europeans. The capital is Asmara (pop. 23,000), Massowa (pop. 15,000) being the chief port, where there is a good harbour. A railway from Massowa runs to Asmara and thence inland to Keren and Agordat, with projected extensions towards the S.E. boundary. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia. The trade of 1932 was valued at 173,000,000 lire (imports) and 60,000,000 lire (exports).

*Somaliland*.—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 12° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by

the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kismayu), transferred from Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 900,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean. The trade of 1932 was valued at 135,000,000 lire (imports) and 142,000,000 lire (exports).

*Tientsin*.—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

*Aegean Dependencies*.—Rhodes, Egea and the Dodecanese (12 islands occupied by Italy in 1912 during the war with Turkey, viz.:—Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Callipno, Lero, Patino, Cos, Simi, Calchi, and Lipsos). The seat of administration is at Rhodes (Rodi) and the total population is about 100,000.

*Other Dependencies*.—The ancient kingdom of Zara, on the Dalmatian coast, has been an Italian province since 1923. Area, 42 sq. miles, pop. 20,000. The *Lagosta* and *Pelagosa* Islands (20 sq. miles, pop. 1,800) are dependencies of Zara.

*Pantereia Island*, in the Straits of Sicily (part of Trapani Province), has an area of 31 sq. miles and a population of 10,000.

The *Pelagian Islands* (Lampidus, Linosa and Lampione) are part of the Province of Agrigento and have an area of 8 sq. miles and a population of 3,000.

*Saseno Island*, in the Bay of Vallona, area 2 sq. miles, is a Naval Station.

## JAPAN.

(Nippon.)

*Emperor of Japan* (Dai Nippon, Teikoku Tenno), His Imperial Majesty Hirohito, K.G., G.C.B., G.C.V.O., born April 29, 1901; succeeded Dec. 25, 1926; married (1924) Princess Nagako (born March 6, 1903), daughter of the late Prince Kuniyoshi Kuni (died Jan. 27, 1925), and has issue two sons and three daughters:—*Heir-Apparent*, His Imperial Highness Prince Akihito Tsugu-No-Miya, Crown Prince, born Dec. 23, 1933.

*Brothers of the Emperor*:—

- (1) H.I.H. Prince Yasuhito Chichibu, born June 25, 1902, married Sept. 28, 1923, Setsuko Matsudaira (born Sept. 9, 1909).
- (2) H.I.H. Prince Nobuhito Takamatsu, born Jan. 3, 1905, married Feb. 4, 1930, Kikuko Tokugawa, grand-daughter of the late Shogun Tokugawa.
- (3) H.I.H. Prince Takahito Mikasa, born Dec. 2, 1915.

## CABINET.

*Prime Minister*, K. Hirota.  
*Minister of Foreign Affairs*, H. Arita.  
*Minister for Home Affairs*, S. Ushio.  
*Minister of Finance*, E. Baba.  
*Navy*, Admiral O. Nagayo.  
*War*, General H. Terauchi.  
*Justice*, R. Hayashi.  
*Education*, T. Hirao.  
*Commerce and Industry*, G. Ogawa.  
*Agriculture and Forestry*, T. Shimada.  
*Communications*, K. Tanomogi.  
*Railways*, Y. Maeda.  
*Overseas Affairs*, H. Nagata.

*Ambassador in London*, Shigeru Yoshida,  
K.O.V.O., 10 Grosvenor Square, W. 1.

*Chancery of the Embassy*, 37 Portman Sq., W. 1.

*Counsellor*, Baron Shu Tomii.

*1st Secretary*, Teruo Hachiya.

*2nd Secretary*, Taro Terasaki.

*3rd Secretaries*, Motokichi Hasegawa; Akira Kotaki.

*Attaches*, Koh Chiba; Shinjiro Tsumura;  
Yoshio Kasuya; Kijiro Miyake.

*Military Attaché*, Lt.-Col. Eiichi Tatsumi.

*Asst. Military Attaché*, Capt. Sei Matsutani.

*Naval Attaché*, Capt. Risaburo Fujita.

*Asst. Naval Attaché*, Lt. Mochifumi Namgo,  
I.J.N.; Commander Yoshio Yamamoto.

*Financial Attaché*, Yutaro Tomita.

*Commercial Counsellor* (15 St. Helen's Place,  
E.C. 3), Shinjiro Matsuyama.

*Chancellors* (37 Portman Square, W. 1), Shigeo Harada; Teijiro Asahina; Kaji Omori; Isamu Nisakawa.

*Consul-General (London)*, Shinjiro Matsuyama,  
15 St. Helen's Place, E.C. 3.

*Consul (Liverpool)*, Jitsunosuke Noda.

" (*Manchester*), Maj. W. P. Groves (*hon.*).

" (*Middlebrough*), Alfred W. Bulmer (*hon.*).

" (*Cardiff*), R. H. Evans (*hon.*).

" (*Glasgow*), U. F. Burrell (*hon.*).

" (*Dublin*), Maj. J. B. Hollway (*hon.*).

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu, Shikoku, Kiu-shū, Hokkaidō or Yezo, situate to the north of the main island, from which it is separated by the Tsugarn Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishing numbers. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Kiu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 260,783 square miles, with a population (1935 Census) of 97,624,628. (49,240,659 males and 48,453,969 females). The population of the mainland only on Oct. 1, 1936, was 70,258,200. In 1935 births in Japan proper numbered 2,190,681, deaths 1,162,058. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-no-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also, liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the *Paulownia imperialis* is largely used for fancy boxes and

works of art; the maple is merely for ornament. Chestnut, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 347,500,000 bushels being consumed annually in Japan proper (home-grown crop 1933, 12,894,000 metric tons). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

*Government*.—Under the Constitution of Feb. 11, 1889, the monarchy is hereditary in the male heirs of the Imperial house. The Diet (*Taishoku-Gikwai*) consists of the House of Peers (*Kizokuin*) of 404 members and the House of Representatives (*Shuguin*) of 466 members, elected for 4 years by universal adult male suffrage. Members of both houses receive 3,000 yen annually and travelling expenses.

*Commerce and Industry*.—The chief manufactures are silk and cotton woven goods, cotton yarn, earthenware, lacquered ware, matches, paper, glass, cement, chemicals and fertilisers, sugar, brushes, flour, insulated electric wire, woollen fabrics, rubber goods, soap, porcelain, mats, matting, hemp-brails, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S.A., Egypt, and China; wheat from Canada, Australia and U.S.A.; oil cake from Kwantung Province and China; wool from Australia; crude rubber from Malaya; lumber from U.S.A.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; kerosene oil from U.S.A. and the Dutch Indies; beans, peas, and pulse from China, Kwantung Province, and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, matches, coal, camphor, straw-plaits, porcelain, earthenware, marine products, paper, glass and toys.

*Communications*.—There were 13,726 miles of Government and private railroad (steam and electric) on Dec. 31, 1932, in addition to 2,700 miles open in Korea, 955 miles in Formosa and 302 in Saghalien. The mercantile marine of Japan and her dependencies consisted in 1933 of 2,019 steamers and motor vessels of 4,258,160 gross tons, in addition to small craft and wooden ships. The total tonnage entered at the chief ports in 1932 was 17,395 vessels (56,038,100 tons), the clearances being 17,307 vessels (55,719,000 tons). The three great ports are Kobe, Yokohama and Osaka, the first-named having a large transhipment trade, in addition to direct imports and exports. In March, 1934, there were 11,832 post offices dealing with about 4,500,000,000 postal packets annually, and 232,000 miles of telegraph line carrying 60,000,000 messages.

*Defence*.—Service in the Army is universal and compulsory between the ages of 20 and 40.

The Army is divided into a first line (*Gen-eki*), and its reserve (*Yeto*), a second line (*Ketsu*), and its reserve (*Ketsu-in*), with a third line to make good the wastage of war (*Hon*). The peace strength of the first line (1934) is 19,400 officers and about 310,000 other ranks. The military Air Force is organized in 8 flying regiments and a balloon corps. The Navy, the service consists of 17 shore-based squadrons, in addition to machines carried by aircraft-carriers and other ships, with 4 small air-ships and a balloon section. The Army (1934) includes 9 battleships, 7 armored cruisers, 31 cruisers, 4 aircraft carriers, 108 fast mines and 63 submarines.

Education is in the lower grades free and compulsory. High schools are State-aided, and require for a 3 years' course at the Universities. There are high schools for girls, and the normal and special schools are well attended. There are six State Universities of Tokyo (2), Kyoto, Fukuoka, at Sendai, Hokkaido and Kyushu (1), and 15 municipal universities.

## FINANCE.

Budget 1935-37.

Revenue —	
Ordinary .....	Yen 1,451,842,000
Extraordinary .....	826,288,000
EMERGENCY —	
Ordinary .....	Yen 1,357,200,000

1934-1935 (March 31, 1935) —	
Internal .....	Yen 7,687,511,000
External .....	1,402,943,000
Floating Debt .....	689,950,000

Total ..... Yen 9,779,804,000

## TOTAL TRADE OF JAPANESE EMPIRE.

	1934	1935
Imports ..	Yen 2,400,000,000	Yen 2,617,000,000
Exports ..	2,258,000,000	2,603,000,000
Imports from U. K.	2,397,400,000	2,413,000,000
Exports to U. K.	2,092,000,000	2,827,000,000

**Formosa.** The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. On the E. coast of the island are the highest known sea cliffs in the world, 8,000 feet sheer above the water. Its total area is 13,800 square miles, with 4,592,537 inhabitants (1930). Imports, Yen 164,408,000; exports, Yen 240,728,000. In 1932, the colony has been self-supporting since 1906, produced 41,468,971 bushels of rice in 1933, and it is the principal source of the world's camphor supply. Estimated rev. and exp. (1934-35) Yen 111,000,000. Capital, Taihoku (Taipei). Pop. (1932) 2,660,000.

**South Karafuto.**—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of about 14,000 sq. miles with a population (1932) of 293,176. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1934-35) Yen 26,000,000. Capital, Toyohara. Pop. 33,000.

The **Kwantung Peninsula**, which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,440 sq. miles; population (1933) 1,004,439. The port of Dairen provides Japan with a mainland port, ice-free all the year round, and the peninsula is fertile. Imports (1933) Yen 374,781,000; exports, Yen 330,151,000. Estimated revenue and expenditure (1934-35) Yen 22,911,000. Capital,

Port Arthur (Ryojunko); chief port, Dairen; pop. (1930) 369,757.

The **Pescadores (Bokoto)** consists of about 63 islands, with a total area of 85 square miles, and a population (1928) of 62,000.

**Korea (Chosen).**—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long. and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Jeju. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population 20,599,870 (1932). The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; fruit-growing is making progress and sericulture is thought to have a bright future. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision at Sengdo (Kangdo), and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. There are extensive forests in the extreme north. The principal exports are rice, beans, silk, fish, fish oil and marine, iron and iron ore, raw cotton, livestock and hides. Manufactures are as yet in a primitive condition, but are growing, including cotton yarn, silk-reeling, sugar, paper, artificial fertilisers, cement, flour (output at present small in each case). The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. Estimated rev. and exp. (1935-36), Yen 200,267,000. Debt (1935) Yen 498,831,000. Capital, Seoul (Keijo); pop. (1935) 383,000.

Imports into Korea, 1935 ..... Yen 659,400,000  
Exports from Korea, 1935 ..... „ 550,800,000

**Pacific Islands.**—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N. of the Equator have been placed under Japanese mandate. These islands, in Micronesia, are (1) *The Marshall Islands* (pop. 9,708), with seat of government at Jaluit; (2) *The Caroline Islands* (pop. 39,718), with seats of government at Truk and Pohnpe (Eastern group) and Palau and Yap (Western group); (3) *The Line Islands, or Marianas Islands* (pop. 69,530), with seat of government at Saipan. Estimated rev. and exp. (1932-33) for the Pacific Islands, Yen 5,629,000.

**CAPITAL OF THE JAPANESE EMPIRE.** Tokyo, formerly called Yedo, the residence of the Emperor; population estimated at 5,875,000 (1935). On Sept. 1, 1923, a disastrous earthquake destroyed great portions of the cities of Tokyo and Yokohama, but the work of reconstruction is now completed. The chief cities are—

Tokyo (1935) .....	6,085,800	Fukuoka .....	291,000
Osaka (1936) .....	3,101,900	Nagasaki .....	212,000

\* A Baltic Republic at the eastern and southern  
 shore of the Gulf of Riga, formerly part of the  
 Russian Empire, its area being about 25,000  
 sq. miles, with a population of about  
 2,000,000. Latvia was proclaimed an inde-  
 pendent state on Nov. 18, 1918. Its frontiers  
 are common with Estonia, Russia, Poland and  
 Lithuania. The constitution is that of a  
 democratic republic, with universal suffrage  
 and proportional representation. Parliament  
 (*Saeima*), a single chamber of 100 members, was  
 suspended in 1934.

The surface of the country is generally flat  
 with marshy areas, interspersed with many  
 lakes. Agriculture and dairy farming are the  
 principal occupations of the people, and there  
 are many flourishing industries. The fisheries  
 are also of importance. The chief exports are  
 flax, timber, butter, paper and glass; chief im-  
 ports are agricultural machinery and implements  
 and wood and metal machinery. The tonnage of  
 ships entered in 1935 was 1,045,029 tons. The  
 chief ports are Riga, Libau and Windau. In 1935  
 there were 2,015 miles of railway in operation.

An independent Negro Republic of Western  
 Africa, occupying that part of the coast of North  
 Guinea which is between the rivers Cavalla, S.E.,  
 and Mano, N.W., a distance of about 350 miles,  
 with an area of about 43,000 square miles, and

extending to the interior to latitude  $8^{\circ} 50'$ , a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,000,000 to 1,500,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piassava, palm-oil, coffee, cocoa, ivory, kola nuts and some rubber. The chief imports are dried fish, rice, tobacco, Manchester goods, provisions, spirits, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for eight years, assisted by a ministry; there are two houses of Legislature, the Senate, with 20 members elected for six years, and the House of Representatives with 21 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 400 men. In 1927 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, of which one-half has been issued. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first lien on customs revenues and head moneys. The Loan Agreement also provides for financial supervision by American officials and additional experts to be employed by the Liberian Government. There are 11 ports of entry, including 3 river ports. In 1934, 545 vessels (1,306,807 gross tons) entered; of these 185 (501,898 gross tons) were British.

	1935.
Revenue .....	U.S. \$632,386

#### LITHUANIA.

(Lietuva.)

President, Antanas Smetona, born Aug. 10, 1874; assumed office Dec. 20, 1926; re-elected for 7 years, Dec., 1931.

Prime Minister, J. Tubelis.

Minister of Foreign Affairs, S. Lozoraitis.

Minister in London, His Excellency Monsieur Bronius K. Balutis.

Legation, 10 Palace Gate, W. 8.

Counsellor, H. Rabinavicius.

and Secretary, J. Zmuidzinis.

Agricultural Attaché, K. Gineitis.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16, 1918. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. and E. by Poland, and on the W. by Germany and the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,400,000. Under the *Treaty of Versailles* Germany renounced the sovereignty over the town and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan. 1923, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory has been transferred to Lithuania, as set out in the Convention signed at Paris (May 8, 1924) and ratified Aug. 1925. The total area administered is 945 square miles, with a population of about 150,000, of whom about 38,000 inhabit the town of Memel.

The legislature consists of a single chamber Assembly (*Seimas*), elected by universal adult suffrage, the Executive being entrusted to a council of ministers. After an interval of 9 years elections to the *Seimas* were held in the summer of 1936, and the Assembly met in September.

The chief industries are agriculture and forestry, the chief products of the Republic being rye, wheat, barley, oats and potatoes; the exports are bacon, dairy produce, cellulose, timber, flax and livestock; the chief imports are herrings, cement, coal, metals, textiles and machinery.

	1934.	1935.

CAPITAL, Kovno (Kaunas), on the Niemen (pop. 110,000), other centres being Memel (Klaipeda) on the Baltic (38,000), and Shavli (17,000).

FLAG: Three horizontal bands, yellow, red, green.

#### BRITISH LEGATION.

(Keistuchio gatve 19 Kaunas [Kovno].)

British Envoy Extraordinary and Minister Plenipotentiary to Latvia, Lithuania and Estonia, Sir Edmund St. John Debonnaire John Mounson, Bt. (resident at Riga, Latvia).  
*Chargé d'Affaires*, T. H. Preston, O.B.E.  
Naval, Military and Air Attachés (see Latvia).

\* At par 48.85 Lits = £1 sterling.

## BRITISH CONSULAR OFFICER.

*Kovno* (Keistuchio gative, 19 Kaunas)—*Consul*,  
T. H. Preston, O.B.E.  
Vice-*Consul*, Percy Gent.  
*Memel*—Vice-*Consul*, E. Hoepfner.  
Transit, 2 days.

## LUXEMBURG.

(Grand-Duché de Luxembourg.)

*Grand Duchess*, H. R. H. Charlotte, born Jan. 23, 1896, succeeded (on the abdication of her sister) Jan. 9, 1919; married, Nov. 6, 1919, Prince Felix of Bourbon-Parma. *Heir Apparent*, Prince Jean, born Jan. 5, 1921.  
*Minister of State*, Joseph Bech.

*Consulate-General* in London, Moorfields House, Tenter Street, E.C. 2.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918. By the Treaty of Versailles, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles; the population (1930) 299,993, nearly all Roman Catholics. There is a Chamber of 54 Deputies, elected by universal adult suffrage for 6 years, one half renewable every 3 years. The Grand Duchy is rich in iron-ore. The revenue in 1935 was estimated at 317,694,094 francs, expenditure 315,257,567 francs; debt (Jan. 1, 1935) 773,650,060 francs. There are 328 miles of railway. The capital, Luxemburg (population 54,250), is a dismantled fortress.

FLAG: Red, white, blue.

## BRITISH LEGATION.

*British Envoy Extraordinary and Minister Plenipotentiary*, Sir Esmond Ovey, K.C.M.G., M.V.O. (1934) (*Ambassador at Brussels*).

## BRITISH CONSULAR OFFICES.

*Luxemburg*—*Consul*, Paul List.

## MANCHURIA.

(Manchoukuo.)

*Emperor* (Ko-tei) of *Manchuria*, Henry P'u Yi (styled Emperor K'eng Teh), born Feb. 7, 1906 (succeeded as Chinese Emperor, Nov. 10, 1909; decree of abdication by Dowager Empress, Feb. 12, 1912). Installed as President (Chih-cheng = Administrator) of Manchuria, at Changchun (Hsinking), March 9, 1932; enthroned as Emperor, March 1, 1934.

*Prime Minister*, Chang Ching-hui.

Manchuria, a Republic independent of China since Feb. 18, 1932, and an Empire since Jan 8, 1934, lies north-east of China proper, and is bounded north and north-east by Siberia, west by Inner and Outer Mongolia, south-east by Cho-sen (Korea), and south by the Gulf of Pechihli, the Yellow Sea and "The Great Wall

of China." The Empire comprises the following provinces:—

Province and Capital	Sq. Miles.	Est. Population.
Antung (Antung).....	19,000	2,784,000
Chientao (Yenchu).....	11,300	597,000
Chinchow (Chinchow).....	15,440	3,269,000
Fengting (Mukden)...	35,200	9,496,000
Heiho (Heiho).....	42,470	53,000
Jehol (Chengtch).....	39,400	2,611,000
Kirin (Kirin).....	34,750	4,774,000
Lungkiang (Tsitsihar).....	48,260	2,163,000
Pinkiang (Harbin).....	55,600	4,196,000
Sankiang (Chiamussa).....	41,300	912,000
East Hsingan (Chalantun).....	41,630	57,000
West Hsingan (Lapanshang).....	31,360	402,000
North Hsingan (Hailar).....	63,540	43,000
South Hsingan (Wangyehmaio).....	30,830	588,000
Total.....	508,080	31,945,000

The above 11 Provinces were demarcated in 1931, largely with reference to the main lines of communications, i.e., the Yalu and Amur rivers and certain trunk railways. Certain racial factors have also been considered, for the Chientao contains a high proportion of the Korean immigrants, while four-fifths of the Mongols, who total about 600,000, are to be found in Hsingan. In 1935 the population of Manchuria was stated to have been composed as follows:—

Chinese and Mongols .....	30,190,526
Japanese .....	629,417
Koreans .....	552,103
Other Nationalities .....	98,431

Total..... 31,470,477

Under the Constitution promulgated March 9, 1932, the Head of the State publishes and sanctions enactments of the legislature (*Fuan*) and has also the power of issuing decrees (having the force of law) with the consent of the Council of State. The Cabinet is nominated by the Emperor.

Manchuria consists mainly of fertile agricultural land, and about half the cultivable land is worked, principally under soya beans and other pulse, kaoliang (the main food of the people) millet, maize, wheat and rice; cotton and tobacco are also grown. The live stock (1933) included 1,645,000 cattle, 3,257,000 horses, 2,661,000 sheep and 8,650,000 pigs; wool and furs are largely exported, and lumbering is an important industry. Mineral products include salt, coal, iron ore, lead, copper, gold and manganese. Apart from the Kuantung Leased Territory, factories have recently been established in large numbers at Mukden for the manufacture of a wide range of consumption goods, including textiles, beer, and metal products, and at Newchwang and elsewhere. There are important flour and oil mills at Harbin and other towns. At Anshan and Fushun, near Mukden, important steel and shale oil factories have commenced operations. These projects and the construction of the new capital have resulted in a building boom. The principal articles of export are soya beans, bean cake, coal, millet, ground nuts, cotton yarn, maize, sulphate of ammonia, hemp seed salt, bean oil, wild raw silk and pig iron. The principal imports are flour, cotton fabrics, tobacco leaves, raw cotton,

gunny bags, sugar, iron and steel, vehicles, machinery and tools, silk goods, electrical appliances, paper, rice and woollens. Manchoukuo State Railways have a total length of nearly 7,000 miles, owing to the present energetic construction policy.

The principal towns are: Mukden, with a population estimated in 1935 at 500,000, Harbin (482,000) HSINKING, the capital (230,000), Antung (164,000) Kirin (141,000) and Newchwang (137,000). Dairen is the most important port for Manchurian trade, the chief ports in Manchoukuo itself being Newchwang (Yingkow), Antung and Hulutao. Three ports are being constructed in North Korea which will greatly improve communication between North Manchoukuo and Japan.

	1936.
Revenue (Budget est.) .....	M\$231,553,077
Expenditure " .....	173,684,375
	1935.

 War, Gen. Andrés Figueroa.

Minister in London, Señor Licenciado Narciso Bassols, 48, Belgrave Square, S.W.1.  
 Consul-General in London, Señor Don Gustavo Luders de Negri, 8, Halkin Street, S.W.1.

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 28 states, 3 territories, and the federal district of Mexico, making in all 32 political divisions, comprehending an area of 768,883 square miles, with a population (1935) of 18,500,000. Mexico is rich in archaeological remains, and work is proceeding in every district to remove the

earth covering which for many centuries has kept them from view. Near the City of Mexico are a number of pyramids built to a great extent with boulders from the river beds. The *Pyramid of the Sun* (now called "Tonatiuh") is 761 feet from N. to S., and 725 feet from E. to W., and rises to a height of 216 feet. The *Pyramid of the Moon* (now called "Mextli") is 426 feet X 511 feet, and rises to 150 feet. The staircases vary in construction between terrace and terrace and are found to be intact. Other places of interest are near Oaxaca, Papantla, Zempoala on the Continent, and Uxmal, Chichen-Itza and other points on the E. side of Yucatan.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of Lower California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepetl ("El Pico de Orizaba") on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Patzcuaro* and *Xochimilco*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude, the rainy season lasting from June to October. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or *Toltecs*, gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*. Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810-1821. From 1837-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1820 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire and the execution of the Emperor gave rise to the

\* The remains of *Hernan Cortes* have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

new Republic, which has endured to the present day. The most prominent of modern Presidents is *Porfirio Díaz*, who ruled (except during 1880-4) from 1876 to May 25, 1911. Since the fall of Díaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 25, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by *de la Huerta* as provisional President, and on Dec. 1, 1920, General Obregon, whose *coup d'état* had caused the downfall of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connexion with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners, caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recognised the Obregon administration. General Obregon was afterwards assassinated. In 1925 relations between Great Britain and Mexico were re-established, and an Anglo-Mexican Special Claims Commission has since met and concluded its labours in February, 1932.

Under the Constitution of Feb. 5, 1917 (amended 1933 and 1934) Congress consists of a Senate of 58 members, elected for 6 years, and of a Chamber of Deputies of 173 members elected for 3 years.

Vera Cruz, Tampico, Progreso, and Puerto Mexico are the chief ports on the Atlantic or Gulf of Mexico, and Manzanillo, Mazatlan, Acapulco, Salina Cruz, and Guaymas on the Pacific. There were 14,400 miles of railroad open on Sept. 1, 1936, and (1926) 54,670 miles of telegraph. The railroads have in a large measure been built by American and English companies. Improvements and new construction are now being undertaken (1936), in various parts of the Republic, on the National lines. The Highway Commission of Mexico has constructed 2,378 miles of road, finished with asphaltic treatment, and there is in addition a total of some 4,000 kilometres of roads in the Republic which are passable. There is a network of 50,000 kilometres of old roads, of which about 12,000 are impassable. The Federal Governments' Six-years Plan (promulgated in 1934) calls for the construction of further asphalted roads. The international highway from Laredo, Texas, to Mexico City, which is part of the projected Pan-

American Highway, has been completed and was formally opened July 1, 1936. It is passable at all seasons. The city of Mexico is linked with all the larger towns by telephone; the line is now extended to the U.S. border and thence is connected to Canada and Europe. The city is connected by wireless to U.K. and Europe. The principal air routes from Mexico City are to Brownsville, to Los Angeles (*via* El Paso) to Mérida (with connexion to Havana and Miami) and to Tapachula (with connexion to Guatemala, Central American Republics and Panama).

The principal agricultural crops are maize, beans, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguery, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines, and Mexico produced 40,234,902 barrels of petroleum in 1935. Domestic consumption of petroleum products is increasing year by year, especially that of gasoline. The mineral production is stated at:—

Mineral.	Kilograms.	
	1934.	1935.
Gold .....	20,572	21,223
Silver .....	2,306,168	2,351,087
Lead .....	166,333,000	184,193,186
Copper .....	44,268,000	39,372,877
Zinc .....	125,188,000	136,321,457
Mercury .....	158,000	216,392
Antimony .....	2,668,000	4,509,675
Arsenic .....	7,680,000	9,950,386
Graphite .....	3,888,000	6,975,324

#### Petroleum Production.

Year.	Barrels.	Year.	Barrels.
1927	64,120,000	1932	32,802,285
1928	50,151,000	1933	34,000,830
1929	44,688,000	1934	38,171,946
1930	39,600,000	1935	40,234,902
1931	33,050,000		

Woollen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties. The imports consist very largely of machinery and implements for industry, mining and agriculture, and of chemical products. Only textiles of the finest quality are now imported. Of the exports 20 per cent. consist of silver and gold, while 35 per cent. represents the value of petroleum and its derivatives, mainly shipped from Tampico. Other important exports are copper, lead and zinc, also sisal hemp (henequen), coffee, cotton, resins, fresh vegetables and dried vegetables.

The monetary system has now been placed on a basis of managed currency and since November, 1933, the *peso* has been pegged at 3'60 = U.S. \$1. The silver *peso* was reintroduced into circulation on Aug. 31, 1936; this did not affect exchange rates. In Sept., 1922, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold *pesos* in 1923, rising by 5 million gold

*pesos* annually to 50 million gold *pesos* in 1927. However, this agreement with the International Commission of Bankers was amended in 1925, after the Government had found it necessary to suspend the service of the debt in June, 1924. The effect of the 1925 agreement was to eliminate the debt of the National Railways of Mexico from the public debt, thereby reducing this from 1,561 million Mexican gold *pesos* to 800 millions, as at Dec. 31, 1925. Furthermore, the 1925 agreement provided for the postponement of payment of the 75 million *pesos* (which had not been met in 1924 and 1925) until 1928-1935. Service of the debt was resumed in 1926, but again suspended: a further agreement was signed on Dec. 22, 1931, providing for resumption of payments on Jan. 1, 1934; this agreement was not approved by the Mexican Congress and so is not operative. A total sum of \$45,000,000 has been received by the committee of bankers. The total debt, funded and floating and interest, was stated to be \$1,253,105,699 as at Dec. 31, 1928, and has not varied greatly since that date, except by the addition of accumulated interest. The External Debt is (Sept., 1936) the subject of negotiation between the Ministry of Finance and the International Bankers Committee.

The official language of the country is Spanish, but about 50 Indian dialects are also spoken.

Estimated revenue ..... (1936) \$286,000,000  
Estimated expenditure ..... (1936) 287,198,785

	1934.	1935

#### MONACO.

(Principauté de Monaco.)

Sovereign Prince, Louis Honoré Charles Antoine, born July 12, 1870, acc. June 26, 1922.

Heiress Apparent, Hereditary Princess Charlotte Louise Juliette (Duchess de Valentinois), born Sept. 30, 1898; mar. March 19, 1920, Prince Pierre de Monaco (Count de Polignac), and has issue a daughter, Princess Antoinette, born Dec. 28, 1920, and a son, Prince Rainier, born May 31, 1923.

Minister of State, Monsieur Maurice Bouilloux-Lafont.

Secretary of State, M. Henri Mauran.

Consul-General in London, C. Nuthall Foreman.

„ Bruton House, Bruton Street, W. 1

Chancellor, Charles E. Isbell.

A miniature Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 3 miles long and 1½ miles broad, with (1933) 22,994 inhabitants, and a yearly average of over 1,500,000 visitors. The whole available ground is built over, so that there is no cultivation. Monaco has a small harbour (24 ft. alongside quay), and the import duties are the same as in France. There is an Assembly of 12 elected members and a Council of Government of 3 ministers. There is a local police force of 200 men.

CAPITAL, Monaco.

FLAG: Red and white.

#### MOROCCO.

(Moghreb el aksa "The Farthest West")

French Protectorate, and Spanish and International Tangier Zone.

Sultan, Sidi Mohamed, born 1911; proclaimed Nov. 20, 1927.

Morocco, the largest of the Barbary States, is situate in the north-west of the African Continent, between 27°-36° N. lat. and 1°-11° 40' W. long., with a total area estimated at 270,280 square miles, and a population of over 7,000,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the

dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsula of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir, formerly known as the "Gate of the Sudan."

The climate of Morocco is generally good and healthy, especially on the Atlantic coast. The country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from November to April, but the summer-heat figures at all the intervening ports (Larache, Port Lyautey-Mehedia, Rabat-Sale, Fedalah, Casablanca, Mazagan, and Safi) are markedly higher; the last-named port being the hottest. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

**Government.**—Morocco is divided into three zones—the *French Zone*, the *Spanish Zone*, and the *International Tangier Zone*. France is the paramount power, and represents the Sultan of Morocco in all foreign relationships. Spain has had relations with Morocco for many centuries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence" which extends over the whole of Northern Morocco, with the exception of the International zone round Tangier. In this sphere occurred the joint Franco-Spanish military operations against Abd el Krim, the Rif leader, which culminated in the surrender of Abd el Krim in May, 1926, and the final pacification of the French and Spanish zones in the following year. Ceuta (on the Mediterranean coast, opposite Gibraltar), in 35° 54' N. lat. and 5° 18' W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the Peñon (Rock) of Alhucemas, Peñon de Velez, and Zaffarin islands are Spanish possessions. A special international régime was designed for Tangier before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this régime from being put into operation. A new Convention instituting the *International Zone* of Tangier was, however, signed by the three governments at Paris on Dec. 18, 1923, and was brought into force on June 1, 1925. The Convention was modified by a Protocol signed at Paris, July 25, 1928, by the three Powers and Italy, who thereby adhered to the Convention. Both instruments have been adhered to by Belgium, The Netherlands, Portugal and Sweden, but the United States have not yet (Aug., 1935) signified their acceptance, and therefore retain their Capitulatory rights in the International Zone. The Convention provides for a complete international administration of the zone, except as regards native affairs, which are reserved to the Sherreefan authority.

**Production, Industry, &c.**—Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the

northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges, and grapes, the latter growing also in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the egg industry is of importance. Important deposits of coal, manganese, iron ore, lead and zinc, as well as other minerals in smaller quantities, have been prospected, but their exploitation awaits transport facilities; the discovery of what may prove to be an important oil deposit was made at Jebel Tseifat (French zone) in the spring of 1934 and gypsum has been located in the Spanish zone. Gold and silver are also found. Phosphates are exported in increasingly large quantities and constitute a great source of wealth for the French zone. The trade of Morocco is chiefly with France and Algeria, Great Britain, Italy, Spain and Japan. The chief imports are cottons, sugar, motor vehicles, petroleum, building materials, soft goods, candles, tea and edible oils; the exports are chiefly grain, phosphates, eggs, hides and skins and wool. The Spanish zone exports iron ore, lead (from Melilla neighbourhood) and cork. The unit of currency in the French protectorate is the Moroccan franc, which is closely allied to the French franc, while in the Tangier zones the Moroccan franc is the lawful currency, while the Spanish *peseta* is legal tender and the *Hassani peseta* is tolerated, in the Spanish zone the two last of these currencies are current.

**Communications.**—The French Protectorate authorities are engaged in the serious development of normal gauge railways in their zone, and (Dec. 1932) 1,600 kilometres of normal and 872 kilometres of narrow gauge track are in working order. In addition, the completion of the Tangier-Fez full gauge system gives through service between Tangier and the principal towns of the French zone, and a normal gauge line links Fez to the Algerian frontier at Oudjda. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Gibraltar, Rio Martin, Melilla, Tarifa and Oran, also between Casablanca and Brest. There are wireless stations at Tangier, Ceuta, Melilla, Tetuan (military), Rabat, and Casablanca; inland lines have been built by the French connecting all important places in their zone, as well as to the borders of the Spanish zone, and the latter line is being extended to Tangier. The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta *via* Tetuan, linking Melilla to the International Bridge (French zone), and the Tetuan-Melilla road, *via* Targuist and Villa Alhucemas, in the North; and to Arzila, Larache, and the French zone in the South. The French zone is well equipped with good main and secondary roads. *Air Services* are maintained between Casablanca and Toulouse (daily), and Casablanca and Dakar (weekly).

The principal *Harbours* are Casablanca, and Ceuta (for Tetuan), Melilla (for eastern part of Spanish zone), Tangier, Larache, Rabat, Mazagan, Safi, Port Lyautey and Mogador; and Agadir (for South Morocco).

**External Trade.**—The imports into the *French Zone* in 1935 were valued at 1,319,138,000 francs, and exports from French zone, 1935, 621,380,000 francs. The imports into the *Spanish zone* were valued at 64,004,657 pesetas in 1935, and the exports at 26,178,393 pesetas. The

imports into the *Tangier Zone* (1934) were valued at 129,013,638 francs and the exports from the zone at 12,866,417 francs.

CAPITAL of French zone, Rabat, population 52,000 (Fez in the North, and Marrakesh in the South being the old capitals of the Sultans).

CAPITAL of Spanish zone, Tetuan, population 48,000 (principal ports, Larache and Rio Martin, for Tetuan).

CAPITAL of International zone, Tangier, population 45,000.

Other towns (with populations exclusive of French army of occupation) are Fez (107,843), Marrakesh (193,582), Meknes (56,770), Salé (25,821), Casablanca (161,113), Rabat, with Salé (77,821), Mazagan (19,601), Saffi (26,158), and Oudjda (29,220).

FLAG: Red, with green pentagram (the Seal of Solomon).

Naval Attaché, Lieut.-Com. A. de Booy.

Agricultural Adviser (40 Cleveland Square, W. 2.), B. Gerritzen.

Chancellor, M. L. Zaanberg.

Consul-Gen., Th. H. de Meester, 28 Langham Street, W. 1.

Consul, G. P. Luden.

Vice-Consul, A. Furnée.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat.  $50^{\circ} 46' - 53^{\circ} 34'$  N. and long.  $3^{\circ} 22' - 14^{\circ} 14'$  E., consisting of 12 provinces, and containing a total area of 13,514 square miles, with a population Dec. 31, 1935, of 8,474,409. The majority, about 55 per cent., belong to the several Reformed Churches, and the remainder are Roman Catholics, with about 115,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The highest point is at Vaals, 656 ft. above mean sea level, but almost half the country is below the mean level of the sea. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, sugarbeet, chicory, flax, hemp, bulbs and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, sugar, chemical and pharmaceutical products, matches, perfumery, bicycles, boots and shoes, starch, potato flour, engines, metal substances, iron and steel, wireless sets and parts works of art in gold and silver, incandescent lamps, machinery, motors, paper, cardboard, printing, oils, beer, "geneva" and other liqueurs. Coal production (1934) 12,340,000 tons. Diamond-cutting, and at one time, employed numerous hands in Amsterdam.

Government.—The Kingdom of the Netherlands was constituted by the Treaty of London (June 14, 1814) under a Prince of Orange-Nassau, a descendant of the house which has taken a leading part in the destiny of the nation since the 13th Century. The States-General comprises the *Eerste Kamer* of 50 members, elected for 6 years by the Provincial Diets; and the *Tweede Kamer* of 100 members, elected for 4 year by men and women voters of 25 years and upwards. Members of both chambers are paid.

Defence.—The Home Forces consist of a conscript army, with an annual levy of 25,232 men, producing a first-line army of 113,400, or (including reserves) 270,000 all ranks. The Royal Navy consists of 12 protected and 60 unprotected vessels.

**Education.**—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, Nijmegen (R.C.), and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Tilburg (Commercial).

**Communications.**—The total extent of navigable rivers and canals is 4,687 miles, and of first-class roads 1,250 miles. There were 2,235 miles of railroad open in 1934, 504 miles of telegraph cable, and 7,441 miles of telephone cable. Air services connect Amsterdam and Rotterdam with Groningen, Enschede, Eindhoven and Flushing. The mercantile marine, on Jan. 1, 1936, consisted of 823 steam and motor vessels of 5,518,000 cubic metres gross. In 1934 20,465 vessels entered and cleared at the ports.

An Act for the damming and draining of parts of the Zuider Zee was passed in 1918. The first reclamation is almost fully developed and plans have been published to reclaim a further portion in the north-east region. The dam was completed in 1932.

#### NETHERLANDS COLONIES.

##### I. Netherlands' East Indies:—

**Governor-General**, Jonkheer Dr. A. W. L. Tjarda van Hakenborch Stachouwer, appointed 1936.

"Netherlands' India" comprises the islands of Java and Madura, the island of Sumatra, the *Riouw-Lingga Archipelago* (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of Banka and Billiton, part of the island of Borneo, Celebes Island, the *Molucca Islands* (Ternate, Halmahera, Burn, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of *New Guinea*, part of *Timor Island*, and the islands of Bali and Lombok, with a total area of 730,000 sq. miles, and a population estimated at 53,000,000. The administrative capital is Batavia (pop. about 260,000).

Java and Madura (51,000 sq. miles, pop. 1930, 40,000,000) furnish sugar, tobacco, tea, coffee, tin, rubber, and other products for exportation. Certain parts of the "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1929) a colonial army of 1,293 officers and 37,100 men. The colonial revenue for 1934 was estimated at fl. 447,900,000 and the expenditure at fl. 563,400,000. The trade of Netherlands India was valued in 1930-31 at fl. 798,000,000 for exports and at fl. 609,000,000 for imports. The trade with Great Britain in 1933 was valued at £2,191,397 for imports from, and at £3,408,585 for exports to Great Britain.

**BRITISH CHAMBER OF COMMERCE FOR NETHERLANDS E. INDIES**, Batavia, Java (and Shell-Mex House, Strand, London, W.C.2).

##### II. Netherlands' West Indies:—

"Netherlands' West Indies" comprise the mainland colony of Surinam ("Dutch Guiana") in South America, and certain islands in the West Indies known as the "Colony of Curaçao" (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba). The area of Dutch Guiana is about 67,000 sq. miles, with a population (1934) of 164,085; area of Curaçao, 436 sq. miles, population (1934) 79,395. The administration capital of Surinam is Paramaribo (pop. 52,000); the capital of Curaçao is Willemstad (pop. 21,000).

## NICARAGUA.

(República de Nicaragua.)

President Señor Doctor Don Carlos Brenes Jarquin.

Minister for Foreign Affairs, Señor Dr. Don Manuel Dehayle.

Minister in London, Señor Dr. Don Constantino Herdocia.

Legation, 21 Queen Victoria Street, E.C.4.  
Vice-Consul, F. V. Cock, 25 Union Court, E.C. 2.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'—15° N lat. and 83° 40'—87° 38' W. long., containing an area of 51,660 English square miles and a population (1930) of about 750,000, of whom about three-quarters are mixed blood and the rest of pure Spanish descent and Indians, including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century, forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov. 20, 1921 (amended 1923) and is that of a centralised republic. The President is elected by direct suffrage for four years. Congress comprises a Senate of 24 members and a Chamber of Deputies of 43 members.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports.

There are (1923) 200 miles of railway, 2,842 miles of telegraph and 3,216 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May–Nov.), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 70 per cent. of the total trade. Bluefields and Puerto Cabezas, on the E. coast, are mainly concerned with the shipment of bananas and timber to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 60 per cent. of the population being illiterate.

The official language of the country is Spanish.

	1933.	1934.
Public revenue .....	*C\$2,843,579	*C\$3,724,793

Counsellor, H. C. Berg.

Secretary, G. F. C. Collin.

Consul-General, G. Couradi, 26–27 King Street, E.C. 2.

Consul, Jacob Gregg.

Norway, an independent kingdom in the western and northern portion of the Scandinavian peninsula, founded in 872 (fundamental law of May 17, 1814), was united with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved. There is a bi-cameral legislature (*Storting*) of 150 members, of whom one-quarter from the Upper Chamber (*Lagting*) and the remainder the Lower Chamber (*Odelsting*), in which all legislation arises.

Norway is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces (*fylker*) and comprises an area of 124,455 sq. miles with a population (1935) of 2,884,300. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about

one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The chief industries are agriculture and forestry, manufactures, fisheries and shipping. Agriculture and forestry give employment to one-third of the population. Manufactures are aided by great resources of water power, estimated at 9,200,000 kw., of which 14 per cent. are utilized. In normal years the quantity of fish caught by Norwegian fishing vessels is greater than that of Great Britain. The Norwegian merchant fleet ranks fourth among the mercantile fleets of the world. The most important articles imported are raw materials, motor spirit, fuel and other oils; coal, ships and machinery; together with cereals, fruits, beverages and manufactures of silk, cotton and wool. The exports consist chiefly of fish and products of fish (as canned fish, whale oils), pulp, paper, iron ore and pyrites, stone, cement, calcium carbide, aluminium, ferro-alloys, nitrate of lime, zinc, cyanide, &c.

**Defence.**—Service in the National Militia is universal and compulsory, about 14,000 being trained annually for a period of 84 days. In time of war all males between the ages of 18 and 55 are liable for service. The Navy consists of 4 ironclads, 19 torpedo-boats, 3 destroyers, 9 submarines, and several mine-layers. There are 60 seaplanes and aeroplanes.

**Education** is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo was attended in 1935 by 3,905 students.

**Communications.**—The total length of railways open in 1935 was 2,464 miles, of which 229 miles were private lines. The length of telegraphs and telephones in 1935 was 35,410 miles (State, 23,130) with 651,970 miles of wire (State, 466,560 miles). The mercantile marine, Jan. 1, 1936, consisted of 3,941 vessels, of 4,070,860 gross tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1934 to about 404,400,000 kroner.

#### SVALBARD.

(Spitsbergen and Bear Island.)

By Treaty (Feb. 2, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognised by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway.

The Svalbard Archipelago lies between 74°-81° N. lat. and between 10°-35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stordil Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. The principal mineral is coal. In 1935 the coal export was 614,257 tons. The wintering force in 1934-35, was 1,838 strong; the archipelago is also visited by hunters for seal, foxes and polar bears.

Svalbard revenue (1936-37) ..... kroner 156,500

do. expenditure (1936-37)..... " 156,500

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsø, 650 miles from Murmansk, and 1,300 miles from

Aberdeen. Transit from Tromsø to Green Harbour (the postal station, with a high-power Telefunken wireless station)  $2\frac{1}{2}$  to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean ( $70^{\circ} 49'$ — $71^{\circ} 9'$  N. lat. and  $7^{\circ} 53'$ — $9^{\circ} 5'$  W. long.) was joined to Norway by law of Feb. 27, 1930.

BOUVET ISLAND, in the Antarctic ( $54^{\circ} 26'$  S. lat. and  $3^{\circ} 24'$  E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER THE FIRST'S ISLAND, in the Antarctic ( $68^{\circ} 50'$  S. lat. and  $90^{\circ} 35'$  W. long.), was declared a dependency of Norway by resolution of Government, May 1, 1931.

## PANAMA.

(República de Panamá.)

President (1935-1940), Señor Dr. Don Juan Demóstenes Arosemena; assumed office Oct. 1, 1936.

Minister in London, Señor Don Galileo Solís.

Consul-General in London, Señor Don Eligio Ocaña, 232 Finsbury Pavement House, E.C. 2.

Vice-Consul, L. J. Lopez.

Chancellor, F. Wright.

Panama, on the Isthmus of that name which connects N. and S. America, was formerly one of the nine Departments of Colombia. After a revolt (Nov. 3, 1903) it declared its independence and established a separate Government, with a single chamber legislature meeting every two years and now consisting of 32 elected members. The area of the Republic is 31,800 square miles, the population 467,459 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one-half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the Atlantic and Pacific oceans. The monetary unit is the *Balboa* (= \$1 U.S.); no Panamanian paper currency is issued, and U.S. \$ bills of all values are in circulation in the Republic and in the Canal Zone.

## THE PAPAL STATE.

(Stato Città Vaticana.)

Sovereign Pontiff (66th), His Holiness Pope

Pius XI. (Achille Ratti), born at Desio, March 31, 1857, elected Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church (*Santa Sede* or Holy See) is vested in the Pope of Rome, the Sovereign Pontiff. For many centuries the Sovereign Pontiff exercised temporal power, and in 1859 the Papal States had an area of 17,218 square miles, with a population of 3,124,688. During the reign of Pius IX. (1846-1878) the Papal States of Romagna, Umbria and the Marches were incorporated in the Kingdom of Sardinia and with the remaining States (Rome, Comarca, Viterbo, Civita Vecchia, Velletri and Frosinone) became part of Unified Italy in 1870. The territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, and the temporal power of the Pope was in suspense until the treaty of Feb. 11, 1929, which recognised the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 lire in cash and the income at 5 per cent. on 1,000,000,000 lire State bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power.

## LIST OF POPES FROM 1591.\*

Sovereign Pontiff.	Family Name.	Elected.

## BRITISH LEGATION,

(Palazzo del Drago Via Quattro Fontane 20,  
Rome 5.)

*British Envoy Extraordinary & Minister Plenipotentiary to the Holy See*, Francis D'Arcy Godolphin Osborne, O.M.G. (1935).

*1st Secretary*, W. I. Mallet.

*Temporary Secretary*, Roger Thynne, M.B.E.

## PARAGUAY.

(República del Paraguay.)

*Provisional President*, Don Rafael Frano, assumed office, Feb. 18, 1936.

*Foreign Affairs*, Dr. Juan Stefanich.

*Minister in London*, (vacant).

*Consul-General in London and Chargé d'Affaires*, Señor Dr. Don Rogelio Espinoza, 12 Russell Square, W.C. 1.

An inland State of South America, situate between 20°–6° 30' S. lat. and 54°–62° W. long. The area of Paraguay (exclusive of the Chaco) is computed at 61,600 square miles, and it contains a population estimated in 1934 at about 902,000.

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814–1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840–1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The country is at present ruled by a Provisional Government, which seized the power as the result of a *coup d'état* Feb. 17, 1936. Congress has been dissolved, but elections are to be held and the constitution (adopted in 1870) is to be amended.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asuncion; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paraná-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, formed the subject of a long-standing dispute with that country and led to war in Sept., 1932, but an armistice was signed with Bolivia June 12, 1935. The Chaco is practically a dead level, though a slight and uniform rise westward is

now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, oranges and cassava (manioc), maize, rice, sugarcane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of *Yerba Maté* (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 51½ hours. Train ferries enable the run to be accomplished without break of bulk. River steamers also connect Buenos Aires and Asuncion (3 to 5 days). The language is Spanish.

*Lima*, 7,020 miles; transit, *via* New York & Colon, 21–27 days; *via* Liverpool & Colon, 17 to 26 days.

## POLAND.

(Rzeczpospolita Polska.)

*President*, Monsieur Ignacy Mościcki, born Dec. 1, 1867; elected June 1, 1926; re-elected May 8, 1933.

*Inspector-General of the Army*, Marshal E. Rydz-Śmigły.

## MINISTRY.

(May 15, 1935).

*Prime Minister and Minister of the Interior*, Felicjan Sławoj-Skłodowski.  
*Foreign Affairs*, Józef Beck.  
*War*, Tadeusz Kasprzicki.  
*Justice*, Witold Grabowski.  
*Finance*, Eugeniusz Kwiatkowski.  
*Agrarian Reform and Agriculture*, Juljusz Ponia-towski.  
*Industry and Commerce*, Antoni Romer.  
*Communications*, Juljusz Ulrich.  
*Posts and Telegraphs*, Emil Kaliński.  
*Social Welfare*, Marjad Zyndram-Kosiński.

*Ambassador in London*, Count E. Raczyński.

*Embassy*, 47 Portland Place, W. 1.

*Counsellor*, Antoni Jazdzewski.

*1st Secretary*, Count R. Michałowski.

*2nd Secretaries*, J. Tomaszewski; A. Baliński.

*Commercial Counsellor*, Z. Merdiuger.

*Financial Counsellor*, W. Zbijewski.

*Consul-General*, London, K. Poznański, 2 Thorn-haugh Street, W.C. 1.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This State extended in the year 1772 over an area of about 285,000 sq. miles, and included a population of about 13,000,000. The political boundaries of the Republic are the Baltic Sea, Germany (East Prussia), and Lithuania, in the N.; Czechoslovakia in the S.; Rumania in the S.E.; Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 150,000 sq. miles, with a population (Jan. 1, 1935) of 33,418,000 (of whom in 1931 22,208,076, or 69.1 per cent., were Poles, and 9,924,860, or 30.9 per cent., other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign, and Poland was enabled to conclude peace on favourable terms.

*Government*.—A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. Under the new Constitution of 1935 the Legislature (*Zgromadzenie Narodowe*) consists of a Senate of 96 members and of a Diet (*Sejm*) of 208 Deputies. The original Constitution voted in 1921 was very liberal, but a new Constitution was introduced in April, 1935, shortly before the death of Marshal Piłsudski, considerably restricting the powers of the Legislature, especially of its Lower Chamber, and investing the President of the Republic with quasi-dictatorial authority in many respects. The Diet (*Sejm*) is still elected by universal (male and female) suffrage as in the 1921 Constitution, but candidates can only be nominated by electoral committees composed of representatives of local authorities and of various commercial, industrial, agricultural, professional and labour organizations. One-third of the Upper Chamber (Senate) is appointed by the President, and the remaining two-thirds are chosen by electoral colleges elected by a restricted franchise.

*Production*.—Mining, cotton, metal work, agriculture, sugar, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia); iron, zinc, lead ore, mineral and potassium salts, and in Galicia (Boryslaw) are famous oil fields; the output of crude oil (1935) was 514,673 metric tons. The chief manufactures are textiles, those of minor importance being machinery and metal works, chemicals, and leather. The exports are principally coal, timber, spelter, agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

*Defence*.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized.

*Education*.—Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

*Communications*.—There are about 12,500 miles of railway and over 16,100 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 3,100 miles of navigable waterways exist on the Vistula, Narew, Warta, Dniester, Prut, Prypec, Niemen and Dzuina, of which about 1,250 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed. A purely Polish port has been constructed at Gdynia, north of Danzig, with a total water area of 790 acres,

and a capacity of over 7 million tons a year. During 1935 Gdynia handled 6,252,606 tons of goods. Direct railway communication is being built linking Gdynia with Upper Silesia and Czechoslovakia on the one hand, and with Rumania and the Black Sea on the other.

*Commercial Attaché*, Senhor Joaquim de Barros  
Ferreira da Fonseca.

Portugal lies between 36° 58'—42° 9' 12" N. lat.  
and 6° 11' 48"—9° 29' 45" W. long., being 302 miles  
in length from N. to S., and averaging about 117 in  
breadth from E. to W. Continental Portugal con-  
tains an area of 34,500 square miles, with a popu-  
lation in 1930 of 6,826,000, and the Portuguese  
Colonies a total area of 802,700 square miles, with  
a population estimated at 8,245,000.

From the close of the eleventh century until  
the year 1910 the government of Portugal was a  
monarchy, and for many centuries included the  
Vice-Royalty of Brazil, which declared its in-  
dependence in 1822. In 1910 an armed rising in  
Lisbon drove the \*King and Royal family into  
exile, and the National Assembly of Aug. 21,  
1911, sanctioned a Republican form of govern-  
ment. Under the Constitution of 1933 the  
President is elected for seven years by direct  
vote of the electors. The Prime Minister is  
appointed by the President, who also appoints  
the other Ministers on the recommendation of  
the Prime Minister. The Government is re-  
sponsible only to the President. There is a single  
Chamber Legislature (*Assemblea Nacional*) of 90  
members elected by direct vote of the electors.  
In practice the candidates are exclusively those  
put forward by the Government party. There  
is also a "Corporate Chamber" consisting of  
representatives of local authorities and in-  
dustrial, commercial and other "Corporations"  
(organisations of employers and employees), to  
which all bills introduced into the Chamber  
must be submitted for its opinion. The Legis-  
lature is in session for three months in the year.  
In the recess the Government legislates by  
decree-laws. Both men and women enjoy the  
franchise; but there are certain educational or  
tax-payment qualifications.

The chief agricultural products of continental  
Portugal are wheat (now grown in more than suffi-  
cient quantity to provide for the requirements of  
the country), barley, oats, maize, flax, hemp,  
and the vine in elevated tracts; in the low-  
lands, rice, olives, oranges, lemons, citrons, figs,  
vines, and almonds. There are extensive forests  
of oak, chestnut, sea-pine, and cork, the culti-  
vation of the vine and the olive being among  
the chief branches of industry; the rich red  
wine known to us as "port" is shipped from  
Oporto. Its mineral products are important—  
copper, lead, tin, antimony, coal, manganese,  
iron, slate, and bay-salt, which last, from its

\* Ex-King Manoel, of the House of Braganza, was  
born Nov. 25, 1809, and succeeded on the assassination  
of his father Feb. 1, 1908; died at Fulwell Park, Trick-  
enharn, Middlesex, July 2, 1932.

hardness and purity, is in demand. Its manufactures consist of gloves silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 25 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, tin, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The mercantile marine (1933) numbered 46 steam vessels (above 1,000 tons), with a tonnage of 188,400. Railways 2,106 miles in extent were open for traffic in 1932, and there were 5,496 miles of telegraph line in 1932.

**Defence.**—Military service is compulsory, but only about 25% of those coming to military age each year are taken. The numbers serving with the colours in Portugal are about 4,000 officers and 45,000 other ranks. The mobilisation strength of the army amounts to some 7,000 officers and 400,000 men. The navy consists of approximately 700 officers and 3,700 ratings, manning a total of nearly 40 destroyers, sloops, submarines and gunboats, of which 5 destroyers, 6 sloops, and 3 submarines are of modern construction. The total number of Service aeroplanes is about 100.

**Education** is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and about 52 per cent. of the population above 7 years old are illiterate. Secondary education is mainly conducted in State lycæums, but there are also private schools. There are also military, naval, technical and other special schools. There are Universities at Coimbra, Lisbon and Oporto.

#### MADEIRA AND THE AZORES.

Madeira and The Azores are administratively  
parts of Portugal.

The *Madeiras* are a group of islands in the  
Atlantic Ocean about 520 miles west of Lisbon,  
and consist of Madeira, Porto Santo and 3 unin-  
habited islands (Desertas). The total area is  
314 square miles, with a population of 212,601  
(1930). Funchal in Madeira, the largest island  
(270 square miles), is the capital, with a popula-  
tion of 31,352; Ponta do Sol (6190), Machico  
(8,619).

The *Azores* are a group of 9 islands (Flores,  
Corvo, Terceira, São Jorge, Pico, Fayal, Graciosa,  
São Miguel and Santa Maria) in the Atlantic  
Ocean, with a total area of 922 square miles and  
a population of 253,935 (1930). Angra, in Ter-  
ceira, the capital of the group, had a population  
of 10,642 in 1930; Ponta Delgado (18,022), Horta  
(7,643).

#### PORTUGUESE COLONIES.

CAPE VERDE ISLANDS, off the west coast of  
Africa, consists of two groups of islands, Wind-  
ward (Santo Antão, São Vicente, Santa Luzia,  
São Nicolau, Boa Vista and Sal) and Leeward  
(Maio, São Tiago, Fogo and Brava) with a total  
area of 1,516 square miles and a population

of 150,553. Estimated revenue and expenditure 1936 £170,420; imports (1934) £438,536; exports, £31,050; shipping entries (1934) 757 vessels. Capital, Praia (6,000). Coaling centre, Sao Vicente.

SAO THOMÉ and PRINCIPE ISLANDS, in the Gulf of Guinea (area 372 square miles, population 59,060). Estimated revenue and expenditure (1936), £82,130; imports (1935), £168,370. exports, £289,420; shipping entries (1935) 138 vessels. Capital, Sao Thomé (3,187). The fort of St. John Baptist on the Slave Coast is a dependency of the Province of Sao Thomé.

PORTUGUESE WEST AFRICA has an area of about 476,000 square miles and a population of about 4,600,000. Portuguese West Africa, or Angola, with present capital St. Paul de Loanda, (pop. 40,000) and capital designate Nova Lisboa, includes also Kabinda and Portuguese Zaire (N. of Congo). Estimated revenue and expenditure (1935) £1,505,210; imports (1934), £1,518,390; exports, £2,200,220 at 110 Angolas (area=£1). Shipping entries (1934), 820 vessels.

A transcontinental railway from *Benquella* (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Buluwayo and eastwards to Beira is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

PORTUGUESE EAST AFRICA, OR MOZAMBIQUE, Lourenco Marques Inhambane, Quillmane, Tete, Mozambique, Cape Delgado and Nyassa, together with the territory of Manica and Sotola administered by the Mozambique Company under a charter expiring in 1941, has a total area of 297,657 square miles, with a population of 4,028,746. Capital, Lourenco Marques (43,000). Estimated revenue and expenditure, £2,980,490; imports (1936), £2,258,444; exports, £1,599,540; shipping entries (1934), 2,731 vessels.

PORTUGUESE INDIA has a total area of 1,636 square miles, with a population of 579,969, and includes Goa, Damaun, and Diu. Estimated revenue and expenditure (1936), £482,580; imports (1935), 14,185,250 rupees; exports (1935), 2,570,210 rupees; shipping entries (1934) 519 vessels.

MACAU, in China, on the Canton River, has an area of 5 square miles and a population of 157,175. Estimated revenue and expenditure (1936), £395,111; imports (1934), 23,950,458 patacas; exports, 8,571,482 patacas; shipping entries (1934), 2,647 vessels.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,329 square miles, with a population of 474,363. Estimated revenue and expenditure (1936), £128,177; imports (1934), 568,570 patacas; exports (1934), 574,725 patacas; shipping entries (1934) 50 vessels.

#### RUMANIA. (România.)

King, Carol (Charles) born Oct. 13, 1893, succeeded June 8, 1930.

Heir Apparent, H.R.H. Prince Mihai (Michael), Grand Voevode of Alba-Julia, born Oct. 25, 1921, succeeded his grandfather as King, July 20, 1927 (until the return of King Carol).

#### CABINET.

(Aug. 30, 1936.)

President of Council and Minister of Armaments, George Tatarescu.  
Vice-President of Council, I. Inculet.  
Foreign Affairs, Victor Antonescu.  
Finance, V. Antonescu.  
Home Office, D. Luca.

Co-operation, M. Negura.  
Without Portfolio, A. Lapedatu.

Minister Plenipotentiary in London, (vacant).

Legation Offices, 4 Cromwell Place, S.W. 7.  
Chargé d'Affaires, M. Constantin Laptew  
(Minister Plenipotentiary).

Counsellors of Legation, M. Dèmeetre Ciotori;  
M. Dèmeetre Buzdugan.

Interpreter, M. Frederic Francke.

Military and Naval Attaché, Com. I. Dumitrescu.

Asst. Mil. Attaché, Capt. C. Marinescu.

Air Attaché, Com. Ernill Gheorghiu.

Commercial Secretary, Alexandre Bianu.

Consul-Gen. (Hon.), M. G. N. Gologan, 5-7 St. Mary Axe, E.C. 3.

Rumania is a kingdom of South Eastern Europe formerly the classical *Dacia* and *Scythia Pontica*, territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The kingdom is divided into the 7 Provinces of The Banat, Transylvania, Bukovina, Bessarabia, Muntenia, Oltenia and Moldavia. Rumania has its origin in the union of the Danubian principalities of Wallachia and Moldavia (and the addition thereto of a strip of Southern Bessarabia) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the *Dobrujda* (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former Principality was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912-13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobrujda) frontier in 1913. In the War of 1914-1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (74,461 sq. miles) may now be estimated at 123,000 sq. miles, and the 1915 population of 7,897,321 has been increased to 19,033,363 (1935 census). *Insula*

*Serpilor* (Isle of Serpents) in the Black Sea, ceded by Turkey in 1878, carries a lighthouse maintained by the Danube Commission; area about 50 acres, with about 8 inhabitants.

The dominating religion of Rumania is that of the Greek (Orthodox) Church.

**GOVERNMENT.**—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate of 56 members, elected for 4 years, and of a Chamber of Deputies (*Camera Deputatilor*) of 385 members, elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

**PRODUCTION.**—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. The wheat crop for 1934 was 2,083,000 metric tons, rye 211,000, maize 4,846,000, barley 871,000, and oats 563,000 metric tons. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,851,401 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, lignite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers in any one industry; the production of crude oil was 1,885,225 metric tons in 1913, 3,669,354 metric tons in 1927, 4,300,000 metric tons in 1928, 4,827,278 metric tons in 1929, 5,792,311 in 1930, 6,750,044 in 1931, 7,339,486 in 1932, 7,376,604 in 1933 and 8,473,355 in 1934. Manufactures are in their infancy, and the imports are chiefly manufactured goods, textiles, machinery and metals; the exports consist principally of wheat, barley, maize, oats, petroleum, timber, cattle, salt and hides. All large estates have been expropriated and divided among the peasants.

**DEFENCE.**—Service in the Army is universal and compulsory. In the War of 1914-1918 over 900,000 all ranks passed into the Arms of Rumania, and of this number over 25 per cent. were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumanian-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small Navy on the Black Sea and on the Danube (30 vessels).

**EDUCATION** is free and nominally compulsory, there being 14,900 primary schools with 1,451,800 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and Cernauti. A Government High School of Commerce was opened in 1913.

**COMMUNICATIONS.**—In 1932 there were 7,364 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the

shipping ports. There are 23,000 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza; the latter is linked with the interior by a railway. Bucharest is connected by air routes with all her neighbours, except U.S.S.R.

#### SALVADOR.

(República de El Salvador.)

President, General Maximiliano Hernández Martínez, assumed office 1935.	
Foreign Affairs, Education, and Justice, Señor Dr. Don Miguel Angel Aranjó.	
Interior Development, Agriculture, Labour, Health, and Charity, General José Tomás Calderón.	
Finance, Public Credit, Industry and Commerce, Señor Dr. Don Rodrigo Samayoa.	
War, Marine and Aviation, General Andrés Ignacio Menéndez.	

Consul-General, Señor Don Samuel Jorge Dawson, 7 Union Court, Old Broad St., E.C. 2.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles,

with a general breadth of 43 miles, and contains an estimated area of 13,176 square miles, with a population estimated (Dec. 1, 1934) at 1,574,495. It is divided into 14 departments.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The government is based upon a written constitution (1864-1886). The President is elected for 4 years by direct vote. There is a single chamber National Assembly of 42 members, elected annually, and a Council of Ministers appointed by and responsible to the President.

The surface of the country is very mountainous, many of the peaks being volcanoes. The highest peak is the Santa Ana volcano (8,300 feet). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season from May to October, and a dry season from November to April. Earthquakes have been frequent in the history of Salvador, the most recent being that of 1919, when great damage was done to the capital and other towns.

The principal river is the Río Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while further away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the present Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, indigo, rice, balsam, &c. Cotton-growing on a large scale was commenced in 1924, but on account of the ravages wrought by insects it was practically abandoned after two seasons; after a lapse of some years it is now (1935) being cultivated once more. In the lower altitudes towards the east henequen is produced and used in the manufacture of coffee and sugar bags. The principal exports are coffee (sometimes over 90 per cent. of total value), sugar, indigo, balsam, henequen, hides and skins. The chief imports are cotton textiles, flour, iron and steel goods, lard, motor cars, manures, chemical products, cement, petrol, thread. A British railway nearly 100 miles in length connects Acajutla with the capital and with the important coffee centre of Santa Ana. A line from the port of La Unión (on the Gulf of Fonseca) to the capital was opened in 1922. Two new lines were opened in 1927, one from the capital to Santa Lucia, a suburb of Santa Ana, tapping the upper Lempa Valley; the other from the coffee centre of Ahuachapán to Santa Lucia. A new line from Santa Lucia to Zacapa (in Guatemala) was opened to traffic in 1930 and affords continuous railway communication between San Salvador and Guatemala City and Barrios. During 1924-26 the re-draining and re-paving of most of the capital were com-

pleted, and plans have been made for the macadamizing or paving of several hundred miles of rural roads, many of which are now impassable during the rainy season. There is a good motor road between the port of La Libertad and the capital, while motor transportation is usually possible in the dry season between the capital and Guatemala City, over the International road opened in 1923. The Pan-American Airways maintain regular services connecting San Salvador with the U.S. *via* Guatemala-Mexico-Brownsville, and *via* Havana-Miami, and connecting with Panama *via* Honduras, Nicaragua, Costa Rica.

There are 202 post-offices and 257 telegraph offices. There is a wireless (receiving and transmitting) station at the capital, and during 1926 a broadcasting station was inaugurated.

The language of the country is Spanish.

Cutuco—Vice-Consul, Capt. John E. Griffiths. Salvador is 5,700 miles from London.

#### SAN MARINO.

(Repubblica di San Marino.)

Regents, Two "Capitani Reggenti."

Consul-General for San Marino in Great Britain,

Grand-Off. Melvill A. Jamieson, 163

Kingsbridge, S.W. 7.

Vice-Consul, Comm. Giovanni Sovrani.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century. It was formerly under Papal protection, but by the Treaty of Rome (June 28, 1867) is under the *Amicizia protettrice* of Italy. The Republic is governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. A Council of Twelve forms a Supreme Court of Justice. The area is 38 square miles, the population 14,222. There is an army of about 1,000. The city of San Marino (pop. 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utiliza-

lion and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899. An electric railway runs from Rimini (55 minutes).

The revenue and expenditure 1935-36 balanced at 4,390,205 lire; there is no debt. The capital, San Marino, has a population of 2,000.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

British Consul-General, C. O. Wakefield-Harrey, (resides at Florence, Italy).

SAUDI ARABIA. See Arabia.

SERBIA. See Yugoslavia.

#### SIAM.

(Muang Tai.)

King, Ananda Mahidol, born Sept. 20, 1925; succeeded March 2, 1935.

Council of Regency, Prince Aditya; Choa Phya Yomarat; General Chao Phya Bijayendra Yodhin.

Foreign Minister, Luang Pradit Manudharm.

Envoy Extraordinary & Minister Plenipotentiary in London, Vice-Admiral Phya Rajawangsan, C.B.E., 23 Ashburn Place, S.W. 7.

The Kingdom of Siam, or Muang Tai, "Land of Free Men" (area about 200,150 square miles; population, 1936, 13,502,000), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. Until the middle of 1932 the King was an absolute monarch, but in June, 1932, a successful *coup d'état* was carried out in the capital and the King invited to rule in future as a constitutional monarch. A temporary Constitution Act was promulgated on June 27, 1932, a modified version of which was later made permanent and signed by the King on December 10. The Constitution provides that the King, as head of the State, shall exercise legislative power by and with the consent of the People's Assembly, executive power through the State Council (the Ministers of State), and judicial power through the Courts duly established by law. The People's Assembly is composed of 156 members, half of whom are elected and half nominated; provision is also made whereby, after a period of 10 years, all the members shall be elected by the people (i.e., from 1942).

An armed rebellion, organized by a reactionary faction against the leaders of the new régime, occurred in October, 1933. On March 2, 1935, King Prajadhipok abdicated and the present King was proclaimed, a Council of Regency being appointed to act during the King's minority. There is an army of nearly 20,000 men. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and about 2,300 Europeans and Americans. The principal religion is Buddhism. There are 264 Government schools and 6,882 schools of all kinds, attended by 788,846 children. There are 2 Universities.

The northern part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Thirty-two per cent. of Siamese sea-borne trade, which centres at Bangkok, is in the hands of the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore

and Hong Kong. Norwegian shipping holds the lead in tonnage, followed closely by British. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation and by rail and road extensions, bringing the provinces into closer touch with the capital. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1935-36 rice constituted 78 and teak 4 per cent. of the exports from Bangkok; while hides and marine products are also exported. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. On March 22, 1936, a new Customs Tariff came into force, imposing specific rates on many classes of goods hitherto subject to *ad valorem* duties. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 2,925 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Varindr (357 miles N.E.), (Chiangmai (462 miles N. of Bangkok), Aranya Prades (159 miles E.); the southern line to Trang, on the west coast of the Malay Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kedah border, where junction with the Federated Malay States Railway system was effected. The E. coast line to Sungai Golok (Kelantan) has also been opened to traffic. A branch line from Korat to Kon Kaen is being extended to Nong Kal. There is through railway connexion between Bangkok and Penang and Singapore. Good roads are few. There are 5,858 miles of telegraph lines.

Counsellor, Señor Don Antonio de la Cruz Marin.

1st Secretary (vacant).

2nd Secretary, Señor Don José Luis Plaza.

Naval Attaché, Captain Don Fernando Navarro Capdevila.

Commercial Attaché, Señor Don Daniel Fernandez Shaw.

Agricultural Attaché (vacant).

Consul-General, Excmo. Señor Don Vicente Alvarez Builla.

Consul (vacant).

A Republic situate in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.—5° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and an estimated population, in Dec. 1934, of 24,583,096—123 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho.

Government.—After the union of Aragon and Castile in the last quarter of the 15th century, Spain was ruled by sovereigns of the Aragon, Habsburg and Bourbon lines (with the intervention of a Republic 1873-75), Alfonso XIII succeeding at birth in 1886. On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be

extremely high in all the chief towns of Spain, King Alfonso XIII. left the country, and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. Elections for a Constituent Assembly were held on June 28; the Assembly met on July 14 and passed a vote of confidence in the Provisional Government, and in December a Presidential Election was held. The Republican Assembly (Cortes) is a single Chamber Congress of Deputies. Each Province has an Assembly (Diputación Provincial), and with the approval of the Cortes Provinces may combine to form an Autonomous Region within the Republic. The Basque Provinces (Alava, Guipuzcoa and Vizcaya) have formed the *Pais Vasco*, and the Catalan Provinces (Barcelona, Gerona, Lerida and Tarragona) have formed the *Generalidad de Cataluña*, with seat of administration at Barcelona.

In 1936 a General Election resulted in favour of the Coalition of the Left, with a clear majority of 57 over the Right and Centre Parties. President Zamora resigned in April and on May 10 Don Manuel Azaña was elected to succeed him. On July 18 a revolt broke out in many military garrisons in Spanish Morocco and spread rapidly throughout Spain, with serious fighting between Government and rebel troops. The revolt is of an openly Monarchist nature, the principal leader being General Francisco Franco, formerly Governor of the Canary Islands, from which office he was dismissed by the Azafia Government. The rebel forces met with many successes, and in November, 1936, General Franco claimed that Madrid would soon fall into his hands.

Production and Trade.—Spain is rich in iron, copper, and lead, but its mineral resources are only partially exploited. In 1934 the coal production was 6,300,942 tons, of which 5,336,769 were pit coal, 280,240 lignite, and 683,924 anthracite. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the War, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1929 there were 10,197 miles of railway open and 70,000 miles of telegraph line. The sea-going mercantile marine over 50 tons, on Jan. 1, 1932, consisted of 1,313 steamers (1,232,251 tons) and 364 sailing vessels (43,803 tons). In 1933, 18,160 vessels of 31,891,829 tons entered and 18,104 vessels of 29,508,169 tons cleared at Spanish ports.

**Defence.**—In 1931 the Army was reduced from 16 Divisions to 8 Infantry Divisions and 1 Cavalry Division, having an authorized Peace establishment of 7,318 officers and 110,120 men for the Spanish Peninsular Army and of 1,409 officers and 32,230 men for the Army in Morocco.

The Navy consists of 12 battleships and 7 cruisers; there are also 7 torpedo-boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

**Education.**—Primary is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Secondary High Schools are in each province, but the curriculum is defective. Universities at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

BRITISH CHAMBER OF COMMERCE FOR SPAIN,

8 Rambla de los Estudios, Barcelona (Branch,

9 Calle Marqués de Cubas, Madrid).

Madrid, 1,150 miles; transit, 45 to 50 hours.

The Balearic Isles, Ceuta, Melilla and the Canary Islands, are integral parts of Spanish territory.

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Ibiza, and Formentera; the total area is 1,935 square miles, with a population (1934) of 376,735. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 square miles, with a population of 35,219.

MELILLA is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492 and is an integral part of Spanish territory. The population is 50,170.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population (1934) of 599,712. The Canary Islands form two Provinces of Spain.—*Las Palmas* (Gran Canaria, Lanzarote, Fuerteventura and the islets of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara and Lobos), with seat of

administration at Las Palmas in Gran Canaria; and Santa Cruz de Tenerife (Tenerife, Palma, Gomera and Hierro), with seat of administration at Santa Cruz in Tenerife.

#### Spanish Colonies.

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population estimated in 1935 at 951,000.

**SPANISH GUINEA** (consisting of the islands of Fernando Póo and Annobon, the Corisco Islands and Rio Muni), a coastal settlement of West Africa, has a total area of about 10,000 sq. miles and an estimated population of 140,000. Fernando Póo lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 34,200. The capital of Spanish Guinea is Santa Isabel (pop. 9,000) on the island of Fernando Póo.

**Annobon Island (Anno Bom)**, in the Gulf of Guinea, in 1° 24' S. lat. and 5° 35' E. long.; population 1,410.

**Rio Muni** is a coastal settlement between Cameroon and French Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata (the principal town) on the coast.

**Corisco Islands**, consisting of Corisco, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

**WESTERN SAHARA**—Spanish possessions in the Western Sahara extend from N. of Cape Blanco to S. of Cape Ifni, exclusive of Wadi Draa (Treaty with France, Nov. 27, 1912) but including the Ifni enclave. The Colony includes Rio de Oro, La Agüera and Ifni, and lies approximately between 21° 20'–26° N. lat., extending eastwards to about 13° W. long. Total area about 100,000 sq. miles (including part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs), total population about 32,000. Capital, Villa Cisneros, pop. about 250.

**SPANISH MOROCCO**.—Spain exercises a protectorate over a part of Northern Morocco (see "Morocco"), and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

**Alhucemas** is a settlement on the bay of that name, and includes six islands; population 356.

**Peñon de la Gomera** (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 450.

**The Chafarinas** (or *Zaffarines*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 610.

#### THE SUEZ CANAL.

**The Suez Canal**.—The *Compagnie Universelle du Canal Maritime de Suez* (1 Rue d'Astorg, Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from

the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1936, £88,391,590). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 60 metres (196 ft. 10 in.), the maximum draught of water allowed for vessels using the canal is 10.35 metres (34 feet). The average time for the transit through the canal is 11 hours 15 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 20 are British (three representing H.M. Government and seven the shipowning interest).

**British Commercial Directors**, T. Harrison Hughes (*Vice-President of the Company*); Sir Alan G. Anderson, G.B.E., M.P.; Sir John Cadman, G.O.M.G.; Sir August Cayzer, Bt.; Rt. Hon. Sir R. S. Horne, G.B.E., K.C., M.P.; Sir E. Wyldbore Smith; Sir Thomas Royden, Bt., C.H.

**Representing H.B.M. Govt.**, Sir Ian Malcolm, K.O.M.G.; Sir J. T. Davies, K.C.B., C.V.O.; The Earl of Cromer, G.C.B., G.O.L.E., G.O.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1926, with the percentage of British vessels:—

Year.	No. of Vessels.	Net Tons.	British Tonnage.
			%
1926	4,980	26,060,377	57.4
1927	5,545	28,962,048	57.1
1928	6,084	31,905,902	56.8
1929	6,274	33,466,014	57.1
1930	5,761	31,668,759	55.58
1931	5,366	30,027,966	55.36
1932	5,032	28,340,290	55.47
1933	5,423	30,676,672	54.55
1934	5,663	31,750,802	54.29
1935	5,992	32,810,968	47.96

The tonnage of the *merchandise* carried was 25,776,000 tons in 1933; 17,047,000 tons in 1920; and 26,328,000 tons in 1935. Details of the nationality of the vessels passing through the Canal in 1935 are appended:—

Flag.	No. of Vessels.	Net Tons.	Per cent (Tonnage)
British	2,775	15,734,818	47.96
Italian	1,302	6,077,376	18.52
German	448	2,692,792	8.21
Netherlands	336	2,316,430	7.06
French	273	1,774,295	5.41
Norwegian	268	1,389,362	4.23
Japanese	131	823,412	2.51
United States	86	541,340	1.65
Greek	150	444,272	1.35
Danish	80	429,806	1.31
Swedish	72	379,318	1.16
U.S.S.R.	34	111,962	0.34
Egyptian	13	37,778	0.12
Finnish	8	22,872	0.07
Spanish	6	13,713	0.04
Chinese	4	9,952	0.03
Yugoslavian	3	8,766	0.03
Irakian	1	1,225	0.004
Portuguese	1	1,100	0.003
Siamese	1	370	0.001
Totals	5,992	32,810,968	100.00

The transit receipts in 1870 were 5,718,756 fr. (gold), and in 1935, 857,220,253 fr. (paper).

The rate of transit dues as from July 1, 1936, is 78. or 34'125 piastres égyptiennes per ton for laden vessels, and 3s. 6d. or 17'0625 piastres égyptiennes per ton for vessels in ballast.

The net dividends for the year 1935 amounted on the ordinary 250 fr. shares to 355 fr. 90 c. and on the Actions de Jouissance to 320 fr. 44 c.

The 5,992 vessels included in the total for 1935 are grouped under the following categories:—

	No.	Net Tonnage.
Merchant vessels (laden).....	2,935	14,672,149
Mail steamers.....	1,564	11,255,980
Warships and transports .....	477	2,178,245
Merchant vessels in ballast ...	1,016	4,704,594
	5,992	32,810,968

# SWEDEN.

(Sverige.)

*Swedish Church, Harcourt Street, Marblebone Road, W. 1.*

Sweden occupies the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 173,345 square miles, and a population, Dec. 31, 1935, of 6,249,489, nearly all Protestant.

Under the Constitution of June 6, 1809 (with

amendments in later years) the throne is hereditary in the House of Bernadotte, a Marshal of France, who succeeded Charles XIII in 1818. There is a Diet (*Riksdag*) of two Chambers, *Första Kammaren* of 150 members, elected for 8 years; and *Andra Kammaren* of 230 members, elected for 4 years. The Council of Ministers (*Statsråd*) is responsible to the Riksdag.

Sweden contains the great lakes of Vänern, Vättern, Mälaren, and Hjälmaren. Nearly 35 per cent. of the population are devoted to agriculture, about 304,000 being owners and 71,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining and agricultural; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots and grasses. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality; lead, zinc, sulphur, manganese, arsenic, granite, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne). The chief imports are coffee, tobacco, and other ordinary colonial produce, coal, machinery, motor cars, mineral oils, cloth, cotton, wool, manures, skins, copper, and yarn. The chief articles of export are timber, wood pulp, paper, machinery, iron ore, matches, butter, and pork. In 1935 the exports of wood pulp and paper were 2,711,873 tons.

Roads 10,415 miles in length (of which 4,615 are the property of the State) were open on Jan. 1, 1936; and 20,389 miles of telegraph (inclusive of 8,397 railroad telegraph), 128 control stations, and 1,847 railroad and 2,018 other telegraph stations. There were at the same date 811,334 miles of telephone.

*Defence.*—Service in the Army is universal and compulsory, about 24,500 being trained annually; war strength about 500,000. The Navy consists of 66 fighting vessels over 100 tons (354 guns), 10 being ironclads and 14 submarines. The Air Force consists of about 200 fighters and general-purposes aeroplanes.

*Education.*—(i.) *Primary:* Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce, and navigation. (iv.) *Universities:* Uppsala, Lund, and private faculties in Stockholm and Gothenburg.

**Minister in London**, Monsieur C. R. Paravicini, 21 Bryanston Square, W. 1.

**Legation Offices**, 18 Montagu Place, Bryanston Square, W. 1.

\* The President is elected in December, and remains in office from 1 Jan.—31 Dec.; he is generally succeeded by the Vice-President.

**Counsellors**, M. Charles de Jenner; M. Walter de Bourg.

**1st Secretary in charge of Commercial Affairs**, M. Clemente Alberto Rezzonico.

**Chancellor (Vice-Consul)** M. Paul Hiltiker.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'—47° 48' N. lat. and 5° 58'—10° 30' E. long. It is composed of 23 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 4,066,400 in 1930, who are divided between Roman Catholics, 41 per cent., and Protestants, 57 per cent., Jews numbering 21,000, and others 43,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansch (Grisons), 1½ per cent. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,217 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. The Alps are a crescent-shaped system situated in France, Italy, Switzerland and Bavaria, covering an area of 80,000 square miles from the Mediterranean to the Danube (600 miles). The highest peak, Mont Blanc, Pennine Alps (15,732 feet) is in France, and Monte Rosa (15,217 feet) is partly in Switzerland and partly in Italy. The highest Swiss peaks are Finsteraarhorn (14,026), Jungfrau (13,671), Mönch (13,456), Eiger (13,040), Schreckhorn (13,385), and Wetterhorn (12,150) in the Bernese Alps, and Dom (14,918), Weisshorn (14,803), Breithorn (13,685), and Matterhorn (14,780 feet) in the Pennine Alps. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables as well as grapes are grown. The forests cover about one-fifth of the whole surface. The chief industries comprise the manufacture of silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embroideries, straw-plait, machines, paper, chemicals, chocolate, condensed milk, dyestuffs, and tobacco; while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches are the staple products of La Chaux de Fonds. In 1935 there were about 3,365 miles of railway in operation, 22,575 miles of telegraph and telephone line (270,032 telephone subscribers), and 3,999 post-offices. The total length of first-class roads was 10,000 miles, the number of motor vehicles being 124,214 (70,662 motor cars, 32,504 motor cycles and 21,048 commercial vehicles). The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 187 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 29,750 francs; the Vice-President and other members of the Federal Council 27,200 francs each. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for

four years. Not more than one of the same canton may be elected member of the Federal Council.

**Defence: Militia.** Active Army, 12 yrs.; initial trg., 60-102 days. Subsequently 12-14 days per ann.; then Landwehr, 8 yrs.; 1 trg., every other year, 11 dys. for dismt'd. branches only; then [Landsturm to age 48]. **War Strength**, Militia, 140,600; Landwehr, 65,000; Landsturm, 57,000.

A National Defence Loan was raised in 1936 for a general increase of armaments. The Loan was oversubscribed by 17,000,000 Swiss Francs (£5,518,869) which surplus has been retained as a special fund for Defence in case of need.

**Education.**—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary*: Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary*: Age 12-15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

#### SYRIA AND LEBANON.

Syria, Lebanon, Latakia and Jebel Druze are states in the Levant, the administration of which was entrusted to France by a mandate of the League of Nations, April 25, 1920 (ratified by the Council of the League, July 24, 1922).

**Syria**.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. (Cilicia was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and King of Iraq, 1921-1933) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (*q.v.*). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beirut. The latter three States were later grouped together to form the *Syrian Federation*, with a nominated Council. The Federation was subsequently abolished. *Damascus and Aleppo* were amalgamated into a single State, and the *State of the Alaouites* (now known as the *Government of Latakia*) again became independent. The *Jebel Druze* forms a small independent State. In March, 1936, following on a prolonged strike and considerable unrest in Damascus and other Syrian towns, a Syrian delegation proceeded to Paris and on Sept. 9 initialled a Treaty of Friendship and Alliance with the French Government. By the terms of the Treaty Syria becomes an independent Republic.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, its political neighbours being Turkey, Iraq and Palestine on the north, east and south, with a western coastline washed by the Mediterranean Sea. The estimated area is about 60,000 sq. miles, with a population of about 3,500,000 of whom the greater number are Orthodox Muhammadans, with a proportion of Shiites and Druses; in the Lebanon, Christians of various creeds predominate. The products of Syria are wheat, tobacco, fruit, wine, silk, liquorice, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen; oil prospecting operations are being pursued in the Deir-ez-zor region. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (310,000), Homs (70,000), and Hama (60,000).

Damascus contains the Mosque of the Ommyayedes and the tomb of Saladin, and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca used to pass, while the "street called Straight" (Acts ix, 12) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are metal work and mother-of-pearl inlay, and also native-made silk and cotton stuffs. At *Baalbek* (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 x 17 x 14 feet), weighing 1,500 tons. The railway system consists of a line from Beirut to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *via* Homs, was reopened in 1921. A narrow-gauge tramway runs from Beirut to Mameltein along the coast. From Damascus there is railway communication with Palestine and with Transjordan, and the Syrian railways link up with the Bagdad railway at Aleppo. Road communications between Beirut and Bagdad, *via* Damascus, have been developed by the opening up of the desert motor routes. Bagdad is now within 24 hours of Damascus by car, and a weekly air service for mails and passengers is projected.

In the autumn of 1925, following a revolt of the Jebel Druze in the Hauran, rioting took place in Damascus on Oct. 18, and the city was bombarded by French artillery, when part of the Azm palace and parts of the "Street Called Straight" were destroyed by shell-fire or burned. Soon after the receipt of news of the disturbances in Syria, the High Commissioner (Gen. Sarrail) was recalled by the French cabinet. A long period of disorder followed, but in Sept., 1927, public security was practically normal. In June, 1930, the French High Commissioner promulgated a new republican constitution for the State of Syria. After somewhat difficult negotiations between the French and the Nationalists elections were eventually held in 1932 and the Parliament elected. Parliament has been suspended on account of internal disorders.

Beirut is the capital of the Lebanese Republic. Damascus was the Federal capital, and has become that of the new State of Syria. *Latakia* is the capital of the Government of that name, formerly known as the State of the Alaouites.

The *Lebanese Republic* (the former Turkish provinces of Lebanon and Beirut), was declared a State under the title of *Etat du Grand Liban*, in 1920, but the constitution was suspended as a measure of economy in 1932, M. Debbas remaining in control without the assistance of Parliament. In 1934 fresh elections to a smaller Parliament were held, and as a measure of economy the various Ministries were entrusted to Directors, and a Secretary of State was appointed. Grand Lebanon extends along the Mediterranean littoral from the Palestine frontier to Nahr el Febr (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Lebanese

Republic is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives; wheat, grapes, oranges, bananas, and mulberry trees. Great efforts are being made to develop the district as a summer resort. The capital is Beirut (pop. 150,000), which is the chief seaport and commercial centre, and the seat of the French mandate. Tripoli, the next important town and seaport, is one of the Mediterranean termini of the Iraq Petroleum Company's pipe line. Minor ports are Junieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

Public Health, Bay Refik Saydam.

National Economy, Bay Celâl Bayar.

Agriculture, Bay Muhlis Erkmen.

Customs and Monopolies, Bay Ali Rana Tarhan.

President of the National Assembly, Bay Abdülhalik Renda.

Turkish Ambassador in London, His Excellency

Bay Ali Fethi Okyar, 69 Portland Place, W. 1.

Counsellor, Bay Sedat Zeki Ors.

1st Secretary, Bülend Usaklıgil.

3rd Secretary, Hasan Nurelgin.

Commercial Counsellor, Nizamettin A. Sun-

gursud.

Archivist, Bay Galip Eldem.

Consul-General in London, İsmetullah Cemal

Ozkaya, 10 Lower Sloane Street, S.W. 1.

Chancellor, Dr. Fehmi Nuza.

The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remained in power until the Great War.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, part of Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

For two centuries preceding the Great War disintegration had reduced the power and extent of the Turkish Empire, and during the Great War its boundaries were further restricted, Iraq, Syria and Arabia passing into other hands. Attempts to wrest further territory were defeated by Gazi Mustafa Kemal (now known as Kamal Atatürk) who won a decisive battle over the Greeks at Afyon Karahisar, the results of which were confirmed at the Lausanne Conference.

Turkey now extends over an area of 470,000 sq. miles, from Adrianople to Transcaucasia and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq.

*Turkey in Europe* (23,975 sq. kilometres = 9,256 sq. miles) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Edirne (Adrianople), and is separated from Asia by the Bosphorus at Constantinople and by the Dardanelles (Hellespont)—about 40 miles in length with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

*Turkey in Asia* (738,761 sq. kilometres = 285,246 sq. miles) comprises the whole of Asia Minor or Anatolia ("Land of the Rising Sun" or Orient), and extends from the Aegean Sea to the western boundaries of Georgia, Soviet Armenia and Iran, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria and Iraq.

*Population.*—Census Oct. 28, 1927, 13,660,275. Census of 1935—total 16,188,767 (7,974,925 men, 8,213,842 women). The population of each of the 8 Regions into which the country is divided was given as follows (census of 1927):—

Region.	Sq. Kil.	Population.	Per Sq. Kil.
Black Sea .....	73,621	2,174,425	29
Marmora & Aegean	92,744	2,746,069	29
Mediterranean ..	56,279	753,639	13
Turkey in Europe	23,975	1,044,306	43
Western Anatolia.	71,180	1,303,114	18
Central Anatolia...	228,791	3,499,707	15
S.E. Anatolia .....	40,125	504,303	12
Eastern Anatolia	176,621	1,534,712	8
Total.....	762,736	13,660,275	18

*Government.*—Sultan Mehmed VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,\* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal (now known as Kamal Atatürk) President. On March 3, 1924, the Assembly passed a law abolishing the office of Caliph and ordering all members of the Ottoman dynasty to leave Turkish territory. The Grand Assembly (*Büyük Millet Meclisi*) is a single-chamber legislature of 316 members, elected for four years by universal adult suffrage, and delegates its executive power to ministers acting in its name and responsible to it for their actions.

*Religion and Education.*—The majority of the inhabitants are Moslems. There are numerous Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a considerable number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. On Nov. 1, 1928, the Grand National Assembly passed a bill establishing the neo-Latin alphabet in place of Turkish characters, and in 1934 it was stated that the percentage of Turks who can read and write had risen from 22 (1928) to 45 (1934). Education is compulsory, free, and secular. There are primary, intermediate, secondary and vocational schools, universities at Istanbul and Ankara.

*Production.*—Although the soil of Asia Minor is generally fertile, agriculture is still primitive in centres that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aydin, Adana, and Mersin. The live stock (1935) was sheep, 12,436,000; goats, 6,778,000 (and mohair goats, 2,743,000); oxen; 5,370,000; buffaloes, 540,000; camels, 94,000; horses, 601,000; mules, 51,000; donkeys, 978,000. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, beet-sugar, nuts, olives, valonea and liquorice root, and many varieties of fruit are grown. Samsun is the chief centre of the tobacco-growing industry, which is also of importance at Izmir (Smyrna), Ismit and Bursa (Brusa). The export of merchandise is considerable and consists principally of opium, tobacco, cotton, carpets, gums, mohair, wool, hazel-nuts, raisins and figs. The forests have now begun to be scientifically exploited; beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Bursa and Ismit, and this industry, which declined after the war, has revived. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver and arsenic, are among the minerals produced.

*Communications.*—Under the present Govern-

\* TURKISH NATIONAL HOLIDAY.—Oct. 29 is observed throughout the Republic as a National Holiday.

ment the following railway lines have been constructed, and are open for traffic:—

National Debt (May 31, 1935):—

Internal .....

External .....

Floating .....

Note.—The National Debt figures include Turkey's share of the repartitioned Ottoman Public Debt. The agreement reached between the bondholders and the Turkish Government for the resumption of the services of the Ottoman Public Debt was ratified by the Grand National Assembly on November 30, 1928. This agreement has been revised (April 22, 1933) and now provides for the creation of new Turkish Debt bonds for the Capital amount of francs 962,636,000 (which is included in the above figures). The new bonds are of 500 franc denomination, bearing interest at 7½ per cent. A further agreement was reached on May 7, 1936, by virtue of which the majority of bondholders (French, British, Austrian, Belgian, Netherlander, Hungarian, Italian and Swiss) will receive half their annuities in Foreign currency, as regards the balance a repartitioned bond will be delivered to holders to establish their right to benefit from the proceeds of the sale in France of goods to be purchased in Turkey, with a corresponding amount in Turkish liras.

The Ottoman Public Debt is administered by a Council which sits in Paris (184, Boulevard Malesherbes, Paris XVII):—

Delegates, S. C. Wyatt (British and Netherlands Bondholders); MM. F. de Closières and E. Regard (French); MM. E. Dartiguenave and de Cock (Alternative Delegate of French and Belgian Bondholders); K. Weigelt (German Bondholders); M. B. Nogara (Italian); Zekia Bey (Turkish); G. Boissière (Ottoman Bank).

Commissary of the Turkish Government, Ali Rıza Bey.

Administrative Manager, R. Maurel.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (Census 1935) of 123,314. Ankara (or Ancyra) was the capital of the Roman Province of Galatia Prima, and a marble temple (now in ruins) dedicated to Augustus contains the Monumentum (Marmor) Ancyranum, inscribed with a record of the reign of Augustus Caesar. A new city is being laid out on modern lines, with parks, statues and avenues. ISTANBUL (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and remained by him; it became capital of the Eastern Roman Empire A.D. 364; population (Census of 1935) 740,805. Other cities are Izmir (Smyrna) 170,546, Adana 76,306, Bursa (Brusa) 72,270, Konya 52,486, Gazi-Ayintap 50,861, Kayseri (Caesarea) 46,491, Elhrue (Adrianople) 35,942, Eskişehir 47,100, Diarbekir 35,000, Erzurum 33,000, Samsun 34,000, Urfa 31,000, and Manisa 31,000.

FLAG: Red, with white crescent and star.

*Consulate-General*, 55 Harrington Gdns., S.W. 7 [Ken. 7268].

The smallest Republic in South America, on the east coast of the Río de la Plata, situate in lat.  $30^{\circ}$ — $35^{\circ}$  S. and long.  $53^{\circ}$   $25'$ — $57^{\circ}$   $42'$  W., containing an area of 72,180 square miles, and a population on Dec. 31, 1935, of 2,042,387.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated.

Under the Constitution approved by the Constituent Assembly on May 18, 1934, the President is elected by the legislature for a term of 4 years, and is eligible for re-election for 4 years. The executive power is discharged by the President, assisted by a Council of Ministers over which he presides. The Council of Ministers is composed of 9 members chosen from the two political parties which have obtained the highest number of votes in presidential elections, the majority party being represented by 5 (or 6) members. The Legislature consists of a Chamber of 99 Deputies and of a Senate of 30 members, elected for 4 years by all adult male and female citizens who can read and write.

The Republic is divided into 19 Departments, each with a Chief of Police and a Mayor. The most important cities of the interior are Salto and Paysandu, both situated on the River Uruguay, which forms the main line of division from Argentina.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the Río Negro (with its tributary the Yi), flowing from north-east to south-west into the Río de la

Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguarón, Santa Lucía, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic. The winter is on the whole mild, but very cold spells, characterized by icy winds from the South Polar regions, are experienced in June, July and August.

Wheat, barley, and maize are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (8,414,327 in 1934) and sheep (20,558,124 in 1930), the wool of which is of excellent quality. Gold mines exist at Cuiapirú, but they have so far not been worked commercially. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef, poultry and eggs; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals. There are 1,729 miles of railway open (1929), of which 1,564 miles are in British hands, and three short lines owned by the State; 45 kilometres of the State line from San Carlos to Garzón have been opened and 73 kilometres from San Carlos to Rocha are now open to traffic; and (in 1930) 7,508 miles of telegraph, with 48,375 miles of telephones. There were 995 post-offices, dealing with 136,053,700 letters and packets. The language spoken is Spanish.

	1935.	1936.

**The Union of Soviet Socialist Republics.**—On March 15, 1917, following a revolution in Russia (March 12, 1917), Nicolas II, Tzar of All the Russias, abdicated the throne. A Republic was declared, and on November 7, 1917, a military revolutionary committee seized control and transferred the government authority to the All Russia Congress of Soviets. The federal system was adopted by the 10th All-Russian Congress of Soviets on Dec. 31, 1922. On February 1, 1924, Great Britain recognized the government of the U.S.S.R. On September 16, 1934, the U.S.S.R. became a member of the League of Nations. The Soviet Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Soviet Union. Prior to the War of 1914-18 the Russian Empire of the Tzar Nicholas II. covered more than 8,500,000 square miles, with a population of about 183,000,000.

Area and population (Jan. 1, 1933) of the constituent Republics of the Soviet Union are:—

Republic.	Sq. miles.	Population.
I. R.S.F.S.R. (Moscow).	7,638,004	113,651,000
II. Ukraine (Kieff) .....	174,372	37,000,000
III. Transcaucasia (Tiflis)	71,899	7,111,000
IV. White Russia (Minsk)	49,041	5,440,000
V. Turkmenistan		
(Poltortsk)	188,609	1,270,000
VI. Uzbekistan (Tashkent)	63,640	5,000,000
VII. Tajikistan		
(Stalinabad)	56,108	1,333,000

8,241,673 165,805,000

The rural population forms 80 per cent. of the whole.

According to the latest census returns (Jan. 1, 1928) the total population was 146,964,366, of whom 71,000,659 were males and 75,953,707 females. The returns include 29,498 persons over 100 years of age (12,340 men, 17,158 women).

The Union is governed by the Congress of Soviets of the Union, and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee ("Tsik") of the Union once in 2 years. (No meetings were convened from 1926-1933). At the Congress of Jan. 1, 1934, *The Council of the Union* consisted of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic. *The Council of Nationalities* is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each, and of representatives of the autonomous Provinces of the R.S.F.S.R. on the basis of 1 representative from each. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Ajaria and Abkhazia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities.)

The regular sessions of the Tsik meet three times a year, and in the intervals the supreme authority is vested in its *Presidium* of 21 members.

Representatives are elected to the Soviet Congress of the Union by indirect voting. The cities and townships *Soviets* send representatives to the Congress of Soviets Union on the basis of 1 deputy for each 25,000 electors, whereas the provincial *Soviets* send 1 deputy for each 125,000 inhabitants.

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*Tsik*), and Council of People's Commissars (*Sovnarkom*).

*The Council of Labour and Defence (Sovet Truda i Oborony, or S.T.O.)* is attached and subordinate to the *Sovnarkom*. and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts.

*The Supreme Court of the Union* is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal

legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme Court consists of 11 members.

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department, originally known as the *Cheka*, and from 1922 to 1935 as the *O.G.P.U.* (*Obiedinonnoye Gosudarstvennoye Politicheskoye Upravleniye*) and renamed The State Security Department in 1935. It is designed to combat political and economic counter-revolution, espionage and brigandage. The Chairman is a member of the Council of People's Commissaries of the Union and the Department is directed by special rules and regulations, which have not been promulgated, the control of the legality of its acts is exercised by the Attorney-General of the Union in accordance with a special decree issued by the *Tsik*.

#### I. R.S.F.S.R.

Rossiiskaya Sotsialisticheskaya Federativnaya Sovetskaya Respublika.—The Russian Socialist Federal Soviet Republic.

The R.S.F.S.R. consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces. *Autonomous Republics*: Bashkir, Tartar, Kirghiz, Mountain, Daghestan, Turkistan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans. *Autonomous Provinces*: Chuvash, Kalmuck, Mari, Votjak, Zyrian (Komi), Oirad, Kabardian-Balkarsk, Karachai-Circassian, Adighe - Circassian, Chetcheu. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the *Black Soil Zone* being subdivided into (1) Central Agricultural Region, (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea; while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Vetluga, (6) Ural.

*Local Government* was, and still remains, highly developed. The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*); they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*guberniya*). The districts and governments had their elective councils (*zemstvos*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was exchanged for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*); but in many cases the local authority of such municipalities and local land councils (*zemstvos*) was overshadowed by the superior authority of the *bureaucratic* governor. After the Revolution, the village and other administrative units set up *soviets* of workers and peasants, and the provincial councils send representatives to the All-Russia Congress, municipalities having a double representation from their own *soviet* and from that

of the province (or district) in which the municipalities are situated.

*Education*.—Under the Bolshevik *régime* popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the Soviet Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching; but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. In 1931 there were stated to be 20,000,000 pupils in the schools as compared with 8,000,000 in 1914; the number of students attending higher educational centres was stated at 350,000 in 1931; there are two universities in Moscow and 21 in other large centres.

*Religion*.—The Orthodox Church was disestablished by the *Bolsheviks* and all its property confiscated. All ecclesiastic schools, seminaries and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden. But the law did not forbid the exercise of religion, and churches remained open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb. 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar. A *Godless Five Year Plan* was embodied in a decree issued by the Council of Peoples' Commissaries in October, 1922, with the object "not to leave a single house of prayer on the territory of the U.S.S.R., and to extinguish in the minds of the people the very notion of God."

#### Soviet Union Budget, Jan. 1-Dec. 31, 1936.

Revenue.....	Roubles 73,715,000,000
Expenditure.....	" 78,715 000,000

*Debt*.—The outstanding Foreign Debt of Russia on Jan. 1, 1917 (before the Revolution), may be stated as under:—

	Debt.
To Great Britain .....	£622,674,406
To France.....	Francs 3,950,000,000
To U.S.A. ....	\$282,000,000
To Japan .....	Yen 256,000,000
To Italy .....	Lira 36,123,836

Since the revolution various loans have been raised, and these were stated to amount on Jan. 1, 1933, to Roubles 10,100,000,000.

*Defence*.—The Red Army, recruited by universal military service, was at the following strength in April 1936:—

Regular Army .....	750,000
Reserves.....	600,000
G.P.U. ....	160,000
Transport .....	90,000

1,600,000

The army is equipped with 4,000 tanks. The Red Air Fleet was stated to comprise an organisation of 4,000 aeroplanes. The Red Navy is believed to consist of 4 battleships, 5 old cruisers, 17 destroyers, and 16 submarines. *Civil Aviation* statistics will be found on p. 692.

## The Five Year Plan.

**The Soviet Five Year Plan (1928-1933).**—The avowed object of the Five Year Plan was to increase the industrial and agricultural production of the U.S.S.R. so that it might overtake and outstrip all other nations. For this purpose the territory was equipped with factories, railroads, steamships, telegraphs, motor vehicles and tractors. The land was to be made to produce food, houses were to be built, and opportunities for recreation provided, so that the population might have these amenities in greater abundance than the peoples of capitalist nations. The Plan had the political aim of making the U.S.S.R. a far more powerful industrial, economical and political State, and the political aim was pursued at the expense of the people, the products of the soil being employed primarily in payment of imports required for industrial development, even if starvation was thus imposed on the people. The principal industries undergoing development are *asbestos* (at Azbest), *steel* (at Magnitogorsk), *manganese* (at Chiatursk), *tractors* (at Cheliabinsk, Stalingrad and Khar'kov), *wheat* (at Gigant and Verblud), *petroleum* and *crude oil* (at Baku), and *tea and oranges* (at Chakwa). The factories are to be provided with electric energy from Dniepostroy, where a dam is under construction, the work being under the superintendence of U.S. engineers. The political development of the Plan appears to be abreast, in most particulars, and in some directions ahead, of the time schedule; and in April, 1931, M. Kulbyshev, Chairman of the State Planning Commission, stated that the Five Year Plan would be completed in 1932 (one year ahead of the schedule), and the Government had therefore decided to begin work on a new Five Year Plan for 1933-1938.

**Agriculture.**—The Soviet Board of Statistics publish the following particulars of the harvests:—

Crop.	Metric Tons.	
	1933.	1934.
Rye .....	24,190,000	20,130,000
Wheat .....	27,730,000	30,410,000
Barley .....	7,850,000	6,840,000
Oats .....	15,410,000	18,900,000
Maize .....	4,800,000	3,843,000
Millet .....	4,820,000	4,166,000
Buckwheat .....	1,120,000	1,108,000
Potatoes .....	50,800,000	56,170,000

The Live Stock are stated at:—

Animals.		
	1934.	1935.
Cattle .....	42,400,000	49,200,000
Horses .....	15,600,000	15,800,000
Sheep and Goats .....	51,900,000	61,000,000
Swine .....	17,300,000	22,500,000

**Industry.**—The natural riches of Russia in coal, iron-ores, copper, manganese, gold, platinum, timber, naphtha, and so on, are enormous. The value of the industrial output is stated at:—

Ores.	Metric Tons.	
	1933.	1934.
Iron .....	15,100,000	21,700,000
Manganese .....	1,040,000	...
Copper .....	...	2,081,000
Coal .....	76,330,000	93,600,000
Refined Oil (1934 and 1935) .....	21,000,000	21,380,000

**External Trade.**—The external trade of the U.S.S.R. for 1935 is stated as under in thousands of roubles:—

Exports from Russia to	Countries.	Imports into Russia from
86,255.....	Great Britain .....	43,382
3,026.....	India .....	...
20,424.....	Belgium.....	9,142
6,559.....	China.....	8,089
11,933.....	Mongolia.....	7,911
1,309.....	Czechoslovakia .....	5,906
6,433.....	Denmark.....	210
3,539.....	Finland.....	1,380
18,050.....	France.....	17,620
66,048.....	Germany.....	21,702
6,176.....	Greece.....	887
15,661.....	Iran.....	20,688
12,112.....	Italy.....	5,650
5,495.....	Japan.....	10,871
795.....	Latvia.....	1,029

Exports to U.K. ....	17,277,000	21,736,000

**Communications.**—Length of railroads in use:

Year.	Miles.
1925-6 .....	46,255
1926-7 .....	47,022
1927-8 .....	48,023
1928-9 .....	48,236
1930 .....	48,153
1931 .....	50,561
1932 .....	51,130
1933 .....	51,630
1934 .....	52,000

The principal railway lines are the main European network from Leningrad, through Moscow to Astrakhan and across the Urals via Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus; the *Trans-Siberian Line* from Cheliabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the *Trans-Siberian line* thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the *Trans-Caspian system*. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and

Armenia, from Batum and Poti, on the Black Sea, *via* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and *via* Erivan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There are in the Soviet Union (1927) 228,600 miles of inland waterways, of which 54,500 are navigable by steam vessels, and nearly 110,000 miles by rafts. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea, and Ekaterininsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamchatka.

**Posts and Telegraphs.**—In 1932 the post offices handled about 1,488,000,000 letters and postcards; the length of telegraph (and telephone) lines was stated at 826,500 miles.

**CAPITAL OF U.S.S.R.**—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1933 of about 3,570,000. **LENINGRAD** (before the war "St. Petersburg," and until the death of Lenin, "Petrograd"), the former Capital, founded by Peter the Great on the banks of the Neva in 1703, had a population in 1933 of 2,840,000. Other centres are Saratov (338,000), Rostov (520,000), Samara (220,000), Nijni-Novgorod, re-named Gorky in 1932 (477,000), Voronezh (214,000), Kazan (267,000), Krasnova, formerly Ekaterinodar (150,000), Astrakhan (200,000), Orenburg (130,000), Irkutsk (104,000), Tomsk (90,000), Omsk (170,000), Vladivostok (130,000); Archangel (128,000).

## II.—THE UKRAINE. (Ukraina.)

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine*. The new Republic was invaded by Germany in 1917-18, and subsequently overrun by Bolshevik forces, and a military and economic

alliance was concluded between Soviet Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The majority of the inhabitants belong to the Greek Orthodox Church. The Ukraine is the great cereal-growing district of the U.S.S.R., and before the Great War the harvests exceeded 1,000,000,000 poods; during the Civil War the production was reduced to 385 million poods, but it has since been increased. In 1932, over a million hectares were under sugar-beet. The Ukraine contains large deposits of iron ore and coal, and is the principal source of the European supply of quicksilver. The value of State industrial production in the Ukraine (1932) was about 5,000,000,000 rouble; the number of workers employed exceeding 1,400,000.

**CAPITAL** (since 1934) Kieff. Population (1931) 573,000. Other towns: Kharkoff (the former capital), 650,000; Dniepropetrovsk, 233,000; Nikolaieff, 105,000; Odessa (Black Sea port), 481,000; Stalino, 200,000; Torgaurog, 150,000; Mariopol, 106,000; and Poltava, 92,000.

## III.—TRANSCAUCASIA. (Zakavkarskaya F.S.S.R.)

The Transcaucasian Federation consists of three Socialist Soviet Republics:

Republic.	Sq. miles.	Population.
Armenia .....	15,065	1,339,969
Georgia.....	25,470	2,135,933
Azerbaijan .....	33,570	2,463,998
	74,105	5,938,100

## Armenia, or Hyastan. (S.S.S.R.A.)

*President of the Council*, M. S. Hambartsumian.

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Chorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's

Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy); more than half the supply of copper from Russia was derived in 1914 from Soviet Armenia, and the value of carpets manufactured in 1914 exceeded 10,000,000 gold roubles. The Armenian Church is the oldest established Christian church. Christianity having been recognised as the State religion in 300, and from the 6th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the vilayet of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1915-17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia*. Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic*, on the lines of the Moscow government.

CAPITAL, Erivan; population (1933) 106,000. Leninakan, (formerly Alexandropol) 53,000. Georgia, or Sakartvelo. (G.S.S.R.)

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhasia and Adjaria), and one autonomous Province (South-eastern Ossetia).

Georgia, a former Kingdom in Transcaucasia with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence, but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation. *Soviet Georgia* is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. There are 970 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian. Batoum and Baku are also connected by a petroleum pipe-line. The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Chikatury mines (in the district of Sharopausky) in 1914. There are also abundant supplies of coal and over 500 mineral springs partly unexploited. Wine is produced in considerable quantities, and of the tobacco produced (chiefly in Abkhasia) a great deal is imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe.

CAPITAL, Tiflis, which is also the Capital of Trans-Caucasia. Population (1933), 414,000.

Azerbaijan. (A.S.S.R.)

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south, and from the Caspian on the east to Armenia and Georgia. It includes the provinces of Baku, Hanjin (Elisavetpol), the district of Zakatalk and the autonomous territories of Nakhichevan and Nagorni-Karabach. More than 75 per cent. of the people are Muhammadans. The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec. 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 8,802,000 tons in 1928-29 and 12,000,000 tons in 1932. Fishing is also important, and 15,000,000 poods of caviare were produced in 1932. The principal crop is cotton.

The CAPITAL is Baku, population (1933), 650,000, on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batum (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Hanjin (75,000), Kuba (15,000) and Nucha (26,000).

IV.—WHITE RUSSIA. (Byelorussia.)

The independence of White Russia was recognised by Soviet Russia in 1919, and a military and economic alliance was concluded Jan. 16, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghilev. The political neighbours are Lithuania and Poland on the west, and the Ukraine on the south. There is a University founded by the Soviet Government at Minsk.

CAPITAL, Minsk. Population (1931), 177,000; Vitebsk, 110,000; Gomel, 108,000; Moghileff, 52,000.

V.—TURKMENISTAN. (T.S.S.R.)

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia, with Afghanistan as a south-eastern neighbour. Eighty-five per cent. of the inhabitants are Muhammadan Turkomans, with about ten per cent. Muhammadan Uzbeks and five per cent. Russians of the Orthodox faith. The seat of administration is temporarily at Poltarask (formerly Achabad). Krasnovodsk is a port on the Caspian and a railway terminus on the Trans-Caspian line.

CAPITAL, Poltaratsk, 74,000; Merv, 24,000; Krasnovodsk, 17,000.

VI.—UZBEKISTAN. (U.F.S.R.)

	Sq. miles.	Population.
Bokhara .....	50,000	2,000,000
Khiva .....	13,640	400,000
	63,640	2,400,000

Bokhara lies between Turkmenistan (on the W.), the Kara Kalpak territory of the R.S.F.S.R. (on the N.), and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbeks. The former capital (Old Bokhara) is a station on the Russian Trans-Caspian Railway. The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia)

are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A Soviet Republic of Bokhara was established and its independence was recognised by Soviet Russia by treaty of March 4, 1921.

*Khiva*, or *Khorezm*, formerly the Khanate of Khiva, lies between Bokhara and the Kara Kalpak territory of the R.S.F.S.R., and has a population of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp).

**CAPITAL OF UZBEKISTAN**, Tashkent, population (1933) 475,000. Other towns: Samarkand (136,000), Andijan (86,000), Bokhara (50,000), Kokand (76,000), Namangan (81,000). Khiva has about 20,000 inhabitants.

#### VII.—TAJIKISTAN.

*Tadzhik*.—The autonomous Soviet State of the Tadzhik lies between Bokhara (on the W.) and the Kara Kirghiz territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The inhabitants are largely nomads, and almost all are Muhammadans. The estimated area is 56,108 square miles, with a population of about 2,000,000.

**CAPITAL**, Stalinabad, population (1931), 31,000. Other centres, Kojent 41,000, and Dura-Tube 25,000.

#### BRITISH EMBASSY.

(Sofiskaya Naberezhnaya 14, Moscow.)  
*British Ambassador*, His Excellency The Rt. Hon. Viscount Chilston, G.C.M.G. (1933) £6,250  
*Counsellor of Embassy*, D. MacKillop (acting).  
*2nd Secretary*, D. W. Lascelles.  
*2nd Secretary*, W. G. Hayter.  
*Commercial Counsellor*, G. P. Paton, C.B.E.  
*Naval Attaché*, Com. H. Clanchy, R.N.  
*Military Attaché*, Col. E. O. Skaffe, O.B.E.  
*Air Attaché*, Wing Commander A. C. Collier.  
*Archivist and Accountant*, G. W. Vincent, M.B.E.  
*Translator*, C. Dunlop, O.B.E.

#### BRITISH CONSULAR OFFICES.

*Leningrad—Consul-General*, B. J. Gilliat-Smith.  
*Vice-Consuls*, H. McErlean; A. J. Caye.  
*Moscow—Consul* (with local rank of 1st Secretary), R. D. Macrae.

#### VENEZUELA.

(Estados Unidos de Venezuela.)

*President*, General E. López Contreras, elected April 19, 1936, for 7 years.

*Interior*, General Régulo Olivares.  
*Foreign Affairs*, Dr. E. Gil Borges.  
*Hacienda* (Treasury), Dr. Atilano Carnevali.  
*Pomento* (Public Development), Dr. Nestor Luis Pérez.  
*Public Works* (ad interim), Ingeniero Tomas Pacanins.  
*Education*, Dr. Alberto Smith.  
*War and Navy*, Colonel Isaias Medina.  
*Agriculture*, Dr. Alfonso Mejía.  
*Health*, Dr. Santos A. Dominici.  
*Communications*, Dr. Alejandro Lara.

*Envoy Extraordinary in London*, Dr. C. Parra Pérez, 50 Pall Mall, S.W.1.  
*Counsellor*, D. E. Arroya Lameda.  
*2nd Secretary*, J. Arrillaga.  
*Attaché*, L. Sosa Báez.  
*Commercial Agent* (vacant).  
*Vice-Consul*, C. Gurtubay.

*Consul*, London, José T. Falcón.

*Consul-General*, Liverpool, Alirio Parra Marquez.

*Consulates at Birmingham, Cardiff, Glasgow, Newcastle-upon-Tyne, Leith and Hull.*

*Consul*, Dublin Irish Free State, J. A. Calcaño Calcaño.

The most northerly Confederation of South America, situated approximately between 1°40' S. lat. and 12°26' N. lat. and 59°52'–73°15' W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1925 gave the population as 3,026,878; estimated at 3,261,734 in 1933.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. Margarita has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonso de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Caracas, who defeated the Spanish forces in the battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822–1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1891, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcón divided the country into States and formed them into a Federal Republic. Under the constitution of July 9, 1931, the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years, and a Congress of 2 Chambers, a Senate of 40 members, and a Chamber of 85 Deputies, elected for 3 years by adult male suffrage.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border

the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincote and de Usumaino enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries. The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for some 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles further up stream. Among the many tributaries of the main stream are the Ventuari, Caura and Caroui from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The coastal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal industries are agriculture and cattle raising. The oilfields are of increasing importance, the production being 118,770,000 barrels in 1931, 119,596,512 barrels in 1932, and 119,003,714 barrels in 1933.

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are petroleum (140,410,240 barrels in 1935), coffee (45,639 metric tons in 1934), cacao (14,040 metric tons in 1934), goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer.

There are about 680 miles of railway in operation.

Spanish is the language of the country.

Revenue (Budget).....	Bolivares	180,000,000
Expenditure .....		215,860,785
Internal Debt.....		Nil
* External Debt .....		Nil

\* On June 30, 1930, Venezuela paid off its entire external debt (23,757,634 Bolivares) in gold, as a token of homage to *Simón Bolívar*, the Liberator.

§ On May 31, 1935 President Gómez requested Congress to vote the sum of Bs. 12,337,994 for the redemption of the whole of the Internal Debt. Venezuela is thus entirely free from debt.

Total Imports.....	Bolivares	159,685,260
Total Exports .....		671,942,525
Imports from U.K., 1935 .....		£1,118,420
Exports to U.K., 1935 .....		£475, 60

The exchange at par = 25'25 Bs. = £ sterling.

**CAPITAL**, Carácas. Population (1933), 150,000; other principal towns are Maracaibo (74,767), Valencia (36,884), and Barquisimeto (23,109).

**FLAG**: Three horizontal bands, yellow, blue, red (with seven white stars on blue band).

Secretaries, Dr. Voyslav M. Radovanovitch; Ivan Babić-Gjalski.

Attache, Voin Popovitch.

Military Attache, Col. George S. Gilischitch.

Yugoslavia consists of the former Kingdoms of Serbia and Montenegro and of Croatia and Slavonia, part of the Banat, Bosnia, Herzegovina, part of Carniola, and part of Styria, and has an estimated area of 248,987 square kilometres (96,135 square miles), with a population (1934) of 14,730,000. It is divided into 9 *Banovins*—Dravska, Savska, Vrbaska, Primorska, Drinska, Zetska, Dunavska, Moravska and Vardarska. Belgrade, Pančevo and Zemun are united into an independent administrative unit under the Ministry of the Interior.

Montenegro (*Crna-Gora*) was, before the Turkish occupation of the remaining territory, a province of the Serbian Empire. Its independent existence ended with the decision of its Parliament (Nov. 29, 1918) to depose King Nicholas and reunite with Serbia. The chief towns are Cetinje (pop. 5,000) and Podgorica.

Under the Constitution of Sept. 3, 1931, there is a Senate, partly elected and partly nominated by the King, and a Chamber of 305 Deputies (*Skupština*), elected for 4 years by universal adult male suffrage.

Pre-War Serbia had no seaboard, but the inclusion of Croatia, Dalmatia and Montenegro in the Kingdom of Yugoslavia gives access to the Adriatic down a lengthy coast. The principal Yugoslav ports are Sušak, Split, Dubrovnik and Kotor (Cattaro), and by an agreement with the Greek Government Yugoslavia has a free zone at the port of Salonika. In 1936 there were 4,538 miles of normal gauge and 1,959 of narrow gauge railway in operation—total 6,497 miles. The Danube forms a great commercial highway, and the tributary rivers Sava and Tisa provide other important shipping routes; the port of Belgrade is now the second busiest on the Danube. The Paris-Istanbul service of the French Aviation Company (*via* Prague, Vienna, Budapest) calls daily at Belgrade, which has also regular air services to Bucharest; the German Luft-Hansa service also calls daily at Belgrade on the Athens-Belgrade route; a national company connects the chief towns with the capital and maintains services with Vienna and Salonika. The Army, Navy and Air Force on a peace footing consist of 130,000 officers and men, the war strength being about 250,000.

The Orthodox, Roman Catholic, Protestant, Muhammadan and Judaic faiths are recognised by the State; nearly 47 per cent. of the population is of the Orthodox faith. Education is compulsory and elementary education is free. In 1931 there were 8,002 elementary schools, with 22,803 teachers and 1,184,505 pupils; about 20,000 attend continuation schools, and 75,986 receive instruction at technical colleges. There are Universities at Belgrade, Zagreb, Ljubljana and Skopje.

The principal industry is agriculture, over 75 per cent. of the population being engaged therein. In 1935 the yield of the principal cereals was: maize 2,359,711 tons, wheat 1,989,485, barley 375,527, rye 196,085 tons. Areas sown in 1935 were as follows:—maize 2,726,856 hectares, wheat 2,210,219 hectares, barley 433,377, rye 260,356. Other important crops are hemp, oats, vines, sugar-beet, flax, tobacco and pyrethrum. The live stock in 1934 included 3,989,941 cattle, 1,205,865 horses, 8,867,685 sheep, 2,791,592 pigs and 1,881,826 goats. The mineral output in

1935 included 3,450,362 metric tons of coal, 925,114 lignite, 592,130 copper ore, 747,286 lead ore, 219,825 iron ore, 190,057 bauxite, 79,820 pyrites, 60,407 tons of chrome ore and 43,552 metric tons of salt. The principal exports are maize, wheat, timber, live stock, meat, prunes, eggs, poultry, skins and minerals; the imports are chiefly textile manufactures, textile raw materials, machinery, and manufactured goods.

	1935-36. Dinars.	1936 37. Dinars.

**CAPITAL**, Belgrade (*Beograd* = White Fortress), at the confluence of the Sava and Danube, a city in rapid growth, with electric tramways and light, and wide streets; it contains the university, museums, national library, old Turkish citadel, national theatre; population (Dec. 1934) 238,775. Other towns are Zagreb or Agram (185,581), Ljubljana (60,000), Subotica (100,000), Sarajevo (80,000), Novi Sad (64,000), Skopje (65,000), and Split (45,000). The language of the country is Serbo-Croatian and Slovenian.

**FLAG**: Blue, white, red.

#### BRITISH LEGATION.

(Zrinjskoga Ulica 20, Belgrade.)

*Envoy Extraordinary and Minister Plenipotentiary*, Sir Ronald Hugh Campbell, K.O.M.G. (1935).....£3,900

1st Secretary, J. Balfour.

2nd Secretary, M. R. Greiffenhagen.

Commercial Secretary (Grade II., with local rank of Grade I.), H. N. Sturrock, O.B.E.

Naval Attaché, Capt. R. H. Bevan, R.N.

Asst. Naval Attaché, Eng.-Com. R. Cobb, R.N.

Military Attaché, Maj. H. C. Stronge, D.S.O., M.C.

Archivist, C. A. Knight.

#### BRITISH CONSULAR OFFICERS.

Belgrade—Consul, Count Stenbock.

Sarajevo—Consul, Mcl. E. Vibert.

Dubrovnik II (*Gruž*)—Vice-Consul, Capt. I. Hagjija.

Zagreb—Consul, T. C. Rapp, M.C.

Pro-Consul, P. N. Preisler.

Split (*Spalato*)—Vice-Consul, N. Perić.

Susak—Vice-Consul, A. E. Piggot.

Vis (*Lissa*)—Consular Agent, A. Topić.

# The International Institute of Agriculture.

(Villa Borghese, Rome.)

THE International Institute of Agriculture at Rome was founded in 1905 as the result of a Convention made between the representatives of 40 different countries. The number of nations (including dependencies) subscribing to the Convention is over 70, and the Institute may be regarded as the pioneer of official international institutions, and as the most representative of all. It is estimated that the countries and colonies adhering to the Institute represent some 92 per cent. of the population of the world.

The following countries have subscribed to the Convention of 1905:

Argentina.	Irish Free State.
Australia.	Italy.
Austria.	Japan.
Belgian Congo.	Latvia.
Belgium.	Lithuania.
Bolivia.	Luxemburg.
Brazil.	Mexico.
Bulgaria.	Netherlands.
Canada.	Nicaragua.
Chile.	Norway.
China.	Panama.
Colombia.	Paraguay.
Cuba.	Pern.
Czechoslovakia.	Poland.
Denmark.	Portugal.
Ecuador.	Rumania.
Egypt.	San Marino.
Estonia.	Siam.
Finland.	Spain.
France.	Sweden.
Germany.	Switzerland.
Great Britain and	Turkey.
Northern Ireland	Union of S. Africa.
Greece.	United States.
Guatemala.	Uruguay.
Haiti.	U.S.S.R.
Hungary.	Venezuela.
Indian Empire.	Yugoslavia.
Iran.	

The essential objects of the Institute are defined in Article 9 of the Convention and may be summarised as follows:—

The Institute, confining its activities to the international sphere, shall:—

Collect, examine and publish, with the least possible delay, statistical, technical and economic information with regard to farming, crop and live-stock production, trade in agricultural products and the prices current on the different markets;

Indicate the wages paid for farm work;

Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control;

Study questions concerning agricultural co-operation, insurance and credit in all their forms; collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co-operation, insurance and credit;

Submit, should occasion arise, for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their conditions.

The Institute has its seat in Rome, in a palace in the Villa Borghese, specially erected through

the munificence of H.M. Victor Emmanuel. The Governing Body consists of a General Assembly of Delegates of the Member Governments, meeting once every two years, and of a Permanent Committee of Delegates, mostly resident in Rome, acting as its executive and meeting every three months in March, June, October and December. Apart from the General Secretariat to which, in addition to the ordinary administrative offices, the Section of Agricultural Legislation and the Section of Forestry are attached, there are special bureaux dealing with General Statistics, Agricultural Science and Agricultural Economics, respectively.

The *Library of the Institute* is one of the best stocked of libraries specialised in agriculture, particularly on the scientific and economic side. The supply of books is maintained by regular purchases and exchanges, and it also receives a number of gifts from Governments, institutions and from private sources, while all the material is arranged and catalogued in accordance with modern methods. In 1934 the Library was transferred to special premises, provided by the Royal Commission, which administers certain properties on behalf of the Institute. The new Library is well equipped for its purpose, and its 300,000 volumes and 2,500 periodicals regularly received from all parts of the world are now most conveniently arranged. The work of consultation has been greatly facilitated by the provision in the new premises of a spacious reading-room in two divisions, one for periodicals and the other for the volumes of the special reference collection. The unique opportunities for the study of agricultural problems of all kinds that the Institute, through its Library, offers freely to all duly accredited students, as well as to the members of its own international staff, are highly appreciated. For 1935 the number of external readers was 1,722, while the total number of books lent was 6,920. The most important recent accessions to the Library are indicated regularly in the *International Review of Agriculture*. In addition, from 1932 onwards, the Library has compiled a current bibliography of all important studies, including articles and reviews relating to the economic and social aspects of agriculture in the various countries. This bibliography is issued as an appendix to the Review, *Berichte über Landwirtschaft* (P. Parey, Berlin), and ten numbers have already been published. Current work includes the preparation of an international list of agricultural libraries and documentation centres, and also an annotated list of all current bibliographies relating to agricultural and allied sciences.

Information on agricultural questions is supplied by the Institute mainly through its various publications, issued in English and French and, in some cases, also in other languages. The regular publications have for many years included two Year-Books, the *International Year-Book of Agricultural Statistics* and the *International Year-Book of Agricultural Legislation*, as also the *International Review of Agriculture*, published monthly, and in four separate sections, dealing respectively with *Agricultural Statistics*, *Agricultural Science and Practice*, *Agricultural Economics and Sociology*, and *Plant Protection*.

The 1934-35 Economic Commentary on the Year-Book of Agricultural Statistics, the sixth of the series, has appeared in the form established last year under the revised title of *The World Agricultural Situation*. The material is divided into two parts, the first dealing with world agriculture and containing an introductory chapter on the trends in world agriculture in 1934-35, together with a summary of the position and tendencies of the international market for certain products of capital importance. The survey of world agriculture 1934-35 deals with *economic planning in operation* and discusses the consequences of national planned economy. The second part contains accounts of agricultural policy and conditions in the different countries.

In regard to statistical work in Farm Accountancy, it is now proposed to publish a final volume of the series, summarising the material of the five-year period 1927-28 to 1931-32. The work of collecting farm accountancy data is being continued and results are being published in the form of special monographs or special articles in the *International Review of Agriculture*.

The first volume (Europe and U.S.S.R.) of the second *International Yearbook of Forestry Statistics (1933-35)* has been published and the remaining volumes should be issued by the end of 1936. This second Yearbook represents a considerable advance upon its predecessor, both as regards the number of countries treated and the fullness of the data supplied in each case. Each volume of the Yearbook is divided, as before, into two parts, of which the first relates to the composition and production of the forests of some 80 countries, the second to the exports and imports of timber for those countries in which the international timber trade is most developed.

The publication is being continued of an international quarterly, entitled *Government Measures affecting Agricultural Prices*, which summarises the measures taken, in respect of cereals, meat and dairy products, whether relating to the consumption and production of these commodities or to the control of imports or exports. In the second year of issue the number of countries reviewed has been extended to 20.

Among other publications of the year is a monograph on the *Use of Leguminous Plants in Tropical Countries as Green Manure, as Cover and as Shade*, appearing in French and English.

The results of the First World Agricultural Census of 1930 have been brought out in a series of detailed reports for the individual countries to be completed by the end of 1936. A methodical study of the schedules and instructions to enumerators adopted for the 1930 Census has also appeared in English and French.

The various publications of the Institute may be obtained in London from Messrs. P. S. King and Son, Westminster, or may be ordered direct from the Institute or through any bookseller.

The economic work of the Institute comes under the purview of its expert *Agricultural Economic Committee*, which advises on the economic and statistical programme in its international aspects. Some reconstitution of this body was effected in 1936. The Institute has also the assistance of two further advisory bodies, viz., the *International Agricultural Scientific Council*, which, through the expert members of its various Commissions, is in a

position to advise on any purely technical questions that may arise, and the *Permanent International Commission of Agricultural Associations*, which provides means for ascertaining the views of practical agriculturists. At the same time liaison with other bodies interested in agriculture is maintained by the *International Commission for Co-ordination in Agriculture*.

By the mandate of the General Assembly of 1934, an important part of the work of the International Institute of Agriculture was to consist in reports prepared by the Bureaux in collaboration on world production and on international trade in agricultural staple commodities. This mandate has been so far carried into effect that studies of this order have been prepared during 1936 in respect of Cotton and Meat.

Another special study is connected with the problem of Nutrition. The Institute was represented at the first meeting (February 10-14, 1936) of the Mixed Committee for the problem of Nutrition, established by the League of Nations. At a subsequent meeting of a Subcommittee in Rome, it was recommended that the Institute should carry out a series of statistical studies on the production and consumption of a number of foodstuffs of particular importance for the work of the Mixed Committee. The initial stages of this enquiry have already been undertaken by the Statistical Bureau of the Institute with expert assistance. In connection with the studies of the Nutrition Problem at present in course, the Institute, at the request of the International Labour Office, also assisted in the preparation of a section (that relating to the evolution of world food production) of the Report on Nutrition and Social Policy, which was to be submitted to the International Labour Conference of the current year.

The XIIIth General Assembly was held from October 5 to 10 under the Honorary Presidency of Mr. H. Ramsbottom, Minister of Pensions, ex-Parliamentary Secretary to the Ministry of Agriculture and Fisheries; Dr. H. C. Taylor (U.S.A.), being the President of the Assembly, and Dr. Walter (Germany) and Dr. Laur (Switzerland), the Vice-Presidents.

A meeting of expert statisticians, to consider the preparatory work for the 1940 Census in the light of the results obtained in the First Census of 1930, was held simultaneously with the Assembly.

Among the important resolutions adopted by the 1936 General Assembly were recommendations to the effect that the Institute should form constantly closer relations with organised agricultural groups, and also that, in view of the increasingly important place occupied in all countries by Agricultural Associations, regular publication of the investigations carried out by these bodies, in respect of agricultural co-operation, insurance and credit, should be maintained as a special feature of the Institute's work. Subjects recommended for treatment in connexion with the series of studies of agricultural commodities, initiated by the 1934 Assembly, included fats and oils of animal and vegetable origin, and the utilisation of residues of human and animal foods as fertilisers and in agricultural industries.

The Assembly expressed its approval of the work thus far accomplished by the Institute in

connexion with the enquiry of the League of Nations into the Nutrition problem, and urged the continuance of this collaboration as a definite part of the Institute's programme of work, since, having regard to the basic purposes of agriculture, nutrition questions properly enter into its competence.

Other resolutions adopted dealt with finance and administration, one of the most important relating to staff conditions, and approving, in principle, the establishment of a scheme of pensions for the international staff, to take the place of the present system of allowances on retirement.

*President:* His Exc. Prof. G. Acerbo, Barone dell'Aterno (*Delegate of Italy*).

*Vice-President:* Dr. J. J. I. Van Rijn (*Delegate of the Netherlands*).

*British Delegate:* Mr. R. R. Enfield.

*Delegate of the Irish Free State:* Mr. J. Radcliffe.

*Delegate of the Indian Empire:* Sir Firoz Khan Noon.

*Delegate of Canada:* Mr. R. R. Enfield.

*Delegate of Australia:* Mr. F. L. McDougall, C.M.G.

*Delegate of the Union of S. Africa:* Dr. G. M. A. Heymaus.

*Delegate of the United States of America:* Mr. J. Clyde Marquis.

*Secretary General:* Prof. Alessandro Brizi.

## THE INTERNATIONAL PEACE CAMPAIGN.

*Joint Presidents,* The Viscount Cecil of Chelwood; Monsieur Pierre Cot.

*International Treasurer and Vice-Chairman,* British National Committee, Dame Adelaide Livingstone, D.B.E.

*Congress Secretariat,* 48 Boulevard Botanique, Brussels.

The International Peace Campaign seeks to mobilise and render effective public opinion in all countries in support of Peace, Disarmament, and International Justice through a strong League of Nations.

It has four objectives:—

1. Recognition of the sanctity of Treaty obligations.
2. Reduction and limitation of Armaments by International Agreement, and the suppression of profit from the manufacture and trade in arms.
3. Strengthening of the League of Nations for the prevention and stopping of war by the organisation of Collective Security and Mutual Assistance.
4. Establishment, within the framework of the League of Nations, of effective machinery for the remedying, by peaceful means, of international conditions which might lead to war.

The International Peace Campaign is no new society, but a co-ordination of the work for Peace through the League of Nations on the part of numerous existing bodies that adhere to the Four Points programme.

An initial step in the Campaign was the holding, in Brussels, from the 3rd to the 6th of September, 1936, of a *World Peace Congress*. This was attended by between 4 and 5 thousand delegates, from 35 countries. They came as representatives from 750 National and 40 International organizations, with an aggregate membership running into several hundred millions of persons. The field covered ranged from the Churches, Ex-Servicemen, Trade Union, and Co-operative movements to Intellectual, Feminine, Agrarian and Youth organisations. While there was no representation of political parties, as such, Conservatives, Liberals, Democrats, Socialists and Communists were all to be found amongst the delegates.

The British Delegation numbered 580 (with 60 additional persons who attended as observers). The League of Nations Union sent a strong contingent (55 branches, apart from headquarters, being directly represented).

Local Government Authorities represented numbered 10.

Peace Councils 55.

Trades Unions 23.

Co-operative Societies 7, for instance:—

The total of organisations represented in the British delegation was 200.

Apart from the public meetings, the work of the Congress was conducted in commissions (or groupings of the delegates according to function), each charged with the task of considering how best to gain the adherence of its own clientele for the Four Points, and to utilise its special knowledge and skill in the conduct of the campaign generally.

The Commissions were 13 in number, namely:—

Churches.	Arts, Letters and
Education.	Science.
Co-operative.	Sport and Physical
Aviation.	Education.
Agrarian.	Women's Organisations.
Youth.	Ex-Servicemen.
Trades Unions.	Commerce, Industry
Parliamentary.	and Finance.

A series of resolutions were passed by the Congress embodying the Four Points; these resolutions were later presented by a delegation of over 100 to a special session of the members of the Assembly of the League of Nations at Geneva on October 2.

The campaign is being conducted through National Committees in 40 countries, all co-ordinated through an International Office and secretariat that is being established at Geneva. The immediate task of these committees is to implement, in their own countries, the resolutions passed at the Brussels Congress.

## THE WEATHER OF 1935-36.

(1935) *October*.—Broadly speaking, the month was wet and dull, with frequent gales. The excess of rainfall and deficiency of sunshine were particularly remarkable in Scotland. The depression, which was centred over the south of Scotland on the 1st, moved away eastward, and between the 2nd and 6th there was a period of heavy local rain and thunderstorms. Unsettled conditions persisted in the west and north, but for the most part, rainfall was only slight in England between the 12th and 17th. The most intense depression of the month passed from the south of Iceland to the Baltic from the 18th to 20th, and caused widespread and severe gales in the British Isles. A spell of colder weather followed, with widespread sleet and snow in Scotland from the 20th to 22nd. On the 27th the British Isles came in the path of a broad stream of equatorial air and temperature rose decidedly. During the last two days a deep depression caused strong, squally winds and local gales in the British Isles. Mean pressure was below the average except at the Scilly Isles, the deviation at 7 h. ranging from +0.4 mb. at Scilly to -11.5 mb. at Lerwick. Strong winds and gales were more frequent than usual in October. Among the highest speeds recorded in gusts were 101 m.p.h. at Bell Rock, 92 m.p.h. at Abbotsinch, and 90 m.p.h. at Dunfanaghy Road on the 19th. Mean temperature was slightly below the average. The warmest spells were from 13th to 16th and 27th to 29th, while the coldest was from 20th to 26th. The extremes for the month were:—(England and Wales) 66° F. at Usk on the 6th and 27th, 15° F. at Rickmansworth on the 21st; (Scotland) 62° F. at Glenbranter on the 3rd and at Ruthwell on the 4th, 24° F. at Dalwhinnie on the 22nd; (Ireland) 66° F. at Glasnevin and Trinity College (Dublin) on the 15th and at Cork on the 26th and 29° F. at Glasnevin on the 21st. The general precipitation of the British Isles expressed as a percentage of the average for the period 1881 to 1915 was 139, the values for the constituent countries being England and Wales 129, Scotland 183 and Ireland 119. In many parts of Scotland more than twice the average was recorded, while at some places, totals exceeded three times the average. At Inveraray it was the wettest month since before 1881. At some places measurable rain fell on each day of the month. Local thunderstorms were frequent. Among the heaviest falls in 24 hours were:—55 mm. at Stonehaven on the 3rd, 74 mm. at Mary Tavy (S. Devon) on 5th, 55 mm. at Lligwy on 9th, 99 mm. at Glenquoich on the 18th and 67 mm. at Dungeon Ghyll on the 28th. With the exception of eastern England, sunshine was generally deficient. At several places in Scotland it was the dullest October since records began. At Southport it was the dullest October since 1903. Local fog occurred at times, mainly from the 2nd to 8th, 14th to 17th, and 21st to 26th. *Aurora* was reported in Scotland on 11 nights and solar haloes were noted at Oxford on 13 days.

*November*.—The month was unsettled and wet, except in the north-west of Scotland. Serious flooding was reported over wide areas in England on the 17th and following days. The opening days were mild and unsettled.

Winds were mainly from some southerly point, and temperature reached 65° F. locally in England on the 3rd. There was heavy rain in England on the 7th. Very unsettled conditions prevailed until about the 21st. A secondary depression, which passed over England on the 17th and 28th, was deep and caused local gales and widespread heavy rain. A period of more settled weather occurred from about the 22nd to 25th. Temperature was rather low from the 23rd to 25th. General rain was again experienced in the west and north on the night of the 25th to 26th, and thereafter deep depressions situated northward of the British Isles maintained unsettled conditions for the remainder of the month, with rather squally south-westerly to westerly winds, reaching gale force at times in exposed places in the west and north. A widespread gale was experienced in England and Ireland on the 30th. Mean pressure was decidedly below the average generally. The deficiency at 7 h. varied from 4.9 mb. at Lerwick to 11.2 mb. at Valentia Observatory. Gales occurred on several days and among the highest gusts recorded were:—78 m.p.h. at Bidston Observatory on the 30th and 75 m.p.h. at Valentia Observatory on the 3rd. Generally speaking, mean temperature somewhat exceeded the average in Great Britain, and was slightly below the average in Ireland. The warmest spell occurred during the early days of the month, maximum temperatures reaching or exceeding 60° F. at many places. The coldest period occurred generally between the 23rd and 26th, minimum temperatures of 25° F. or less were registered at numerous stations on the mornings of the 24th or 25th. The extremes for the month were:—(England and Wales) 65° F. at Attenborough and Canterbury on the 3rd, 16° F. at Rickmansworth on the 25th; (Scotland) 61° F. at Turnberry on the 3rd and 4th, 19° F. at Eskdalemuir on the 24th; (Ireland) 59° F. at Armagh and Trinity College, Dublin, on the 3rd and 24° F. at Markree Castle, Foyines and Cork on the 25th and at Phoenix Park, Dublin, on the 17th. The general precipitation of the British Isles expressed as a percentage of the normal was 154, the values for the constituent countries being England and Wales 179, Scotland 114, and Ireland 132. The general distribution was rather erratic, for while in north-west Scotland a considerable deficiency occurred, more than twice the average was recorded over large areas in southern and central districts. The period 7th to 20th was excessively wet in England and flooding occurred in many places. At Shanklin, Calshot, Wakefield and Cranwell it was the wettest November since records commenced at these stations. Falls of 2 inches or more in 24 hours were recorded at several places on the 14th, 16th and 30th. Hail and local thunderstorms were reported frequently during the month. Sunshine aggregates, generally, exceeded the average in Ireland, south-west England and north of Scotland, and were, for the most part, below the average elsewhere. Local fog occurred at times, particularly between the 5th and 25th. *Aurora* was observed in Scotland on 10 nights, solar haloes at Oxford on 12 days, and a sun pillar at Worthy Down on the 21st.

*December.* The outstanding features of the month were the extremely cold spell from the 17th to 24th, excessive sunshine except in south-eastern districts, much fog from the 6th to 8th and 17th to 24th, and widespread flooding in England during the last week. The month opened with unsettled weather, which continued until the 8th. An anticyclone, which was centred off the west coast of Scotland on the 9th, moved eastward and maintained anticyclonic conditions over the United Kingdom for some days. Unsettled weather was re-established on the 14th by a depression centred over eastern Iceland. Local gales occurred in the west and north. Heavy rain fell locally in the west of Scotland on the 14th. Subsequently from the 19th to 24th a belt of high pressure extended across the British Isles between depressions situated over Scandinavia and off our south-west coasts. This was a period of intense frost, much fog and some snow. On the 24th and following days a deep Atlantic depression approached our western coasts and secondary depressions crossed the British Isles. There was a rapid rise of temperature and much rain fell in England. Monthly mean pressure was below the average in all districts, the deficiency being greatest in the south. At Kew Observatory at 7 h. it was  $-10.1$  mb. Local gales were recorded on several days, but on the whole the month was not a windy one for the time of the year. Among the highest gusts recorded were 84 m.p.h. at The Lizard on the 2nd, 80 m.p.h. at Bidston Observatory and 76 m.p.h. at Fleetwood on the 1st. Mean temperature was well below the average, the deviation ranging from  $-1.1^{\circ}\text{F.}$  in the Channel Isles to  $-4.2^{\circ}\text{F.}$  in western Scotland. The spell from the 17th to 24th was exceptionally severe, temperatures below  $15^{\circ}\text{F.}$  being recorded at many stations, while  $4^{\circ}\text{F.}$  was recorded at Braemar,  $7^{\circ}\text{F.}$  at Balmoral, Mayfield and Rickmansworth on the 24th, and  $8^{\circ}\text{F.}$  at Appleby, Buxton, West Linton and Peebles on the 23rd. This cold spell was immediately followed by the mildest spell of the month. The extremes for the month were:—(England and Wales)  $55^{\circ}\text{F.}$  at Dungeness on the 28th,  $7^{\circ}\text{F.}$  at Rickmansworth and Mayfield on the 24th; (Scotland)  $51^{\circ}\text{F.}$  at Achnashellach on the 3rd,  $4^{\circ}\text{F.}$  at Braemar on the 24th; (Ireland)  $53^{\circ}\text{F.}$  at Dublin City and Hazelhatch on the 26th and  $12^{\circ}\text{F.}$  at Markree Castle on the 23rd. The general precipitation of the British Isles expressed as a percentage of the average was 88, the values for the constituent countries being England and Wales 100, Scotland 72 and Ireland 72. The heaviest daily falls occurred generally during the last week and destructive floods resulted in many districts. Sleet or snow occurred frequently during the first 25 days. Thunderstorms were widespread on the 1st and 2nd. They were also reported on the 7th, 8th and 15th. A large excess of bright sunshine was enjoyed over the greater part of the country. The largest excess was recorded in northern and western Scotland: at Stornoway the total for the month, 54 hours, is the highest recorded in December since before 1881. Fog occurred very frequently: it was reported on 25 mornings at Nottingham and on 24 at Glasgow. During a thick fog on the 23rd Kew Observatory reported the greatest atmospheric pollution for nearly 11 years. *Aurora* was seen in Scotland

on 6 occasions, and solar haloes were noted at Oxford on 10 days. A waterspout was observed off Ferring, near Worthing, on the 28th.

*Year 1935.*—The weather of the year was very variable and many interesting features occurred. Among the most notable were the severe frost and unusual snowfall of mid-May; the warm, sunny and mainly very dry period during the summer holidays from about June 20th to August 22nd, the excessive and frequent rainfall of the three autumn months, the violent gales of September 16th to 18th and October 18th to 20th, and the severe frost and widespread fog from December 17th to 24th. *January.*—In most districts there was a deficiency of rainfall. Mean temperature was somewhat above the average, while sunshine was variable. *February* was very mild and wet, with frequent strong winds and gales. Sunshine was deficient on the whole, except in Ireland and parts of Scotland. *March* was unusually dry and very mild, except for a cold spell from the 8th to 11th. There was a fairly heavy fall of snow locally in south-west England around the 10th. Sunshine slightly exceeded the average for the country generally. *April* was mainly wet, excessively so in England and Wales and east and south-east Scotland. It was also dull, most districts recording less than average sunshine, but mean temperature was generally above average. *May.*—The outstanding features were the large deficiency of rainfall and the cold spell from the 12th to 19th, the latter causing much damage to trees, fruit and vegetables. Sunshine was generally in excess of the average, especially in western Scotland, north-west England and northern Ireland. *June* was a wet month, with frequent and sometimes severe thunderstorms. The first three weeks were very unsettled, rather cool and dull, with rain nearly every day. Mean temperature for the month was above the average. *July* was distinguished by an almost universal excess of sunshine, a large deficiency of rainfall at most places and an unusual number of warm days. At many places it was the driest July since records became available and at some places it was the sunniest July on record. *August* was warm and dry on the whole, though rainfall exceeded the average in parts of southern England, in north and west Scotland and isolated areas elsewhere. Sunshine was excessive in England and Wales and variable elsewhere. *September* was very unsettled and unusually wet, the general rainfall amounting to nearly 200 per cent. of the average. Severe gales prevailed from the 16th to 19th, the one of the 16th to 17th being very severe in the southern half of England. *October* was dull and wet, on the whole, particularly in Scotland where some places recorded more than three times the average. Strong winds and gales were more frequent than usual in October, the gale of the 18th to 20th being widespread and very violent, especially in the northern half of the country. In some places it was the dulllest October on record. *November* was the third successive month in which rainfall exceeded the average generally over the British Isles. Mean temperature somewhat exceeded the average in Great Britain and sunshine totals generally exceeded the average in Ireland, south-west England and

the north of Scotland, and for the most part below the average elsewhere. December had several outstanding features; an extremely cold spell from the 17th to 24th, much fog from the 6th to 8th and 17th to 24th, and widespread flooding in England during the last week. Rainfall was deficient in Scotland and Ireland, but more than the average fell over a considerable part of England. Mean pressure for the year was everywhere below the average, the deficiency at 7 h. varying from 0.4 mb. at the Scilly Isles to 2.1 mb. at St. Ann's Head and Aberdeen. Large variations occurred in individual months. There were several noteworthy gales during the year, those of September 16th to 17th and October 18th to 20th were outstanding. The highest hourly mean speeds were 66 m.p.h. at Scilly on September 16th and 68 m.p.h. at Bell Rock on October 19th, while among the highest gusts were 101 m.p.h. at Bell Rock on October 19th, 98 m.p.h. at Pendennis Castle, 96 m.p.h. at Scilly and 92 m.p.h. at The Lizard on September 16th. A feature of the year was the general mildness, all districts exceeding the average temperature. The long warm period from about June 21st to August 24th, and the two very cold periods of May 12th to 19th and December 17th to 24th are of particular interest. The extreme temperatures of the year were:—(England and Wales) 92° F. at Attenborough on July 13th, 7° F. at Mayfield and Rickmansworth on December 24th; (Scotland) 84° F. at Dunbar and Kelso on June 22nd, at Liberton on July 13th and at Gordon Castle on August 26th, 4° F. at Braemar on December 24th; (Ireland) 81° F. at Newcastle, Co. Wicklow, on July 13th and 12° F. at Markree Castle on December 23rd. The general precipitation of the British Isles expressed as a percentage of the average for the period 1881 to 1915 was 110, the values for the constituent countries being, England and Wales 114, Scotland 109, and Ireland 98. Among the heaviest falls in 24 hours were: 153 mm. at Swainswick (Somerset) on June 25th, 109 mm. at Baltasound on July 20th, 108 mm. at Aberfeldy on June 23rd and 104 mm. at Kinlochquhoich on August 10th. Thunderstorms were rather more frequent than usual, occurring on 25 or more days at many stations. During the storm of June 25th, at Swainswick, over 6 inches of rain fell in 3 hours. Sunshine aggregates exceeded the average in most districts, the percentage of the average over the British Isles as a whole being 104. July was the outstanding month, at some places it was the sunniest July on record. More than 300 hours were registered at many stations in east and south-east England. The Aurora was observed in Scotland in each month except May, June and July, most frequently in October and November. Some remarkable displays of halo phenomena were observed in March and April. Waterspouts were seen at Teignmouth on May 17th, at Beachy Head on July 19th, at Bude on August 28th and off Ferring on December 28th. A line squall, which moved across the country on September 14th, was particularly severe at Sandbach, Cheshire.

(1936) January.—The mild, unsettled conditions persisted during the first ten days, in which period extensive flooding again occurred.

From the 1st to 8th rain fell almost daily and was heavy at times, though a temporary improvement occurred locally around the 3rd to 4th. The rainfall on the 9th was general, and heavy in many places, and widespread, rather severe gales were experienced between the 9th and 11th. The highest temperatures of the month occurred round about this period. Anticyclonic conditions then prevailed until the 15th, temperature fell decidedly, and fog was rather widespread in England. From the 16th to 18th weather continued cold, but with widespread snow and sleet. In the north a severe snowstorm occurred on the 19th to 20th, and rather widespread gales were reported on the latter day. On the 23rd and 24th Atlantic depressions moved slowly over the British Isles and filled up. Temperature rose gradually and rain fell generally on the 24th and 25th. After the 27th mild weather prevailed, with heavy rain at times, notably on the 28th. A noteworthy feature of the month was the exceptionally low mean pressure registered over the country generally. At Southport, in 65 years records, only December, 1876, was lower, and at Radcliffe Observatory, Oxford, it was the lowest in January since before 1881. Several gales were recorded, that of the 9th to 10th being the most severe. A mean hourly velocity of 60 m.p.h. at Pendennis on the 9th and 62 m.p.h. at Kingstown on the 10th being recorded. At Bell Rock Lighthouse gales occurred on 10 days. Among the highest gusts of the months were 92 m.p.h. at Bidston, 91 m.p.h. at The Lizard, 89 m.p.h. at Southport and 88 m.p.h. at Fleetwood and Barton on the 9th. Mean temperature was below the average except in east and south-east England and the Channel Isles. The outstanding feature was the cold spell from the 12th to 23rd. During this period temperatures of 10° F. or below were registered at some places. On the grass, 0° F. was registered at Rickmansworth on the 18th, at Mayfield on the 19th and at Braemar on the 20th. The extremes for the month were:—(England and Wales) 58° F. at Stratford-on-Avon, Westminster, Llandudno and Bath on the 9th, 9° F. at Workop, Mayfield and Barton on the 19th; (Scotland) 52° F. at Peebles, Dumfries, Ruthwell and Douglas on the 9th and at Ayr on the 9th and 10th, 6° F. at Logie Coldstone on the 20th; (Ireland) 57° F. at Glasnevin on the 8th, and 18° F. at Newtownforbes and Aldergrove on the 19th. The general precipitation of the British Isles expressed as a percentage of the average for the period 1881 to 1915 was 163, the values for the constituent countries being England and Wales 178, Scotland 140 and Ireland 148. With the exception of a part of Scotland, the excessive rainfall was general. It was the wettest January on record at some stations, at Aberdeen in a record going back to 1871. Among the heaviest falls in 24 hours were 85 mm. at Dalry, Forest Lodge, on the 9th and 66 mm. at Borrowdale, Cumberland, on the 4th. Snow fell rather frequently, the outstanding fall being that of the 19th to 20th. In Scotland, some villages were isolated for several days. At Bellingham, the snow was 12 inches deep on the 20th and 9 inches from 21st to 24th, and at Buxton it was 18 inches deep on the 22nd. Sunshine was generally below the average except in Scotland and north-east England. Fog was frequent during the month, being reported

at Nottingham on 19 mornings, Cranwell on 17 mornings, and Glasgow on 16 mornings. *Aurora* was observed in Scotland on 6 nights, and solar haloes at Oxford on 16 days. During a thunderstorm at Newbury (Berks) on the 10th there was a single flash of lightning; a 70 ft. tree was struck and many windows of houses nearby were blown out.

**February** was cold and wet in England, eastern Scotland, and in the extreme south of Ireland. A shallow depression centred off north-west Ireland on the 1st moved away eastward and, in its rear, cold northerly winds prevailed over the United Kingdom with rather widespread showers of snow and sleet. Cold and mainly dry conditions prevailed for the most part until the 13th, but a deep depression off our south-west coasts caused widespread gales on the 10th and heavy rain in south-west England and south Ireland. Unsettled conditions, with precipitation at times, then persisted until the 25th, when a wedge of high pressure passed southward over the country. From the 26th to 28th a deep depression moved southward from Iceland. Snow or sleet was rather widespread on the 28th and 29th; the falls were fairly heavy in north-east England and the south-eastern uplands of Scotland, and in the latter area the accompanying strong north-easterly winds caused deep drifts in places. For the sixth month in succession, mean pressure was below the average generally. The deficiency at 7 h. ranged from 0.8 mb. at Lerwick to 11.4 mb. at the Scilly Isles. Winds from some easterly point were more frequent than usual. Gales were fairly frequent and were reported on 9 days at Valentia Observatory, Baltasound and Lerwick and on 8 days at St. Ann's Head. The most widespread and severe gale in England and Ireland was the one around the 10th-11th; mean hourly speeds of 67 m.p.h., 64 m.p.h. and 60 m.p.h. were recorded at Pendennis Castle, The Lizard, and St. Mary's, Scilly, respectively on the 10th. Among the highest speeds recorded in gusts were 92 m.p.h. at Valentia, 90 m.p.h. at Pendennis and 88 m.p.h. at St. Mary's, Scilly, all on the 10th. Mean temperature was below the average in all districts, the deficiency being greatest in the Midlands and north-east England. The coldest spells were, as a rule, from the 3rd to 5th and the 8th to 14th, while generally the mildest spell was from the 17th to 21st. During the cold spells, many places recorded screen minima of less than 10° F. At Shoburyness on the 11th, a thin layer of ice formed on the sea and extended 20 ft. out, while 2 to 3 ft. of flaked ice was heaped up by the incoming mid-day tide. The extremes for the month were:—(England and Wales) 56° F. at Oundle on the 18th, 7° F. at Rickmansworth on the 12th; (Scotland) 51° F. at Auchincruive on the 18th and at Forbes on the 10th, 5° F. at Braemar on the 5th and 13th; (Ireland) 55° F. at Blacksod Point on the 6th, 21° F. at Aldergrove and Dublin (Phoenix Park) on the 4th. The general precipitation of the British Isles expressed as a percentage of the normal was 112, the values for the constituent countries being England and Wales 127, Scotland 87 and Ireland 93. The distribution was very variable for while at Fort William only about 40 per cent. was recorded, more than 200 per cent.

of the average fell in parts of England and Scotland, while three times the average fell at the Scilly Isles. Among the heaviest falls in 24 hours were: 79 mm. at Dunmanway, 63 mm. at Cork and 61 mm. at Scilly on the 10th. Broadly speaking, sunshine exceeded the average in England (except the south-west), in western Scotland and northern Ireland. On the whole, the first half of the month was the sunnier; the 20th was, however, the sunniest day of the month at many stations. Local fog occurred at times, particularly from the 4th to 6th, 8th, 12th to 13th, 15th to 18th, 22nd to 26th, and 28th to 29th. The most notable fog was that of the 15th to 16th, when it was both widespread and thick in places. The *Aurora* was observed in Scotland on 8 occasions. Solar haloes were noted at Oxford on 9 days. Glazed frost occurred at Farcham and at Niton, Isle of Wight, on the 11th.

**March.**—The month was distinguished by a marked deficiency of sunshine. Temperature was considerably above the average, while rainfall was deficient over the country generally, but an excess occurred in places, particularly in south-west England, the western Midlands and south-east Ireland. The month opened with cold northerly winds with snow or sleet in many places. Southerly gales blew in Scotland on the 4th, on which day fog was widespread in the east, south-east and central districts of England. An Atlantic depression on the 7th and 8th caused rain in most districts and milder conditions. On the 9th there was general rain over the British Isles and in Scotland snow and sleet. This was succeeded by a ridge of high pressure and weather became dry, and in the south very mild, temperature reaching 61° F. at South Farnborough on the 10th. Temperature fell again on the 11th, but, with anticyclonic conditions prevailing up to the 18th, mainly dry weather was experienced, while temperature rose during the latter part of this period. On the 19th a depression off south-west England was spreading north-east and, with air of warm southerly origin invading the country, temperatures rose high above the average March level and exceeded 60° F. at many places in the next few days. A trough of low pressure moved northwards on the 23rd, giving general rain and local thunderstorms. Conditions continued unsettled and very mild until the end of the month. Widespread rain fell on the 26th and 29th, and heavy rain occurred in south-west England and south-west Ireland on the night of the 28th. Mean pressure was much below the average in the south-west and somewhat exceeded the average in the north of Scotland, the deviation at 7 h. ranging from -5.9 mb. at the Scilly Isles to +3.9 mb. at Lerwick, Shetland. South-easterly or easterly winds were unusually prevalent and gales were, on the whole, infrequent for March. A rather widespread gale was reported in Scotland on the 1st, and gales occurred locally on the 2nd, 4th and 5th. They were also reported at isolated stations in the north and west on the 26th and 29th to 31st. Among the highest gusts recorded were 68 m.p.h. at Kirkwall and Bell Rock Lighthouse and 65 m.p.h. at Lerwick on the 1st and 63 m.p.h. at St. Mary's, Scilly, on the 2nd. Mean temperature exceeded the average in all districts. The first four days were

cold, and a second rather cold spell occurred from about the 12th to the 15th. The latter half of the month was very mild, particularly after the 19th. The extremes for the month were:—(England and Wales) 65° F. at Kensington, Camden Square (London) and Cranwell on the 21st, 18° F. at Rickmansworth on the 4th; (Scotland) 65° F. at Fort William and Kelso on the 22nd, 11° F. at Braemar on the 3rd; (Ireland) 62° F. at Newcastle (Wicklow) on the 31st and 25° F. at Markree Castle on the 11th and at Glasnevin (Dublin) on the 3rd. The general precipitation of the British Isles expressed as a percentage of the average was 85 and for the constituent countries England and Wales 90, Scotland 71 and Ireland 86. Thunderstorms were reported on each day from the 20th to 23rd. Among the heaviest falls of rain in 24 hours were:—55 mm. at Fofanny (Co. Down) on the 26th, 47 mm. at Fofanny on the 28th, 60 mm. at Snowdon and 47 mm. at Borrowdale (Cumberland) on the 29th. The most striking feature of the weather of the month was the exceptional deficiency of sunshine. At many places it was the dullest March on record. At Southport and Dublin (Phoenix Park), no previous March has had so little sunshine in records which go back to 1892 and 1881 respectively. Local fog occurred at times, particularly from the 3rd to 4th, 7th to 11th, 16th to 20th and 24th to 31st. The fog on the 4th was widespread in England and thick in many places. The *Aurora* was observed in Scotland on 7 occasions, the display on the 24th being seen as far south as Edinburgh. Solar haloes were noted at Oxford on 13 days.

*April.*—The weather of the month was distinguished by persistent cold northerly winds during the first three weeks, and by deficient rainfall and excessive sunshine in Scotland, northern England and north-east Ireland. The month opened with a depression off southern Ireland, moving east-north-east, causing rain in England and south Ireland, and on the 3rd a secondary depression over the Bay of Biscay moving east, caused more rain in southern districts. Meanwhile an anticyclone moved south-east from Greenland, and mainly dry weather prevailed from the 4th to 10th, with good sunshine records at times, particularly in the north and west. On the 11th, weather began to deteriorate, and during the next few days cold north-easterly winds prevailed with showers and snow in many places. Subsequently, pressure became high over Greenland and low over Germany and Scandinavia. The prevailing winds were from some northerly point and were accompanied by local wintry showers. Much sunshine was recorded from the 17th to 19th inclusive. Fairly heavy rain fell in the south on the 20th and 21st, but the 22nd was a sunny day. A change to mild, unsettled conditions with southerly to south-westerly winds occurred around the 23rd to 24th. A wedge of high pressure crossed the British Isles on the 27th, and subsequently the Azores anticyclone spread north-east over England, giving fair, rather warm weather over most of the country. Mean pressure for the month was generally somewhat above average, the excess being greatest in the north-west. Winds from some northerly point were unusually persistent during the first three weeks, but a mild south-westerly current set in on the 24th. Gales

were reported on the 3rd, 4th, 13th, 14th, 15th, 21st and 22nd. Among the highest gusts were 63 m.p.h. at Lerwick on the 14th, 59 m.p.h. at Pendennis Castle on the 3rd and 58 m.p.h. at Dunfanaghy Road, Donegal, on the 24th. Mean temperature was below the average in all districts. The coldest spell generally was between the 12th and 23rd, and the warmest was during the last week. The extremes for the month were:—(England and Wales) 69° F. at Newport, Isle of Wight, on the 29th, 16° F. at Rickmansworth on the 23rd; (Scotland) 63° F. at Stirling on the 8th and at Perth on the 30th, 14° F. at Dalwhinnie on the 21st; (Ireland) 62° F. at Glasnevin and Trinity College, Dublin, on the 28th and at Foynes on the 30th, and 24° F. at Markree Castle on the 13th and 19th. The general precipitation of the British Isles, expressed as a percentage of the average was 81, the values for the constituent countries being England and Wales 96, Scotland 54 and Ireland 73. Although the deficiency was almost general, falls were usually excessive in Lincolnshire, the Midlands, southern and south-western England. Snow or sleet occurred at times, particularly between the 11th and 22nd, and thunderstorms were reported at a few stations, mainly between the 11th and 16th and on the 20th, 22nd, 25th and 26th. Among the heaviest falls in 24 hours were:—49 mm. at Fofanny (Co. Down) on the 23rd and 40 mm. at Swansea on the 3rd. A noteworthy feature of the month was the excessive sunshine in Scotland, northern England and at certain stations in northern Ireland. On the other hand, in southern and eastern England and southern Ireland, there was, on the whole, a deficiency. At Wakefield it was the sunniest April since 1921, at Incheith since before 1923 and at Aldergrove since before 1927. At Tiree, an average of rather more than 12 hours per day was enjoyed during the period 17th to 22nd. Fog was reported on several days. *Aurora* was observed in Scotland on 17 occasions and Solar haloes were noted at Oxford on 7 days.

*May.*—The month was distinguished by a deficiency of rainfall. Sunshine was excessive in Scotland, Ireland and north-west England, but deficient, on the whole, elsewhere in England. On the 1st an anticyclone centred over the British Isles moved east, and mainly fair weather prevailed during the first four days, with good records of bright sunshine in many places. A depression moving south-east from the west of Ireland brought rain to western districts on the 5th and locally on the 6th. Thunderstorms occurred in some places on the 5th and 6th. Mainly fair weather prevailed from the 7th to 11th. A depression centred south-west of Iceland and a shallow trough moving south-east across the British Isles brought rain in the north-west and west late on the 11th and more generally on the 12th. During the next week rather unsettled conditions were general, with local thunderstorms between the 16th and 18th. Mainly fair weather prevailed on the 19th and 20th, and the 21st was bright with showers. Rain was fairly general on the 22nd, and occurred in many places in England on the 23rd, while a shallow depression spreading west from Germany caused heavy rain in north-east England on the 24th. Meanwhile, pressure became high northward of Scotland, and by the

27th an intense anticyclone was established south-west of Iceland and dominated conditions in the British Isles. Subsequently, a depression north of the Faroes moved south-east, and then east, and cool showery weather, with local thunderstorms, prevailed until the end of the month. Mean pressure exceeded the average generally, the excess being much greater in the north than the south. Winds from some northerly or easterly point greatly predominated. No outstanding gales occurred, and among the highest gusts recorded were:—57 m.p.h. at Valentia Observatory on the 14th, 56 m.p.h. at Kirkwall on the 16th and 52 m.p.h. at Lympe on the 20th, at South Shields and Spurn Head on the 21st, and at Eskdalemuir and The Lizard on the 24th. Mean temperature somewhat exceeded the average over the country as a whole. As is so often the case in May, there were marked fluctuations in temperature. Warm spells occurred around the 6th, from the 10th to 19th and around the 26th, while the cold spells included the 1st to 4th, 21st to 23rd and 28th to 31st. At Chelmsford strawberry and potato crops were caught by the frost on the 29th (grass minimum 24° F.), and at Street (Somerset) exposed beds of potatoes and beans were injured by ground frosts on the 29th and 31st. The extremes for the month were:—(England and Wales) 80° F. at Tunbridge Wells on the 17th and at Camden Square (London) and Reading on the 18th, 22° F. at Houghall on the 3rd; (Scotland) 73° F. at Ardnish and Ruthwell on the 10th, 26° F. at Dalwhinnie on the 1st; (Ireland) 73° F. at Cork on the 26th and 32° F. at Newtownforbes on the 31st. Rainfall was much below the average and expressed as a percentage of the average the values were British Isles 58, England and Wales 53, Scotland 65 and Ireland 61. An absolute drought was recorded at several places in south and east England. At Eastbourne it was the driest May since 1895, and at Totland Bay since 1896. Thunderstorms occurred at times, mainly on the 5th, 6th, 15th to 18th, 26th and 30th to 31st. During a severe thunderstorm in the Dunstable district on the 6th 53 mm. of rain fell in 45 minutes, and the hailstones were in some instances fully 1 inch in diameter. Sunshine was above the average in Scotland, Ireland, north-west England and the Channel Islands, and below in other parts of England. At Plymouth the month's total was nearly 49 hours more than the average. Fog occurred at times, particularly from the 5th to 13th, 17th to 20th and 25th to 26th. The *Aurora* was observed at Lerwick on the 12th. Solar haloes were noted at Oxford on 11 days.

*June.*—The month was distinguished by frequent and sometimes severe thunderstorms, particularly in England and Wales and parts of Ireland. A secondary depression developed over the Hebrides on the 1st and moved southward to the Bristol Channel and then across England to Germany. Conditions were cool generally and very unsettled weather prevailed for a time. The 5th was a mainly fair day, though a little rain fell in the west and north. A period of rather unsettled weather ensued, with pressure high to the south-west of the British Isles and depressions moving eastward across Iceland. Between the 11th and 16th a series of disturbances

moved across the British Isles. On the 17th pressure began to rise over Scandinavia, and later the high pressure extended its influence to Scotland. Meanwhile a depression developed off the coast of Portugal, moved northwards and dominated conditions over the southern half of the British Isles. Temperature rose generally and widespread, frequent and locally intense thunderstorms occurred. Between the 25th and 27th pressure was relatively high over the British Isles and fair weather prevailed in many parts, though rain was reported in south-east England and locally in the Midlands on the 25th and 26th. On the 28th a secondary depression moved north-east over northern France and subsequently northward over Britain; unsettled weather was renewed generally with widespread thunderstorms, and torrential rain locally on the 29th and 30th. Mean pressure for the month slightly exceeded the average in the extreme north of Scotland, and was somewhat below average at most places elsewhere. A gale occurred locally in the north-west on the 14th, and a mean hourly velocity of 42 m.p.h. was registered at South Shields on the 3rd. Among the highest speeds recorded in gusts were 60 m.p.h. at Sealand on the 21st and 56 m.p.h. at South Shields on the 3rd, at Bidston Observatory on the 15th and at Calshot on the 19th. Mean temperature exceeded the average generally, the excess varying from 1° F. in southern Ireland and the Channel Islands to 2° F. in northern Scotland. The first week was unusually cool and some exceptionally low temperatures were recorded. The latter half of the month was, on the whole, much warmer than the average, the period 19th to 22nd being notably warm. The nights during this period were very warm. The extremes for the month were:—(England and Wales) 80° F. at London (Camden Square) on the 20th and 21st, 28° F. at Castleton on the 11th; (Scotland) 87° F. at Forbes on the 21st, 25° F. at Dalwhinnie on the 5th; (Ireland) 78° F. at Birr Castle on the 26th and 28° F. at Markree Castle on the 5th. The general precipitation of the British Isles expressed as a percentage of the average was 124, the values for the constituent countries being England and Wales 151, Scotland 74, and Ireland 115. In England and Wales the excess was almost general except in south-west England. More than twice the average fell at numerous stations, while at Holyhead it was the wettest June since readings were first taken in 1871. The month was remarkable for the heavy rains which occurred chiefly during thunderstorms. Among the heaviest falls in 24 hours or less were:—101 mm. at Ciliau Aeron on the 20th, 101 mm. at St. Albans on the 21st, 81 mm. (in three hours) at Florencecourt (Co. Fermanagh) on the 30th and 80 mm. at Rothamsted, mainly in two periods of half and hour, on the 21st. During these storms many large hailstones were measured; at Horfield 1½ inches and at Malvern 1¼ inches in diameter. The excess of bright sunshine in the east and north of Scotland was exceptional. At Aberdeen, Craibstone, Stonehaven and Montrose the daily mean exceeded 9 hours, and at Aberdeen the total, 274 hours, was the highest monthly total ever recorded there since before 1881. On the other hand, in the extreme south-west of Scotland, the western districts of England and the Midlands there was a marked deficiency of sun-

shine. Solar haloes were noted at Oxford on 16 days and a mirage was seen off the coast between Bexhill and St. Leonards on the 17th.

*July.*—Unsettled conditions prevailed throughout the month; the excessive rainfall was almost general and at several places it was the wettest July on record. During the opening days of the month a shallow depression off the north of Ireland moved slowly south-east and filled up. Rain fell at times and was heavy locally on the 1st and 2nd. There was a temporary improvement on the 5th, but heavy rain fell in south-west England on the night of the 5th to 6th. Thereafter until the 22nd depressions moved across the country mainly in some easterly direction. Rain fell frequently during this period, and was unusually heavy at times, while thunderstorms occurred locally on most days. A deep depression off our south-west coasts moved slowly north-east and caused widespread gales in southern England on the 18th. An intense depression approaching Ireland caused rain on the night of the 22nd to 23rd. Between the 23rd and 25th there was heavy local rain and gales in places. Thunderstorms were widespread on the 28th and occurred locally on the 29th, while further rain fell on the 30th and 31st, though the 30th was a fair day over most of southern England. Mean pressure for the month was substantially below the average, the deficiency at 7 h. varying from 5.4 mb. at Scilly to 8.2 mb. at Wick. The prevailing winds were from between south-west and north-west. Among the highest gusts were 64 m.p.h. at Holyhead on the 17th, 63 m.p.h. at Larkhill and 62 m.p.h. at Penderennis Castle on the 18th, and 60 m.p.h. at Valentia Observatory on the 23rd. Mean temperature appreciably exceeded the average in north and east Scotland and was, in general, below the average in southern districts of England and Wales and the Midlands. The absence of really warm days was a striking feature of the weather of the month. At Hampstead it was the coolest July since 1922. The warmest period was, on the whole, the first seven or eight days, but there was a brief warm spell in England around the 17th, and in east Scotland the 31st was a warm day. The lowest temperatures were registered generally on the 22nd or 27th. The extremes for the month were:—(England and Wales) 86° F. at Tunbridge Wells on the 17th, 33° F. at Rickmansworth on the 27th; (Scotland) 76° F. at Forres on the 2nd, 34° F. at Dalwhinnie on the 27th; (Ireland) 74° F. at Glasnevin and Trinity College, Dublin, on the 4th and at Rathfarnham on the 1st, and 41° F. at Markree Castle on the 8th, at Birr Castle on the 22nd and at Waterford on the 27th. The general precipitation of the British Isles expressed as a percentage of the average was 182; the values for the constituent countries being England and Wales 191, Scotland 150, and Ireland 197. At a number of places in England it was the wettest July since 1888, while the totals at Woburn and Wellingborough were the highest for any month since observations were first taken in 1883 and 1861 respectively. At Valentia, Bristol and Col-lumpton measurable rain fell on each day of the month and at several places on 30 days. Heavy local falls of rain in short periods of time were another feature of the rainfall, and among heavy falls in 24 hours or less were:—87 mm. at

Forrest Lodge, Kirkcudbrightshire and 74 mm. at Auchnafree (nearly all of which fell in under an hour) on the 17th, 78 mm. at Northwood, Middlesex, most of which fell in about 30 minutes on the 7th. Thunderstorms were unusually frequent; at Wakefield on 10 days and at Attenborough on 9 days. Sunshine was much below the average. A daily mean of more than 6 hours was recorded only in east Kent, at Sandown, at the Scilly Isles and at Jersey, while less than 3 hours a day was registered at some stations in central Ireland, central Wales, and the north-west of England. Solar haloes were noted at Oxford on 8 days. A small whirlwind swept from Seaton up the Exe Valley in the early hours of the 28th and off Newhaven, waterspouts were observed on the 10th.

*August.*—The weather of the month was distinguished by a marked deficiency of rainfall, particularly over large areas in the southern half of England and Wales and the Midlands and in parts of southern Ireland. The first week was mainly cool, but from the 23rd onwards conditions were, on the whole, unusually sunny and warm. A trough of low pressure situated over the North Sea on the 1st and a depression which moved across Scotland to the Skagerrak between the 2nd and 4th maintained cool, unsettled weather, with rain at times during the opening days of the month. A fresh disturbance west of Ireland moving east caused heavy rain in the west on the night of the 5th to 6th and rain in England and southern Scotland on the 6th. The 7th was a cool, cloudy day in east and south-east England, but a wedge of high pressure moving south-east across the British Isles maintained fair, sunny weather over a large part of England between the 7th and 9th. There was rain locally at times between the 10th and 12th, while a depression moving slowly north-east from off north-west Ireland gave further rain at places in the west and north from the 13th to 15th. Subsequently pressure became high to the south and south-east of the British Isles, while a depression skirted our north-west seaboard. Rain fell at times in the west and north, but little or none occurred in the south-east. On the 19th, however, a small secondary depression moved rapidly across northern England, and rain fell generally in England. The Azores anticyclone spread north-eastward on the 22nd and thereafter dominated conditions over the greater part of the country. Some rain occurred at first in the west and north, but from the 25th to 28th inclusive, fair weather was general. Slight rain was again recorded locally in the west and north between the 29th and 31st. During the anticyclonic spell abundant sunshine was enjoyed and high day temperatures were recorded for the most part. Mean pressure exceeded the average generally, the excess at 7 h. varying from 2.9 mb. at Lerwick and Wick to 5.5 mb. at Valentia and 5.6 mb. at St. Mary's, Scilly. Gales were reported at a few stations on the 2nd, 3rd, 22nd, 23rd, 29th and 30th. Among the highest speeds registered in gusts were 54 m.p.h. at Bidston on the 4th, at Lerwick on the 23rd and at Kirkwall on the 30th. Mean temperature exceeded the average generally. The first week was cool and last week was, for the most part, really warm. The extremes for

the month were:—(England and Wales) 85° F. at Rickmansworth on the 29th, 34° F. at Rickmansworth on the 22nd and 29th; (Scotland) 81° F. at Gordon Castle and Logie Colston on the 27th, 36° F. at Balmoral on the 7th; (Ireland) 80° F. at Glasnevin on the 20th and at Cork on the 31st and 41° F. at Phoenix Park, Dublin, on the 11th and 28th. The general precipitation of the British Isles expressed as a percentage of the normal was 48, the values for the constituent countries being England and Wales 39, Scotland 70, and Ireland 45. At many places in the west and south of England it was the driest August on record, i.e., Barnstaple since 1857, Ross-on-Wye 1859, Falmouth 1871 and Teignmouth 1871. At Teignmouth the month's total was less than 1 mm. In contrast to this heavy rain fell in short periods during thunderstorms, i.e., 66 mm. in 75 minutes at Leatherhead and 50 mm. in 90 minutes at Leyland on the 10th. Sunshine was rather variable but exceeded the average for the country as a whole. During the week 22nd to 29th the daily mean of bright sunshine exceeded 10 hours at a large number of stations. Fog was reported locally on several days. Solar haloes were noted at Oxford on 7 days.

**September.**—The weather of the month was distinguished by a marked deficiency of sunshine in most districts. Rainfall, though variable, exceeded the average for the country generally and thunderstorms were frequent, while temperature was high for the season except during the last five days. The month opened with fair, warm weather over most of England. Between the 2nd and 6th an Atlantic depression moved east and then north, causing unsettled weather with general rain and widespread thunderstorms. Further intense disturbances from the Atlantic on the 6th caused squally winds which reached gale force locally on the 7th and 8th. In the rear of the latter depression a belt of high pressure passed eastward across the British Isles and subsequently an anticyclone formed over southern Scandinavia. Meanwhile a depression was centred south of Iceland and secondary troughs moved over the British Isles. Warm, unsettled weather prevailed, with occasional rain, while thunderstorms occurred between the 12th and 14th. A wedge of high pressure, which was situated over Scotland and Ireland on the 15th, moved south-east and mainly anticyclonic conditions prevailed until the 19th, but a shallow depression over the North Sea moving south, gave rain and widespread thunderstorms in England on the 15th. Further widespread thunderstorms occurred in England on the 20th. Unsettled weather was renewed on the 24th by secondary depressions, which moved north-east from our

south-west coasts. Subsequently, an anticyclone over Iceland moved southward to the west of Scotland and a depression north of Iceland moved rapidly south-east, giving northerly winds, accompanied by a considerable drop in temperature on the 26th. Thereafter, the anticyclone spread over the British Isles, and mainly fair, cool conditions persisted until the end of the month. Mean pressure somewhat exceeded the average in Scotland and Ireland and was slightly below the average in most of England. The deviation at 7h. varied from -1.3 mb. at Kew Observatory to +4.9 mb. at Lerwick. A period of strong, squally winds occurred, particularly in England and Ireland, between the 6th and 8th, and a widespread gale was reported in these areas around the 7th. Isolated gales occurred outside this period; at Skye, on the 9th, at Kirkwall on the 12th, and at Fort Augustus on the 25th. Strong winds occurred in places on the 27th and a gale was recorded locally in North Wales. Among the highest gusts recorded were 68 m.p.h. at the Scilly Isles, 64 m.p.h. at Bidston, Spurn Head and the Lizard on the 7th, and 65 m.p.h. at Holyhead on the 8th. Mean temperature exceeded the average in all districts. The period 1st-25th was warm, the nights as well as the days being mild. At several stations night minima of 60° F. or over were recorded on several occasions. The mean minimum for the month at Oxford, 52.3° F., was the highest for September since records began in 1881. Temperature fell on the 26th and cool conditions persisted for the most part until the end of the month. The extremes for the month were:—(England and Wales) 81° F. at Newport, Isle of Wight, on the 1st; 27° F. at Rickmansworth on the 29th; (Scotland) 73° F. at Forres on the 3rd and 12th, 24° F. at Dalwhinnie on the 28th; (Ireland) 73° F. at Glasnevin and Trinity College, Dublin, on the 3rd, and 58° F. at Markree Castle on the 29th. The general precipitation of the British Isles, expressed as a percentage of the average, was 136, and for the constituent countries England and Wales 142, Scotland 119 and Ireland 140. Thunderstorms occurred frequently and were accompanied at times by heavy rain, and among the heavy falls in 24 hours were 91 mm. at Poolewe (Ross and Cromarty) on the 4th, and 79 mm. at Berkhamstead on the 20th. A notable feature of the month was the marked deficiency of sunshine in most areas, and at many stations it was the dullest September on record; at Kew Observatory and Oxford in records going back to 1880 and 1881 respectively. Local fog occurred frequently, mainly from the 1st-4th, 9th-25th and 29th-30th. The *Aurora* was observed in Scotland on five occasions, and at Oxford solar haloes were noted on 11 days.

### FACTS ABOUT "WHITAKER."

"WHITAKER" was first published in November, 1868 (for the year 1869). The founder and first Editor was Joseph Whitaker, F.S.A., who was born May 4, 1820, and died May 15, 1895. From 1856-8 he was Editor of *The Gentleman's Magazine*, in which capacity he compiled a "Common-Place Book" of notes, extracts from Government Bluebooks, cuttings, &c., which he provided with an Index for ready reference. In 1858 he founded *The Bookseller*, the first periodical to be devoted to the interests of a particular trade, and ten years later it occurred to him that his "Common-Place Book," so useful to its compiler that it had been kept up to date, might be acceptable to others. The first issue contained 365 pages with an Index of 4 pages. The present issue extends to 1056 pages of which more than 70 are occupied by the Index.

(1935) *October 4.*—Violent storms, accompanied by heavy rain, caused havoc in South-eastern France, and many rivers were in flood. The Rhône, swollen by the rains, overflowed its banks at several points. 6. Many lives were lost in floods at Machengan, Northern Kiangsu. The water was kept out by dykes, but forced its way underground and burst into fountains inside the walls, the whole place being submerged in a few hours. 10. Brussels and its suburbs were visited by a severe storm. Trees and fences were blown down in many places, specially at the exhibition. The Imperial Airways' liner, *Syrinx*, was blown over by a violent squall. In a violent gale which swept the Rhineland and Western Germany, the transmission tower, about 530 ft. high, of the Cologne broadcasting station at Langenberg was blown down. 18. Heavy rain caused the rivers in Paraguay and Uruguay to overflow. South-east gales also drove the water into the estuary of the River Plate and up the Parana. Many people were driven from their homes and cattle were drowned. 21. Heavy storms swept over Southern Italy. In the Syracuse district several persons were killed and injured and in Naples the lower parts of the town were flooded. 22. A tropical hurricane passed across the eastern end of Cuba. It was accompanied by torrential rain, and the River Cauto overflowed its banks. Santiago de Cuba suffered heavy damage, principally to roofs, sky-signs and shop fronts. 23. A cloudburst near Simitli, in the Department of Petritch, caused two tributaries of the Struma to flood the railway lines and a camp of workmen, where 17 men were drowned. 27. The heaviest rains recorded since the Observatory was established swept Tokyo in a succession of brief but unprecedentedly severe showers, during which at times rain fell at the rate of nearly 3 ins. an hour.

*November 4.*—A hurricane crossed Southern Florida, passing out into the Gulf of Mexico, leaving a trail of havoc behind it. The wind at one point reached a velocity of 100 miles an hour and some areas near the beach were flooded to a depth of 3 ft. 6. Thunderstorms and rainstorms of unusual violence swept along the Riviera. 9. Mandalay was cut off from railway and road communication with Rangoon by widespread floods. 13. Storms in the south of France caused much damage. At Avignon a large part of the town was under 3 ft. of water and some 3,000 people had to leave their houses. Sixty hours continuous rain caused severe floods in Switzerland. They were the most severe since 1890. Near Geneva wide areas were under 2 ft. of water. 18. One of the worst storms in recent years lashed the Atlantic coast of New York. Damage estimated at several million dollars was caused. 21. Further storms and heavy rain caused the Rhône to rise again at Avignon. The damage since the beginning of the floods was estimated at 50,000,000 fs. A violent storm broke over Catanzaro, in Calabria, and caused much damage. Heavy rain also fell at Messina and some of the streets were flooded to a depth of 5 ft. There were 78 deaths and several hundred people were injured in these storms.

*December 1.*—A gale, accompanied by heavy rain, swept over most of France. It was especially severe in the Paris area. Severe floods were caused in Central France, in Brittany, the Gironde, the Vendée and the district of Belfort. 25. Heavy storms swept over Spain during the Christmas holidays. In the province of Avila eight people were drowned by floods. 29. Forty people lost their lives as the result of floods in Skutari (Albania) caused by the sudden rise of Skutari Lake, which broke its dykes that had stood for 50 years. Elbasson and Berat also suffered from floods and the road leading to Tirana was under water. Further heavy rains again aggravated the floods in France. 31. Heavy rain fell in many parts of Spain. The Douro rose 7 ft. above its usual level, and a large area was inundated. Further loss of life from flood occurred in the Province of Caceres, bringing the total up to over 20 during the week.

(1936) *January 3.*—Continued bad weather caused a steady increase of floods and landslips in various parts of France. A gale, accompanied by persistent rain on the west coast, created a new area of damage in Brittany. 4. Torrential rains fell in parts of South Australia, causing unprecedented floods over large areas. 8. Heavy rain fell in the Paris area and produced the expected recrudescence in the flooding of the Seine and its tributaries, which, after a momentary fall, rose sharply. 10. A thunderstorm and whirlwind broke over the Dusseldorf area. Two persons were killed and many injured. 19. The United States from the Gulf of Mexico to Chicago was swept by storms which caused loss of life and material damage in many parts of the country. 20. Violent whirlwinds accompanied a storm which broke over Florence, and among various objects which were seen spinning in the air were some big fish. 23. The most severe blizzard for several years raged over most of Eastern Canada.

*February 2.*—A great hailstorm followed by a cloudburst occurred at Johannesburg and many natives were killed. The most severe midsummer southerly gale experienced for many years disorganized communications on North Island and caused widespread damage. 4. A whirlwind, in the Tremolat district, near Bordeaux, stripped several roofs of tiles and uprooted trees. 8. The worst storm for 15 years swept over the Middle West from the Rockies to Illinois and isolated many towns and villages. 11. A fierce northerly gale, said to have reached a velocity of 100 m.p.h., followed by a heavy snowstorm, did great havoc in Constantinople and other parts of Turkey. 20. Continued rain caused the Douro, in the neighbourhood of Zamora, to flood a wide area for the second time this winter, and much damage was done to crops. 23. Violent rainstorms swept Portugal for several days and caused extensive flooding. At Rodam, on the Tagus, and Regua, on the Douro, the water rose more than 50 ft. above the normal level. 27. Lahore experienced an exceptionally heavy hailstorm. Hailstones weighing 11½ grammes fell, breaking much glass. Extensive damage was caused by a gale along the Algerian coast.

**March 4.**—After a series of heavy gales the sea dykes in the Médoc Peninsula, near Bordeaux, gave way and seawater covered about 3,000 acres of land, which will be barren for five years. 13. Widespread floods occurred in many parts of Nova Scotia. The rivers rose 6 to 8 ft. above their banks. Rapidly melting snow and heavy rain caused severe floods in many parts of America. More than 150 lives were lost and some 200,000 people were rendered homeless. Fourteen States were affected, as was many parts of Eastern Canada. The flood peak was not reached in some places until the 23rd. 23. A tornado wrecked 50 houses in South-western Missouri, while in Kansas, Oklahoma and the Texas Panhandle there were stifling dust storms.

**April 6.**—A tornado swept across the South-eastern States from Arkansas to the Atlantic seaboard. Over 400 persons were killed and some 2,000 injured. At Gainesville the damage was so great that it was estimated that it would take the town 10 years to recover from the disaster. 14. The P. and O. liner *Ranpura* ran aground near Mayorga during a south-westerly gale. 16. Heavy rains and a gale which blew over the Upper Adriatic caused extraordinary scenes in Venice. The water rose very high and flooded the whole city. It was more than 3 ft. deep in St. Mark's Square. 27. During a violent snowstorm in the Black Forest, five London schoolboys lost their lives. 25. A cyclone hit the Kyaukpyu district of Burma. Thirty people were killed and 20,000 rendered homeless. The cyclone was followed by serious floods.

**May 10.**—A violent thunderstorm swept over Central Switzerland causing much damage, particularly in the Cantons Lucerne and Berne. Hail fell for over half an hour. 19. Serious floods were caused in many parts of Spain by torrential rain. 21. During a violent storm at Siena a thunderbolt struck the famous tower del Mangia. 22. A violent storm in the Gulf of Lyons delayed inward shipping to Marseilles for 10 hours. 30. Seven gypsies were drowned at Pakratz, in Croatia, when a sudden cloudburst caused a stream to overflow its banks and carried off their caravan. 31. Tura, the headquarters of the Garo Hills District in Assam, was struck by a cyclone travelling at

200 miles an hour, which damaged every building.

**June 29.**—A whirlwind in the Mouscron district, near the French frontier, did much damage and caused a panic among the inhabitants.

**July 1.**—Cloudbursts in South Texas caused the deaths of 21 people and did more than \$1,000,000 worth of damage to crops and buildings. 5. Heavy rain in Moldavia and South Bessarabia caused floods which washed away two railway bridges and several sections of the railway. 21. Seventy villages, over an area of 20 square miles, were submerged as a result of the flooding of the River Rapti in the Gorakhpur district of the United Provinces. A high wind and severe electrical storm injured 30 persons at the Texas Centennial Exhibition at Dallas and did material damage estimated at \$1,000,000. 28. A stretch of territory east of Ottawa was swept by a fierce storm, with hail and lightning which devastated market gardens and field crops.

**August 6.**—Many lives were lost and widespread damage done as the result of a terrific tornado which swept over North-east Poland. 9. Continuous heavy rains in Bihar, Bengal and Assam caused devastating floods of the Ganges and Brahmaputra and their many tributaries. 12. An unusually severe thunderstorm, with torrential rain, broke over Grenoble and did much damage to crops. 17. A severe typhoon swept Hong Kong. A wind speed of 131 m.p.h. was registered. 23 and 27. Typhoons swept Korea, causing the deaths of nearly 2,000 people. Some 40,000 houses were destroyed.

**September 3.**—As a result of a violent storm, which broke over Central Switzerland, a torrent from the Dent du Midi cut the Simplon railway line in the Rhône Valley near St. Maurice. 11. The first September snowstorm for 32 years occurred at Johannesburg. 17. A hurricane coming north from the West Indies struck Virginia and North Carolina. Maryland and New Jersey were swept by violent winds and New York was deluged with rain. The wind velocity varied from 60 to 90 miles per hour. The Concho River rose rapidly, flooding the town of San Angelo, in Texas.

#### VIOLENT DEATHS IN ENGLAND AND WALES, 1934.

	Males.	Females.	Total.	
Suicides..... Homicide..... Wounds of War..... Execution..... Accidents.....	3,839 109 83 8 10,420	1,711 117 — 1 5,409	5,550 226 83 9 15,829	(of which, 1,864 by gases, 807 by drowning, 786 by hanging, 749 by poisons) (12,366 crushing or falling, including 7,151 on roads, rails and in air, and 642 in mines and quarries; 1,238 by burns, 600 by drowning, 35 at games, 11 by lightning, 56 by excessive heat, 16 by excessive cold, 15 by hunger or thirst)

**BRITISH ASSOCIATION.**—The annual meeting of the British Association for the Advancement of Science was held at Blackpool from Sept. 9 to Sept. 16, under the presidency of Sir Josiah Stamp. The subject of his presidential address was "The Impact of Science upon Society." Widespread uneasiness existed, he said, among scientists and the general public, as regards possible ill effects of scientific research and its application. The field of the adjustments to change in social and economic affairs made necessary by the progress of science had up till now remained a no-man's-land, neglected by scientists, economists, and Governments alike. Here was a new and important field for scientific study. In the future, the impact of change due to science was likely to be more severe, since we should shortly be deprived of the economic safety-valve of an increasing population. Perhaps the rate of application of scientific discovery should be retimed. Put epigrammatically, birth-control for human beings may demand birth-control for their machines and other impedimenta. We had also to devise methods of ensuring that desirable applications of scientific knowledge which do not come within the scope of the profit motive should not be unduly delayed. This applied notably to the raising of the health of the people by proper feeding.

The Presidents of the various sections, and the subjects of their addresses, were as follows: *A*, Mathematics and Physics, Prof. A. Ferguson, "Trends in Modern Physics"; *B*, Chemistry, Prof. J. C. Philip, "Training of the Chemist for the Service of the Community"; *C*, Geology, Prof. H. L. Hawkins, "Paleontology and Humanity"; *D*, Zoology, Dr. Julian Huxley, "Natural Selection and Evolutionary Progress"; *E*, Geography, Brig. H. S. L. Winterbotham, "Mapping of the Colonial Empire"; *F*, Economic Science and Statistics, Dr. C. R. Fay, "Plantation Economy"; *G*, Engineering, Prof. W. Cramp, "The Engineer and the Nation"; *H*, Anthropology, Miss D. A. E. Garrod, "The Upper Palaeolithic in the Light of Recent Discovery"; *I*, Physiology, Prof. R. J. S. McDowall, "The Control of the Circulation of the Blood"; *J*, Psychology, Mr. A. W. Wolters, "Patterns of Experience"; *K*, Botany, Mr. J. Ramsbotham, "The Uses of Fungi"; *L*, Education, Sir Richard Livingstone, "The Future in Education"; *M*, Agriculture, Prof. J. Hendrick, "Soul Science in the Twentieth Century."

The evening discourses were: Mr. C. C. Paterson, "Science and Electric Lighting"; and Capt. F. Kingdon Ward, "Plant-hunting and Exploration in Tibet."

The meeting in 1937 will be held in Nottingham from Sept. 1 to Sept. 8, under the Presidency of Sir Edward Poulton. The Association will meet in Cambridge in 1938, from Aug. 17 to Aug. 24, and in Dundee in 1939.

**AIR CONDITIONING IN LIVING-ROOMS.**—A device for humidifying air to a degree suitable for breathing has been developed in Berlin. The water to be evaporated is contained in a tank in which is a frame with capillary pads of absorbent blotting paper overlapped and sewn together. The pads, which can be easily replaced, are saturated with water, the evaporation of which is accelerated by an electric fan

in the back wall of the protective case. With a temperature of 68° F. and a relative air humidity of 50 per cent., the apparatus evaporates about 7 oz. of water per hour. One filling of water is sufficient for eight hours operation. The apparatus has been found useful in living-rooms where the atmosphere is close, in offices where smoking is allowed, and in nurseries, hotels, and hospitals.

**AUSTRALIAN ABORIGINES UNDER CONTROL.**—An important innovation in the control of Australian aborigines is announced. The Government has decided that in future the work of the police control in the south-west of the Northern Territory will be entrusted to Dr. Strehlow, an anthropologist who is familiar with the language and customs of the tribes. The district under the new officer will include the country of the Arunta, where Sir Baldwin Spencer and Mr. F. J. Gillen conducted their investigations. The change in administration is due largely to the protests by anthropologists, when certain aborigines were tried for murder on account of killings in accordance with tribal custom. It is also an advance in the method of dealing with native offences against the law of the white man.

**BIRDS IN THE SLUMS.**—Official statistics show that Liverpool's atmosphere possesses the heaviest annual deposit of solids in the country. The Liverpool Cathedral wild birds sanctuary of less than an acre, established in 1927 in an old cemetery in the midst of city slums, eight miles from open country, half a mile from the docks, and within a few minutes' walk of the busiest parts of the city, has proved not only that many migrants regularly visit it in spring and autumn on migration over the city, but 12 species of bird definitely nest there. The 34 species of bird recorded there are: nesters—house-sparrow, robin, blue-tit, hedge-sparrow, starling, song thrush, blackbird, wren, great tit, mistle-thrush, domestic pigeon, greenfinch. Visitors on migration are: willow warbler, goldcrest, chiffchaff, white throat, swift, wheatear, meadow-pipit. Winter visitors: grey wagtail, pied wagtail, redwing, herring and common gulls, rook, jackdaw, cole tit, linnet, chaffinch. Rare visitors: kestrel, nuthatch, yellowhammer, tawny owl. In summer the sanctuary is also visited by painted lady, red admiral, small tortoiseshell, large and small garden white and green-veined white butterflies and silvery moths.

**BIRDS USEFUL TO CROPS.**—In estimating the damage done to crops by birds too little attention is often paid to their beneficial effects, such as the destruction of weed seeds and harmful insects. In the Philippine Islands the weaver bird, *Munia cabanisi*, was regarded as a dangerous pest, and a menace to the rice crop, but closer study of it has shown that the rice in its menu amounts to 4 per cent. only, the remaining 96 per cent. being wood seeds. The figures are based on the examination of the stomachs of 800 adult birds.

**BRACKEN BREAKER.**—Captain V. H. Holt has invented a machine for the purpose of breaking and destroying the bracken which has now become a pest in many parts of the

country. The appliance consists of a heavy steel bar of square section, fitted with two bearings and shackles for attachment to horse traces. The bearings enable the bar to revolve as the implement is dragged over moorland by the horse. The bar revolves over rocks and other obstructions, and serves to break or bruise all young bracken shoots over which it passes and to damage them so as to prevent further growth. For demonstration hilly ground at Westerdale Moor, North Riding, was chosen, containing a number of rocks and a fair density of bracken. It was found unnecessary to return over land once traversed by the machine.

**BUTANE GAS.**—Mr. Theodore Rich, writing in "Engineering," gives an account of the development of the use of bottled butane gas ( $C_4H_{10}$ ) in rural areas with no gas or electricity supply in Great Britain, France, and the United States. Butane can be obtained from natural gas, crude oil, or coal, and liquefies under a pressure of 23 lb. per sq. in. at 60° F. It can be delivered to customers in comparatively light shell bottles, which in France contain 28.6 lb. of liquefied gas. The cost works out at about 3s. per therm. The gas is used particularly for cooking, one bottle containing sufficient gas to cook for a family of three for six or seven weeks. The gas (which is marketed in Great Britain as "Calor" gas) can be used for house lighting, gas fires, and geysers, and in three small towns it has been applied to street lighting.

**CANADIAN FOLK SONG.**—An unexpected source of evidence bearing on European cultural development has been brought to light by Mr. Marius Barbeau's study of Canadian folk songs. During fifteen years research he has discovered 6,700 versions of songs from Quebec, the Maritime Provinces, and New England, where there are many immigrants from Canada. Ninety per cent. of these songs are of French origin and retain their traditional character, while the remaining 10 per cent. are purely Canadian. The true folk songs which form the bulk of the repertory were introduced between 1608 and 1673, and others in the true folk song vein were brought in after 1680 as marching and college songs by soldiers, priests, and teachers. It is suggested that the true folk songs came with the settlers from Normandy and the Loire valley.

**CAVE EXPLORATION IN AUSTRALIA.**—A party led by Captain Maitland Thompson has explored the caves in the treeless Nullarbour Plain, South Australia. The most impressive cave was the Koonalda Cave. Passing through a chamber 800 ft. in circumference the explorers penetrated for more than half a mile to a narrow passage leading to a subterranean well 50 ft. in diameter, near which an impression in the sand of the foot of an aboriginal was found. From the Weebubble Cave a tunnel was followed until a vast room, the back wall of which was 400 yards from the entrance, was reached. Here the water, 320 ft. below the surface, was at the level of the sea 14 miles away. At the entrance to the Murrawidginie Cave were found a number of imprints of the human hand, usually the left, in red on the surface of the rock, which was also daubed with red ochre.

It is suggested that the sign, which prevailed with the Bushmen and paleolithic man of Europe, was a taboo, especially as it is believed that the cave may have been used to store the churingas and other emblems used in tribal ceremonial.

**CLARENDON PALACE.**—Excavations were resumed, for the fourth successive year, at the site of Clarendon Palace, near Salisbury, which for five centuries was a favourite country seat of English kings, and the place where Henry II. assembled the barons to enact the "Constitutions of Clarendon." The palace seems to have consisted of a number of buildings built round a courtyard and connected by cloisters. In 1933 the general outlines were revealed; in 1934 the kitchens and smaller buildings were excavated; and 1935 was occupied chiefly by the exploration of the royal apartments to the east of the Great Hall. The programme for 1936 provided for the uncovering of the King's apartments and a smaller suite, probably that of the Queen. In one of the chambers in the Queen's departments was found a small angel's wing, exquisitely wrought in stone, on which the original gilding and red colouring is still plainly visible. It is good characteristic work of the middle of the thirteenth century, and so is easily dated. Another discovery was that of glazed floor tiles bearing a type of decoration not previously known in England. The design is in yellow on a red ground, and consists of a broad zigzag line bordered by rows of circles and roseates which are divided from one another by broad straight lines. No complete tiles have been discovered, but the excavators were fortunate in finding two large fragments which fitted into each other, although the original tile must have been broken centuries ago. Many other glazed floor tiles have also been found, some bearing a portrayal of Richard I. fighting on horseback.

**COSMIC RAYS IN ANTARCTICA.**—Admiral Byrd's book, "Antarctic Discovery," contains a note on the cosmic ray records made by his expedition near the South Magnetic Pole. In an aeroplane flight from Little America, 828 miles from the magnetic pole, a height of 12,000 ft. was maintained for three hours, while A. A. Zuhn made observations. They show that the intensity of radiation was 15 times greater at 12,000 ft. than at ground-level in Little America, and eight times greater than any recorded in the United States.

**DAYLIGHT STRENGTH.**—A study of the seasonal variations in the strength of daylight, based on ten years' observations, has been published by the National Physical Laboratory at Teddington. The light measurements were made for the whole sky, and from each quarter of the sky, according to the compass. The daily variations are large, but by averaging over ten years the difference in natural illumination between the seasons may be estimated. It was found that the light from the whole sky at 9 a.m. on a morning in June or July is about nine times as much as at the corresponding time on a Jan. morning. The light at noon in June is about four times that at noon in Dec. or Jan., and at 3 p.m. on a June day is nearly ten times that at the correspond-

ing time on a Dec. day. The average illumination from the whole sky in Jan. is 405 foot-candles at 9 a.m., 850 at noon, and 390 at 3 p.m. These large variations, due in part to weather and cloudiness and smoke, besides seasonal change in the position of the sun, have important effects on plants and animals, and human physiology and psychology, and suggest that windows and the colour of the furnishing and decoration of houses are more important than is commonly supposed.

**ECLIPSE OF THE SUN.**—A total eclipse of the sun took place on June 19, 1936. The shadow track passed over the Mediterranean across Greece, Turkey, South-east Russia, Central Siberia, and Northern Japan. In the British Isles the eclipse was only partial and happened about sunrise, and everywhere ended a few minutes after 5 o'clock. Dr. R. L. Waterfield took a party to the island of Chios. At Ak-Bulak, in Kazakstan, Prof. R. d'E. Atkinson was present with the Harvard College Observatory representatives; at Omsk Prof. Carroll, of Aberdeen University; and at Kamishari, near the north-east coast of Hokkaido, Prof. Stratton, Professor of Astrophysics at Cambridge University, with astronomers from England and the Dominions. The Russians sent out more than 20 expeditions, and some of them were in aeroplanes three or four miles up. At Chios the eclipse was observed in a transparent sky. A pearly-white corona, intermediate between the maximum and minimum types, with streamers longest in the region of the sun's equator, was seen, and four large flaming prominences were observed at the sun's rim. A brilliant temporary star near the boundaries of the constellations, Cepheus and Lacerta, was seen by observers in the Eastern Mediterranean, Heidelberg, and Bologna. At Omsk the British, Soviet and Japanese expeditions carried out their programmes completely. The only failures in Hokkaido—the northern island of Japan—occurred at Shimowakubetsu and Kanishari. In these places clouds formed on account of the lowering of the temperature and obscured the sun at the critical moment. Elsewhere, however, conditions were excellent, and 160 Japanese scientists had a perfect view of the phenomenon.

**EGYPT UNDER THE TWELFTH DYNASTY.**—An important discovery bearing on the relations of Ancient Egypt and Asia under the Middle Kingdom was reported from Toud (Tuphium), 25 miles south of Luxor, by an expedition of the Institut Français d'Archéologie Oriental. Four small bronze caskets were found in the foundations of a temple at Mont, which contained a tribute from Asia to Amenhemet II., a Pharaoh of the Twelfth Dynasty. The contents of the cabinets are lapis lazuli beads, amulets of a type unknown in Egypt, and ingots of gold, silver and lead. In addition to figures of Asiatic divinities a human-headed eagle and a winged lion, each of the boxes contained a cylinder with cuneiform inscriptions.

**ELECTRIC EYE.**—An electric tube device, sensitive to visible and invisible light, was demonstrated by Dr. Zworykin and Dr. G. A. Morton before the American Association for

the Advancement of Science. It comprises an electron image tube of high overall magnification fitted with a fluorescent screen which acts as an artificial retina. The cathode emitter is operated directly by the incident light, which need not be in the visible range. The image which becomes visible on the fluorescent screen may be the result of incident radiation in either the infra-red or the ultra-violet portions of the spectrum. It would therefore appear as though this electric eye will enable us to see in the dark, and also to provide a solution of the problem of navigation in fog on land and sea and in the air. It is also likely to be of exceptional value in the study of micro-organisms now only to be seen in the microscope by intense light or with the aid of special stains which often kill them.

**EVOLUTION ON PARALLEL LINES.**—A new theory of the origin of the races of mankind, termed by him "parallel evolution," was put forward by Sir Arthur Keith in his presidential address to the British Speleological Association. Hitherto, he said, anthropologists had been searching caves all over the world in the hope of finding among fossils of the middle part of the Pleistocene period, about 250,000 years ago, the remains of the common ancestor of the modern types of humanity—black and brown, white and yellow. Instead of accepting Noah as the common ancestor of the human race they had substituted a "mid-Pleistocene ancestral stock." But the discoveries which were being made were not in favour of that theory. Many extinct types of humanity had been discovered, but not one which was fit to serve as the common ancestor of modern races. No evidence of an outward migration from a common centre had been found. We were now tempted to believe that by the beginning of the Pleistocene period some half-million years ago—or more—the ancestors of the Mongol, of the Australian, and of the Negro were already in occupation of the continental areas where their descendants are now. Sir Arthur contended that at the date of separation into modern races each race was still "in the rough" and that after separation each underwent similar or "parallel" changes. In each race reduction of tooth and jaw set in, the brain continued to add to its size and complexity, and simian markings were replaced by human ones. In support of his theory he adduced Mongolian, Australian, and Negro characteristics in the skulls respectively of *Sinanthropus* from China, *Pithecanthropus* from Java, and Kanam man from East Africa. Clearly, he said, we had reached a point which compelled a radical re-orientation of our working theories. It was only when we accepted the independent evolution of the races of mankind during the whole length of the Pleistocene period that we could give a coherent explanation of the facts known to us. Throughout the Pleistocene period the separated branches of the human family had been unfolding a programme of latent qualities inherited from a common ancestor of an earlier period. We, too, had our inherited programme of latent qualities which the future would unfold—if our descendants survived.

**FOG EFFECT ON FLOWERS.**—A series of experiments have been made at the Royal

Botanic Gardens, Kew, with the object of protecting flowering plants from damage by London fogs. "Gloire de Lorraine" begonias were protected from the sulphuric acid in the fogs by putting a dilute solution of ammonia in trays on the floor of the glass-house. After this was done these begonias did not shed more leaves and petals than is usual at that time of the year. In Dec. the plants in the houses for the tropical begonias and orchids were protected by draughts made by electric fans. Under these conditions *Calanthe* flowers suffered no injury, while in a house without fans all the flower spikes were damaged. The fans were unable to withstand the combined effects of the fogs and snowstorms of Jan. This appeared to be due to excessive humidity in the houses, and the dampness enabled the injurious substances in the fog to come into closer contact with the plants.

**GOLD CUP OF THE BRONZE AGE.**—The King has placed on permanent loan in the British Museum three articles of great archaeological value which came into the possession of the Crown under the law of treasure trove. The oldest of the three dates from about 1400 B.C., the age immediately succeeding the building of Avebury and Stonehenge. It is a gold beaker with handle, standing about  $3\frac{1}{4}$  in. high, and weighing  $2\frac{1}{2}$  oz. Troy, which was found in 1837, with a bronze dagger and other objects, in Rillaton Barrow, on Bodmin Moor, Cornwall. Next in age is a gold torc of about the first century B.C., made of twisted strands of gold, which was found in Needwood Forest in 1848. The third exhibit is a pectoral cross and chain, known as the Clare reliquary, which was dug up at the side of Clare Castle, Suffolk, in 1866. It has a pearl at each angle, and is stippled with a representation of the crucifixion in front and a floral pattern behind.

**GREENWICH OBSERVATORY TIME SERVICE.**—Hitherto the time service maintained by Greenwich has suffered from a lack of precision, in so far as the absolute personal equations of the observers who observe clock corrections with the small reversible transit telescope are not known. A personal equation machine has therefore been constructed with the view of determining these personalities. The machine, carrying an artificial star, has been installed, and the movement of this artificial star will be observed with a telescope similar to that used in the observations for clock correction.

**HADRIAN'S WALL.**—Excavation of the fort on the Hadrian's Wall at Halton Chesters, by the University of Durham Excavation Committee, has definitely established the fact that the building of the Wall was completed in five years. A dedicatory tablet on the west gate of the fort bears the name of Platorius Nepos, the Governor of Britain in 122-126 A.D. As he directed the first stages of the building the whole erection was completed within his term of office. The excavation has also thrown much light on the planning and construction of the fort and on the Wall itself. The original plan was not always followed. For example, the original ditch fronting the Wall runs straight through below the existing fort, one of six, which projects 200 ft. north of the

Wall. The east and west gates of the fort are carried down the entire depth of the filled-in ditch and are built on massive foundations. After the Caledonian invasion the Emperor Severus rebuilt the fort about 205 A.D., erecting a monumental fore-hall in front of the administrative building, which is shown by its foundations to have been 160 ft. long by 30 ft. broad. About a century later the fort was increased in size by an enlargement towards the west behind the shelter of the Wall, which gave the fort the L-shaped plan that has long been a puzzle to archaeologists.

**INSECTIDE BY SHOT-GUN.**—In Science Service (Washington, D.C.) a patent is described, which embodies the application of insecticides by means of shells discharged from a shot-gun. It is claimed that shot-gun shells can be loaded with compressed wads of insecticide instead of lead shot. The force of the explosion ejects the wad like a bullet, and when it has travelled a certain distance, which can be easily calculated, it breaks into a cloud of ultra-fine dust over the tree or crop which it is desired to treat. The claim for this method of distributing insecticide is that the operator is safe from the effects of toxic dust, that cumbersome and explosive spray or dusting equipment are unnecessary, and that the insecticide may be distributed in otherwise inaccessible places.

**LEICESTER IN ROMAN TIMES.**—Excavation of Roman remains at Leicester has resolved an archaeological problem of long standing. The well-known Jewry Wall, one of the highest surviving Roman walls in Britain, has been variously regarded as a temple of Janus, a Roman bath building, a basilica, or a town gate; but according to recent exploration it was part of the external walls of the basilica in the forum of Roman Leicester, dating from about 100 A.D. The base of the Jewry Wall has been uncovered to some 10 ft. below the present surface, giving a total height of existing masonry of more than 35 ft. Two arched openings, previously thought to be doorways, were revealed as windows. Beneath the Jewry Wall timber and masonry were found associated with pottery and coins going back to the earliest occupation of Britain. To the west of the Wall is a courtyard 175 ft. wide, flanked by ranges of rooms or shops opening on to the courtyard by porticos. The plan indicates that this is the forum or market place of Roman Leicester, and that the Jewry Wall is in fact one of the external walls of the Roman basilica or town hall.

**LIGHTNING FLASHES STEP BY STEP.**—Flashes of lightning photographed by a cine-camera were exhibited at a meeting of the American Physical Society. The progress of the flash was shown to be similar to that of a nail gradually piercing a wooden board step by step under the successive blows of a hammer. The camera showed that the first flash extended half-way from the flash to the earth; a second flash followed the path of the first, but went six-tenths of the way; a third travelled seven-tenths of the distance; while the fourth reached all the way and struck the earth. Four other flashes from the cloud to the earth followed at intervals of approximately one-hundredth of a second.

**MAIDEN CASTLE.**—Dr. R. E. Mortimer Wheeler, Keeper of the London Museum, has made a full report of the results of the excavation of the prehistoric earthwork at Maiden Castle, Dorchester, which has gone on for three years under his control. The knowledge gained relates not only to Maiden Castle itself, but to the earlier occupation of the hillside on which it is built. The first-known inhabitants lived there some time before 2000 B.C., in a town defined by three rings of entrenchment, hewn in the chalk with deerhorn picks. They possessed herds of cattle and sheep, and practised agriculture on a primitive scale. Some of their implements were made by stone obtainable in the Cornish peninsula, but not in Dorset. The early town came to an end at the opening of the Bronze Age, soon after 2000 B.C., a change in the climate having made the higher lands too dry for human habitation. In the fourth century B.C., as a result of various immigrations from the Continent, the first Maiden Castle was built. Considerable new light was thrown on it during 1936. It had elaborate defences. The eastern entrance had two gateways masked by an outer rampart rising steeply within inner and outer walls of timber, and the main defensive ditch was of unusual depth and steepness. When the timbering collapsed or decayed Maiden Castle was fashioned on a more ambitious scale, and round the main rampart ran a high stone rampart, which, in modern times, has been used for the building of cottages and field walls. Just outside the gate was an iron-working establishment, where cattle were shod, and hereabouts the burial of the minor inhabitants of the town took place. The stone-built shelter of the custodian of the gate was uncovered, and close inside the gate was an armoury of 5,000 sling-stones. The people, who included potters, weavers, farmers, and metal-workers, lived in small circular houses with storage pits, and also had cooking pits for baking wheaten bread, of which actual specimens have been found. On the summit of the hill stood the principal building of the city, oblong in plan, and built of timbers 2 ft. in diameter. A street, now worn hollow in the chalk, leads to it from one of the gates. The Roman Conquest marked the substantial demolition of the defences, particularly near the gates. Over the ruins of the gate, a new roadway of rough metalling gave access to the city while the new Roman Dorchester was being built. The final phase of destruction coincided with the abandonment of the city, about 60 A.D., and for three centuries it was entirely derelict. The last phase of its history is represented by the temple, which formed the nucleus of a small group of buildings that included one of circular plan, where 200 Roman coins of the fourth century A.D., and part of a marble statuette, probably of Diana, were found. The temple is to be preserved by the Office of Works.

**MILKY WAY.**—The Royal Astronomical Society has been presented by Dr. Otto Boeddicker with the original drawing of the milky way which he made in 1884-89, when he was astronomer in charge of the Earl of Rosse's observatory at Birr Castle, Farnstown. The survey was made entirely by the naked eye, and includes as much of the galaxy

as lies between the celestial north pole and 10 degrees south declination. The work involved Dr. Boeddicker lying on his back in the open air for hours together, sometimes on frosty nights. Every trace of extraneous light being excluded, the sky was examined, and when a feature was made out, it was inserted by pencil stump in its place in a sketch-map of that section of the galaxy. The alternate seeing into darkness and then looking on white paper was a great strain on his sight, and the time taken to regain eye-sensitiveness added much to the time involved in the work. It is the very first combination of these sectional maps taken directly from the sky, dilapidated and torn, that Dr. Boeddicker, who is now living in retirement in Germany, has presented to the Royal Astronomical Society.

**MONTREAL'S MAMMOTH CLOCK.**—A monster clock has been erected in Montreal, which, it is claimed, is the largest in the world. It stands from the level of the street to a height of 330 ft. (the clock tower at Westminster is 318 ft. high), and has three dials set in a triangle, each dial being 60 ft. in diameter. The hour hands measure 20 ft. in length and weigh 1,500 lb., the minute hands are 30 ft. long and weigh 2,500 lb. The mechanism, which is strong enough to withstand the severe Canadian winters, is of the electric pendulum-driven type, and so designed that when, under pressure of ice or wind-power, the working of the hands is unbalanced, mercury switches operate automatically and increase the ordinary horse-power to 96 times normal capacity.

**NEW BLUE PIGMENT.**—The discovery of a new blue pigment—the first for more than a hundred years—was made known by the dyestuffs group of Imperial Chemical Industries. It is claimed that the new blue, which is called "Monastral Fast Blue BS," possesses better all-round fastness and more brilliance than the blues now in use. The new product will concern chiefly firms dealing in oil paints, enamels, cellulose lacquers, printing inks, distempers, water paints, soaps, sealing waxes, artists' colours, wallpapers, rubber, bookcloth, and linoleum. An interesting property claimed is its suitability as a "trichromatic blue" for printing inks, a colour which, blending with its opposites, the trichromatic red and yellow, will give hitherto unobtainable combinations of shades. For the printing of textiles it is said that the new blue will enable the printer to obtain effects for which he is accustomed to use mineral pigments, and that the non-mineral character of the blue will almost entirely eliminate heavy wear and tear of the engraved rollers.

**NOISE AND POTATOES.**—M. O. Istomina and M. E. Ostrovsky, two Russian scientists, have published in the "Comptes Rendus" of the Soviet Academy of Sciences, a report on the effect of super-sonic vibrations on the growth of potatoes. Super-sonic vibrations are air-waves whose frequency is too high to be within the range of human hearing, which ends at frequencies of 40,000 per second. The potatoes were submitted to vibrations of a frequency of 400,000 per second for periods of one minute.

The sonised potatoes gave a yield 16 per cent. greater than the control plants not submitted to the vibrations, and contained a per cent. more starch. The sonised plants were in full flower before the control plants had begun to flower. The experimenters suggest that the vibrations shake up the chemical constituents of the potatoes and accelerate the chemical processes of growth. If plants can be made to mature in a week less than the usual period, they may be grown in higher and colder latitudes, and new regions may be brought under cultivation.

**OIL IN AMERICA INEXHAUSTIBLE.**—Mr. A. J. Byles, President of the American Petroleum Institute, states that the exhaustion of American petroleum and products is beyond the power of prediction. Proved reserves are now estimated at twice the amount they were in 1925, in spite of the immense quantities of oil withdrawn. Oil has been found at greater depths, and in some cases even below old pools; and there still remain unexplored more than a billion acres of geological formations which may prove to be oil-bearing. If necessary the deposits of bituminous coal, which are unlimited, may be drawn upon to meet the demand for motor fuel. Further, more than a hundred billion barrels of oil are said to be obtainable from shale oil deposits, while with improved methods of discovery and production there has come a greater recovery of oil per well and a more economical use of it. In this connection it may be stated that large-scale drilling for oil has begun at Paulsgrove, on the slope of Portadown Hill, near Portamouth.

**PEKING MAN.**—In a report on recent material from the cave of Choukoutien Dr. Franz Weidenreich discusses the problem of how the *Sinanthropus* individuals—Peking man—came to be there. His conclusions are that the new material, jaws and fragments of jaws, part of a left humerus, a well-preserved and strongly fossilised fragment of a brain case, confirms the fact that *Sinanthropus* represents an independent hominid type, distinctly inferior to the Neanderthal type. The teeth are larger than those of recent and Neanderthal man, and the premolars and molars are very complicated in their pattern. The upper canine projects like a husk beyond the level of the first premolar. Further peculiarities suggest that the place of *Sinanthropus* is in the direct line leading to recent man, and that among recent races the Mongolian group has the closest affinity to Peking man.

**RAILWAY "SIGNAL BOARDS."**—A new system of signals was put into operation by the L.N.E.R. as an experiment on a single track 12-mile branch line between Filmoor Junction and Knaresborough. The familiar semaphore signals have been abolished, and in their place are "signal boards." As a train approaches a station, in place of a distance signal there is a rectangular "location board," painted black and yellow in diagonal stripes which will be easily observed in daylight and after dark will be illuminated by a zig-zag row of hemispherical lenses to be picked up by powerful headlamps on the engines. The home signal is replaced by a larger board painted red and

white in diagonal stripes with white reflex lenses and three red clusters down the centre. This also will be illuminated at night by means of the headlamp of the engine. At the station a board 4 ft. square has been fitted on the platform. If it is permissible for the train to enter the station, the person in charge will lift a flap on this board exhibiting a green centre; after dark the green light will be shown.

**RAILWAY WATER TROUGHS.**—The L.M.S. Railway have adopted an ingenious device for preventing waste by locomotives which take up water from track-troughs while travelling at full speed. A deflector-plate fitted in front of the pick-up scoop, by directing the water from the sides of the trough towards the centre, causes an artificial increase in the height of the water near the scoop mouthpiece and so increases by 200 gallons the amount of water it is possible to pick up at each lift. It is estimated that 3,675,000 gallons of water may be saved every day by this means. The device, which reduces by about half the amount of water wasted through being spilled at water-troughs, is part of a campaign to reduce the company's annual bill of £300,000 for water used for locomotive purposes.

**REINDEER IN CANADA.**—The pastoral possibilities of reindeer in the North-west Territories of Canada are discussed in the "Geographical Journal" by Mr. E. Porsild, who has spent several years in charge of experimental herds. Apart from lake areas and rocky ground that exclude large areas, the ubiquity of insect pests, especially the mosquito, seems to be the limiting factor. Except in the Arctic archipelago and along the sea-coast of the mainland, flies and mosquitoes occur during the short summer in such enormous numbers that neither the reindeer nor the hardest of herders can endure their movements. The only escape is to move the herds to the sea-coast during June and July. There are no hills of sufficient height to be clear of mosquitoes. Mr. Porsild considers that among the areas suitable for reindeer grazing, the best is on the west coast of Hudson Bay.

**ROCK LOCATED BY SOUND WAVE.**—A simple method of locating the distance of rock beneath the ground surface has been developed by the United States Bureau of Public Roads. The device employed is a highly sensitised seismograph, and the results are obtained by measuring the speed with which an impulse from the explosion of a buried blasting cap travels through the earth. The impulse travels through soil at a speed of 1,000 to 6,000 ft. per second, but through rock at 16,000 to 20,000 ft. per second. When the cap is exploded a record is made for time measurement, and the impulse as it comes through the ground is picked up by special detectors placed at different distances from the explosion. At greater distances an impulse coming through the soil is received, and another which has travelled through soil to rock, through rock, and finally from the rock to the surface. From the data thus obtained it is possible to calculate how far the impulse went downward through the soil before it encountered rock.

**ROMAN POTTERY AT LINCOLN.**—The kiln of a Roman potter, fully loaded with light cream ware, and fired but unopened, has been discovered on a site in Cathedral Street, Lincoln. It provides evidence that an industry, which is known to have been in existence at Lincoln in the Middle Ages, was also extensively practised in the Roman period. The kiln was a hole in the ground 4 ft. long and 2 ft. wide, with a well-fired wall on two sides. It was roofed over with a whitish clay mixed with sand; and it contained four stacks of pottery, which had been considerably crushed. The vessels were of the mortaria type, the large shallow basins with a heavy rim, in which the Romans used to grind their food. Many of the vessels were stamped with the potter's mark.

**ROSES WITHOUT THORNS.**—Prof. N. E. Hansen, of State College, South Dakota, has, after 25 years of intensive research, produced a thornless rose. Many millions of plants were raised from innumerable crosses at the research station at Sioux Falls, and in 1932 only 5,000 were reserved for the final work. The rose without a thorn now exists, and is used in the evolution of suitable garden roses. In addition, the Hansen roses have been reared from special crosses to endure more than 70 degrees of frost and general blizzard conditions. There should, therefore, be no trouble in accommodating them to British gardens, where such low temperatures are unknown. Eastern Siberia assisted in the new discovery by the contribution of a wild rose found by Prof. Hansen in 1913 near Semipalatinsk, where it grows freely on the dry steppes.

**SEA DAMAGE TO TIMBER AND METAL.**—The result of 19 years research on the ravages of sea-water on timber, metal, and concrete are surveyed in the report of the Committee of the Institution of Civil Engineers, published by the Stationery Office. Hundreds of specimens of various materials were exposed to the action of sea-air and sea-water at home and in the tropics. Damage to timber in sea-water is mainly caused by ship-worms, known as *Teredo*. These are molluscs, but they differ from mussels and oysters in having only a small part of the front portion of their soft bodies covered by shell. Using their shells as chisels, they excavate burrows in the wood, taking the sawdust produced into their bodies. Impregnating the timber with poisons is stated to be the most satisfactory method of dealing with their attack. The most efficient poison has been found to be the arsenical compound known as "D.M." (chlorodihydro phenarsine), which was used as a poison gas during the War. Tests on the corrosion of iron and steel were carried out on bars of 14 different materials in Auckland, Colombo, Halifax, Nova Scotia and Plymouth. In the half-tide tests and in the tests above high-water mark the bars at Colombo were most severely attacked. Next in order were those at Plymouth and Halifax, while the Auckland suffered the least. The investigations show that there is little to choose between wrought iron and mild carbon steels, both being cleaned from scale. With regard to carbon steels exposed with the scale on, those high in sulphur and phosphorus proved the

least satisfactory. The addition of small percentages of copper was of some benefit. The addition of chromium appeared beneficial in the tests above high-water mark, but in the half-tide and complete immersion tests it resulted in excessive pitting. The best results were obtained by adding a proportion of nickel to the steel, an addition of 36 per cent. rendering the steel exceptionally resistant under all conditions. Cast irons resisted aerial corrosion well, but in the half-tide and complete immersion tests corrosion was found beneath the surface.

**SHEEP DOMESTICATION.**—Dr. Max Hilzheimer, writing in "Antiquity" on the origin of domesticated sheep, points out that as domestication can have originated only where the wild sheep had its home, the whole of Africa is excluded. Europe also, as the wild breed was extinct before the glacial epoch, and is only represented to-day by the moufflon in Corsica and Sardinia. The wild sheep must have originated in the country lying between the Mediterranean and the Pamirs, though certain Asiatic types may have originated further east. With these exceptions, the wild breeds are confined to Asia and part of North America, and in addition to being found in high mountainous regions they also appear in the low-lying plains of Central Asia and Siberia, east of the Yenisei to the Polar Sea. Sheep must have been first domesticated around the Caspian and the Ural Seas, to the south of the Salt Range in the Punjab, in Baluchistan, and in South Persia. In the west the sheep is among the earliest of domesticated animals, being found in the neolithic Danish kitchen middens.

**SIGNAPHONE.**—The signaphone is an apparatus, a French invention, which telephones on its own account for fire brigade or police in an emergency, giving details by means of a gramophone record. As a fire alarm it is operated either by thermostats fixed near the ceiling or by push-buttons. With thermostats, the hot air rising to the ceiling when fire occurs acts on them and so breaks a closed circuit. An electrical relay in the signaphone starts a clockwork motor, which sets revolving a dialling drum, on which are small metal discs having projections corresponding to the letters and figures of the telephone number of the nearest fire station. Thus the fire brigade is called up. A gramophone record bears a verbal message giving the location of the fire and all essential details, and the disc repeats its message continuously for 3½ minutes. After this the signaphone will automatically ring up a second number—perhaps the home address of the subscriber—and will repeat its message to him. As a burglar alarm the signaphone is connected with an electrical circuit in the building. A burglar who opens a door or window, or does anything else that breaks the circuit, rings up the police, who learn from the gramophone message what is happening, and where.

**SILVER THAT WILL NOT TARNISH.**—A new process has been developed, after a long period of experiment, of treating silver with the precious metal rhodium in such a way as to make it untarnishable. Once silver has been rhodanised

it is claimed, it is free from tarnishing almost indefinitely, and the rhodium finish is unaffected by heat and does not chip or crack. The process is simple: A chemical bath for the metal, followed by a thorough dip in a rhodium solution, and with that the operation is finished. How long the thin coat of rhodium, which is in colour and glitter an exact replica of silver, remains intact depends on the amount of use. Rhodium is one of the six metals that are found in platinum, and, like platinum, it is expensive, although it is relatively cheap in the process of rhodanisation. Before its value for treating silver was discovered it was an almost useless metal. Platinum is found in Canada, Russia, South America, and South Africa, and an Italian two years ago found a little in an Abyssinian river. But it is in the nickel mines of Ontario, from which the rhodium used in the new process comes, that most of the platinum containing rhodium is found.

**SOUTH AFRICA'S LARGEST LIGHTHOUSE.**—The construction has been completed at Cape Columbine of the largest lighthouse in South Africa. The stretch of coast north of Saldanha Bay has for many years been extremely dangerous for navigators. The Cape Columbine light, with a strength of 9,500,000 candlepower, will cast a white beam every 15 seconds, which will be visible more than 20 miles away. It has many times the power of the famous lighthouse on Cape Point. It cost £16,000 and took two years to build.

**STERKFONTAIN SKULL.**—Dr. Robert Broom, of the Transvaal Museum, and his colleagues have discovered in the Sterkfontein caves near Krugersdorp a natural cast in limestone of the brain of an advanced type of ape and a number of fossilized bones of the skull, including parts of the jaws and a number of teeth. If first impressions are confirmed by more detailed examination, the discovery may go far towards clearing up a point which has been a matter of acute anthropological controversy for more than a decade. It is anticipated that the new evidence provided by the Sterkfontein skull will have an important bearing on the status of the phylogeny of man and the great apes, and more especially on the position of the Taungs skull. When that fossil was found in 1924, some doubt was expressed as to how far the approximation to the human type was due to its immaturity. It was pointed out that the young of the chimpanzee is known to exhibit pseudo-human characters, which disappear as maturity approaches; and it was agreed that the Taungs skull was that of an individual not more than six years old. As the Sterkfontein skull is adult a comparison with the Taungs skull may determine these uncertainties and indicate the relation of these fossil types to existing anthropoids as well as to early forms of man.

**STINGLESS BEES FROM MATABELELAND.**—English and American beekeepers have long been engaged in controversy regarding the possible use of stingless bees, the best known variety of which comes from Mexico. An experimental swarm of stingless bees, smaller, slimmer, and no longer than the common house fly, has been sent in a tree trunk by

air mail from Matabeleland to the London Zoo. There are a number of varieties of stingless bees in the Rhodesias, the particular type sent to London being the *Umgogumtshani* ("Grandmother of the grass"). These bees form their nests in hollow trees, where they store limited quantities of honey, adopting a pocket-shaped waxen storage cell instead of the familiar hexagonal cellular comb. While without stings, they are said to fight fiercely with their jaws as weapons of offence and defence, as is also the case with stingless bees from Central America, which bite fiercely.

**STAINLESS STEEL PLATING.**—After five years of research, Mr. F. F. Gordon, director of a Sheffield steel works, has discovered a process for bonding ordinary steel and stainless steel; in other words, he has found a way to give ordinary steel a coating of stainless steel which will make the whole absolutely rustless. Sheets of ordinary steel can be given a stainless-steel coating of less than one-thousandth of an inch or even thinner. This opens up possibilities of stainless-steel bridges and aeroplanes, railway carriages and springs, of the same rustless material. But for the necessity of allowing for corrosion, the plates of ships could be made at least 20 per cent. thinner, with consequent saving in gross weight and increased carrying capacity. This thinness, it is stated, can be attained by the use of the new material. Shipowners are put to heavy expense by having to send their vessels repeatedly into dry dock for the removal of barnacles from the hull. Experiments have proved that barnacles will not adhere to stainless steel. By the new process, razor blades, it is claimed, could be given a rustless surface, and a stainless coating could be given to sheets of corrugated iron for roofs, and applied also to all metal pipes and containers.

**SUBMARINE WITH SINGLE MOTOR.**—Submarines have hitherto been equipped with Diesel motor-engines for surface running and electric motors for propulsion under water. The drawback of the system is the weight of the electric motors and the storage accumulators and the enormous space they occupy, while the accumulators themselves may be a source of danger in the event of sea-water getting at the batteries, when poisonous chlorine gas is generated. In the new German submarine, one motor only is used for under-water and surface propulsion. When the boat is on the surface it is driven by Diesel compression-ignition motors using oil fuel, and these motors, in addition to propelling the boat, drive dynamos which generate current for a high-pressure electrolyser that breaks up distilled water into its constituent parts, oxygen and hydrogen. These two gases are stored separately, and, when the boat is about to submerge, the fuel oil is shut off, the gas supply turned on, and the stored oxygen and hydrogen passed to the expansion and mixing chamber, and the explosive mixture that results is carried on to the engine.

**TELEVISION.**—A television station has been opened at Alexandra Palace, North London, where a complete television chain, comprising studios, control room, and transmitting equipment, has been installed by both the Baird

Television Company and the Marconi-E.M.I. Television Company, while the B.B.C. has provided the sound transmitter for use with each television system. Because of the wealth of picture detail to be transmitted in high-definition television, ultra-short waves of 6.67 metres in length are used, the range of which is greatly extended as the height of the transmitting aerial is increased. For this reason the east tower of the Alexandra Palace, itself 80 ft. high, has been reconstructed and is now surmounted by a tapering lattice mast 220 ft. high. At the top is the vision aerial, circular in structure so as to radiate horizontally and equally in all directions, and situated more than 600 ft. above sea level. Immediately below is a similar aerial array for use in connexion with the accompanying sound transmissions to be radiated on a wavelength of 7.23 metres. The two television systems differ in the type of mosaic in which the transmitted and received pictures are constituted and also in the way in which the television scenes are "shot." The Baird Company has installed three different types of scanner. In the first, the original spotlight principle, due to Mr. J. L. Baird, is used, in which an intense spot of light runs rapidly over the object to be televised. The system is suitable for televising subjects in the studio. The Baird intermediate film method is used for televising scenes in the large studio adjoining the camera-room, the complete operation from taking the picture to transmission by radio taking only 30 seconds. The third Baird method provides for the use of ordinary "talkie" films for the broadcasting of both vision and sound. The special feature of the Marconi-E.M.I. television transmitter is the Emitron camera, which may be used for a studio scene or for an outdoor scene.

**THAMES TUNNEL AT DARTFORD.**—Preliminary work has begun in connection with the construction of the Dartford-Purfleet Tunnel, which will provide a much-needed link between the north and south sides of the Thames Estuary. The cost of the scheme is estimated at about £3,200,000, and the length of the tunnel will be more than one mile, exclusive of the open approaches, which will be constructed with a maximum gradient of one in 28. A carriageway of 20 ft., with a patrol path on each side, will be provided. The tunnel will be constructed by means of a shield driven by compressed air through shafts more than 100 ft. deep, 900 yards apart, and sited one on each side of the Thames. The top of the tunnel at its lowest point will be 80 ft. below Trinity high water, and the upper part will be in the form of a semi-circle of 30 ft. outside diameter with a flattened invert to support the floor. The tunnel will be of cast-iron and concrete segments lined with concrete. Hitherto there has been no provision for crossing the Thames by bridge or tunnel below Blackwall Tunnel, which is 35 miles from the Thames Estuary. The distance between that tunnel and the site of the new Dartford tunnel is 12 miles.

**TREPPANNING IN PALESTINE.**—An exhibition of antiquities from Tell Duweir, the ancient Lachish, which were obtained by the Wellcome Archaeological Research Expedition to the

Near East, was held in London. One of the most important discoveries was made in the western valley, where in a little-disturbed, small circular tomb, dating from 1400 B.C. to perhaps 1275 B.C., was a collection of 200 pots, of which 53 were types new to Tell Duweir. The most interesting was a censer, which in paste and finish recalls the famous Tell Duweir ewer on which was the inscription in the early Palestinian alphabetic script. The censer has lugs and a flat cover, on the upper side of which is an incised decoration with tree or plant motif in a hatched border, and on the under side a further example of the early script. In an adjacent large sepulchral chamber the lower levels were comprised of a mass of human skeletal remains, which may have been thrown through a hole in the roof when the city was sacked by Sennacherib in 701 B.C. Several of the skulls had been artificially deformed; while three had been trepanned. Of the latter, two examples, instead of the usual circular operation, had had a square section of bone, about an inch across, removed by sawing cuts, which intersect. This primitive surgical holing represents roughly the design made in the game of noughts and crosses. This method, known in the Inca skulls in Peru, is new to the ancient civilisation of the Old World.

**"VELVET TRACK" ON THE RAILWAY.**—Experiments have been made on the Delaware and Hudson Railway with long stretches of rail without any division between the sections, the object being to secure smoother running. The usual lengths of rail have been welded together by the thermit method, portable grinders being used to smooth over the welding at the top and sides of the rails. Rails 2,700 ft. in length have successfully withstood two years' usage, and installations have since been made of mile-long lengths. This type of metal has greatly improved the smoothness of travel, so much so that the welded stretches have earned the name of "the velvet track." The jolting of the train as the wheels pass over the joints made to allow for the expansion of the rails has been entirely eliminated, and the greater comfort of the passengers thereby secured.

**WATER-SOFTENING.**—In a report of the Water Pollution Research Board it is stated that certain synthetic resins have been found to possess marked water-softening properties. As a result of experiments at the Chemical Research Laboratory methods of treatment have been devised whereby materials suitable for water-softening can be prepared from certain British clays. Synthetic resins prepared from certain phenols and tannins possess marked base-exchange properties. Some of these resins are capable of removing as much calcium and magnesium from hard water as an equal weight of the commercial water-softening materials with the highest base-exchange values. Other resins prepared from aromatic bases, such as aniline, possess the property of removing anions or acidic radicals from solution.

**WAVE-ROLL COUNTERED BY FINS.**—The new Denny-Brown ship stabiliser, which has been fitted to s.s. *Isle of Sark*, owned by the Southern Railway, for cross-Channel service,

is designed to minimise the rolling of passenger boats. The device consists of a fin placed on each side of the vessel and controlled by a gyroscope. When the ship begins to roll the gyroscope causes power to be applied to the fins, which drives them in a direction opposite from that in which the ship is rolling. This has the effect of "damping" the vessel's roll. Although the fins are comparatively small they act with surprising quickness, and a roll of fifteen degrees is easily controlled. A larger number of fins will be required if the invention is applied to liners on the Transatlantic service.

**WEED-KILLING TRAIN.**—An experimental weed-killing train has been put into operation on various branch lines of the L.M.S. system. The train comprises an engine, a number of rail tank wagons filled with concentrated chemical, two specially constructed tenders, and a brake van fitted with spraying apparatus. Each of the tenders contains a tank of concentrated chemical, the combined capacity of the two tenders being 7,000 gallons of solution, in the proportion of one-third chemical concentrate and two-thirds water, 2,700 gallons of concentrate being carried in reserve. Before the train leaves each starting-point it is charged with solution, the track being sprayed from the brake van as the train travels at from 20 to 25 m.p.h. The solution not only kills existing weeds, but it is expected that after three years' heavy treatment the growth of weeds will be so much reduced that lighter spraying will suffice.

**WOAD IN ENGLAND.**—In a paper on the preparation of woad in England, read before the Newcomen Society by Mr. H. O. Clark and Mr. R. Wallis, the statement was made that dyer's woad was last grown and prepared at Skirbeck, Lincolnshire, in 1932, and was not likely to be grown again in England or elsewhere. On farms at Algarkirk and Skirbeck the machinery used in the industry remains almost intact. At Algarkirk the output of the farm varied from 75 to 178 tons, and the price obtained for the prepared woad was from £9 to £15. After the woad leaves were excised and cut up, in a mill with a circular track of oak blocks, they were kneaded into balls by hand and then dried. In a few weeks these balls were broken up and spread on the floor of the "couching house" to a depth of 3 ft., where they were allowed to ferment for six to eight weeks, and then dried again and packed in barrels for the dyers.

**WOODEN PIPE LINES.**—T. Pausert, writing in "World Power," describes how wooden pipes made of staves and bound with hoops are coming into modern use all over the world. The staves generally are of pine or larch, and are planed off to give a smooth finish after assembly. The contact surfaces are then dovetailed. When the pipe is filled with water the wood swells naturally and becomes watertight. One great advantage is the immunity of the wood from the effects of water, whether it is pure, acid, alkaline, or saline. Another important point is that salts are not deposited on the inside walls of the pipes, so that they do not become choked up and their rate of flow affected. Nor is there any risk of electrolysis from stray electric currents. If a sudden

hydraulic surge occurs, inherent elasticity acts as a safety valve; and the staves, being bound by hoops, enable the longitudinal joints to let water escape by small jets. When the pressure comes back to normal the staves resume their original position, and the pipe becomes watertight again. The pipes, being cheap, durable, and easily transportable, are specially valuable in mountainous regions.

**WORLD'S LARGEST TELESCOPE.**—After 12 months of cooling the 300-in. disc which has been made for the largest telescope in the world, to be set up on Mount Palomar, California, has been released from the annealing oven, at Corning, New York State, and sent to Pasadena for grinding and polishing. Ordinary visual tests, supplemented by observations through various parts of the disc and its rib system by polarised light, show that the annealing process was perfect. If it had been made in the conventional style the disc, which is 27 in. thick, would have weighed 45 tons, but by the ribbed structure adopted the weight has been reduced to 20 tons. The disc was packed with great care, its face protected by a 4-in. blanket of cork, and mounted on edge in a heavy steel case in a low car specially built for the journey of 3,300 miles across the Continent. The base of the steel covering cleared the road bed by only a few inches, while its upper extremity came within three or four inches of the tunnels and bridges en route. A special train of three cars and a locomotive was provided, which proceeded at the rate of 25 miles an hour from the glass works at Corning to Pasadena. It was expected that the polishing operation would take three or four years, and that the giant telescope is not likely to be installed before 1940. With the 100-in. telescope now in use at Mount Wilson it is possible to see objects 300 ft. or 400 ft. in diameter on the surface of the moon. With the 200-in. telescope it is hoped to see objects down to 30 ft. or 40 ft. in diameter.

**ZUYDER ZEE.**—A sum of 2,000,000 florins (about £154,000) has been voted in the national budget of the Netherlands for continuing the work of reclaiming the Zuider Zee, the ultimate object of which is to add more than 500,000 acres to the land of that country. The first section, the North-west Polder, of 50,000 acres, has already been enclosed. It is now proposed to proceed with the reclamation of the second section, the North-east Polder, containing 117,000 acres. The outer dyke, or embankment, enclosing the polder, starts from Lemmer, in Friesland, and follows a sweeping curve, first westerly, then southerly, and finally easterly, to a point on the coastline north of Kampen. It will be 35 miles long, and for the greater part of that distance will run parallel to a new canal. The reclaimed area will be at two levels, one 13 ft. and the other 18 ft. below water-level at Amsterdam, and three large pumping stations are to be provided to deal with the fresh-water drainage after completion. The cost is estimated at about £9,600,000; and the work will take about five years, while another ten years will be required to bring the salt-saturated soil to a completely effective state of productivity.

THE custom of opening a winter exhibition at the Royal Academy at the beginning of the year was not followed in 1936, for the Chinese exhibition of art and industries, which was opened in the autumn of 1935 drew such crowds of visitors that it was kept open until the early spring of the following year. The exhibition was one of the most successful that have been held at Burlington House, and the interest taken in it by the many thousands of visitors who attended it was astonishing. Most of them looked at everything, and without any signs of the boredom that is occasionally observed at exhibitions of modern pictures. The great number of priceless exhibits lent by the Chinese Government, and brought here by an English warship, the *Suffolk*, were returned uninjured; but the delicately-toned fabrics brought with them to adorn the walls of the Royal Academy galleries were left in their places, and formed a delightful background for the pictures shown in the summer exhibition.

The number of pictures submitted by non-members to the Council of the Royal Academy in the spring, for admission to the May exhibition, was smaller than in 1935, which, again, was less than that of 1934. The figures were 11,894 in 1934; 11,642 in 1935; and 11,501 in 1936; and suggest that the falling sales make it less and less possible for non-members to paint pictures on the chance of exhibition. Of 4,932 oil paintings sent to Burlington House, 3,723 were rejected outright; and of 3,513 water-colours, 2,931 suffered the same fate. No works of any kind were actually accepted.

The Hanging Committee for 1936 was composed of Sir William Reid Dick; E. G. Dawber, Francis Dodd, Malcolm Osborne, Sir W. W. Russell, C. M. Gere, E. G. Gillick, Harold Knight, and W. Monnington. The Royal Academy was more fortunate in connection with the opening of its exhibition this year than it was in 1935, when its opening day clashed with the commencement of the Silver Jubilee celebration, and the attendance suffered accordingly. The attendance in 1936 was good throughout the season, and the sales respectable considering the general depression in the world of art. The sales included a sea-piece by Sir W. W. Russell, "Squally Weather" (£105); "Evening after Rain," by Mr. Arnesby Brown (£200); "Under the Ramparts of the Ben Inverlochy," by Mr. S. J. Lamorna Birch (£230); "Armida," by Mr. G. L. Brockhurst (£1250); "Ballet," by Dame Laura Knight (£412); "Four Singers of Vera, Southern Spain," by Mr. W. Russell Flint (£450); "The Footbridge" (£105), "The Grey River" (£125), "Autumn at the Farm" (£150), all by Mr. Stanhope Forbes; "The Lying-in-State, Westminster Hall" (£210), by Mr. Frederic Elwell; "Winter, Bray, Ireland," by Mr. Julius Olsson (£52 10s.); "Pension Day" (£84), by Mr. Charles Spencelagh; and "Dover Castle" (£100), by Mr. Henry Bishop. Other works sold but unprired were "El Dorado, the Lochy at Camaskie, Inverness-shire," by Mr. S. J. Lamorna Birch; "A Farm in Suffolk," by Mr. Alfred J. Munnings; "The Wilds of Assynt," by Sir D. Y. Cameron; and the amusing picture by Mr. George Belcher, "I dreamt that I dwelt in marble halls."

The Chantrey purchases made this year

were eight in number; six of which were paintings, and two pieces of sculpture. All of them were shown in the exhibition. The paintings were No. 191, "Commotion in the Cattle Ring," Mr. James Bateman's amusing representation of the commotion caused at a sale by the breaking loose of a bull, for which £600 was paid; a small landscape by Mr. Oliver Hall, No. 126 (£80); "October," No. 368, by Mr. Elliot Hodgkin (£52 10s.); No. 392, "L'Infermiere," by the late Beatrice How (£105); No. 539, a large landscape, by Dame Laura Knight, "Spring in Cornwall" (£400); and No. 601, "The Zodiac," by the late Ernest Proctor (£367 10s.). The examples of sculpture purchased were No. 1591, "Monolith, Roman Stone," by Gilbert Ledward (£787 10s.); and No. 1599, "The Hand—group, bianco del mare," by Alfred Turner (£850).

Apart from that of the Royal Academy, the principal exhibition of the year was of paintings and drawings by Gainsborough, held by Sir Philip Sassoon at his house in Park Lane. Held, like all the preceding exhibitions at the same place in other years, for the benefit of the Royal Northern Hospital, it was a great success, in spite of the fact that some of the finest works of the great English master have been acquired by American collectors, particularly by the late Mr. Huntington. One of the best of the paintings by Gainsborough, in America, the portrait of Miss Linley and her Brother, was, however, lent for this exhibition, and the examples from English collections proved to be unexpectedly fine. A famous Gainsborough, new to most of the visitors to the exhibition, lent by Mr. Victor Rothschild, "The Morning Walk," was the picture of a bride and bridegroom painted in 1785, and now probably worth a hundred thousand pounds. A century ago it was offered for sale by auction and not a bid was made for it. Several Gainsboroughs were lent from the Royal Collection at Windsor, among them the beautiful sketch for the artist's famous portrait of Mrs. Robinson in the Wallace Collection, and certain of his many portraits of the young children of George the Third. There were many interesting exhibitions during the season at the galleries of the principal picture dealers. Messrs. Wallis showed a fine collection of works by French and English artists at their rooms in Berkeley Square, in the house once tenanted by Horace Walpole; Messrs. Knoedler, the paintings of that accomplished French woman-painter, Berthe Morisot; Messrs. Agnew, studies and sketches by Degas and Cezanne, and English water-colours; Messrs. Colnaghi, etchings and drypoints; and Messrs. Dunthorn, 18th-century English paintings, and drawings by Constable. Many fine French pictures were shown from time to time by Messrs. Reid and Lefebvre; and Messrs. Tooth's exhibitions included those of works by Claud Monet, Gluckmann, and Stanley Spencer; and, towards the close of the season, of a remarkable collection of English paintings, chiefly of the 18th century. A notable collection of English water-colours was one of several attractions at the Fine Art Society's rooms in New Bond Street. At the Leicester Gallery, pictures by Sir William Nicholson formed one of the best exhibitions.

In the autumn an exhibition of paintings by

French artists of nineteenth century was held at the New Burlington Galleries.

A remarkable collection of pictures from the collection of Mr. Gulbenkian, of Paris, was on view for some time at the National Gallery, and attracted general attention and admiration. It included works by Carpaccio, Vandyke, Frans Hals, Fragonard, Rembrandt, Rubens, and Gainsborough, the last, the well-known full-length of Mrs. Lowndes-Stone, formerly in the collection of Mr. Alfred de Rothschild. A fine work by a famous French artist was acquired for the Gallery in the spring, a portrait by Ingres of Madame Moitessier, which is in its way remarkable; and, a little later, was purchased a large landscape by Constable, his "Hadleigh Castle," which was shown at the Royal Academy in 1829, and described by the critics of the time in terms which suggest that it must have undergone considerable alteration at the hands of the artist after it was returned to him unsold. An interesting new departure

was made at the Gallery in the spring, when many small Dutch pictures were hung in some of the rooms which had formed part of the Royal Academy schools during the years that it was located in Trafalgar Square.

The principal sale of the year at Christie's was that of the late Mr. Henry Oppenheim's Old Master drawings, which lasted three days and realized £91,915. It included, among many other drawings, "A Rider on a Rearing Horse," by Leonardo (£4,305); "Drawing of Torso of Man," by Michael Angelo (£3,750); "A Wise Virgin," by Durer (£2,415); and "Drawing of a Farm," by Rubens (£1,102 10s.). Other pictures and belonging to different owners, and sold by auction, were "Charity Relieving Distress," by Gainsborough (£1,701); "Pink and Yellow Roses in Glass Vase," by Fantin (£966); "Portrait of James Alexander Simpson, when a Boy," by A. W. Devis (£3,780); and "A Portrait of Mr. Alexander Buchanan," by Raeburn (£2,730.)

### BRITISH EMPIRE CULTIVATION.

Principal Territories.	Land Area.	Cultivated Area, where declared.
	Acres.	Acres.
Gt. Britain & N. Ireland	60,000,000	13 mill. cereals and food crops; 35 mill. grass and pasture.
Isle of Man	145,000	70,000 arable and grass; 39,000 grazing pasture.
Channel Islands	48,000	Over 38,000 potatoes, fruit and roots.
Irish Free State	17,000,000	3¼ mill. field-crops; 8 mill. pasturage.
Canada	2,213,000,000	57 mill. field-crops; 8 mill. pasture; 700 mill. forest.
Newfoundland	176,000,000	43,000 hay, potato, turnips, cabbage.
Australia	1,903,000,000	32 mill. field-crop; 6 mill. pasture (110 mill. sheep.).
Papua	58,000,000	60,000 coconut, rubber, cotton, coffee and hemp.
British New Guinea	58,000,000	229,000 coconuts, cocoa, coffee, kapok, &c.
New Zealand	66,000,000	2 mill. field-crops; 37 mill. pasture and grasses; 4 mill. woods; 29 mill. sheep.
Indian Empire	1,008,000,000	187 mill. food grains; 89 mill. forest.
Burma	150,000,000	14 mill. food grains; 22 mill. forest.
Ceylon	16,000,000	3,200,000 paddy, rubber, tea, cocoa, tobacco, coffee, &c.
Cyprus	2,293,000	450,000 wheat, barley, vines, oats, cotton, &c.
Malta, &c.	78,000	40,000 cereal and food crops.
Palestine	6,600,000	2,000,000 barley, wheat, citrus fruits, olives, vines, &c.
Malaya	33,000,000	4,725,000 rubber, rice, coffee, tobacco, coconut, oil-palms, pineapples.
Sarawak	27,000,000	560,000 rubber, rice, sago, coconut, pepper; 342,000 timber.
North Borneo	20,000,000	290,000 rubber, rice, coconut, sago, tobacco.
Union of South Africa	302,000,000	12 mill. field-crops; 1¼ mill. fruit; 41 mill. sheep and goats.
Southwest Africa	206,000,000	56,000 potatoes, wheat, maize, tobacco.
Rhodesia, North	184,000,000	45,000 maize, tobacco, wheat, &c. (Europeans' cultivation).
Rhodesia, South	96,000,000	340,000 maize, tobacco, wheat, &c. (Europeans').
Bechuanaland	176,000,000	(feeds 1½ mill. cattle.)
Basutoland	7,500,000	400,000 maize, kaffircorn, wheat, &c.
Swaziland	4,300,000	42,000 maize, kaffircorn, tobacco, cotton, &c.
Kenya	141,000,000	488,000 hemp, maize, coffee, wheat, &c. (Europeans').
Uganda	51,500,000	1,700,000 cotton, sesame, ground nuts, maize, coffee.
Sudan	645,000,000	2,250,000 durra, cotton, sesame, ground nuts, cereals.
Tanganyika	235,000,000	1,325,000 maize, sisal, rice, coffee, cotton, &c.
Nyasaland	24,000,000	98,000 tobacco, cotton, tea, &c. (Europeans').
Somaliland	43,500,000	80,000 sorghum, maize, gram; cedar and gum trees inland.
Nigeria	238,000,000	1,040,000 ground-nuts, cocoa, sesame, rubber, cotton and cotton-seed.
British Cameroons	22,000,000	10,700 cocoa and rubber; also palm kernels and bananas.
Gold Coast	59,000,000	950,000 cocoa; also kola, oil-palms, yams, cassava.
Togoland	84,700,000	Cocoa, cotton, palm kernels, kola-nuts, tobacco.
Sierra Leone	17,800,000	430,000 palm kernels, kola, rice, cassava, yams.
British West Indies	8,071,000	720,000 cocoa, sugar-cane, bananas, &c.; 950,000 timber.
British Guiana	57,000,000	185,000 rice, sugar-cane, coffee, &c.; 50 mill. forest (hard-woods).
British Honduras	5,500,000	Coconuts, bananas; 5 mill. mahogany, cedar and gum trees.

FROM statistical tables published in *The Bookseller* it is clear that the number of books issued during the period under review continues, in face of general complaints of over-production, to show an increase on that of the previous year, the respective figures being 17,080 as against 16,459.

Co-operation amongst publishers has not, it would seem, reached the stage of concerted restriction.

Whilst Lord Camrose inconsequently advocated "the more books the better, whether good, bad or indifferent," Sir John Murray ruefully calculated that it would take 75 years to read the books in the *Sunday Times* Exhibition, by which time there would have been 75 more such shows to be digested.

On the other hand, Mr. J. D. Stewart, editor of the English Catalogue of Books for 1935, declared that the book-reading public has increased by over 250 per cent. in the past year, and that we "may soon hear of a scarcity of books." In this variety of counsel it is perhaps not surprising that the publishers are taking no chances of a shortage; which might, however, prove a blessing, if it threw readers back upon the masterpieces of the past.

The following may be recorded amongst statistics of interest chronicled during the year:—

The Oxford Press issued a fine quarto lectern Bible, marking the 400th year since it was first printed in English.

The Jubilee of King George V. produced 104 commemorative volumes.

Over three million copies of the sixpenny Penguin books were sold in the first year of their issue.

Eleven million copies of Tolstoi's works have been printed since the Russian Revolution, and 712,000 in 1935. Of Mr. Morton's "In the Steps of the Master" over 200,000 copies have been sold.

A large collection of Boswell papers was discovered at Durham, including 119 letters from Dr. Johnson.

A copy of the 1863 edition of "Alice in Wonderland" was sold for 900 guineas; a large paper copy of Blake's "Songs of Innocence" fetched £1,050, and a 4-page letter of Keats £1,600.

Rudyard Kipling left £155,238.

LITERARY EVENTS occurring during the period included the celebration on March 31 of the centenary of the publication of "Pickwick Papers"; the reception by the King at Buckingham Palace in June and, later, officially by the Government, of the International Congress of Publishers; and the large Book Exhibitions and Fairs held by the *Sunday Times* in London, and by other organisations in France, Spain and Hungary.

Concerning the machinery of book production and distribution, controversy has centred chiefly around the following subjects:—

- (a) The censorship of books and plays.
- (b) The law relating to libel and plagiarism.
- (c) The effect of the growth of "Twopenny Libraries."
- (d) Proposals that booksellers should become librarians; that libraries (in view of the estimate that each library copy of a book represents 50 readers) should contribute to authors' royalties, or pay more for their books.

(e) The influence of broadcasting and gramophone developments upon book reading.

(f) The ethics of author-reviewing.

Amongst various items of literary interest chronicled during the year may be mentioned Mr. Baldwin's speech at Cambridge urging our Universities to produce more poets "to inspire the world with a sense of unity and a sense of freedom"; the continued vogue of long novels—Priestley's last contained 516 pages, Frankau's 608, and Shaw Desmond's 960; and the reports of various librarians indicating the steady increase of the percentage of readers interested in the classes of books comprehensively labelled as "non-fiction."

Attention was once again drawn to the niggardly treatment by the State of Letters and the Arts when Mr. A. P. Herbert spoke in the House of Commons upon the contemptible smallness of the Civil List Pensions to persons distinguished for their services to literature and science, the total of which for new pensions amounts to £1,200 a year. Mr. Chamberlain could only reply that "there was little evidence of feeling in favour of any change."

### BEST SELLERS.

Speaking generally, the year has given us a good average output of literature without phenomenal features.

The element of the "topical" in book successes must not be forgotten.

It is not unnatural that in a period of successive political crises and alarms, John Gunther's "Inside Europe" should have taken first place in the lists of "best-sellers"; whilst Winifred Holtby's untimely death lent a special interest to "South Riding," her last book.

The elder generation, for whom he was much more than a name, has seized with eagerness upon Mrs. Dugdale's life of Arthur Balfour. The popularity of detective stories and "thrillers" shows little signs of waning or exhaustion, but their best authors have realised the necessity of humanising their interest; of making any love episode introduced inherent in the plot; of conforming, in short, more nearly to the canons of ordinary fiction. Again, interest in the Oxford Group Movement has doubtless stimulated the sales of Beverley Nichols' "The Fool Hath Said." The vastly increased vogue for travel, cruising, and the countryside helps to account for the phenomenal success of Mr. Morton's "In the Steps," and other topographical issues; whilst the laughter of an ever-growing army of motorists explains the popularity of Fougasse's "You Have Been Warned." A further contribution to the gaiety of nations has been supplied by a new biography of Emily Brontë, in which the too speculative author, misreading a pencilled "Love's Farewell," written by Charlotte over one of her sister's poems, has provided the author of "Wuthering Heights" with an unexpected lover, Mr. "Louis Parendsen."

The following have been included amongst BANNED BOOKS: *In the Irish Free State*; "Helen between Cupids" (Edwards); "Men of Goodwill," Book V (Jules Romains); "The Little Wench" (Lindsay); "A Farewell to Arms" (Hemingway); "The Sixth Beatitude" (Radclyffe Hall); "David and Joanna" (G. Blake); "Eyeless in Gaza" (A. Huxley); "Bird Alone" (S. O'Faolain); "I Claudius"

(R. Graves). *In India*; "The Face of Mother India" (Mayo). *In Germany, Italy and Russia*; "I Saw for Myself" (V. Brown). Arnold Zweig has been denationalised in Germany, and his property confiscated.

## PRIZES.

*Femina Vie*: "The Root and the Flower" (L. H. Myers). *Pulitzer*: "Honey in the Horn" (H. L. Davis). *Hawthornden*: "Life of Edmund Campion" (Evelyn Waugh). *Harraps' Cracksman Competition*: "Meet the Baron" (Anthony Morton).

## DEATHS

during the year in the various provinces of literature include the names of Winifred Holtby, Adam Black, Rudyard Kipling, George, Frederick and Maurice Macmillan, C. Graham, Clarence Day, Charles Chambers, F. P. Dunne (Mr. Dooley), G. K. Chesterton, A. E. Housman, Ben Maggs, R. B. Cunningham Graham, C. H. B. Quennell, Sir Owen Seaman, Professor J. S. Haldane, A. B. Powys, Lord Reading, Mrs. Sidgwick, Dr. Shadwell, Sir M. Spielman.

THE CENTENARIES were marked of the publication of the "Pickwick Papers," Mark Twain's birth (Nov. 30), Samuel Butler's (Dec. 4), William Godwin's death (April 7), Joseph Butler's "Analogy of Religion" (bicentenary), and the tercentenary of Harvard College.

Dealing with some general aspects of authorship and literature to-day, a few pertinent paragraphs from an article by Mr. Swinnerton published in "The Book World" last autumn may appropriately be quoted here: "Of course, it might be said that the interests of real literature would be best served if the supply of new books could fail utterly for a period not exceeding ten years. That would allow many of us to make a first acquaintance with some of those excellent works which are overlaid, as it were, in each publishing season—the books we mean to read and never quite reach; the books nobody has told us about; the books the bookseller has not seen fit to stock or the library to re-order. On an average, most of us fail to investigate the claims of something over thirteen thousand new books per annum.

"Any writer who would withdraw from the prevailing confusion in order to think for himself is apt to lose step with the time, and fall into complete neglect. Then the work upon which he has lavished his pains over a long period may seem to others by the time it is published as stale as an old loaf. Amid the frantic busy-ness of the age there is no time for cautious and reflective handling of a great theme, no time for quietness, for happiness, for peace. Every day's news may destroy the conclusions reached after months of labour. Many books are out of date five minutes after they have been published; others are stillborn, because their themes have been anticipated by those luckier in the race. Success itself is something snatched in haste from oblivion. . . . The need for immediate results leads more and more to a preference on the part of publishers and booksellers for the book which has "advertising" or "sales" value—some obvious quality or topical interest which can be hammered into ordinary minds by means of what is equivalent to the "plugging" of tunes in a current musical comedy. Hence the prevalence of "stunt"

books. While unostentatious quality will nearly always in time find its acknowledgment, there is a common inclination to align quality with novelty.

"A living literature is one in which authors can go their own way regardless of fashion and regardless of dictation from outside. They should be able to write what they wish to write. That is more difficult to-day than it has ever been; not because publishers will not venture with the unknown, for they have never been keener and more enterprising, but because amid so much shouting over what is immediately saleable an impression arises that anything which cannot be pushed into notice will be overwhelmed. . . . As in the novel, so in other fields, calculation, the product of a period pre-eminently economic and mathematical, has taken the place of spontaneous relish in life and art. Rule has been devised and acclaimed as principle. It has seemed more admirable to produce a calculated cleverness than an uncalculated beauty. . . . I am frightened on the author's account lest speed and push should drive the more delicate brethren to ambition lower than the highest. That is a terrible danger at the moment. I loathe the present absorption of some young talents in political exercises for which they have but a bookish foundation. I dread lest the only alternative to mass popularity should be dilettantism and academic priggishness. But I have no belief in the extinction of originality even in a much mechanised world. . . . I do not suppose for a moment that Cervantes or Shakespeare or Balzac thought of his own cleverness, or that he was concerned with anything beyond the making of a better book or play he was engaged upon. I think that what is the matter with our literature at the present time is excessive concern with either publicity or æsthetics."

## CLASSIFIED LIST.

In regard to the following classified list it should be noted:—

- (1) That space does not permit of more than 3 per cent. of the new books issued during the year being included;
- (2) that the general reader rather than the student has been considered in selecting titles;
- (3) that a proportionately higher percentage of non-fiction books is recorded than of novels;
- (4) that translations are only exceptionally included; and
- (5) that the year under review runs from October, 1935, to September, 1936, and entries are roughly chronological in order.

## BIOGRAPHY AND LETTERS.

"An Autobiographical Study," by S. Freud; "The Queen of Scots," by Stefan Zweig; "Epitaph on George Moore," by C. Morgan; "Beany Eye," by David Garnett; "Byron, The Years of Fame," by P. Quennell; "Life and Letters of John Galsworthy," by H. Marrot; "Correspondence of Thomas Gray," edited by Paget Toynbee and Leonard Whibley; "Antony," by Lord Lytton; "A Roman Life," by Gipsy Petulengo; "Letters of George III.," by B. Dobree; "Samuel Pepys, The Years of Peril," by A. Bryant; "Letters of Sir Walter Scott," edited by H. Grierson; "Randall Davidson,"

by G. Bell; "Lord Chesterfield," by S. Shellabarger; "General Smuts," by S. Millin; 2 vols.; "Voltaire," by H. N. Brailford; "Life Errant," by C. Hamilton; "Thomas Lovell Beddoes," by H. W. Donner; "The Naval Memoirs of Sir Roger Keyes," 11 (1916-18); "Robespierre," by J. M. Thompson; "Shakespeare," by J. Middleton Murry; "The Anvil of War," Letters of F. S. Oliver; "Spinoza," by F. Pollock; "Aspects of Wilde," by V. O'Sullivan; "Victoria of England," by E. Sitwell; "As Time went on," by E. Smyth; "George V.," by A. Bryant; "Oil Paint and Grease Paint," Autobiography of Laura Knight; "Joseph Conrad," by E. Crankshaw; "Scottish Eccentrics," by H. Macdiarmid; "The Last Landfall," by D. Malone; "A Flame in Sunlight," by E. Sackville West (De Quincey); "George III.," by J. D. G. Davies; "Ali the Lion," by W. Plomer; "Molly Lepell," by D. M. Stuart; "Monogram," by G. B. Stern; "The Silver Fleece," by R. Collis; "Rufus Isaacs," by S. Jackson; "Lobby," by H. Pearson; "Mrs. Thrale of Streatham," by C. Vulliamy; "Dramatis Personæ," by W. B. Yeats; "Wellington," by C. Crutwell; "The Life of Charles James Fox," by E. Innes; "Lord Palmerston," by H. Bell; "Parnell," by Joan Haslip; "A Royalist's Notebook," edited by F. Bamford (Sir John O'Leander); "John Tweed," by his daughter; "William Morris," by May Morris; "Henrietta Maria," by C. Oman; "Arthur James Balfour," by B. Duddale (Vol. I); "The Wild Irish Girl, Sidney Owenson," by L. Stevenson; "The Earnest Atheist," by M. Muggeridge (Samuel Butler); "Anne Douglas Sedgwick," edited by B. de Selincourt; "The Anatomy of Frustration," by H. G. Wells.

#### ESSAYS AND MISCELLANEOUS.

"Four Hedges: A Gardener's Chronicle," by C. Leighton; "What Happens in Hamlet," by Dover Wilson; "In Praise of Idleness," by Bertrand Russell; "Salar the Salmon," by H. Williamson; "The Book World," edited by John Hampden; "Reason and Emotion," by J. Macmurray; "Religion and Science," by B. Russell; "What a Word!" by A. P. Herbert; "The Ashendene Press Bibliography," by C. H. St. J. Hornby; "Game Birds, Beasts & Fishes" (Lonsdale Library), by Eric Parker; "Collected Essays," by F. H. Bradley; "The Torch of Freedom," Speeches by Stanley Baldwin; "Language of Truth and Logic," by A. Ayer; "Down but not Out," Anon.; "Running Accompaniments," by H. Nevinson; "Dorset Essays," by L. Powys; "From Rousseau to Proust," by Havelock Ellis; "Mars his Idiot," by H. Tomlinson; "Essays Ancient and Modern," by T. S. Eliot; "Life with Father," by C. Day; "Poets and Prophets," by A. Maurois; "Song for Sixpence," by G. Pollett (A Pedlar of Verses); "Abinger Harvest," by E. M. Forster; "The Movies on Trial," edited by W. Perlman; "The Zoo you knew," by L. Brightwell; "History of the English Novel," by E. A. Baker (Dickens and Thackeray); "As I was Saying," by G. K. Chesterton; "Newnham," by M. Hamilton; "Sagittarius Rising," by C. Lewis (Flying Records); "The Open Air," by A. Bell; "Sherston's Progress," by

S. Sassoon; "Between the Wars," by H. Nevinson; "The Tichborne Case," by Lord Maugham; "Obiter Scripta," by G. Santayana; "Reperusals," by L. Pearsall Smith; "Only the other Day," by E. V. Lucas; "Walls have Mouths," by W. Macartney (Prison Experience); "I took off my Tie," by H. Massingham (East-end Life); "The Patient Looks at the Hospital," by F. Fidler.

#### FICTION

"Clear Horizon," by D. Richardson; "Faith, Hope, No Charity," by Margaret Lane; "The Last Puritan," by G. Santayana; "To-morrow is also a Day," by R. Cavan; "Cut and Come Again," Short Stories by H. E. Bates; "The Middle-aged Man on the Flying Trapeze," by J. Furber; "Hester and Her Family," by H. W. Freeman; "The Virgin of Sealholt," by G. Kamban (Icelandic); "Summer-time Ends," by I. Hargrave; "Regency," by D. L. Murray; "The Pure Flame," by E. Maunin; "Venus over Lannery," by M. Armstrong; "South Riding," by W. Holtby; "An Ordinary Life," by Karel Capek; "Jamaica Inn," by D. du Maurier; "Strange Glory," by L. Myers; "Night over the East" (adapted from the German by E. and W. Muir); "Who Rides on a Tiger," by Mrs. B. Lowndes; "The Retreat," by F. Reid; "Silence in Heaven," by L. Sieveking; "Prelude to Kingship," by J. Lane (Charles II.); "Sparkenbroke," by C. Morgan; "Old King Cole," by E. Shanks; "The Thinking Reed," by R. West; "Mirror for Skylarks," by M. Hare; "The Sixth Beatitude," by Radclyffe Hall; "The World Over," by E. Wharton; "The Phoenix Nest," by E. Jenkins (Elizabethan); "Main Line West," by P. Horgan; "Caroline," by R. Crompton; "Duet for Female Voices," by S. Campion; "Eyeless in Gaza," by A. Huxley; "The Faithful Lovers," by J. Beresford; "The Island of Sheep," by John Buchan; "Choose a Bright Morning," by H. Bernstein; "London Pride," by Shaw Desmond; "Bird Alone," by S. O'Faolain; "They Walk in the City," by J. Priestley; "Novel on Yellow Paper," by S. Smith; "Not Too Narrow, Not Too Deep," by R. Sale; "The Weather in the Streets," by R. Lehmann; "The Emotional Journey," by W. Maxwell; "The Olive Field," by R. Bates; "Men of Good Will," IX and X, by Jules Romains; "Summer Will Show," by S. Warner; "Far Forest," by F. Brett Young; "A Prayer for My Son," by Hugh Walpole; "Shining Scabbard," by R. Hutchinson; "Golden Wedding," by A. Parrish; "Cities of Refuge," by Sir P. Gibbs.

#### CRIME AND DETECTIVE STORIES.

"Gaudy Night," by D. L. Sayers; "The Loss of the *Jane Vosper*," by F. W. Crofts; "Flowers for the Judge," by M. Allingham; "Murder by the Dozen," introduced by F. Yeats Brown; "The Crystal Skull," by J. Maclaren; "Trent's Own Case," by E. Bentley and H. Allen; "Six Against the Yard," by Various Authors; "Murder off Miami," by D. Wheatley (a new format, cumbersome but clever); "Rooksmiths," by S. Truss; "Death at the President's Lodging," by M. Innes; "Murder in Mesopotamia," by A. Christie; "In Face of the Verdict," by J. Rhode.

## POLITICS, ECONOMICS AND RELIGION.

"Soviet Communism," by S. and B. Webb; "The Forward View," by L. S. Amery; "We Europeans," by J. S. Huxley and R. Haddon; "World Without Faith," by J. Beevers; "An Introduction to the Books of the Apocrypha," by W. Oesterley; "We Did Not Fight," edited by J. Bell; "Survey of International Affairs, 1934," by A. J. Toynbee; "The Purpose of God," by W. R. Matthews; "Magna Britannica," by J. Coatman; "Guide to Philosophy," by C. E. M. Joad; "A Prelude to Religion," by E. E. Thomas; "The General Theory of Employment, Interest and Money," by J. Keynes; "Inside Europe," by J. Gunther; "The Ethics of Competition," by F. Knight; "The Future of Marriage in Western Civilization," by E. Westernmark; "The Fear of the Dead in Primitive Religion," by Sir J. Frazer; "This Have and Have Not Business," by Sir N. Angell; "Motive and Method in a Christian Order," by Sir J. Stamp; "Spring Up, O Well!" by D. Kahn (Jewish Life in Palestine); "The Rise of European Liberalism," by H. Laski; "Road to Life," by A. Makarenco; "Moscow Admits a Critic," by Sir B. Pares; "Christian Morality," by Hensley Henson; "Millions of Dictators," by E. Lengyel; "The United States and Europe," by E. Tatum.

## ART AND SCIENCE.

"The Arts To-day," edited by G. Grigson; "English Costume of the Later Middle Ages," by Iris Brooke; "Faraday's Diary," edited by T. Martin; "The Painter's Eye," by E. Glasgow; "Human Ecology," by J. Bews; "Recollections of a Picture Dealer," by A. Vollard (Modern French Art); "Brahm's Life and Work," by K. Geiringer; "Medical Aspects of Crime," by W. N. East; "Studies in the Psychology of Sex," by Havelock Ellis (4 vols.); "Velasquez, a Catalogue," by A. Mayer; "English Church Screens," by A. Vallance; "First Principles of Typography," by S. Morison.

## POETRY AND DRAMA.

"Vigils," by S. Sassoon; "A Full Moon in March," by W. B. Yeats; "Lyrics and Sonnets," by Lord A. Douglas; "Poems, 1919 to 1934," by W. De la Mare; "The Simpleton, The Six and The Millions," by Bernard Shaw; "The Faber Book of Modern Verse," edited by M. Roberts; "Songs and Incantations," by W. J. Turner; "A Letter from Pontus and other Verse," by J. Masfield; "Collected Poems," of G. W. Young; "Sonnets and Poems," by E. Holmes; "Selected Passages from The Dawn in Britain," by C. Doughty; "Poems," by M. Roberts; "The Collected Poems of Austin Clarke."

## HISTORY.

"Charles I. and Cromwell," by G. Young; "The Russian Revolution," by W. Chamberlin; "The War in the Air," by H. A. Jones; "England, 1870-1914," by R. Ensor; "England and the Near East," by H. Temperley; "Gallipoli," by J. North; "The Reign of Elizabeth," by J. Black; "The Allegory of Love," by C. Lewis; "Great Britain Empire and Commonwealth, 1886-1935," by J. Spender; "War Memoirs of D. Lloyd George," Vol. 5.

## TRAVEL AND TOPOGRAPHY.

"Both Sides of Buka Passage," by B. Blackwood; "Antarctic Discovery," by R. E. Byrd; "Everest: The Challenge," by F. Younghusband; "Malayan Symphony," by W. Foran; "China's Millions," by A. L. Strong; "Abyssinian Adventure," by G. Harmsworth; "My Vagabondage," by H. A. Vachell; "Sledge," by M. Lindsay (Greenland); "London Through the Ages," by F. Tickner; "Green Hills of Africa," by E. Scotland at the 1931 Census showed longevity, both of males and females, less than England and Wales at all ages under 85 by 2·7 years for males and 3·4 years for females at birth to fractions of a year at later ages, but while in Scotland at every age women's longevity exceeds that of men the excess is less than in England. In Ireland the longevity of men from 35 years of age and of women from 65 years right up to 100 consistently exceeds both England's and Scotland's average at some ages by over a year. The expectations based on the 1936 Census there are not available yet.

**THE LONDON STAGE.**—In its fight against the cinema, the theatre during the past year followed a fashion set by its competitor and turned to history. Among the chief successes of 1936 were several dramas based, more or less accurately, upon real characters of the past, such as *Mary Tudor*, by Wilfrid Grantham, which registered over 200 performances; *Charles the King*, by Maurice Colbourne, and *St. Helena*, in which R. C. Sherriff and Jeanne de Casalis showed Napoleon in a sympathetic light. Another dramatist, Miss Helen Jerome, introduced to playgoers two of the earliest of British women novelists in adaptations of *Jane Eyre* and *Pride and Prejudice*, and a living woman writer, Miss Mazo de la Roche, brought to life in *Whiteoaks* part of her story of a Canadian family. Mr. St. John Ervine's *Anthony and Anna* ran through the year, but that record was exceeded by *Night Must Fall*, Enilyn Williams' thriller, *Call It a Day*, Miss Dodie Smith's comedy, and the quaint Chinese play, *Lady Precious Stream*, survivors of the previous year. Another big success was *Storm in a Tea-cup*, adapted by James Bridie from the Austrian; Mr. Noel Coward displayed a new side of his versatility with a group of one-act plays, and Mr. J. B. Priestley contributed *Bees on the Boat Deck*, one of his least satisfactory comedies. A new type of thriller was *The Amazing Dr. Clitterhouse*, by Barre Lyndon, and high in this class stood *Love from a Stranger*, adapted by Frank Vosper from one of Mrs. Agatha Christie's stories, and *The Frog*, from Edgar Wallace's novel, by Ian Hay. Sir John Martin-Harvey was welcomed in the West End in an elaborate production of Professor Gilbert Murray's translation of *Edipus Rex*; Ibsen and Tchekov were represented, the latter by *The Seagull*, which achieved a long run; and Shakespeare not only drew enthusiastic audiences to the Old Vic, Sadler's Wells and the Open Air Theatre in Regent's Park, but had a West End revival in *Antony and Cleopatra*.

The following is a list of productions between Nov. 1, 1935, and Oct. 31, 1936:—

**ADELPHI**, 411 Strand, W.C.2.—(1935) Dec. 20. *Fritzi*, musical comedy by Sydney Blow and Edward Royce, music by Carl Tucker (Messrs. Paul Robeson, John Ahuma, and Robert Adams and Miss Helen Vayne); at the Westminster on June 7, *Peace*, adapted from Aristophanes by Francois Porche (Messrs. Cecil Truncer and Finlay Currie).

## THE FILMS.

DESPITE 2 number of highly interesting films, both British and American, the event of the year in the cinema world was the presentation of *Modern Times*, the latest production of Charlie Chaplin. Behind a succession of the great comedian's whimsicalities was a background indicting the machinery age which brought the film a ban in Germany and wide popularity in Britain. The States also sent three splendid productions in *Romeo and Juliet*, the last and the best of Irving Thalberg's beautiful screenwork, *Mr. Deeds Goes to Town*, and *Mutiny on the Bounty*, which "starred" our leading actor, Charles Laughton. A home Shakespeare film, *As You Like It*, was a striking addition to British successes, with Elisabeth Bergner and a very good cast. Mr. H. G. Wells saw two of his stories successfully presented—*Things to Come* and *The Man Who Worked Miracles*—and other notable works from our studios included *Rhodes of Africa*, *The Ghost Goes West*, *Secret Agent* and *Tudor Rose*.

Following is a list of the principal films shown publicly in London from Nov. 1, 1935, to Oct. 31, 1936:—

ACADEMY, 165 Oxford Street, W.1.—(1936) Jan. 13. *Sans Famille*, French (Robert Lynen). Feb. 17. *Hohe Schule*, Austrian (Rudolf Forster). March 10. *Crime et Châtiment*, French (Pierre Blanchard and Harry Baur). April 6. *Liebesmelodie* (Marta Eggerth). May 27. *Die Ewige Maske*, Swiss. June 29. *Janosik*, Czechoslovakian. Aug. 24. *De Kribbebijter*, Dutch. Sept. 14. *Sylvia and Her Chauffeur*, Austrian (Olga Tschechowa). Oct. 7. *Singende Jugend*, Austrian.

ASTORIA, 157 Charing Cross Road, W.C.2.—(1936) May 18. *The Improper Duchess*, British (Hugh Wakefield and Yvonne Arnaud).

CAPITOL, Haymarket, S.W.1.—(1935) Nov. 4. *Ginger* (Jackie Searle and Jane Withers). Nov. 11. *Way Down East* (Henry Fonda and Rochelle Hudson). Nov. 17. *King Solomon of Broadway* (Edmund Lowe). Nov. 25. *Our Little Girl* (Shirley Temple). Dec. 9. *A Fire Has Been Arranged*, British (Bud Flanagan and Chesney Allen). Dec. 16. *No Limit*, British (George Formby), and *His Night Out* (Edward Everett Horton). Dec. 23. *Foreign Affairs*, British (Tom Walls, Ralph Lynn, Robertson Hare and Marie Lohr).

CARLTON, Haymarket, S.W.1.—(1936) Jan. 15. *Peter Ibbetson* (Gary Cooper and Ann Harding) and *The Last Journey*, British (Godfrey Tearle). Feb. 4. *I Dream Too Much* (Henry Fonda and Lily Pons). March 3. *The Milky Way* (Harold Lloyd, Adolphe Menjou and Helen Mack). May 7. *The Trail of the Lonesome Pine*, in colour (Henry Fonda, Fred MacMurray and Sylvia Sidney). June 4. *The Ex-Mrs. Bradford* (William Powell and Jean Arthur). July 6. *The Case Against Mrs. Ames* (George Brent and Madeleine Carroll). \* By the Representation of the People Act (1885) Membership of the House of Commons was increased from 658 (at which it had stood since 1801) to 670. By the Representation of the People Act (1918) the numbers were increased to 707. After the Dissolution (Oct. 26, 1922) of the Parliament elected in December, 1928, the number of members was reduced from 707 to 615, through the decrease of Irish representation from 105 to 13 Members under the Government of Ireland Act (1920).

In a year of considerable broadcasting activity, which included important developments in television and the erection of two new transmitters, it is none the less true that the greatest broadcasting events of 1936 were those which concerned the death of King George V and the Accession of King Edward VIII. It was through broadcasting that the British public learnt, soon after midnight on January 20, that King George had passed away; and, from that evening until after the Royal Funeral, the ordinary programme arrangements were put on one side, while special and appropriate programmes were hastily devised. The proclamation of the Accession, the Memorial Service in the Concert Hall of Broadcasting House, and a moving "outside broadcast" of the Funeral were heard by listeners at this time, as well as tributes to King George's memory by Mr. Stanley Baldwin and others; but it was not until St. David's Day that King Edward VIII, whose voice had often been heard when he was Prince of Wales, broadcast to the British Commonwealth for the first time as King-Emperor. Listeners also heard him later in the year at the unveiling of the Canadian War Memorial at Vimy Ridge.

#### FUTURE OF THE B.B.C.

There was much discussion in 1936 about the future of the B.B.C. The Broadcasting Committee, which was set up in 1935 under the chairmanship of Viscount Ullswater, issued its Report in March, and a Memorandum by the Postmaster-General followed in June; but, as had been generally forecast, neither the Committee nor the Postmaster-General suggested any radical change in the constitution or working of British broadcasting. The Committee recommended that the B.B.C.'s charter should be extended for ten years; that the number of Governors should be increased to seven; that the licence fee should remain at ten shillings; that the B.B.C. should receive an increased share of the licence revenue; and that Empire broadcasting and television should be developed. All these recommendations were accepted by the Government, but the suggestion that responsibility for the cultural side of broadcasting should be transferred to a Cabinet Minister in the House of Commons, preferably a senior member of the Government, was rejected. Many other points were dealt with, but it may be generally said that the Committee endorsed the policy of the B.B.C., and that this endorsement was approved by the Government. It may thus be taken for granted that B.B.C. policy will not undergo any vital change in the near future.

#### PRINCIPAL DEVELOPMENTS.

Before reviewing the programmes in detail, the chief general developments of the year should be briefly chronicled. They included a satisfactory advance in the licence figures; slow but valuable progress in television; the erection of new transmitters for Northern Ireland and Scotland; the resignation of an important official; and the institution of a special department for training new members of the B.B.C. staff. Outstanding broadcasts of the year came from the *Queen Mary* during her maiden voyage; from Vancouver at the time of the city's Jubilee; from the opening of the British Empire Exhibition at Johannes-

burg; and from India when the Earl of Willingdon relinquished the Vice royalty and the Marquess of Linlithgow entered upon his new duties.

Once again there was a substantial increase in the number of wireless licence-holders, although, in view of the high figures already reached, it was inevitable that there should be some diminution in the rate of progress. At the end of 1935 the number of licences issued was 7,403,109, which was an increase of 622,540 on the previous year; and by August 31, 1936, the figure had grown to 7,699,306. Though the total increase for 1936 is likely to be smaller than in recent years, it is certain to represent a highly creditable advance, and there is a good chance that the 8,000,000 mark will be reached during 1937. It is interesting to recall that, when this annual survey was instituted, the number of licences (on August 31, 1932) was considerably short of five million.

Though extensive preparatory work was done at Alexandra Palace, the first London television station, in the early part of the year, it was not until the end of August that the new television service made its experimental beginning. This was during the Radio Exhibition at Olympia, London, where a number of receivers were installed to enable the public to see the first transmissions from Alexandra Palace. Both films and studio programmes were transmitted, the Baird and the Marconi-E.M.I. systems of television being used on alternate days; and the general reception was so favourable that it was quite obvious that television had "arrived." After a lapse of some weeks, test transmissions were resumed in October, and the first regular programmes were scheduled to begin in November. Though receiving sets are still costly, the next twelve months should see some notable progress, and the interest aroused by the appointment of the first television announcers—Miss Jasmine Bligh, Miss Elizabeth Cowell and Mr. Leslie Mitchell—showed that the new medium is certainly catching the popular fancy.

The two new transmitters opened during the year were at Lisburn, for Northern Ireland, which has a power of 100 Kw. and gives a greatly improved service to listeners; and at Burghead, for the north of Scotland.

The B.B.C. lost one of its most distinguished officials in September, when Mr. W. E. Gladstone Murray, Assistant Controller of Programmes, was appointed General Manager of the new Canadian broadcasting organisation. Mr. Murray, who was formerly responsible for the B.B.C.'s publications and public relations, had been associated with British broadcasting since the early days of Savoy Hill. In the staff re-arrangements which followed his resignation, Mr. R. E. L. Wellington became Assistant Controller of Programmes, Mr. R. H. Eckersley Director of Regional Relations, and Mr. C. A. Siepmann Director of Programme Planning.

Considerable comment was aroused by the formation of a B.B.C. Staff Training Department, under the direction of Mr. G. C. Beadle, but the adverse criticism hardly seemed to be justified. The object of the Department, which came into operation in October, is apparently to ensure that new members of the B.B.C. shall be well grounded in general broadcasting principles before taking up specialised positions; and as this should have the effect of producing

greater efficiency in all the B.B.C.'s programme activities, it would appear that the innovation should be of benefit to listeners.

### TALKS AND TALKERS.

Of the talks that were broadcast during 1936 it would perhaps be fair to say that they maintained a very high level of general interest, but that really outstanding talks were few and far between. In previous years there has usually been at least one series which brought to the microphone some of the leading writers, thinkers and statesmen of the day; in 1936, although the actual number of talks appeared to be increasing considerably, there was no series of this nature, and the programmes suffered a little in consequence. Apart from the address by His Majesty the King, which has already been mentioned, perhaps the principal talks of the year were the two National Lectures—*Law and the Citizen* (Lord Macmillan) and *Modern Poetry* (W. B. Yeats); Mr. Lloyd George's broadcasts—one on the eve of St. David's Day, the other in commemoration of Dr. John Clifford's centenary; and Max Beerbohm's delightful talks on *Speed* and *A Small Boy Seeing Giants*. Mr. Beerbohm, who made his first microphone appearance at the end of 1935, when his talk on *London Re-Visited* made a lasting impression on all who heard it, is undoubtedly, both in style and in matter, one of the most accomplished broadcast talkers that the B.B.C. has yet discovered, and his two talks in 1936 were a sheer joy.

In the fortunate absence of a General Election or a national crisis, politics played a very small part in the talks between January and October, and the Budget, which was discussed in four talks by Mr. Neville Chamberlain, Mr. C. R. Attlee, Sir Archibald Sinclair and Mr. W. S. Morrison, provided the only opportunity for political controversy at the microphone. It is true that several Cabinet Ministers broadcast on other occasions, but their talks, such as those by Mr. Leslie Hore-Belisha on *Road Safety*, Mr. W. G. A. Ormsby-Gore on *Britain's Ancient Monuments*, and Mr. Oliver Stanley on *Facilities for Continued Education*, were non-controversial.

Among the series of major importance were some highly successful philosophical talks. *If Plato Lived Again* (R. H. S. Crossman); an interesting symposium on *Conquest of the Air*; another symposium entitled *Down to the Sea in Ships*, which was divided into three parts—"Sea Communications," "Sea Harvests" and "Sea Power"; *Public Opinion and Politics* (Lord Elton); *Living Together* (Dr. H. A. Mess), a study of the social groups to be found in the world to-day; *The Commonwealth and the Colonial Empire* (Professor R. Coupland and H. V. Hodson); *Many Inventions* (H. Stafford Hatfield), a useful survey of recent scientific discoveries; *Behind the Scenes in Nature* (Professor James Ritchie); *The Village* (Professor H. H. Swinnerton, J. L. Hammond and Dr. J. D. Chambers); and *This Freedom of Ours* (Frank Birch, with an introductory talk by Lord Macmillan). Lighter talks included *Imaginary Biographies* (of which the outstanding feature was undoubtedly Mr. James Agate's "The Voice from the Edinburgh Gallery"); *The Spice of Life* (in which the late Mr. G. K. Chesterton broadcast in the evening programme for the last time); *Living in the Past*; *This*

*Time Last Year*, a series of holiday talks; *Down River* (G. M. Boumphrey); and *London Scenes* (Harold Nicolson and others). Dr. Julian Huxley gave six talks on *The Zoo*, and there were several talks on birds by Tom H. Harrison, including a series on *Bird Watching*.

The Regional programmes also provided a large number of interesting talks, among which may be mentioned *The Midland Parliament*, consisting of debates on such subjects as "Paid Holidays" and "Marriage on the Dole"; some Northern *Adventures in Eating* (F. E. Doran); the Western series on *Books and Back-grounds* (Lord David Cecil, Sir John Squire and others); *Scotland's Living Past*; and a survey of *Town-planning in Northern Ireland* (Maxwell Fry), which was arranged for the end of the year.

The reading of poetry was represented by mosaics of words and music called *Poet's Pilgrimage*, and later in the year by the beginning of a special series of selections from great English poets, the selector in each case being a distinguished critic or man of letters. That the B.B.C. is still shy of poetry, however, was shown by the fact that these readings were given in the afternoons or late at night, but not in the ordinary evening programmes. The prose reading of serial extracts from novels was revived, the first two being *Martin Chuzzlewit* and *The Mill on the Floss*.

In addition to the general talks and readings, there were special series of religious talks on Sundays. Canon A. C. Deane, Sir Thomas Inskip and the Bishop of Durham discussed the relations between *Church and State*; the Dean of St. Paul's gave an absorbing series on *The Hope of Immortality*; and young men and women joined in a symposium called *The Church I Look For*, which was summed up by the Bishop of Bristol. Other religious series dealt with *Christian Morals* (Father M. C. D'Arcy), *Three Common Graces* (Father Vincent McNabb), *The Problem of Evil* (Rev. J. S. Whale) and *What is the Church For?* (a series of interviews with leaders of the Churches, reported by Howard Marshall).

### DRAMA.

It may at first appear paradoxical to suggest that the principal dramatic developments in broadcasting during 1936 were not to be found in the sphere of drama, but it is none the less true. Broadcast drama made little progress in this year, although, as will be mentioned later, there were a number of excellent productions; the more specialised "radio drama," which is the most convenient term for plays specially written for broadcasting, was practically stagnant, and only the occasional efforts of Philip Wade, Horton Giddy and Norman Edwards saved it from utter stagnation; but great activity and progress were to be found in the production of "feature programmes." These programmes, which consist of the presentation of a person, an event or an aspect of life in a programme that combines dramatic method with adherence to known facts, were by no means a novelty, but it was not until 1936 that their potentialities began to be fully exploited. As the year advanced they became more and more numerous, and they dealt with such diverse subjects as fog and Erasmus, the Battle of Sedgemoor and Bret Harte. Among the most

notable were Val Gielgud's *Gallipoli*, Laurence Gilliam's *St. George's Day and Kitchener* (from material compiled by Dr. Harold Temperley), and *Louisa Wants a Bicycle*, an amusing and instructive survey of the growth of women's rights, produced by Miss M. H. Allen and John Cheate.

Apart from the feature programmes, the dramatic broadcasts included many adaptations of stage plays, of which Noel Coward's *Cavalcade* was perhaps the most successful. As usual, several of Shakespeare's plays were broadcast, including *Twelfth Night* (with Irene Vanbrugh), *Coriolanus*, *King Henry VIII*, *King Richard II* (an O.U.D.S. production), *The Tempest* and *Much Ado About Nothing*. In these plays, and indeed in most of the broadcast drama of the year, it was to be noticed that the former policy of engaging important "stars" to play the leading parts was very often abandoned, and there were comparatively few productions which could attract listeners on account of their casts.

Other adaptations of stage plays were Marlowe's *Edward II* (with Jean Forbes-Robertson and Ernest Milton), T. S. Eliot's *Murder in the Cathedral*, C. K. Munro's *War Calls the Tune*, H. Granville-Barker's *The Voyage Inheritance* (a remarkably successful production), William Archer's *The Green Goddess* (with Cyril Maude), Frederick Lonsdale's *The High Road*, John Van Druten's *London Wall*, Clifford Bax's *Socrates* (with Sir Cedric Hardwicke), Sidney Howard's *The Silver Cord*, and revivals of Edgar Wallace's *The Ringer* and *The Calendar*, and of W. Somerset Maugham's *The Breadwinner*. Two or three films were also adapted for broadcasting, including *Episode* and *The Thin Man*.

Adaptations of novels and short stories were infrequent, but two were brilliantly successful—Jane Austen's *Love and Friendship* and Henry James's *Four Meetings*. The latter was probably the best broadcast play of the year. Miss M. H. Allen was responsible for both of these productions, and she also produced Herbert Farjeon's charming *London Calling: 1600 A.D.*, which gave an impression of what broadcast listeners might have heard in Shakespeare's day.

It will be interesting to see if the coming years bring a revival of plays specially written for broadcasting. At one time these were a prominent—almost a too prominent—feature of the programmes, but in 1936 they appeared to be moving towards a low-water mark. Horton Giddy contributed *The Queen at Lochleven* and Off Finisterre, Philip Wade *Jenny Meade*, and Norman Edwards *Salubria* and *The Queen of Baltimore*. Apart from these there was little original material in the chief programmes of broadcast plays, and the year suggested that feature programmes and adaptations of novels and short stories are the most likely lines of advance for broadcast drama.

### MUSIC.

While the musical broadcasts did not include such a sensational occurrence as the visit of Toscanini had provided in 1935, they maintained a very high standard of execution. Two interesting innovations were made during the year: the summer Promenade Concerts, which had previously been broadcast at considerable length, were curtailed (as far as broadcasting

was concerned), and listeners were asked to give their views on this development; and the *Foundations of Music*, which had been the butt of adverse criticism for many years, disappeared from their usual place in the programme. It is true that similar programmes were broadcast every day, at some time or other, but listeners were saved from the certainty of knowing that, if they "switched on," they would be forced to listen to a special kind of musical programme at a definite time each day.

The works performed in the symphony concerts from Queen's Hall included Constant Lambert's *Summer's Last Will and Testament*, a Masque for Orchestra, Chorus and Baritone Solo (conducted by the composer); Stravinsky's *Oedipus Rex* (conducted by Ernest Ansermet); and a number of special programmes given by the B.B.C. Orchestra at different centres in the British Isles, such as Leicester, Glasgow and Hanley, and during its Continental tour at Paris, Zurich, Vienna and Budapest. Continental music critics gave the B.B.C. Orchestra warm praise during its foreign tour.

Other musical programmes of 1936 were the interesting Concerts of Contemporary Music, in which Malpiero, the late Alban Berg and Lennox Berkeley were represented; the Sunday orchestral concerts, in which Oskar Fried conducted Mahler's *Das Lied von der Erde*, and Roussel's *Symphony No. 4* was given its first performance in England; the first concert performance in England of Shostakovich's *The Lady Macbeth of Mtsensk*; and Vladimir Vogel's saxophone oratorio, *Wagadu Destroyed*. Recitals were given by Elisabeth Schumann, Solomon, Suggia, Myra Hess, Irene Scharrer, Moiseiwitch and others.

Studio broadcasts of opera were temporarily in abeyance, though new developments in this field (under the supervision of Mr. Stanford Robinson) are promised for 1937; but there were many opera broadcasts from Sadler's Wells and Covent Garden. The Mozart Festival at Glyndebourne Opera House was also represented by broadcasts from *Don Giovanni*, *The Marriage of Figaro* and *The Magic Flute*; while *The Mastersingers* (conducted by Toscanini) and *Orpheus and Eurydice* provided important relays from the music festival at Salzburg. In the Regional programmes there were several broadcasts from theatres where the touring Carl Rosa Opera Company was appearing.

### LIGHT ENTERTAINMENT.

The light entertainment provided by the B.B.C. proceeded along fairly orthodox lines, though there were one or two interesting experiments. One of these was John Watt's *The Pull Story*, a musical comedy-melodrama in five instalments: unfortunately the story was not good enough to hold the listener's attention, and the general possibilities of the experiment are still unknown. Another novelty was *Big Business*, in which two well-known comedians—Claude Hulbert and Bobbie Comer—appeared in a series of short humorous episodes, broadcast from time to time. Though here again the material was far from perfect, the episodes suggested that continuity, in humorous programmes may eventually find favour with British listeners. (It is, of course, a regular feature of American broadcasting.) Another development was the increased number

of short revues or variety programmes, under such titles as *The Little Show* or *Half-an-hour with . . .* these were in pleasant contrast with the longer revues and music-hall programmes.

Revues, musical comedies, concert party performances and music-hall programmes made up the bulk of the light entertainment, and in the Regional programmes (and occasionally in the National) they were reinforced by relays from local music-halls and pier pavilions. One of the most successful of these relays was an enchanting Northern programme called *Top o' th' Tower*, in which the microphone visited all the principal places of amusement in Blackpool.

Musical comedies included a number of original works, among which *Never Talk to Strangers* (with Gertrude Lawrence) and the slightly disappointing *Mr. Barley's Abroad* should certainly be mentioned, and several adaptations of well-known stage pieces, such as *No, No, Nanette* (with Binnie Hale in her original part), *Rio Rita* (with Edith Day), *The Gypsy Princess*, *My Lady Frayle*, *Monsieur Beaucaire*, *La Vie Parisienne* and *The Boy*. Among the revues were *The February Revue* (with Nelson Keys and Arthur Marshall), *Savoy Hill Memories* (arranged and produced by Miriam Ferris), *This Month of May* (with Hermione Baddeley and Adele Dixon), and Ronald Frankau's very amusing *You Ought to See Us*, described as a "tellavisionary revue." The principal concert parties were *The White Coats*, which on one occasion had Leslie Henson

as a guest artist. *The Kentucky Minstrels*, *The Air-Do-Wells* and *The Fol-de-Rols*. The music-hall programmes proceeded along popular and well-defined lines, without, perhaps, discovering any particularly new and lustrous "stars."

### OUTSIDE BROADCASTS.

No review of the wireless programmes during 1936 would be complete if it did not mention the development, both in quantity and in general interest, of "outside broadcasts"—the term that the B.B.C. applies to broadcasts that originate outside the B.B.C. studios or the theatres and concert-halls generally linked with Broadcasting House. While many of these broadcasts, such as the commentaries on cricket Test Matches, Rugby Internationals, the Wimbledon Lawn Tennis Championships, the Grand National and the Derby, come into the category of "hardy annuals," there were several novelties during the past year. One was the broadcast from a "haunted house," in which Mr. Harry Price took part; another was "Night Shift," a programme from Beachy Head lighthouse; and the subjects of new sporting commentaries covered a wide field of interest, ranging from aristocratic polo to democratic darts. Both the Winter Olympic Games at Garmisch-Partenkirchen and the more important Olympic Games at Berlin in August were discussed and reported by B.B.C. commentators, and listeners with sporting tastes had certainly no reason to complain about 1936.

TABLE FOR CONVERTING AN AREA, WHICH IS SHEWN DECIMALLY, INTO RODS, POLES AND SQUARE YARDS, AND THE CONVERSE.

Rods.	Poles.
*100	0 16
*200	0 32
*300	1 8
*400	1 24
*500	2 0
*600	2 16
*700	2 32
*800	3 8
*900	3 24

Example:—An Area is shewn as 10.861.

Acres.	A.	R.	P.	Sq. Yds.
0.800	=	0	3	8 0
0.061	=	0	0	9 25

Therefore 10.861 = 10 3 17 25

Conversely:—An Area is 6 1 15 10

A.	R.	P.	Sq. Yds.
0	1	8	0 = 0.300
0	0	7	10 = 0.046

Therefore 6 1 15 10 = 6.346

## A YEAR OF ACHIEVEMENT.

THE year 1936 will go down in history as television's year of achievement. By the time this article is published regular television programmes, limited, it is true, but representing a definite daily service, will be radiating from the television station which has been established by the British Broadcasting Corporation at Alexandra Palace. In short, television has "arrived."

Television transmissions are not new in this country. For some time past brief transmissions at stated intervals have formed part of the experimental work of the B.B.C. The experience which has been gained during that time by both the engineers responsible for the transmissions and the executives who have the responsibility of arranging the entertainment side has been of the greatest value. It has provided much important data for both departments, and has enabled a sound foundation to be laid for the building up of a regular television service.

Early in the year various official announcements indicated that television transmissions on an entertainment basis would commence before the end of 1936. In the meantime Alexandra Palace, which occupies a commanding site in an especially favourable position, had been acquired by the B.B.C., and for several months a large staff of engineers and workmen had been installing the highly complicated and expensive equipment necessary for transmission by means of two systems.

Early in August it was announced that a special effort was to be made to enable a special series of test transmissions to coincide with the annual Radio Exhibition at Olympia. This effort was successful and during the week of the Olympia Show thousands of people queued up daily to see the first television programmes broadcast in this country for public entertainment. The B.B.C.'s "television theatre" at Olympia was filled at every "performance," and it was obvious that everyone was greatly impressed by this foretaste of what television can now offer.

These public demonstrations at Olympia coincided with the display by several radio manufacturers of combined sound and sight receivers capable of reproducing the television programmes radiated from Alexandra Palace. These attracted much attention, but it is obvious that until the radius of reception is greatly extended there can only be a limited demand for them. The B.B.C. have themselves announced that the Alexandra Palace transmissions can be received only within a radius of 25 miles of the transmitting station. This includes a considerable portion of the metropolitan area, but it leaves the Provinces unprovided for.

For some time to come Alexandra Palace will be an experimental television centre, and the future development of the service will depend on many factors. Even the most responsible members of the technical staff at Alexandra Palace are unable to make any pronouncement as to the direction in which the service will be developed to cover the Provinces.

Until very considerable technical advances have been made, it seems improbable that we shall have one central television station radiating

nationally, as Droitwich does to-day in the ordinary broadcasting sphere. The alternative is a series of regional television stations constructed on suitable sites to operate within definite regional limits; but television stations are very expensive to construct and equip, and there is little doubt that the B.B.C. will go very warily before they commit themselves to a definite development policy.

Looking at the possibilities from every angle it seems probable that it will take at least five years before the new medium reaches a stage of development comparable with that of ordinary broadcasting.

Now that a practical start has been made, it is possible that progress will be fairly rapid. That some of the experts are optimistic is revealed by a recent statement of the chairman of one of the big companies manufacturing television apparatus, that television will be installed in cinemas throughout the country by the end of 1936. Whether this forecast is a little premature or not it seems fairly obvious that competitive considerations will force the cinemas to adopt television in part of their programmes as soon as the fully developed service is available. In this connexion it is interesting to note that a considerable proportion of film material is being used in the television transmissions to-day.

Apart from the limited radius of reception the television receivers exhibited at the recent Olympia Show were comparatively expensive, and this price level is likely to be maintained until there is sufficient demand to justify mass production.

Receivers are now available which are capable of receiving ordinary B.B.C. sound programmes on the short, medium, and long waves, as well as television programmes. One such receiver incorporates 23 valves, and will reproduce pictures 9 ins. wide by 7 ins. high. The makers claim that reception is practically foolproof, and that pictures can be "tuned in" as easily as sound. By operating a switch it is possible to tune instantly to the "450 line" or the "240 line" transmissions. In this type of receiver the principle used is the cathode ray, incorporating a full-sized 12-in. tube. Receivers built on this principle have no moving parts and there is no serious possibility of interior complications, or of breakdown.

The brilliancy and clearness of the pictures received are controlled by turning a knob in the same way as one operates the volume control of an ordinary broadcast receiver. At least one set incorporates a tuning-by-sound device, which enables small re-adjustments which have to be made in the sound-tuning also to be made in the pictures.

At the moment, the B.B.C. are not committed to any one transmitting system. Two systems are being used alternately—that of the Baird Television Co., and that of the Marconi E.M.I. Co. Pictures are transmitted on an ultra-short wave of 6.67 metres, and the sound programmes accompanying the television on a wavelength of 7.23 metres. This wavelength is standard for both transmitting systems, it being thus possible for one television receiver to receive both systems.

The Baird Co. are using three types of scanner. The first involves the spotlight principle invented by Mr. J. L. Baird, and is used for televising objects in the actual studio. The second, known as the intermediate film method, is used for televising scenes in a larger studio. The method is to photograph the scene on cinema film, which is developed, fixed and automatically washed, and then fed into the television transmitting apparatus—the whole cycle taking a matter of 30 seconds. The third method of the Baird Co. makes it possible to use ordinary talking pictures for television.

The Marconi E.M.I. apparatus includes a valuable factor in the Emitron camera, which can be used for taking scenes in the studio or for outdoor events. This apparatus, it is expected, will be much used for the televising of important events, such as Coronation scenes, the Derby, and similar events of national importance.

The apparatus installed at Alexandra Palace is the most up-to-date and the most efficient yet available for the transmission of television programmes. It is admitted that there are certain limitations, but it is apparent that British television is in the forefront of world development in this new and highly complicated sphere.

During recent months there has been some criticism of the B.B.C., on the ground that television development in this country is lagging behind that of Germany, where regular television transmissions have been provided for some time past. There is little doubt, however, that Britain has been following a wise policy in deciding to delay the definite commencement of regular television programmes until satisfactory results can be guaranteed. This stage has now been reached, and henceforward one may look for steady progress to the time, not very far distant when there will be a television receiver in practically every home.

In the meantime a big responsibility devolves upon the programmes staff at Alexandra Palace. The Television Director is Mr. Gerald Cock. He and his staff of experts have to evolve a new programme technique to exploit a medium which itself is still in the experimental stages. Several novelties are under consideration, including a television news bulletin. A year's work at Alexandra Palace should provide a good ground-plan for future policy. By the time it is over it is probable that there will be definite news as to where the next television stations are to be erected, of what their equipment will consist, and whether one system is to be favoured more than another.

## PARLIAMENTARY MAJORITIES

### PARLIAMENT OF UNITED KINGDOM.

1801. Sir John Mitford (Lord Redesdale)
1802. Charles Abbott (Lord Colchester).
1817. Charles M. Sutton (Viscount Canterbury).
1835. James Abercromby (Lord Dunfermline).
1839. Charles Shaw-Lefevre (Viscount Eversley).
1857. J. Evelyn Denison (Viscount Ossington).
1872. Sir H. W. B. Brand (Viscount Hampden).
1884. Arthur Wellesley Peel (Viscount Peel).
1895. William Court Gully (Viscount Selby).
1905. James W. Lowther (Viscount Ullswater).
1922. John Henry Whitley.
1931. Hon. Edward Algernon FitzRoy.

## GREAT TECHNICAL ADVANCES.

A HEALTHY reaction in the British gliding movement during the past two years has added greatly to its strength. It is true that many of the gliding clubs cannot show so lengthy a membership list as they were able to do three or four years ago—that is, just after the "boom" period—but they have the satisfaction of knowing that practically every member is seriously interested in the sport and not a temporary adherent attracted by a passing craze.

When some of the "crack" German glider pilots gave their initial demonstrations in England in 1930 and 1931, large numbers of young people, eager to experience a new "thrill," flocked to the gliding clubs which were soon established, with more enthusiasm than that "staying power" which is essential to give strength and permanence to any new movement. When they found that there was a considerable amount of hard work to be done—gliders were mostly launched manually in those days, and then had to be man-hauled back—much of their enthusiasm quickly went, and it was not long before club secretaries found that they had a good 50 per cent. of non-effectives on their membership lists. But there still remained a working proportion of seasoned stalwarts who not only carried on the activities of the club, but gradually became experienced glider pilots, steadily working through the succession of tests necessary to gain them their much coveted certificates.

It must not be thought, however, that the movement to-day is one of veterans, with no new blood coming in to maintain its vitality. There is, indeed, quite a steady recruitment to its ranks, and every month a new quota of novitiates are awarded their beginners' certificates. In this connection it must be mentioned that gliding goes on all the year round in many of the British centres, but it is, of course, during the summer season that the best gliding conditions are experienced, and the larger number of beginners receive their training.

This important aspect of the movement—the training of the beginner—has been greatly encouraged during the past two or three years by the introduction of gliding camps, generally lasting from a week to a fortnight, at which complete courses of preliminary training have been available. These training camps have proved to be very popular, and have been largely modelled on those which have been a feature of the German gliding movement for some years past. Indeed, many English gliding enthusiasts have attended German gliding camps during the past season, and have come back full of admiration for the training methods employed, and of gratitude for the attention and courtesy they have received.

At the present time the practical work of training is entirely the responsibility of the gliding clubs, the sport in this country now being sufficiently old to ensure a sufficiency of trained British instructors, most of whom have graduated in their own clubs.

It is the intention, however, eventually to found, equip and maintain a central school of gliding at a suitable spot in Great Britain. It was partly for this purpose that the Government recently decided to give an annual grant of £5,000 to the British movement, a factor

which will be of great help to gliding in Britain when the full benefits of the grant make themselves felt.

This grant, which reflected the Government's realisation of the importance of gliding, will be of the greatest assistance to many of the leading clubs. Until the grant was decided upon, these clubs had been wholly dependent upon the subscriptions of their members. Whilst gliders and sail-planes are relatively inexpensive to build, the clubs have to face considerable annual outgoings, for, in addition to the cost of materials, they have to provide hangars and workshops, and sometimes to pay for the rental of a gliding site. During the past two years many of the clubs have progressed out of all knowledge in the matter of club-houses, workshops and equipment. Quite recently several clubs have opened modern club-houses providing every comfort for their members.

The technique of training glider pilots has greatly advanced in this country during the past year or so, and the proportion of successes in obtaining the necessary certificates marking the various grades of proficiency is high. There is a satisfactory proportion of pupils, too, who are not satisfied until they have become sufficiently skilful to fly a sail-plane.

Sail-planing represents the most advanced grade in glider pilotage, and every pilot must have mastered a somewhat complicated technique, which includes several subjects other than the mere ability to control a sail-plane itself, before he is allowed to take one of these graceful craft into the air. The latest sail-planes are remarkably efficient. The number of designers has greatly increased, and their productions are extremely sensitive to the special conditions for which they are constructed.

The standards of efficiency in the primary and secondary machines, in which pupils undergo most of their training, have also been considerably improved. It is claimed that no person of ordinary intelligence can fail to master the elements of gliding, and this claim is supported by the fact that, in Germany particularly, many schoolboys succeed in obtaining preliminary certificates.

Useful work has been done by many clubs in surveying promising areas in their own localities. Some of the bigger clubs have gone further afield. There is, however, still much to be done in this direction, but some day, no doubt, a complete gliding survey of Great Britain will be available.

Outside Britain, gliding continues to make steady progress in several countries which have been foremost in stimulating its development. Germany, which can be regarded as the "cradle" of the gliding movement, continues to turn out many clever pilots. Russia is experiencing what can only be described as a gliding "boom." There, gliding and parachuting are twin sports which have attracted great popular interest, and it is claimed that Russia has now more glider pilots than any other country.

A remarkable high-altitude flight of a glider equipped with oxygen apparatus was reported from Russia in March. The glider in question, piloted by Stephanovsky, of the Moscow Experimental Institute of the Red Air Force, was towed to a height of 31,000 ft., said to be

the highest altitude ever reached by a glider, when it was detached from the plane and glided down to earth, the whole flight lasting two hours.

The Russians are still experimenting with "glider trains," consisting of a number of gliders towed by an aeroplane. The gliders are cast off at intervals and glide to earth with a small consignment of mail or freight. It is realised, however, that this idea has but limited possibilities.

The annual British gliding competitions took place at the beginning of Sept. on a site at Bradwell Edge, near Hope, Derbyshire. Some anomalous gliding conditions were experienced, as a result of which unexpectedly good flights were made on machines usually capable of limited achievement. On other days, sail-planing was spoilt by unfavourable weather. The meeting, however, provided a good deal of sport, and new experiences for many trained pilots.

At the end of the week's meeting, it was announced that the principal trophies were held as before. Mr. P. A. Wills holds three trophies—the Wakefield trophy for the longest flight of the year (105 miles) in Hjords; the De Havilland Cup for the highest flight of the year (5,600 ft.); and the Manio Cup for the best out-and-home flight.

The Du Garde Peach Cup for consistently good flying by a member of the Lancashire and Derbyshire Gliding club is held by Mr. E. Thomas.

Amongst the best British gliding flights of the year can be mentioned the altitude flight of Flight Lieut. T. M. Watts, in a Falcon III two-seater glider, to a height of 4,000 ft., a British record for a two-seater craft.

The world's duration record is held by Lissitvine, of Russia, who flew for 38 hours 40 minutes in the Crimea, on Oct. 2, 1935. The British duration record is held by J. C. Neilan, who remained in the air for 13 hours 7 minutes over Sutton Bank, Yorkshire, on July 16, 1935.

The world's distance record is held by Rudolf Oeltzschner, who flew 313 miles from the Wasserkuppe, Germany, to Brno, Czechoslovakia, in July, 1935. The British distance record is held by P. A. Wills, who flew 105 miles from Dunstable Downs to Pakefield, near Lowestoft, on July 5, 1936.

The world's altitude record is held by Heinrich Dittmar, of Germany, who reached 14,190 ft. over Rio de Janeiro in Feb., 1934. The British altitude record is held by G. M. Buxton, who reached 8,323 ft. over Sutton Bank on Sept. 4, 1934.

## STRATOSPHERE FLIGHT RECORDS.

DURING the short history of stratosphere flight, which may be said to date from 1931, balloonists have flown ten times in the highest regions above the earth.

Below is a complete list of every ascent into the stratosphere yet made:—

1931.—Professor Auguste Piccard and M. Kipfer, in balloon "F.N.R.S." of 500,000 cu. ft. capacity when fully distended. Ascent made at 3.57 a.m. from Augsburg, Bavaria. Landed about 9 p.m. on a glacier above the village of Ober-Gurgl, Austrian Tyrol. Height attained: 51,775 ft. (9.81 miles; 15,781 metres). World record. May 27, 1931.

1932.—Professor Auguste Piccard and Dr. Max Cosyns, in same balloon used for 1931 ascent. Left Zurich 5.15 a.m. Landed, about 5 p.m., 20 miles south of Desenzano, Lake Garda, Italy. Height attained: 53,152 ft. (10.07 miles; 16,201 metres). World record. Aug. 18, 1932.

1933.—MM. Prokofiev, Birnbaum, and Godunof, in Russian stratosat (balloon) "U.S.S.R." of 880,000 cu. ft. capacity. Left Moscow air-port 8.43 a.m. Landed, 70 miles distant at Kolomna, 7 hours later. Height attained: 62,336 ft. (19,000 metres; 11.806 miles). As the U.S.S.R. is not a member of the International Aeronautical Federation, this ascent has not been classed as an "official" world record. Sept. 30, 1933.

1933.—Lieut.-Commander T. G. W. Settle, U.S. Navy, and Major Chester Fordney, U.S. Marine Corps, ascended from Municipal airport, Akron, Ohio, at 9.30 a.m. Landed, 5.15 p.m. in a swamp, 350 miles distant, near Bridgeton, New Jersey, U.S.A. Balloon used was 600,000 cu. ft. displacement, and named "A Century of Progress." Height attained: 61,237 ft. (11.59 miles; 18,665 metres). Official world record. Nov. 20, 1933.

1934.—MM. Fedoseyenko, Vasenko, and Ousyskin, in Russian stratosphere balloon "Osoaviakhim." Left Moscow air-port 9.15 a.m. Crashed, some 350 miles distant, at 4.23 p.m. All three occupants were instantly killed. The barograph record which was afterwards discovered intact, showed an altitude of 72,179 ft. (22,000 metres; 13.67 miles). Jan. 30, 1934.

1934.—Major William Kepner, Captain Albert Stevens and Captain Orvil Anderson, ascended in balloon "Explorer" from Strato-bowl, 12 miles south-west of Rapid City, South Dakota. Took off at 5.45 a.m. (M.S.T.), and crashed near Holdrege, Nebraska, as a result of the bottom fabric of the balloon ripping, when the balloon was 60,000 ft. up. The balloon used was the largest yet made, being 3,000,000 cu. ft. capacity. Height attained: 60,613 ft. (11½ miles; 18,475 metres). July 28, 1934.

1934.—Dr. Max Cosyns and M. van der Elst, ascended from Hour Havanne, in the Ardennes, Belgium, and landed 1,000 miles away at Zenavejle, Yugoslavia. Balloon used was the same one used by Professor Piccard in 1932, but equipped with a stabiliser. Height attained: 53,329 ft. (10.1 miles; 16,255 metres). Aug. 18, 1934.

1934.—Dr. Jean Piccard (twin brother of Professor Auguste Piccard) and his wife, Mrs. Jeanette Piccard, ascended from Ford Air-port, Dearborn, Michigan, and landed near Cadiz, Ohio, U.S.A. Mrs. Piccard was the first woman to enter the stratosphere. Balloon used was 600,000 cu. ft. capacity. Height attained: 57,579 ft. (10.9 miles; 17,550 metres). Oct. 23, 1934.

1935.—MM. Christophzille and Preludski, accompanied by Professor Alexander Varigof, of the Leningrad Observatory. Made experi-

mental flight from Moscow of two and a half hours duration in a "parachute balloon." Height attained: 10 miles. June 26, 1935.

1935.—Captain Albert Stevens and Captain Orvil Anderson, U.S. Air Corps; took off at 8.1 a.m. (Central Time) from the Stratobowl, Rapid City, South Dakota. Landed, 4.14 p.m. 12 miles south of White Lake, South Dakota—230 miles east of point of departure. The balloon used, "Explorer II," was the largest ever made, being 3,700,000 cu. ft. capacity. Helium gas was used for the first time in the history of stratosphere balloon ascents. (A previous attempt in the preceding July, was balked by the top of the balloon ripping open just as filling had been completed.) Height attained: 72,395 ft. (13.71 miles 22,265 metres). This is the greatest height yet attained by man. World record. Nov. 11, 1935.

Each of the foregoing balloon ascents exceeded 50,000 ft., and each was made on the now famous "Piccard system," consisting of a sealed ball gondola, a livable air supply, and a constant interior pressure.

The altitude records of aeroplanes fall considerably short of those made by stratospheric balloons. They are as follows: 1910, France, Legagneux, 10,171 ft.; 1913, France, Legagneux, 30,079 ft.; 1920, U.S.A., Major Shroeder, 33,114 ft.; 1929, Germany, W. Neuenhoffer, 41,795 ft.; 1932, Britain, Captain C. Uwins, 43,977 ft.; 1934, Italy, R. Donati, 47,349 ft.; 1936 (Aug.), France, G. D  tre, 48,696 ft.; 1936 (Sept.), Sq.-Ldr. Swain, 49,967 ft.

As Professor Piccard is universally regarded as being the first man to enter the stratosphere, it would appear that heights up to 41,795 ft.—achieved by Neuenhoffer two years before Professor Piccard's flight in 1931—are not so regarded.

Generally speaking, England has lagged behind other countries in stratosphere exploration. No attempt by balloon has yet been made in this country, and the world record (aeroplane) achieved by Sq.-Ldr. Swain on Sept. 28, 1936, was the first occasion on which the Royal Air Force has attempted to beat the altitude record.

Ever since the Great War the tendency of aviation has been upwards. Every year, aeroplanes have risen higher and higher. Over and above the exigencies of civil aviation, is the ever-growing military urge, dictated, among

other things, by the development of anti-aircraft artillery, which has to-day, attained a remarkably high percentage of efficiency and accuracy.

And important, too, from the military view, is the fact that owing to the extreme tenuity of the atmosphere in the stratosphere, the stratosphere becomes much less noisy, and is well beyond the range of sound locators. And it is also invisible from the ground and beyond the range of the heaviest anti-aircraft guns.

Realising the ever-growing importance of stratosphere flight, the Air Ministry, in Nov., 1934, placed an order with the Bristol Company for a stratosphere, with the object of exploring the special problems, involved in the operation of aircraft, and the functioning of equipment and instruments, at extreme altitudes.

The stratosphere built by the Bristol Company and flown by Sq.-Ldr. Swain on his world record altitude flight was one of the largest span, single-engined aeroplanes ever built. Its engine, a Bristol Pegasus P.E.V.I.S., air-cooled, radial, was of the two-stage blower (or supercharged) type, which enabled it to continue to develop its power at great altitudes.

Full consideration was given to the use of a sealed cockpit (on the Piccard system), but it was decided to equip the pilot with a sealed flying suit very similar in appearance to the diving suits built by Siebe Gorman Co.

Sq.-Ldr. Swain took off on Monday, Sept. 28, 1936, from the aerodrome at Farnborough, Hampshire, at 7.30 a.m. and landed at Netheravon, Wilts, at 10.50 a.m. He attained 45,000 ft. when 10 miles north of Brighton. At 46,000 ft. he could see the whole of the coast from Margate to Lands End, as far north as the Wash, and south, the north coast of France. The Channel Islands looked like small stones in a shallow river-bed, while London looked like a little toy-town. He descended safely after reaching the world record height of 49,967 ft.

Now that the machine, known officially as the "138" has achieved the altitude record, it is planned to continue experimental flights on research work with it, which, if successful, may give Britain the lead in high-speed flying of the future.

A second machine, fitted with a new and improved Rolls Royce-Kestrel engine, is also being prepared to the order of the Air Ministry, for stratosphere research work.

## BRITISH AIR STRENGTH.

December 1, 1936.

GREAT BRITAIN .....60 regular squadrons  
16 auxiliary or cadre  
squadrons.

### OVERSEAS:

India ..... 8 squadrons.  
Iraq ..... 4 squadrons.  
Middle East..... 6 squadrons.  
Aden ..... 1 squadron.  
Singapore ..... 2 squadrons.

### FLEET AIR ARM:

At home and abroad.....20 squadrons.

### FLYING BOATS:

At home and abroad ..... 8 squadrons.

## AIR ESTIMATES, 1927-1936.

Financial Year.	Maximum Numbers (Exclusive of India).	Estimate.
		£
1927.....	33,000	15,550,000
1928.....	32,500	16,250,000
1929.....	32,000	16,960,000
1930.....	32,000	17,850,000
1931.....	32,000	18,100,000
1932.....	32,000	17,400,000
1933.....	31,000	17,426,000
1934.....	31,000	17,761,000
1935.....	45,000	27,595,000
1936.....	55,000	50,700,000

## FIXED AND FLEXIBLE "UNIT" INVESTMENT TRUSTS.

SINCE the first British *UNIT* investment trust was formed in April, 1931, just before abandonment of the gold standard, the movement (the bulk of whose investments are in "ordinary" shares of well-established companies) has been favoured by the ensuing rise in equity share values in this country, whilst most of its predecessors in the U.S.A. have succumbed in the collapse of security prices following the 1929 Wall Street crash. By the end of Sept., 1936, the movement in Great Britain had grown to 69 *unit* trusts (a few of which are now closed to further investment), promoted by some dozen groups, and managed by a score of companies—all private except one; while six banks (including one of the large executor and trustee subsidiaries) and three insurance companies act as trustees. Most of the trusts formed before the end of 1935 worked on a fixed small panel of selected securities ranging from 20 to 30, but the later trusts have taken extended powers to operate from much larger portfolios of companies (sometimes from as many as 200 or 300, as well as any trustee securities)—usually, however, subject to trustees' veto, with limits to proportion of the trust's total investments in any one security or company, &c.—thus tending to wide flexibility and partial reversion to the old "managed" type of investment company. The *unit* trusts, however, as yet remain subject only to common law, and not to the Companies Act, 1929.

The prime object of the movement is to open up to the investor of small means a wider field to enable him to spread his risks, with relative safety, hitherto available only to the more influential investor. For 1935 the gross dividends earned by the trusts usually ranged from some 4 to 5½ per cent. (though seven gold-mining and finance share trusts had yields of 6½ to 8½ per cent.); in the aggregate the trusts' investments appreciated by some 8 per cent. during the year, a few trusts with relatively low dividend yields showing a more substantial capital appreciation. Some trusts are "general," i.e., spread their investments over several industries; others "specialised," i.e., confine investment to one industry or field. Some are "cumulative," as distinct from others which distribute in cash any "capital bonuses" received as well as dividends. Usually the trusts limit their size to a specific number of units, and may not invest in underwriting syndicates or pools. The life of each trust is fixed by deed, usually 15 or 20 years with, in some of the newer trusts, the option of conversion to a trust company at the end of the period; gold-mining and some "group units," however, are for only 10 years. The relatively short initial periods of life fixed by the trusts and their opportune inception probably account for their having made little or no attempt, as yet, to set up out of profits dividend equalisation funds or other reserves (as maintained by the "managed" type of investment company) to meet the risk of a future trade depression with adverse effect on equity shares, causing probable decline in trusts' capital values and income per unit, against which the spread of investments, in itself, affords no real safeguard.

The *unit* trust movement, however, early in 1936 formed its own *Association of Fixed and Flexible Trust Managers* who drew up a code of rules with which all members must comply.

So far only the "National" group of 11 trusts publishes "sales" information—by July, 1936, this group had attracted some 60,000 subscribers with £18,000,000 for investment, an "average" of £300 per investor. During 1935, for the movement as a whole, the cost of intensive press advertising, booklets, &c., was put at some £200,000, and by Sept., 1936, the total investments of sub-unit holders had increased to between £50,000,000 and £60,000,000—nearly treble the computed figure at the end of 1934.

Normally, the trust managers first select a panel of ordinary shares or stock in various companies of standing, 1 *unit* thereof being divided into anything from 2,000 to 20,000 *sub-units*; the investor buys *sub-units* (subject to an initial minimum varying from 10 to 100 in the different trusts) and, in practice, the trust managers usually offer to "buy back" *sub-units* at a price about 1s. less than current selling price. The quantity of securities which go to make up the *unit* usually is so arranged as to produce a *sub-unit* around £1 or 10s. denomination. To the current day's Stock Exchange quotations for the securities in the *unit* is added brokerage, stamp and fee charges, and an equitable sum for adjustment for dividends earned since the trust's last distribution to secure a uniform cash distribution at the next due date; a commission or "service charge" is then added (ranging from 5 to 10 per cent. on purchase price in the different trusts). The total thus obtained is then divided by the number of *sub-units* to the *unit*, and the resultant *sub-unit* price levelled up to the next highest 3d. multiple which, in effect, slightly increases the "service charge." A few of the newer trusts also provide for setting aside for trustees' and managers' benefit from the trust income ⅓d. on "each *sub-unit* in issue at the end of each year," or ⅓ of 1 per cent. half-yearly on "current market values of the trust's securities." Normally, arrangements are made for adequate provision for future management and trustees' fees to ensure proper continuity of the trust, e.g., by depositing with the trustees a substantial part of the service charge, for periodical release.

The phenomenal growth of the movement and its susceptibility to abuse has called for two reports—one by a Stock Exchange sub-Committee (issued early in 1936) who submitted draft regulations for control to secure maximum information, segregation of interests, &c., and suggesting that trust portfolios when fully constituted should not contain any one security exceeding 2½ per cent. of the total value dealt in—an important proviso in view of the increasing overlapping of popular securities with the growing number of trusts—adding that full protection could only be achieved by legislation. The other report by a Board of Trade Committee (Aug., 1936) made detailed recommendations for control

analogous to that imposed by the Companies Act, 1929, including lodgment of proper accounts and essential documents with the Registrar, with suggestions for imposition of settlement and stamp duty, also for deposit of £20,000 with the High Court by the managers in respect of each trust (with conditional exemption of *existing* trusts) as is already done by insurance companies and collecting societies; hawking of sub-units to be prohibited; sub-unit holders to have full voting rights and power to select auditors, &c.; units to be made transferable with view to developing a free market on the Stock Exchange, &c. It now rests with the Government to pass the necessary legislation.

Clearly the *unit* trust movement meets a genuine public demand in these times of highly-graduated taxation, when a much larger part of the aggregate national savings must be provided by persons of comparatively small means and industry has to look increasingly for finance for its expansion to the small investor directly and indirectly. Legislation, if passed in due course, to secure essential safeguards, should in no way hinder the utility and growth of the movement in playing an important part in the country's economic life, as a complement to older savings institutions which, already subject to various statutes, show such phenomenal expansion since the War.

## EXCHANGE EQUALISATION FUNDS.

DURING the Great War we were obliged to "peg" the pound-dollar exchange by establishing in New York a fund fed by "dollar securities." Our enforced departure from the gold standard in 1931 obliged us to create a similar fund to prevent pressure on the pound, and to maintain its power over other currencies. The immediate cause of the establishment was the failure of the departure from the gold standard to give the expected impetus to British trade and industry. In 1932 Parliament authorised the institution of a Fund with power to borrow £150,000,000 in order to buy and sell foreign currencies so as to keep sterling steady and prevent disturbances in the money market through the action of speculators. The creation and the operating of the Fund constituted, indeed, an attempt at currency control on a gigantic scale; and the attempt apparently is highly successful, so that in some form or other the Fund will, we may expect, be a permanent part of our monetary system, even though the pound should be again stabilised in terms of gold. The borrowing takes place by the issue of Treasury Bills. In effect, the Fund is a means for putting Treasury Bills on tap for foreign buyers, thus enabling them to make short loans to the British Government.

At its inception the Fund took over also the balance of the war time dollar fund. In 1933 the amount of the Fund was raised to £350,000,000. The increase was due to the bulling of the pound by timid capitalists in the United States and in the gold bloc countries, particularly France, for it is noteworthy that, whereas the Fund was set up primarily as a buffer against depreciation of the pound, it has been necessary throughout its history to use it rather to prevent a too rapid appreciation of the pound in relation to other currencies. Although the operations of the Fund are not attended with publicity, it may safely be said that it has more often bought francs than sold francs. Nor need it be surprising that the Bank maintains secrecy, for if the Fund is to counteract the ill effect of speculation in the foreign exchanges, those who speculate are not to be given gratuitous instructions about how to act. In particular we know little about the scale of the Fund's operations; and it may be that these are usually quite small, since the possibility of action is in this matter as effective as action

itself. A possible buyer of sterling who looked for its appreciation in terms of francs might well be deterred by the thought that the Fund would flood the market with pounds. For the method of the Fund is to act against market tendencies, to buy when prices are falling; to sell when prices are rising.

In 1934 a similar Fund was set up in the United States, and now that France has left the gold standard, she too has set up a stabilising Fund. The wholly admirable currency agreement reached in the Sept. of 1936 by the Governments of Great Britain, France and the United States ensures that the three Funds will maintain a practical equilibrium among the currencies. Other currencies have come into line with those of the three great financial powers. The resources of the Stabilisation Funds of these three powers, therefore, will maintain such a tranquility of the exchanges as the business community has long eagerly wanted. The statement of the British Government, in welcoming the action of the French Government to disburden itself of the handicap afforded by adherence to gold, did in fact emphasise the mutual wish of the countries to avoid as far as possible any disturbance of the basis of international exchanges resulting from the proposed readjustment of the franc. And the Chancellor of the Exchequer, speaking shortly after the agreement, declared:—

"To those who have been waiting and hoping for a change, the decision of the French Government to effect a readjustment of the exchange value of the franc must have come like the cracking of the ice at the approach of a warmer season to the Polar explorer whose ship has been frozen for many months into immobility. When the French Government communicated their intention to his Majesty's Government, and to the Government of the United States, they found not only a sympathetic understanding of their difficulties, but the fullest readiness to help by giving assurances that the action of the French Government would not be followed by any deliberate depreciation of the pound sterling or the dollar. The world is quite right in seeing in these three declarations a community of views as to the need for the revival of international trade and as to the nature of the first step that was necessary if we were to move in the right direction."

THE British monetary unit, the pound sterling, is an abstraction: we can only define it as a Unit of Power over the British market. The paradox of these days is that it maintains a more stable power over the market than when it was linked to gold. The reasons for this are not occult. Even before 1931 our currency was a "managed" one, not an automatic one dependent upon the inflow and outflow of gold; now the Bank of England—by its Bank Rate, its open market dealings, and by its manipulation of the Exchange Equalisation Fund—manages the currency more effectively; and manages it to bring about virtual stability of prices.

We are off the gold standard. Yet the movement of gold still matters, if only as an indication of where people look for security. A currency is on the gold standard when its monetary unit can be exchanged for a fixed weight of gold. A currency is off the gold standard when its monetary unit buys gold as it buys butter, when that unit exchanges for a variable weight of gold. That is, our going off the gold standard in the Sept. of 1931 did not imply that our currency ceased to have relation to gold. Parliament's decision relieved the Bank of England of its statutory obligation to sell gold to all comers at a fixed price; but the pound sterling still commands gold. The difference is that the fixed has become the variable. The pound sterling commanded, under the old Mint Par, 113.0016 grains of fine gold. This represented £4 4s. 11½d. per fine ounce. With a market price of £7 per fine ounce the pound sterling commands only 68.5714 grains. The pound sterling has lost in power over gold. This loss is not necessarily mirrored in general prices. The Board of Trade Index of Wholesale Prices for July, 1936, actually shows lower figures than for 1930: for "All Articles" the figure is 93.6. That is, the selection of articles costing £100 in 1930 could in 1936 be bought for £93.128. The Bank of England Index of Retail Prices does indeed show a rise—taking the week-ending Sept. 19, 1931, as basis for comparison—the index of food prices for Aug. 1, 1936, is 124.8.

Nominally, too, the amount of Bank of England notes still depends upon the amount of gold held by the Bank. The relation is now, however, a curious one. The Bank Notes and Currency Act of 1928 authorised the Bank to issue, £260,000,000 without a gold backing. If the Bank continues to acquire gold at the present rate, this fiduciary issue will be wholly cancelled. For the Bank buys gold at the market rate; it issues notes, however, at the

old rate. It buys at £7, it issues notes at £4 5s. per fine ounce. The difference is borne by the Exchange Equalisation Fund, which is not, as many assert, merely a device for speculating with the tax-payer's money in the foreign exchange. Thus in the "Weekly Return," Sept. 23, 1936, the Issue Department was debited with £445,104,282 in notes. It held £247,600,837 in gold. At a market price of £7 per fine ounce this represented, however, not £247,600,837 but £407,841,140, so that over 90 per cent. of our notes are fully covered. When the pound sterling is re-linked to gold we may, therefore, assume that the new valuation will recognise the existing market rate: the pound sterling will be fixed as the equivalent of considerably less than 113.0016 grains. We shall then be following the precedent of the United States which, after a temporary abandonment of the gold standard, re-linked the dollar to gold at a lower rate.

That there will be no return to the old valuation is certain. Expansion rather than contraction of the currency seems to be essential. A report on monetary policy has been issued by the League of Nations' Economic Intelligence Service. Its thesis is that by the end of 1935 substantial progress has been made in such countries as had pursued an expansionist monetary policy, little progress in such as had pursued a policy of contraction. Perhaps "policy" is hardly the right word to use. For both movements are due rather to circumstances than to deliberate planning. With us, for instance, the influx of gold has given a greater basis for credit, while at the same time the great outlet for money in happier days—the foreign capital market—is well-nigh closed. There is the sufficient reason for the abundance and cheapness of money among us. Nor, we may be certain, did the "gold bloc countries" prefer deflation to expansion. The deflation, the continual rise in the power of the franc or the florin over goods in the market, was inevitable if the link with gold was to be maintained. For currencies elsewhere had depreciated in terms of gold; yet there was no compensating rise in prices. There ensued, even apart from political troubles, a steady flow of gold from the gold bloc countries and a consequent contraction of their credit bases. The decisions during the Autumn of 1936 of France, Switzerland, and Holland to sever the connexion between their monetary units and a fixed weight of gold were therefore inevitable. With the severance has come also a devaluation bringing the currencies into more accurate line with the pound and the dollar.

**The "Lame Duck" Amendment.**—The XXth Amendment, which became effective on Oct. 15, 1933, provides (Section 1) that the terms of the President and Vice-President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3rd day of January, of the years in which such terms would have ended if this Article had not been ratified, and the terms of their successors shall then begin. Section 2 provides that Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3rd day of January, unless they shall, by law, appoint a different day. Sections 3 and 4 provide for the succession to the Presidency in the event of a President elect dying before the beginning of his term. Section 5 provided that Sections 1 and 2 shall take effect on the 15th day of October following the ratification of the Amendment. Section 6 prescribed that the legislatures of three-fourths of the several States must ratify the Amendment within seven years of its submission before the Amendment can be operative.

A hundred years ago the Tithe Act, 1836, commuted all tithes (tenths) and moduses (a *modus decimandi* was a "method of tithing") into tithe rentcharge. The Tithe Act, 1936, now limits the term of payments to tithe owners, and at the end of 60 years land now encumbered with the tithe rentcharge, or its statutory equivalent, will be freed from the burden. The hope is, said the Commission upon whose report the Act was framed, "to put an end to a secular controversy which has had regrettable social consequences." Blackstone in 1765 had already shrewdly said: "An honourable and competent maintenance for the ministers of the gospel is, undoubtedly, *jure divino*; but, considering the degenerate state of the world in general, it may be more beneficial to the English clergy to found their title on the law of the land than upon any divine right whatsoever." Making a voluntary gift into a compulsory charge did not, however, diminish the antagonism to the payment.

The Tithe Act, 1936, extinguished all tithe rentcharges on Oct. 2, 1936. Parliament has compensated the owners of the charges by an issue of 3 per cent. stock that will yield what the tithe did before—when it could be collected. The lands subject to the charge will for the next 60 years pay as an annuity what before they paid as tithe, but will pay temporarily to a Tithe Redemption Commission appointed by Parliament and ultimately to the Inland Revenue Authorities. And the annuity will be, like the Income Tax, a debt due to His Majesty, recoverable "by any means whereby a debt due to the Crown may be recovered." On agricultural land, however, the amount payable for every £100 of tithe rentcharge has been abated to £91 11s. 2d., this including the sinking fund.

The tithe rentcharge was the main feeder of Queen Anne's Bounty, from which many Church of England clergymen obtained a substantial part of their stipends. The bounty originated in 1704 when, by her letters patent, Queen Anne created a Corporation to which she assigned her revenues of first-fruits and tenths. The name of the Corporation explained its purpose, "The Governors of the Bounty of Queen Anne for the Augmentation of the Maintenance of the Poor Clergy." Landowners subject to the tithe charge paid the dues to

the Corporation, which distributed to the incumbents entitled. There was no direct payment to clergy. Nor did all the tithe accrue to the clergy. Under Henry VIII. tithes came into lay hands as a new species of property. In 1933, for instance, Merton College, Oxford, was sued in the High Court for levying an illegal distress upon one who had defaulted in payment.

The means by which Queen Anne's Bounty collected tithe more than three months in arrear was fixed by the Tithe Act, 1891. Application for an order to distrain was made to the County Court Judge of the district where the land in default was situate. The County Court judge was obliged—*mandamus* from the High Court proceeding if necessary—to give the order. Thus *Rex v. Judge Clements* (K.B., 1933) arose out of the reluctance of the County Court Judge to issue an order that popular agitation would not permit to be executed. "I am," he said, "not going to make these orders until you give me the name of a person who can carry them out." Queen Anne's Bounty obtained a rule *nisi* for a *mandamus*, and the Divisional Court made the rule absolute: "It is," said the Lord Chief Justice, "a very unfortunate case. I sympathise very much with the County Court Judge. But, in view of the Tithe Act, 1891 the Court has no alternative but to make the order asked for. I hope most sincerely that wise counsels will prevail in the present and in similar cases." The Tithe Act, 1925, s. 10, did in fact give Queen Anne's Bounty a discretion not to take proceedings in cases of hardship.

Section 5 of the 1936 Act required the owners of any tithe rentcharge to submit on forms prescribed by the Minister of Agriculture particulars, before Oct. 31, 1936, of the charges. The submission is by way of a statutory declaration. (The forms are obtainable free of charge on application to the Tithe Redemption Commission, Eagle House, 90-96, Cannon Street, E.C.4. To this address any enquiries relating to the procedure under the Act should be addressed.) The Commission is empowered to grant extension of the time; but it was also empowered, in the event of failure to transmit the required particulars within the time appointed, to reduce the compensation allowable for the extinguishment.

### CORN PRICES.

The following statement shows the average price of British corn per cwt. of 112 Imperial pounds as received from the Inspectors of Corn Returns in the week ended November 14, 1936, pursuant to the Corn Returns Act, 1882, and the Corn Sales Act, 1921:—

Period,	Average Price per Cwt.					
	Wheat.		Barley.		Oats.	
	s.	d.	s.	d.	s.	d.
Week ended November 14, 1936 .....	8	8	9	11	6	10
Corresponding weeks in:—						
1932 .....	5	6	7	7	5	11
1933 .....	4	8	9	5	5	4
1934 .....	4	11	8	9	6	8
1935 .....	5	11	8	5	6	1

Mainly by the genius and driving force of the first Earl of Birkenhead, a great simplification has been wrought in the law relating to land. The *Law of Property Act, 1922*, describes itself as "An Act to assimilate and amend the law of Real and Personal Estate." "Real Estate" consists of immovables, land and buildings, for the recovery of which the law provides a real action (*i.e.*, an action for the thing itself). "Personal Estate" consists of chattels, for the wrongful detention of which the common law awards damages to the aggrieved party.

In its avowed intention of simplification, so that dealings in land might be entered upon with greater confidence, the 1922 Act swept away a vast amount of reciprocal rights and duties originating in feudal times. The Act enfranchised at a stroke all copyhold land, making it similar to freehold land. The Act, however, temporarily saved some of these rights and duties, or *manorial incidents*, in order that those with vested interests might be compensated. But it made provisions whereby the last of these manorial incidents was extinguished on Dec. 31, 1925, subject however to the possibility before Dec. 31, 1940, of a claim for compensation. The manorial rights were incident chiefly to copyhold land, land of which the title was a copy in which the "custom of the manor" was stated, showing what were the annual dues to the lord. They applied on occasion to other land also.

Among us an old institution is likely to survive long after the reason that gave it birth, and that perhaps justified it. So it has been with manorial rights. We have a striking illustration of our tenderness for vested interests in that it needed an Act of Parliament to terminate even such a right as *heriot*. This was the right whereby the lord of the manor constituted himself his tenant's heir, so far as the best live beast, or the best chattel was concerned. During many centuries this right must have been an intensely irritating obligation upon the tenant's successors; in feudal days it conceivably had its justification. The freeholder would take a man to work in the demense as his tenant in villeinage. The freeholder would furnish his tenant with the stock and the instruments needed to exploit the land, and also with the warlike equipment, the horse and the weapons, enabling the tenant to fulfil his military obligations. It is to the war equipment that the term "*heriot*" is more suitably applied; for the term is a compound of the Old English *here*, meaning an armed force, and *geatwa*, trappings. The corresponding right and duty in Scots Law was the "*hereward*." On the death of the tenant these furnishings reverted to the lord. Later, the lord ceased to provide. But the custom of taking the *heriot* became crystallised into law, and, like other manorial rights, in the majority of cases it became a money rent.

These manorial rights were originally in kind—so many eggs at Easter, so many geese at Michaelmas, so many days' labour on the lord's land. It suited both lord and tenant to turn these dues into fixed money payments:

they became "rents of assize," such, that is, as have been assized, reduced to a certainty, by the lord of the manor. They were called *quit-rents*, "because thereby the tenant goes quit and free of all other service." Having paid this the copyholder could regard the land as his property; and there were abundant illustrations of the fact that "the magic of property turns sands to gold." The freeholder's dues to the lord were usually called *chief-rents* paid by those who held their land free of dues apart from that obligation. Of these rents Blackstone wrote: "Rents of assize are the certain established rents of the freeholders and ancient copyholders of a manor, which cannot be departed from or varied. Those of the freeholders are frequently called *chief-rents* (*reditus capitales*); and both sorts are indifferently denominated *quit-rents* (*quieti redditus*, paid for quiet enjoyment)."

When Blackstone wrote, these manorial incidents did seem destined to endure in perpetuity, but now Parliament intervenes and effectively varies and departs from the ancient dues. Though the manorial incidents were saved from the immediate effect of the statutory enfranchisement, they are now extinguished.

We may assume that, for the vast preponderance of land subject to the incidents, the statutory method of obtaining compensation for the land has been followed. They were to be extinguished, subject to the payment of compensation, in either of these events: (1) Upon the execution, within ten years from Dec. 31, 1925, of an agreement in writing between lord and tenant. The Minister of Agriculture and Fisheries was required to give help in arriving at the compensating agreement, if such was the general wish, to lord and tenants. A scale of compensation was appended to the Act. Thus, the compensation for quit-rents and other annual payments was fixed at 20 years' purchase; and where, by special custom, the lord could enter upon the tenant's holding and cut and carry away timber without the tenant's consent, the compensation was the whole value of the timber, subject to an allowance for repairs. Where questions of valuation were in debate, the valuation was to be made by a single valuer appointed; in default of agreement, by the Minister. (2) If no agreement has been reached, then the manorial rights are automatically extinguished on Dec. 31, 1935.

There still remains for the lord a possibility of compensation until the end of 1940. To obtain this he is required to make application to the Minister, and it is well for him to make the application speedily, for no allowance is to be made in respect of any rent, fine, relief, *heriot*, or fee, which would have been payable but for the extinguishment between Dec. 31, 1935, and the date of application.

It is desirable to add that the cancelling of manorial incidents does not involve the cancelling of the rights of the lord to mines and minerals, nor to the lord's sporting rights. The Act specifically preserves these from the effects of the enfranchisement.

The Report on the Overcrowding Survey in England and Wales, 1936, is introduced by the following statement by the Rt. Hon. Sir Kingsley Wood, Minister of Health.

THE Report on the Overcrowding Survey in England and Wales is a social document of the first importance. The survey was undertaken by local authorities in pursuance of their duty under the Housing Act, 1935, to make an inspection of their district to find out what dwelling houses were overcrowded according to the standard laid down in that Act. That standard, which is set out in full in the Report, fixes the maximum number of persons permitted to live in a house according to the number and floor area of the rooms in the house.

The survey, however, was designed to give much more information both to the local authorities and to the Minister than the mere number and location of the overcrowded families. The method suggested by the Minister for conducting the survey, which was followed by practically every local authority, meant an enumeration of the number of rooms and size of family in every working-class dwelling in the country. The data so obtained give a mass of valuable information relating to the general housing conditions of the working classes. The Report on the survey reproduces in an appendix the detailed information relating to each individual local authority and, in the introduction, deals generally with the main conclusions which can be drawn from the information.

One thousand five hundred and thirty-six local housing authorities in England and Wales were asked to undertake this survey of all working-class dwellings in their areas and to report the result of their survey to the Minister of Health by June 1 last. Sixty-four returns were still outstanding when the present Report was written, but many of these were received in time to be included in the tables in the appendix.

The overcrowding position is summarized in the statement that 8,924,523 dwellings were inspected—equal to the total number of houses existing in 1931—of which 341,554 (or 3·8 per cent.) were overcrowded. The distribution of these overcrowded families among dwellings of different sizes is set out in Table C 1 of the Report. From this table can be picked out at once the number of families of any given size in the whole country occupying the dwellings of any given amount of accommodation; it is then possible to pick out the worst cases of overcrowding. For example, the table shows that there was one family consisting of 9 units\*

\*An adult counts as 1 unit and a child between 1 and 10 as  $\frac{1}{2}$  unit; a child under 1 is not counted.

occupying one room between 70 and 90 square feet in area, while there were 470 families of between 6 and 10 units in size occupying one room only. At the other end of the scale the table shows that over 80,000 working-class families consisting of only 2 units occupy dwellings with six rooms or more. Corresponding information is given separately in Tables C 2–C 5 for London, county boroughs, urban areas and rural areas respectively.

The Report contains a tabular analysis of the average units of accommodation per

family of given size, which clearly shows that the working-class family of average size is housed well above the statutory minimum standard. But the total accommodation at the disposal of the large families of 8 or 9 units or more is insufficient, though some such families are not actually overcrowded.

#### SIZE AND ACCOMMODATION OF WORKING-CLASS FAMILIES.

The Report classifies families according to the proportion which their actual accommodation bears to the minimum accommodation they ought to have according to the overcrowding standard; over 46 per cent. of all the working-class families in the country are shown to be so well housed that the number of persons in each family could be doubled and yet overcrowding would not ensue. On the other hand, 380,000 families—or 4·4 per cent. of the present uncrowded families—are very near the border line of overcrowding and a small variation of the overcrowding standard would bring them in. A further table brings to light the intensity of overcrowding; over 43 per cent. of overcrowded families are shown to have at least 80 per cent. of the minimum accommodation required by the overcrowding standard and only 4·8 per cent. have less than half the minimum accommodation required by the standard.

Other calculations show the average number of units in a working-class family with the following results:—

(a) <i>All Families.</i>	
Average number of units per family	3·20
Average permitted number per occupied dwelling .....	6·66
(b) <i>Uncrowded Families.</i>	
Average number of units per family	3·11
Average permitted number per uncrowded dwelling .....	6·76
(c) <i>Overcrowded Families.</i>	
Average number of units per family	5·60
Average permitted number per overcrowded dwelling .....	4·17

The average overcrowded family is, therefore, 74 per cent. larger than the average family and occupies accommodation on the average 37 per cent. less.

Other tables analyse the number of overcrowded families of each size and the corresponding percentage of the total number of families of the same size, with corresponding information for overcrowded dwellings.

Table V shows that 30·4 per cent. of all overcrowded families consisted of small families up to 4 units in size, while 27·7 per cent. of all overcrowded families consisted of large families of 7 units or over. Overcrowding may occur in families of normal size in certain areas because, for some reason or other, they cannot obtain an ordinary working-class dwelling; while overcrowding of abnormally large families is likely to occur in any area because the average working-class dwelling, which is generally all they can afford, is not large enough for them.

**L'ACADÉMIE FRANÇAISE.**

THE FRENCH ACADEMY (*Secretary* M. Robert Regnier) is composed of 40 members, elected for life, and is the highest of the five Academies constituting l'*Institut de France* (*Secretary of the Institute*, M. Henri de Montfort). The Academy was founded by Cardinal Richelieu in 1635 and re-organized in 1816. The special object of the Academy is the composition of a Historical Dictionary of the French Language, and its members, "The Forty Immortals," are as follows:—

Elected.	Name.	Born.	Elected.	Name.	Born.
1897	Gabriel Hanotaux .....	1853	1927	Emile Mâle .....	1862
1898	Henri Emile Lavedan .....	1859	1927	Louis Madelin .....	1871
1907	Maurice Donnay .....	1859	1928	Maurice Paleologue .....	1859
1909	René Doumic .....	1860	1929	Maréchal Pétain .....	1856
1909	Marcel Prévost .....	1862	1930	André Chaumeix .....	1874
1914	Henri Bergson .....	1859	1931	Pierre Benoit .....	1886
1918	Alfred Baudrillart .....	1859	1931	Général Weygand .....	1867
1919	Henri Bordeaux .....	1870	1932	Abel Bonnard .....	1883
1920	Joseph Bédier .....	1864	1933	François Mauriac .....	1885
1920	Louis Chevrillon .....	1864	1934	Duc de Broglie .....	1875
1922	Georges Goyau .....	1869	1934	Leon Bérard .....	1875
1923	Edouard Estaunié .....	1862	1934	Maréchal Franchet d'Espérey .....	1856
1924	Georges Lecomte .....	1867	1935	André Bellessort .....	1866
1924	Emile Picard .....	1856	1935	Claude Tarrère .....	1876
1925	A. de Caumont (Duc de la Force) ..	1878	1935	Louis Gillet .....	1876
1925	Louis Bertrand .....	1866	1935	Georges Duhamel .....	1884
1925	Paul Valéry .....	1871	1936	Edmond Jaboux .....	1878
1927	Abel Hermant .....	1862	1936	Joseph de Pesquidoux .....	...

The four other Academies are:—

ACADÉMIE DES INSCRIPTIONS ET BELLES-LETTRES, founded 1663, 40 members.

ACADÉMIE DES SCIENCES, founded 1666, divided into 11 sections, each of which comprises 6 members.

ACADÉMIE DES BEAUX-ARTS, 5 sections, comprising 40 members, as follows—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6.

ACADÉMIE DES SCIENCES MORALES ET POLITIQUES (for the study of questions of social and political economy), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of honorary members and of national and foreign correspondents.

**THE FRENCH REPUBLICAN CALENDAR.**

This, although reckoned from September 22, 1792, was not introduced until November 22, 1793, and it remained in use only till December 31, 1805. The Gregorian Calendar was restored January 1, 1806 (Nivôse 10, Year XIV.). The calendar contained 12 months, each of 30 days, and the months varied, in consequence, in different years; thus Nivôse 1 commenced December 21 in 1793, December 22 in 1795, December 21 in 1796, December 22 in 1799, December 23 in 1803, and December 22 in 1804 and 1805. The following are the dates for the year 1804, the last complete year of the Calendar:—

Vendémiaire ( <i>Vintage</i> ), Sept. 23 to Oct. 22	Germinal ( <i>Budding</i> ), Mar. 22 to Apr. 21
Brumaire ( <i>Foggy</i> ), Oct. 23 to Nov. 22	Floréal ( <i>Flowery</i> ), Apr. 21 to May 20
Frimaire ( <i>Sleety</i> ), Nov. 22 to Dec. 21	Prairial ( <i>Pasture</i> ), May 21 to June 20
Nivôse ( <i>Snowy</i> ), Dec. 22 to Jan. 21	Messidor ( <i>Harvest</i> ), June 20 to July 19
Pluviôse ( <i>Rainy</i> ), Jan. 21 to Feb. 20	Thermidor ( <i>Hot</i> ), July 20 to Aug. 19
Ventôse ( <i>Windy</i> ), Feb. 20 to Mar. 19	Fructidor ( <i>Fruitful</i> ), Aug. 19 to Sept. 18

The months were divided into three decades of ten days each, but to make up the 365, five were added at the end of September; (*Prim-di*), dedicated to Virtue; (*Duodi*) to Genius; (*Tridi*) to Labour; (*Quartidi*) to Opinion; and the 5th (*Quintidi*) to Rewards. To Leap Year, called *Olympic*, a sixth day, September 22 or 23 (*Sextidi*), "Jour de la Révolution," was added. This variation of dates has led to considerable confusion, but those who may wish to trace the fourteen years will find some very elaborate tables in the English edition of Bourrienne's "Life of Napoleon": Bentley.

## § THE NOBEL PRIZES.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were distributed on the fifth anniversary of Nobel's death, Dec. 10, 1901. Particulars concerning conditions, &c., can be obtained from Nobelstiftelsen Styrelse, Sturegatan 14, Stockholm, Sweden.

(Value, 1936, approx. £8,000.)

## GIRLS' LIFE BRIGADE (Inc.).

Founded in 1902 by the National Sunday School Union, its aim is to help and encourage girls to become responsible, self-reliant and useful Christian women. Through its programme (Spiritual, Physical, Educational and Social) it endeavours to cater for every phase of a girl's life. An Interdenominational-temperance movement with an international membership. Headquarters: 56 Old Bailey, London, E.C. 4.

§ A Complete List of Winners of Nobel Prizes from the First Awards in 1901 to those given in 1932, appeared on p. 1005 of "WHITAKER" for 1933.

## QUARTER SESSIONS IN COUNTIES.

Under § 2 of the Criminal Justice Act 1925 Quarter Sessions in Counties must be held within the period of 21 days immediately preceding and immediately following the four Quarter Days. Quarter Sessions in Boroughs are fixed by the Recorder of the Borough. BREWSTER SESSIONS are regulated by Sec. 10 of the Licensing (Consolidations) Act, 1920.

## OFFICIAL END OF THE WAR.

The Official Termination of the War, when Treaties of Peace had been ratified by the respective Governments, was Aug. 31, 1921. The Ottoman Empire was excluded from the Order in Council, and War with Turkey was declared at an end on August 6, 1924.

# The Auctioneers' and Estate Agents' Institute

29, LINCOLN'S INN FIELDS, LONDON, W.C.2

(FOUNDED 1886. MEMBERSHIP OVER 6,800.)

THE profession of the Auctioneer, Estate Agent, and Valuer is essentially one for a boy of good education. Good education, however, is not in itself sufficient, since the profession offers no prospects to one who is not prepared to work hard, and who is not blessed with a fairly good personality. Every boy whose object is Membership of the Institute must begin by passing the Preliminary Examination, or one of the exempting Examinations, either before or soon after he enters upon his practical training.

Further particulars of the Institute, and a small brochure on entry into the profession, may be obtained on application. If, after reading these, a boy or his parents should require any further information or advice, application should be made to the Secretary, who will be pleased to deal with the matter either by letter or in an interview.

## THE COLLEGE OF ESTATE MANAGEMENT

(Incorporated by Royal Charter)

35 LINCOLN'S INN FIELDS  
LONDON, W.C.2

Complete Courses of Preparation for the Examinations of  
**CHARTERED SURVEYORS' INSTITUTION**  
**AUCTIONEERS' & ESTATE AGENTS' INSTITUTE**

Students are prepared by whole-day tuition at the College or  
in Evening Classes, or by Postal Tuition.

Apply—THE REGISTRAR.

Tel: Holborn 8821

**BEDFORD  
MODERN  
SCHOOL**

Four Entrance Exhibitions giving exemption from Tuition Fees (£20 for Boys outside Bedfordshire) are awarded by Examination in June. Ages: under 13 and under 15 on June 1st. The Boarding Fee of the School is £70. Apply to the Head Master's Secretary.

**RYDAL SCHOOL,  
COLWYN BAY.**

An Examination will be held in June, when Scholarships and Exhibitions varying in value from £100 to £20 will be offered. Candidates must be under 14½ years on June 1st. There are valuable Leaving Exhibitions. Large Engineering Workshops and Biological Laboratories. Boys may take their 1st M.B. from School. Particulars and Prospectus from the BURSAR, Rydal School, Colwyn Bay.

**EXETER  
SCHOOL,  
EXETER.**

The Entrance Scholarship Examination is usually held in July. Four Scholarships may be offered (£60 to £20 p.a.); also restricted Bursaries for sons of Clergy, for sons of Old Boys, and for brothers. Other Special Exhibitions fall vacant at regular intervals. University Endowment, £600 a year. Apply to John L. Andrews, Head Master, Exeter School, Exeter.

## Belmont School

Westcott, near Dorking

Founded 1880.

*Head Master—*

**A. BRUCE ANDERSON, M.A.**  
(*Cantab.*)

A fully-equipped Preparatory School for boys of 6 to 14, situated in the most beautiful part of Surrey, but only 25 miles from London.

The School has an excellent record of health, and many Scholarships have been won recently to the leading Public Schools.

All fruit and vegetable produce grown in the School grounds.

## Lydgate House

### PREPARATORY SCHOOL

### Hunstanton

*Head Master—*

**R. A. A. BERESFORD, M.A.**  
(*Formerly Scholar of Selwyn College, Cambridge.*)

Boys are prepared from 7-14 for Entrance or Entrance Scholarship Examinations at Public Schools and for the Navy.

Though the SCHOOL COURSE follows mainly the usual lines, ELEMENTARY SCIENCE is included, and English Subjects receive special attention.

The artistic side is also catered for in connection with Music, Painting and Architecture.

Excellent situation on Cliffs immediately overlooking the Sea. The buildings are thoroughly modern, the rooms light, lofty, and well ventilated.

## Lancaster Royal Grammar School

Lancaster

Founded 1471.

This ancient school offers the advantages of a Public School education at the modest fee of 21 guineas per term.

War Memorial Library, three Chemistry, two Physics and one Biology Laboratories, Workshop, Gymnasium, Tiled Swimming Bath, Fives Court, Rifle Range, O.T.C., and Playing Fields of 15 acres.

Pupils prepared for Professional and Business Careers, Universities, Army, Engineering, etc.

£500 per annum available for leaving Exhibitions to the Universities.

Fourteen Scholarships to the Universities, 22 Higher Certificates (10 distinctions) and 52 School Certificates were gained at the School last year.

*Head Master—*

**Rev.**

**J. H. SHACKLETON BAILEY, D.D.**

*Illustrated Prospectus on application.*

## The School

Malvern Link

H. PAULLEY, M.A.

*Fees*—25 to 31 guineas per term.

## SCHOOL—GIRLS

**The Greylands High School****Ashburton, Devon**

This School is situated in a beautiful and healthy part of South Devon, on the fringe of Dartmoor, 300 feet above sea-level. It enjoys an exceptionally mild climate, and is increasingly patronised by parents resident in warm countries abroad. Recent admissions include children from India, Egypt, Cyprus, Turkey, Malaya, etc. Entire charge is taken, where desired, at an inclusive rate which is kept as low as is economically possible for any really efficient School. The premises (formerly a Country Gentleman's residence with up-to-date additions), the Teaching, the Dietary, and the whole of the School arrangements have been fully inspected and favourably reported on by Cambridge University, and the School conducts its own Centre for Cambridge Local Exams.

The Classes are kept small, so that both backward and forward children receive more than the usual amount of attention to their special needs. SIX full-time Resident, Graduate and Specialist Mistresses for about 60 girls. Kindergarten for children from 5 to 8, in charge of two Froebel-trained Mistresses. Lovely Grounds and Playing Fields. Swimming Pool adjoining.

*Fees*—Very moderate. Entire charge (including holidays) from 85 to 100 guineas per annum.

For Prospectus, etc., apply to the Head Mistress, or to the Bursar, Mr. H. NAYLOR, M.A. (Camb.), The Wilderness, Ashburton.

*Prospectus* may be obtained from Clerk to the Harpur Trust, or the Head Mistress.

## Oaklea

### Buckhurst Hill, Essex

*Principal—*  
Miss BEATRICE GARDNER

*Vice-Principal—*  
Miss BEATRICE L. SEARL.

Inspected and recognised as efficient by the Board of Education, 1921. The house occupies a high position overlooking miles of open forest land. Carefully graded education for girls 8 to 19. Large and highly qualified Staff. Programmes of the Parents' Union School are followed. Individual time-tables for school work. Preparation for higher examinations. Local centre for Oxford examinations. Great attention is paid to health and individual physical development, outdoor life, games, gardening. Grounds nearly 7 acres. Home-like holidays are arranged for pupils from abroad.

## Mickleham Hall

### Dorking, Surrey

SCHOOL FOR GIRLS.

Mickleham Hall is very highly recommended as a School for Girls, and entire charge is taken of Children whose Parents are abroad.

It is situated in one of the beauty spots of Surrey, near Box Hill, and only 19 miles from London. The Grounds of 10 acres include Tennis and other lawns, large Kitchen Gardens and Orchards.

The health record of the School is excellent.

# Lowther College for Girls

Bodelwyddan Castle, Abergele, North Wales

Chairman of Governors—Sir J. W. RONALD MACLEAY, G.C.M.G.

Head Mistress—Miss K. I. SAYERS, M.A. (Cantab.),  
Mathematical Tripos, Girton College.

The School is a Public Boarding School for 240 girls, recognised by the Board of Education. Girls are received from 6-19 years of age. The usual Kindergarten and Junior School courses are offered, and in the Senior School an ordinary School course, including preparation for external and University entrance examinations, or a Domestic Science Course, or a Commercial Course, or a Gardening Course. The music, art, and dancing are of a high standard.

The Castle stands on high ground in a park of 400 acres overlooking sea and mountains. The food is thoroughly good and varied, fresh fruit and vegetables being supplied by the School's own gardens.

Modern additions to the buildings include an Assembly Hall, Gymnasium, Swimming Bath, Domestic Science Block, Laboratories, Music Rooms, Library, and Sanatorium.

All usual School games are played; there are also Riding Stables and a private Golf Course.

Junior, Senior, and Music Scholarships are offered each year. The fees are moderate.

*Entire charge of Children from abroad if desired.*

Prospectuses may be obtained on application to the Head Mistress, who will be glad to arrange for parents to see the School by appointment.

## Upper Chine School for Girls

Shanklin, Isle of Wight

**BATH,** SOMERSET. Episcopal city. Pop. 68,801. 107 miles from London. 11 miles from Bristol. Means of Access—G.W. Railway, London Midland and Scottish Railway, and Somerset and Dorset Railway. Elevation—60 to 750 ft. above sea-level. Neighbourhood—Woodland, hills and diversified country. Climate—Mild, equable, varies according to elevation and aspect. Water Supply—Constant. Drainage—Modern. Soil—Oolitic limestones, clays and sands. Baths—Luxuriously appointed with every scientific application known to modern balneology. Mineral Waters—Thermal springs. Temp. 120° F.

Bath, situated in a valley, and at various levels on slopes of surrounding hills, possesses an unrivalled combination of archaeological, historical, social and scenic attractions, besides the famous waters to which it owes its origin.

"HOUSES AND ESTATES." FORTT, HATT & BILLINGS, F.A.I., Auctioneers and Estate Agents. Special list on application. Offices, 3, Burton Street. Telephone, 4268 (2 lines).

**BEDFORD.** Pop. 40,573. 50 miles from London. L.M. & S. Railway. A noted educational centre on the banks of the Great Ouse, with charming riverside promenade. Golf Links (18 holes).

BEDFORD'S PRINCIPAL HOUSE AGENTS. W. and H. Peacock, 6, Dame Alice Street (Near G.P.O.), Bedford. Telephone 2333. Illustrated property Register free on application, containing details of Town and Country Properties, Map details of Schools and Fees and Notes on Town. Weekly Auction Sales at Rooms and Market.

**BEXHILL,** SUSSEX. M.B. Pop. 21,229. Southern Railway. 71 miles from London, 5 miles from Hastings, 12 miles from Eastbourne. Aspect—South. Climate—Dry, invigorating. Water Supply—Constant. Soil—Sandy. A modern select seaside resort, with good educational facilities. 2 Golf Links. Public Park, 12½ acres. Excursions—Battle Abbey, 8 miles; Pevensey Castle, 7 miles; Hurstmonceux Castle, 10 miles.

The rapid growth of Bexhill is to be attributed to its bracing air and sunny climate, and it has been found that the air possesses recuperative and stimulating qualities in a remarkable degree. It is one of the sunniest spots on the South Coast; fogs are practically unknown, while the soil is for the most part sandy, and dries quickly after rain.

HOUSE AND ESTATE AGENTS. STAINES & CO., 28, Devonshire Road, and Sea Road, Cooden Beach. Agents for all available Furnished and Unfurnished Houses to be Let or Sold. Special Lists, Map, and Guide gratis. Telegrams, "Property, Bexhill." Telephones, 349, and Cooden 15.

ESTATE AGENT, AUCTIONEER AND VALUER,

ERNEST SHEATHER, F.A.I.,  
14, St. Leonards Road.

The only local Estate Agent a native of the Town.  
Telephone, 351. Over 40 years' experience.

**BOGNOR REGIS,** SUSSEX. U.D.C. Pop. 13,510. Southern Railway. 66 miles from London. Aspect—South. Climate—Mild, dry, equable; freedom from frost and fog. Quiet family summer resort and residential town.

ROCK GARDENS HOTEL. First class. Appointed A.A. Unrivalled position on Esplanade with Private Lawns. Close West End Bandstand. Dining, Smoking Rooms and Lounge all face sea. 40 Bedrooms. Hot and Cold Running Water all Bedrooms. Garage.

Phone, Bognor Regis 500 (2 lines).  
Telegrams, "Gardens, Bognor Regis."

F. PULLIN, Resident Proprietor.

**CLEVEDON,** SOMERSETSHIRE. U.D.C. Pop. 7,033. G.W. Railway. 133 miles from London. Elevation—To 300 feet. Aspect—S. & W. Climate—Mild and bracing according to situation. Soil—Light and porous. Pier—840 feet. A quiet, fashionable watering-place. Golf links (18 holes). Tennis, boating, fishing.

**STANCLIFF GUEST HOUSE.** Charming situation, standing high, in own grounds, overlooking Bristol Channel and Welsh Hills. 5 minutes Pier and Dial Hill; 15 minutes Railway and Golf Links. Electric Light. Gas Fires in some Bedrooms. Special arrangements Winter Months. Phone, 4. Telegrams: "Stancliff, Clevedon." The MISSES M. G. and D. C. COTTELE.

**HASTINGS & ST. LEONARDS,** SUSSEX. C.B. Pop. 65,199. Means of Access—Southern Railway. Elevation—20 to 600 feet. Aspect—South. Climate—Sea-front under overhanging cliffs, mild; hillsides and cliff tops more bracing; valleys running inland sheltered and warm.

St. Leonards, the modern extension to the west, is the principal residential and most select quarter. Two golf links (18 holes).

**HOUSE AGENT. F. TANTON, F.A.I.** Probate, Land Valuer, and Auctioneer, 38, Norman Road, St. Leonards. Sale Rooms. Telephone, 709.

**MALVERN,** WORCESTERSHIRE. U.D.C. 129 miles from London. Pop. 15,632. Means of Access—G.W. Railway and L.M. & S. Railway. Location—On the slopes of the Malvern Hills, 8 miles from Worcester. Elevation—300 to 900 feet above sea-level. Climate—Dry and bracing. Water Supply—Pure, constant. Drainage—Modern. Soil—Gravel. Season—Summer and winter. Annual Fixtures—Shakespeare Week in May; Croquet and Lawn Tennis tournaments in May and June. Malvern is an inland watering-place, important educational centre, and a pretty residential town, consisting mostly of villas standing in own grounds. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 feet high, from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys, the Cotswold, Mendip and Welsh hills; and in the plain below can be seen Droitwich, Worcester, Evesham, Cheltenham, Gloucester and the Bristol Channel.

**HOUSE & ESTATE AGENTS, VALUERS, & AUCTIONEERS. J.B. HARPER & SONS** Particulars of all Residences, etc., to be let Furnished, Unfurnished, and to be Sold, and also Building Land, free on application. Established 1851. Telephone, 235

**RYDE,** ISLE OF WIGHT. M.B. Pop. 10,519. The largest and most lively watering-place in the Isle of Wight; second in yachting importance only to Cowes. Climate—Equable, invigorating.

**ROYAL ESPLANADE HOTEL.** First-class Family Hotel, opposite Pier. Running Hot and Cold Water in Bedrooms. Gas or Coal Fires. Fully Licensed. Appointed A.A. and R.A.C. Telegrams, "Band, Ryde." Telephone, Ryde 2473.

**SEVENOAKS,** KENT. Pop. 10,482. Southern Railway. 22½ miles from London. Noted for the rural beauties of its surroundings and the number of historical residences, etc., in its vicinity.

**HOUSE FURNISHERS. S. YOUNG & SON, LTD.,** Complete House Furnishers. Warehousing. Removals. General Drapers and Outfitters. Funeral Directors. London Road and 110, High Street. Telephone, 50. Telegrams: "Stanfords, Sevenoaks."

**SHERBORNE,** DORSETSHIRE. Southern Railway. 118 miles from London. 5½ miles east of Yeovil. The fine building of the Abbey, the Park and Gardens and Sherborne School, founded A.D. 705, interest visitors. Cricket, tennis, fishing, golf. Pop. 6,542.

**SHERBORNE** (*continued*).

**GROCERS, WINE AND SPIRIT MERCHANTS, &c.** CARTER & COMPANY, the Modern Store-keepers, Tea Blenders, Coffee Roasters, Wine and Spirit Merchants. The public say we are noted for goods of high quality at moderate prices. 'Phone No. : Sherborne 54.

**SOUTHAMPTON,** HAMPSHIRE. Pop. 176,025. The leading passenger port. Popular holiday and tourist centre. Golf links (18 holes). Parks and pleasure grounds. Equable climate. New Forest and Isle of Wight within a few miles.

**WALLER & KING, F.A.I.,** 17, Above Bar. The leading House and Estate Agents for Southampton, New Forest, and Southern Districts. Auctioneers, Valuers and Surveyors. BUSINESS ESTABLISHED OVER 100 YEARS. Extensive Registers of Town and Country Properties, also of Business and Commercial Premises. Residential Handbook on application.

**Excellent Cuisine. :: Inclusive Tariff. :: Personal Supervision.**

Telephone: 3731.

Proprietress, Mrs. COOMBS CROSSLEY.

## WORTHING

is noted for the equability of its climate, which is largely due to its geographical situation. The proximity

of thesea and the shelter of the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents to take exercise without exertion, and so derive the greatest benefit from the high percentage of ozone in the air and the large

amount of sunshine. A palatial Pavilion and commodious Bandstand Enclosure add to the town's many attractions. Orchestra plays in the Pavilion throughout the year. There are facilities for sports of all kinds. Horse-riding on the Downs is a popular pastime. Luxurious Dance and Sun Pavilion. Municipal and privately-owned Courses on the South Downs afford splendid facilities for Golf in superb surroundings. Theatre (rebuilt 1935).

83 minutes from London by the luxurious corridor trains of the Southern Electric Railway.

**SIX TRAINS PER HOUR.**

**The Ideal Residential Town 'twixt Sea and Downs.  
Unsurpassed for Sunshine and Equability of Climate.**

A copy of the latest OFFICIAL GUIDE AND REGISTER OF HOTELS, etc., will be forwarded on application to the TOWN CLERK, No. 16, TOWN HALL, WORTHING, SUSSEX

# **"WHITAKER"**

## **BOOKS ABOUT BOOKS**

J. WHITAKER & SONS, LTD., ARE NOW AGENTS IN THE  
BRITISH EMPIRE FOR THE BOOKS OF THE R. R. BOWKER  
CO. OF AMERICA. HERE ARE SOME OF THEM

### **THE BOOKMAN'S MANUAL**

By BESSIE GRAHAM

4TH EDITION

A guide to Literature on a plan which, in three earlier editions, has proved its peculiar value to all buyers of books.

It is an introduction to book knowledge with discussions of editions and their makers. It covers the whole field of reading and brings it to date. Authors are listed alphabetically within each field of literature—fiction, poetry, drama, essays, etc. British, Russian, French and other continental authors are included. All the books of each author are listed in chronological order by date of publication. Publisher and price are given.

22/6 net

### **FAMOUS LITERARY PRIZES AND THEIR WINNERS**

By BESSIE GRAHAM

A handbook of information, revised and enlarged by Jessie H. Murray, with discussion and description of the character and details of over 60 prize awards given to books, followed by a listing of the titles that won each such award.

Ninety-six pages, with index to titles, bound in cloth, size 5½ by 8½.

6/6 net

### **BANNED BOOKS**

Informal Notes on Some Books Banned for Various Reasons at Various Times and in Various Places

By ANNE LYON HAIGHT

A list of books compiled from an exhibition held at the Junior League of the City of New York, April 24, 1935. The data placed under each title are factual rather than editorial in nature; dates, circumstances of suppression, and quotations from contemporary comments.

7/6 net

### **PRIVATE PRESSES AND THEIR BOOKS**

By WILL RANSOM

A record of that fascinating field of publishing which has made so many contributions to scholarship and to fine bookmaking. The volume has been planned as a practical reference tool for the collector, and every detail of the checklists and index is arranged for ready use in research. 494 pages, illustrated.

Special reduced price, 30/- net

# SIX FINANCIAL SERVICES WHICH WILL HELP YOU AND YOUR FAMILY

**YOUR HOME** automatically cleared from mortgage charges should you not live to make the repayment yourself. Think what this would mean to your wife and family bereft of your presence and income.

(Service No. 1.)

**YOUR CHILDREN'S** education can be purchased by instalment out of your earnings **now**. The School Fees are **guaranteed**, whether you live or not, from the moment you make your first deposit. The most convenient educational provision.

(Service No. 2.)

**YOUR PENSION** in later years secured by means of the **guaranteed** terms of the new Sun Life of Canada Pension and Protection plan. First deposit creates a fund of £1,000 for your dependents (should you not live) for each £10 a month you arrange for your own pension. You also save Income Tax yearly.

(Service No. 3.)

**YOUR FAMILY** provided for, should you die before you have time to secure their future well-being, by a substantial cash sum, followed by guaranteed monthly cheques, and finally another large cash sum.

(Service No. 4.)

**YOUR GRANDCHILDREN**, nephews, nieces or anyone in whom you may be especially interested, will receive a cash sum at age 21 to be used for a start in life or as a cash reserve for the future—a benefit beyond praise for the recipient and a comfort to the parents.

(Service No. 5.)

**YOUR INCOME** from Invested Capital may be doubled, with the certainty that it will be paid to you, in full, for as long as you live, and yet there will be a substantial sum for your dependents at your death.

(Service No. 6.)

Why not let us send you particulars of the service in which you are interested ?  
Please quote number.

# SCOTTISH AMICABLE LIFE ASSURANCE SOCIETY

FOUNDED 1826

- ★ A Mutual Life Office with an unbroken bonus record extending over a period of 111 years.
- ★ The extremely stringent basis of Valuation preserves wide margins for future profits and provides for the accumulation of Reserves on a very ample scale.
- ★ On a Policy for £1,000 effected 30 years ago which matured in 1936, the actual sum assured and bonuses paid amounted to £1,701 14s. 0d., representing an average annual rate of bonus of £1 17s. 1d.%, compound, equivalent to a simple rate of £2 6s. 9d.%.

West End Branch: 14, Waterloo Place, S.W.1.

Law Courts Branch: 76b, Chancery Lane, W.C.2.

# A LARGER INCOME FROM YOUR CAPITAL

**Guaranteed to you for life, even if you live to be a hundred**

There are very few men and women who would not welcome a larger income. The trouble is that, generally speaking, a larger income (from investments) can only be secured by taking a risk. No one dependent upon investments for an income should do that. Safety first should always be the rule.

Here, though, is a way of greatly increasing your private income and of making the larger income even more secure than was the smaller amount. Buy an annuity from the Sun Life of Canada—who specialize in annuities. It's a simple process, and once the transaction is through you will enjoy a peace of mind regarding the safety of your income that you have never experienced before. You can purchase an annuity for yourself, or for your wife and yourself—to be paid as long as either of you lives, and you can buy a deferred annuity to start at a later date. Also there are annuities with guaranteed return of capital. This enables you to enjoy the larger income and yet make provision for dependents.

Why not find out now all about Sun Life of Canada annuities—safeguarded by assets exceeding £145,000,000? See how this great company can serve you. No obligation is incurred and, by letting the company know, in confidence, your exact age and the amount you have invested or wish to invest, exact figures can be supplied to you.

# THREE POPULAR POLICIES with THREE SPECIAL BENEFITS in each

## I. THE PERFECT POLICY.

A unique combination of Life Assurance and Investment.

1. On death within 25 years payment of £2,000, gradually rising by GUARANTEED additions to £3,250.
2. On survival to the end of 25 years guaranteed cash payment of £2,000.
3. Automatic replacement by a new assurance of £2,000 without medical examination or further cost.

## II. THE CONVERTIBLE POLICY.

1. Large cover at low cost.
2. Valuable Options.
3. Fully profit-sharing from the outset.

## III. THE CHILD'S POLICY.

1. Early entry secures assurance costing less than £1 for every £100.
2. Valuable Education benefits.
3. Guaranteed cash payment at age 21.

## YOUR RETIREMENT PROBLEM CAN BE SOLVED

by means of

### A GUARANTEED ANNUITY-INVESTMENT BOND

which overcomes all the objections to the ordinary Annuity Policy and gives nearly the same net yield.

THESE ANNUITIES PRODUCE AN INCOME RANGING FROM 5% to 8% p.a. on the Capital invested (according to age and the guarantee period selected, i.e. 10, 15 or 20 years), together with A RETURN OF A SUBSTANTIAL PROPORTION OF CAPITAL to the Investor's heirs if his decease occur before the expiry of the guarantee period. This special form of Annuity is so devised as to attract a much reduced rate of Income-tax during the said guarantee period.

Full particulars and relative information is obtainable without charge from

**HONYWOOD CROSTHWAITE & CO., LTD.,**

*Insurance Brokers and Consultants,*

**P. & O. House, 14/16 Cockspur St., London, S.W.1**

THERE IS AN ANNUITY TO SUIT EVERY CASE.

P.S.—Life Insurances and Pension Policies can be arranged on particularly favourable terms for healthy lives resident abroad. Extra premiums are charged only in certain tropical climates.

# National Institute for the Blind : :

(Registered under the Blind Persons Act, 1920).

**Patrons:** HIS MAJESTY THE KING. HER MAJESTY QUEEN MARY.

**Chairman:** Captain Sir BEACHCROFT TOWSE, V.C., K.C.V.O., C.B.E.

The far-reaching activities of the National Institute, the largest institution for the blind in the world, affect all classes and conditions of the blind population, from the blind baby to those who lose their sight in old age.

*These activities include the following national services:—*

1. Production of Embossed Publications:
  - (a) Production of all kinds of books in Braille and Moon types (sold at a two-thirds loss on cost price).
  - (b) Production by hand of Students' Text-books in Braille (lent gratis).
  - (c) Production of Music in Braille type (sold at a three-quarters loss on cost price).
  - (d) Preparation and Issue of Periodicals and Pamphlets.
2. Education of the Blind:
  - (a) Maintenance of Chorley Wood College for Blind Girls.
  - (b) Maintenance of Court Grange Special School for Blind Children.
  - (c) Grants for Higher Education and Professional Training.
  - (d) School of Massage (and Settlement of Blind Masseurs).
3. Care and Training of Blind Babies at the three Sunshine Homes.
4. The Interests of Blind Musicians:
  - (a) Publication of Works of Blind Composers.
  - (b) Music Students' Library.
  - (c) Organists' and Tuners' Bureaux.
5. The Provision and Maintenance of Homes:
  - (a) Home for Blind Women, Hove.
  - (b) Home for Blind Women, Leamington.
  - (c) Convalescent and Holiday Home, St. Leonards.
  - (d) Hostels for Blind Women, London.
6. Administration of Relief in co-operation with Local Agencies:
7. Research Work:
  - (a) Apparatus and Scientific Means of Overcoming Blindness.
  - (b) Exploration of Possibilities of Employment in Industrial Concerns.
8. Provision of Apparatus:
  - (a) Special Appliances.
  - (b) Embossed Maps.
  - (c) Games.
  - (d) Educational Models.
  - (e) Talking Books.
9. Employment of the Blind as:
  - (a) Salesmen.
  - (b) Stereotypers.
  - (c) Shorthand Typists.
  - (d) Telephonists.
  - (e) Organisers, etc.
10. Home Industries Scheme in Home Counties.
11. World-Wide Propaganda.
12. Information Bureau.
13. Collecting Agency, under Agreements, for many local Societies, throughout the country.
14. Selling Depot for Goods made by the Blind.
15. Gifts of Apparatus and Books and Periodicals to Blind Individuals, Schools, Societies, etc.
16. Grants to Institutions for the Blind.
17. Provision of Christmas Parcels.
18. Provision of Summer Holidays for Blind Children.

## FUNDS ARE URGENTLY NEEDED

*All Donations should be addressed to the Hon. Treasurers—*

**National Institute for the Blind, 224-8, Great Portland Street, W.1.**

*Balance Sheet, Annual Report, Forms of Bequest, etc., will gladly be forwarded on application.*

# Principal Charitable Bequests of the Year.

liii

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount left for charitable purposes is, in a considerable proportion of the cases, approximate, owing to the bequests including a share in the residuary estate or consisting wholly, or in part, of business interests, blocks of shares, or real estate for which a definite value cannot be given.

Reversionary bequests, where these are absolute (usually on the cesser of life interests or of a period of years) are included, but contingent reversions (dependent upon the failure of issue, the failure of prior trusts, or the failure to observe certain conditions, etc.) are not included, unless it is known that the reversion, though nominally contingent, is, in the events which have happened, absolute.

The amounts of residuary bequests are subject to variation on the final winding-up of the estate, owing, possibly, to variations in the amount of duty payable (as the figures may place an estate for duty purposes in either a higher or lower category as compared with the original valuation when probate was granted.)

The list records the principal bequests published during the year and not necessarily those becoming payable during the year.

The charitable bequests recorded during the past year are larger in amount and more numerous than for several years past, and though the various forms of charity have nearly all benefited by the increase, the bulk has been shared by hospitals and educational charities. Perhaps the most marked of all is the category that falls between these two: research. Apart from the munificent bequest of Sir Henry Wellcome for research work, to which he had given generously during his lifetime, there are a number of others of a generous nature, though they may be somewhat overshadowed by this huge sum; these, with Lord Nuffield's recent gift to Oxford University, must certainly constitute a record year for research work.

Other notable bequests are the quarter of a million pounds left by Lord Dalziel towards the Reduction of the National Debt, a similar amount bequeathed by Mr. Percy Johnson to King Edward's Hospital Fund, the large sum left by Mrs. A. B. Smith to the Church Army and the Salvation Army, and the bequest of Mr. W. M. Tapp to Caius College, Cambridge, for law scholarships and fellowships.

Name.	Gross Value of Estate.	Approx. Amount.	Objects.
Wellcome, Sir Henry Solomon, LL.D., F.R.S., of Regent's Park, N.W.	£ 2,138,959	£ 1,000,000	£500 to Dr. Barnardo's Homes, 400,000 dollars for benefit of Garden City, Blue Earth, County Minnesota, and residue of estate between "The Research Undertaking Charity," for a fund for the advancement of research work bearing upon medicine, surgery, chemistry, physiology, bacteriology, therapeutics, materia medica, pharmacy and allied subjects which may conduce to the improvement of the physical conditions of mankind and "The Museum and Library Charity" for a fund for the maintenance and/or the extension of any of his research museums or libraries now in existence or any future such.
Coty, Joseph Marie Francois Spoturno, of Louveciennes, France (English estate)	660	600,000	Large bequests of francs to the Town of Ajaccio, Office Centrale des Ouvres de Bienfaisance, the Commune of Coti Chiavari, Corsica, the Bureau de Bienfaisance of Ajaccio, the Union Generale des Corses and the Bureaux de Bienfaisance of the towns of Suresnes, Puteaux, Neuilly-sur-Seine and Louveciennes.
Johnson, Percy, of Tidebrook Place, Sussex.	729,368	320,000	£1,000 each to Sheffield Royal Infirmary, Sheffield Royal Hospital and Sheffield Children's Hospital and residue of estate to King Edward's Hospital Fund.
Diplock, Caleb, of Polegate, Sussex	527,936	300,000	£20,000 for distribution among hospitals, homes and institutions as executors select, for disabled soldiers and residue for such charitable institutions or objects in England as executors decide.
Dalziel, Baron of Borgue, Kirkcudbrightshire (per- sonal estate in Great Britain)	412,193	250,000	Residue of estate to National Debt Redemption Fund.
Smith, Mrs. Annie Blanche, of Albert Hall Mansions, W.	354,715	235,000	Bequests include £2,000 to the British Home for Incurables, Streatham, £1,500 to the Home for Incurables, Putney, £1,000 to Cancer Hospital, Fulham, £1,000 to Royal National Lifeboat Institution, £1,000 to Cottage Hospital, Oban, and residue to Church Army and Salvation Army.

# Principal Charitable Bequests of the Year.

Name.	Gross Value of Estate.	Approx. Amount.	Objects.
Baxter, William Henry, of Harrogate	£ 266,886	£ 200,000	£5,000 each to Boy Scouts' Association, Girl Guides' Association, and Dr. Barnardo's Homes, and the residue of estate to be held in trust for 21 years and income utilized for distribution of his religious publications and at expiration of 21 years, £5,000 each to Boy Scouts' Association, Girl Guides' Association, Dr. Barnardo's Homes, Royal National Lifeboat Institution, and Leeds Unmarried Women's Benevolent Institution, and ultimate residue to form a private limited company to be called Baxter's Publications, Ltd., or some similar title for the printing, publication and distribution or other dissemination of his publications and such other objects as may be ancillary thereto.
Cobbold, Francis Edward, of South Yarra, Victoria (English estate)	260,631	160,000	Subject to life interest, bequests to hospitals in Queensland, and residue of estate to Royal United Kingdom Beneficent Association, Bedford Street, W.C., for permanent memorial annuities of £35 each for persons in Suffolk or Ipswich, eligible according to the bye-laws of the Institution.
Talbot, Frederick John, of Sheffield	186,079	130,000	Residue, subject to life interest of wife to be used for convalescent treatment of Sheffield workpeople, especially those employed at the Globe Steel Works, Sheffield, who may be patients of Sheffield Royal Infirmary.
Tapp, William Munro, of St. James's Park, S.W.	201,068	120,000	Residuary estate for founding scholarships and Fellowships for undergraduates and graduate members of Gonville and Caius College, Cambridge, so that not less than half shall be applied for the encouragement of law and jurisprudence.
Murphy, John, of Kingston Hill, Surrey.	154,487	113,000	Subject to life interests, £2,000 to Birkenhead Borough Hospital, and residue for such charities at Birkenhead as trustees select, not of a political character, nor connected with Christian Science or Spiritualism.
Paul, Thomas Dennison, of Dunmurray, Co. Antrim (personal estate in Great Britain and Northern Ireland)	183,968	100,000	Subject to life interest, £1,000 each to Salvation Army and N.S.P.C.C., and residue as to one-eighth each to Belfast Central Mission and Northern Belfast Mission, two-eighths each to Royal Victoria Hospital, Belfast, and Belfast Hospital for Sick Children, and one-eighth each to Ulster Hospital for Children and Women and Royal Maternity Hospital, Belfast.
Gibb, James, of Golder's Green, N.W.	234,232	100,000	Residue subject to life interest to such charitable institutions or objects in England as his wife should appoint.
Harding, Walter, of Oxton, Birkenhead	208,148	98,000	£12,500 to executors for their own use, requesting them to take steps to provide the benefits he had conferred on the nursing and other staff of various hospitals by way of entertainment at theatres, steamship trips to North Wales and elsewhere, and the provision of journals and the residue of property as to four-tenths to Royal Liverpool Children's Hospital, two-tenths each to Birkenhead and Wirral Children's Hospital and Liverpool Merchants' Guild, and one-tenth each to Birkenhead Maternity Hospital, and University of Liverpool.
Poland, Sidney Michael, of Betchworth, Surrey.	130,240	95,000	Bulk of property for the benefit of the Village of Brockham and its inhabitants.

Name.	Gross Value of Estate.	Approx. Amount.	Objects.
Clifford, Sir Charles, of Sheffield	£ 385,653	£ 82,000	Bequests include £7,500 to Sheffield University and bequests to local hospitals, £250 to Sheffield Conservative and Unionist Association and two-thirds of residue to Sheffield University for the general endowment fund.
Williams, Samuel, of Nottingham	116,706	80,000	£1,000 each to Nottingham General Hospital, Nottingham Children's Hospital, Nottingham Hospital for Women, Dr. Barnardo's Homes and Denbighshire Infirmary, and residue for the purchase of well-built and suitable houses to be let to respectable women on such terms as executors determine, and remainder for such charities within the City of Nottingham as they determine.
Beilby, Dame Emma Clarke, of Hampstead, N.W.	166,930	75,000	Bequests include £1,000 to the Young Men's Christian Association, £5,000 to Edinburgh Hospital and Dispensary for Women and Children, £2,000 to the New Sussex County Hospital for Women and Children, £500 to Clapham Maternity Hospital, £2,000 to London School of Medicine for Women, and residue to South London Hospital for Women, Clapham Common, and Edinburgh Hospital and Dispensary for Women and Children.

There is no more deserving cause than that which relieves the undeserved **POVERTY OF THE AGED** who have known better times  
—Such is the object of

## THE NATIONAL BENEVOLENT INSTITUTION,

Founded by the late PETER HERVÉ, 1812

Patrons: H.M. THE KING, H.R.H. The Duke of Kent

US

# ALEXANDRA ORPHANAGE

Haverstock Hill, LONDON, N.W. 3.

*Founded 1758.*

*Patrons: H.M. The King. H.M. Queen Mary.*

*President: H.R.H. The Duke of Kent, K.G.*

The Orphanage is unsectarian, and helps fatherless and other necessitous children from all parts of the country and the Dominions, without restriction as to class or creed. Boys and girls are admitted at all ages between infancy and 11 years of age, and are cared for until 15. Their education fits them for useful positions in after-life. Opportunities occur for suitable children to have a secondary education or technical training. During the past 178 years 7,600 have been received; 380 are now resident, and others await vacancies.

More annual subscribers are needed. £10,000 required (by voluntary donations) each year above the assured income. Legacies are a useful means of helping. Please include the School in your Will. Annual Report sent on request, and the School may be visited by interested friends.

Forms of application for the admission of children and all needful information may be had of the SECRETARY, FRED. J. ROBINSON, F.C.I.S., 34-40, LUDGATE HILL, LONDON, E.C. 4.

## MISS SMALLWOOD'S SOCIETY FOR THE ASSISTANCE OF LADIES IN REDUCED CIRCUMSTANCES.

*Under Royal Patronage.*

### AN URGENT APPEAL

For over 50 years we have waged war against poverty and distress, and in that time many poor ladies have been helped, and some saved from the workhouse, through the administration of the Society.

Most of the ladies are old, sick and lonely, and if assistance were stopped would suffer great privation, in fact would be very near starvation.

Will you send a Gift to-day to our most deserving Charity, and so ensure that the work already being done will not be curtailed during the coming months? Please make cheques payable to—

**MISS SMALLWOOD'S SOCIETY, LANCASTER HOUSE, MALVERN.**

## LEPROSY!

### We Depend on Legacies and Subscriptions to Carry on Our Work

among the tragic sufferers from leprosy in the British Empire. It should be a matter of concern to all that there are probably two million of these sufferers in our Empire, of whom many are children. We need funds for assisting in the provision and maintenance of treatment centres, supplying drugs and instruments, and for educational propaganda and scientific investigation.

### WILL YOU HELP US?

Contributions will be gratefully received by the Hon. Treasurer, Sir Frank Carter, C.I.E.

The **BRITISH EMPIRE LEPROSY RELIEF ASSOCIATION**  
131, BAKER STREET : : LONDON, W.1

# DR. BARNARDO'S HOMES

**ANY DESTITUTE CHILD  
HAS AN IMMEDIATE FRIEND IN DR. BARNARDO'S HOMES.**

Under the Charter "No destitute child ever refused admission," over 119,000 orphan and destitute boys and girls have been welcomed into a new life. The Nation's needy children are rescued from adverse conditions, given a new environment, nurtured and trained for useful and self-supporting lives. Over 8,000 children are always being supported—the largest family in the world. On an average 5 come in daily.

**Turning C.3 children into A.1  
citizens is a work that calls  
for your practical sympathy.**

**WILL YOU BECOME A PARTNER IN THIS  
WORK FOR HELPLESS LITTLE ONES?**

**10/-** will feed one child  
for a fortnight.

25,000 meals have to be provided every day.

**£50** will support a sick child for a year.

**LEGACIES**  
earnestly asked for.

Cheques, etc., payable "Dr. Barnardo's Homes" and crossed, should be sent to Dr. Barnardo's Homes, 233, Barnardo House, Stepney Causeway, London, E. 1.

*The*  
**Crusade  
against  
CANCER**

**£150,000**

**urgently required**

The Committee earnestly appeals for £150,000 to provide much-needed extensions to the Research Institute, Enlargement and Modernisation of the Wards, some of which date back to 1851, and a new addition to the Nurses' Home.

Without these necessary and too-long-deferred extensions the work of the Doctors and Scientists must suffer restriction.

*Will you  
please send a  
gift to the Earl  
of Granard.*

# **The Royal Cancer Hospital**

**FULHAM ROAD, LONDON, S.W.3**

## **The CHILDREN'S HOSPITAL** **King Edward VII Memorial** **BIRMINGHAM**

Will you help us in our set task this year to build a BABIES' BLOCK for 60 small children under two years of age in a specially constructed building which medical science demands?

*Your generous help may be the means of saving many babies' lives and will be so much appreciated.*

**HAROLD F. SHRIMPTON,**  
*House Governor.*

## Why we need LEGACIES and BEQUESTS

THE need of ex-Servicemen, including the disabled, and their dependants, and the care of those left behind by men who fell in action, are an ever-present and recurring charge on the Legion. Its work in these directions is dependent upon the sale of Poppies—a slender support for so great a work that must go on indefinitely. Every year since the inception of the Fund the expenditure has increased, and it is vitally necessary that the Fund should be strengthened and fortified against any possible diminution of income in the future by means of Legacies and Bequests.

### EARL HAIG'S BRITISH LEGION APPEAL FUND

*Full particulars and Forms of Bequest can be obtained from the Organising Secretary,*

**Capt. W. G. WILLCOX, M.B.E., 29, Cromwell Road, London, S.W. 7.**

## THE ELDER LAD FOR THE CHURCH

### THE CHURCH LADS' BRIGADE

#### THE BEST AND OLDEST CHURCH ORGANISATION

for the elder lads, 14 to 21 years of age.

"I consider the Church Lads' Brigade to be the very finest organisation for the elder lad."—

HIS GRACE THE ARCHBISHOP OF YORK.

**FUNDS ARE URGENTLY NEEDED FOR THE  
FURTHER DEVELOPMENT OF OUR WORK.**

Subscriptions may be sent to the Secretary, Church Lads' Brigade, General Headquarters, Ironmonger Lane, London, E.C.2, and all information on How to Start a Company will be gladly given.

## THE DESTITUTE SAILORS' FUND

(Founded 1827)

President: **H.R.H. THE DUKE OF KENT, K.G.**

The vast majority of stranded merchant seamen do not seek charity—they seek work—British Seamen of the Merchant Service, when in distress, turn naturally to our Beresford Rest as a haven to which they can steer when in difficulty.

Over 173,000 assisted since its foundation.

**WILL YOU SEND A CONTRIBUTION TO THIS OLD  
ESTABLISHED CHARITY? LEGACIES EARNESTLY SOLICITED.**

*Subscriptions and Donations should be sent to the Chairman, Admiral H. L. P. Heard, C.B., D.S.O., c/o The Sailors' Home, Dock Street, London Docks, E.1.*

# GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E. 1.

ESTABLISHED 1765.

Patron—H.M. Queen Mary.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable. Over 4,000 Mothers and Babies attended annually in the Hospital, at their own Homes and at the Ante-Natal and Welfare Clinics.

Subscriptions and Donations thankfully received by the Treasurer, or Miss LILY HEARN, the Secretary, at the Hospital. [146]

## GUY'S HOSPITAL

LONDON BRIDGE, S.E. 1,

**URGENTLY NEEDS HELP.**

Patron : HIS MAJESTY THE KING.

President : The Rt. Hon. The VISCOUNT GOSCHEN, P.C., G.C.S.I., G.C.I.E.

Founded in 1725 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 61st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly value of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts.

BEDS  
**681**

IN PATIENTS (1935)  
**12,108**

OUT-PATIENT ATTENDANCES (1935)  
**515,308**

**Expenditure : £198,306 :: Income from Endowments : £67,641 : 9 : 9**

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is only about £6,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over **£131,000 per annum.**

To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow or support a Bed, over which a brass tablet, inscribed in accordance with the wishes of the Benefactor, can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. Rupert Brooke, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone : Hop 1086.

Bankers : THE BANK OF ENGLAND. Treas. : The LORD NUFFIELD, O.B.E., D.C.L.

## THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—H.M. THE KING.

Vice-Patron—H.M. THE QUEEN.

Chairman Executive Committee—H.R.H. THE DUKE OF YORK, K.G.

Treasurer—LIEUT.-COLONEL SIR JAMES LEIGH-WOOD, K.B.E., C.B., C.M.G.

THE HOME IS SITUATED AT WEST END, WOKING, between BAGSHOT and BISLEY.

The Home is constructed to accommodate 250 Boys, chosen from the necessitous classes between the ages of about 14 and 16, and give them a training, up to the age of 17 or thereabouts, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy, Air Force or Mercantile Marine.

Conditions of Admission.—1. The age for admission is from about 14 to 15½ years. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £35 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. Subscriptions and Donations are urgently needed in order that the above number of boys may be maintained.

Subscriptions are received by THE WESTMINSTER BANK, LIMITED, 1, St. James's Square, S.W., and by the Treasurer and Commandant at the Home, from whom any further information can be obtained. For historical reasons the London Office has been abolished.

COMMANDANT:—LIEUT.-COLONEL H. C. HERBERT, O.B.E.

One of the 3,400 we have befriended.

"It is not the will of your Father in heaven that one of these little ones should perish." Matt. 18, 14.

## HOMELESS CHILDREN'S AID & ADOPTION SOCIETY

and F. B. Meyer Children's Home (Incorp.)

25,000 unwanted children born every year in the United Kingdom

**URGENT NEED of GENEROUS SUPPORT  
LEGACIES INVITED.**

Hon. Treasurer, 93, Westminster Bridge Road, London, S.E.1.

## THE HOSPITAL FOR DISEASES OF THE SKIN

Telephone: Hop. 1021.

70-71, BLACKFRIARS ROAD, S.E.

ESTABLISHED 1841.

Treasurer—SIR HARRY HAGUE.

This Hospital, established in 1841, was the first and for many years the only one of its kind in the United Kingdom. Donations and Subscriptions are urgently needed in order to re-open In-patients beds. Since its foundation no less than 622,000 patients have been treated. The scientific equipment of the Institution has always been kept thoroughly abreast of modern developments in Diagnosis, Research and Treatment. The Light Department is provided with X-rays, radium, diathermy and ultra-violet light apparatus. It is a centre both of dermatological therapeutics and education, and welcomes at its clinics medical practitioners and advanced students. Patients should attend daily at 1-30 p.m., except Saturdays, or on Tuesdays or Fridays at 6 p.m. They are expected to contribute to the funds of the Hospital according to their means and position. Any further information regarding the uses of the Hospital can be obtained from the Secretary.

[152]

## Imperial Cancer Research Fund.

**Patron—HIS MOST GRACIOUS MAJESTY THE KING.**

*President* His Grace the Duke of Bedford, K.G.

*Chairman of the Executive Committee—Sir Humphry Rolleston, Bt., G.C.V.O., K.C.B.*

*Hon. Treasurer—Sir Holburt Waring, Bt., C.B.E., F.R.C.S.*

*Director—Dr. W. E. Gye.*

Founded in 1902, under the direction of the Royal College of Physicians of London and the Royal College of Surgeons of England as a centre for research and information on Cancer, the Imperial Cancer Research Fund is working unceasingly on the systematic investigation of the disease in man and animals. The work of this Fund and of other great centres of research has increased our knowledge of the origin and nature of cancer and has so altered our outlook that the disease is now curable in increasing numbers. The income from investments and the Endowment Fund is insufficient to cover the total annual expenditure and, moreover, the present laboratories have become too small for the scope of the work. Administrative costs over a long period of years have consumed only 10% of the total annual expenditure, but the need for expansion makes it imperative for the Fund to appeal to the generous help of the public.

Donations, subscriptions and legacies are earnestly solicited and should be sent to the Honorary Treasurer, 8-11, Queen Square, London, W.C.1, or paid direct to the Westminster Bank Ltd., Marylebone Branch, 1, Stratford Place, London, W.1, A/c Imperial Cancer Research Fund.

### FORM OF BEQUEST.

I hereby bequeath the sum of £ \_\_\_\_\_ to the Treasurer of the Imperial Cancer Research Fund under the direction of the Royal College of Physicians of London and the Royal College of Surgeons of England, 8/11, Queen Square, London, W.C.1, for the purpose of Scientific Research, and I direct that his receipt shall be a good discharge for such legacy.

# KING'S COLLEGE HOSPITAL, LONDON, S.E.5.

The Hospital providing for the poor in the heart of South London.

Private Rooms and Wards available for middle-class patients.

Please send a subscription or donation to the Treasurer,  
C. P. SEROCOLD, Esq.

## WHERE THERE'S A WILL there's a way to help The LOCK HOSPITAL and HOME

Founded 1746.

(Chairman - THE LORD KINNAIRD.)

which for nearly 200 years has cared medically, socially and spiritually for adult and child sufferers from venereal disease. Last year attendances of out-patients alone approximated 186,000. Patients come from all parts of the country. Your contribution will help to restore to health some innocent child.

A further feature of the Work is the After-Care and Reclamation of Women Patients, who, trained and found employment, can face a bright and happy future, in place of the darkest outlook.

*The Hospital is supported entirely by voluntary contributions and receives no grants from State or public authorities.*

DONATIONS AND SUBSCRIPTIONS WOULD BE MOST GRATEFULLY ACCEPTED, AND SHOULD BE ADDRESSED TO THE CHAIRMAN,

at the LOCK HOSPITAL,

283, HARROW ROAD, LONDON, W.9. (Abercorn 2272.)

LEGACIES ARE EARNESTLY INVITED.

## THE NATIONAL ANTI-VIVISECTION SOCIETY

92, VICTORIA STREET, LONDON, S.W.1

President—LORD LEIGH.

Director—Captain GUY COLERIDGE, R.N. (Ret.)

### ITS POLICY.

The Society advocates the total abolition of scientific torture of animals and seeks to attain this object by every possible means.

All humane people who are desirous of seeing something practical done to save tortured animals, are earnestly invited to support the National Anti-Vivisection Society. Members' Annual Subscription. 10/-.

Life Membership, £5.

Subscription to "The Animals' Defender," the Organ of the Society, 1/6 per annum, post free.

Cheques (crossed "Bank of England") and P.O.'s should be made payable to

The National Anti-Vivisection Society.

Telephone—VICTORIA 4705.

Telegraphic Address—ZOOPHILIST, SOWEST, LONDON.

THE NATIONAL CHILDREN'S HOME helps boys and girls who cannot help themselves. Many have no father or mother; some have been sadly neglected or badly ill-treated. All are in the Home because they were in desperate need. Nearly 4,000 children are now receiving the benefits of this great child-saving ministry. Please help us to help them.

## Queen Mary's Hospital for the East End requires immediately

**TWO NEW OPERATING THEATRES**  
which will cost **£15,000** to build.

Will you send us a donation and thereby help us to  
save more lives?

Subscriptions to Major RAPHAEL JACKSON, Secretary of the Hospital.

# The Cost of Civilization

Medical research confirms that with higher civilization certain scourges follow. It is now known that the microbe responsible for childbed fever is also responsible for scarlet fever, tonsilitis, abscess of the ear, and deaths from wounds, both in war and on the roads.

**QUEEN CHARLOTTE'S MATERNITY HOSPITAL** is fighting the ravages of this microbe. It is a costly warfare. Over £80,000 has already been spent on this vital research. Many fatalities occur in homes which are unfit for children to be born in. We are still compelled to turn away one woman in four, so we must extend our accommodation at a cost of £90,000, and **DO IT NOW.**

Will you not PLEASE try to send a donation to carry on this work?

LEGACIES or GIFTS will be gratefully received by the

SECRETARY-SUPERINTENDENT,

**QUEEN CHARLOTTE'S MATERNITY HOSPITAL**  
191a, Marylebone Road, London, N.W.

## THE ROYAL ASSOCIATION IN AID OF THE DEAF AND DUMB

President: THE LORD BISHOP OF LONDON Chairman: THE REV. PREBENDARY W. G. PENNYMAN, M.A.  
Hon. Treasurer: STANLEY S. BOND, Esq.

AREA OF WORK: LONDON, MIDDLESEX, SURREY AND ESSEX

There are more than 6,000 Deaf and Dumb in this area

Some features of our work:

**Individual Help.**—A specially trained staff of Chaplains and Lay-workers spend their lives among them, assisting them to secure employment—interpreting in all difficulties in hospitals, courts and prisons.

**Rescue Homes for Deaf and Dumb Girls**—for those who, already handicapped by affliction, have fallen by the way.

**The Blind, Deaf and Dumb**—to enable those without sight, hearing, in many cases speech, to live a human life.

**Home for Deaf and Dumb Men.**

*Gifts gratefully acknowledged by Secretary, R.A.D.D., 413 Oxford Street, W.1.*

## ROYAL BLIND PENSION SOCIETY

Patron—HIS MAJESTY THE KING.

President: THE LORD LECONFIELD.

Treasurer: MR. P. LAURENCE POCOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 15s. to 25s. per month. There are upwards of 900 pensioners, residing in various parts of the Kingdom, among whom over £9,000 are annually distributed.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £56, if single, and £112, if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society. Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion.

Contributions will be gratefully received by the Treasurer or by the BANK OF ENGLAND.  
237, SOUTHWARK BRIDGE ROAD, LONDON, S.E.1. E. JEFFERY HICKS, B.A., Secretary. [31]

# ROYAL FEMALE ORPHANAGE

(Incorporated by Special Acts of Parliament, 1800, 1824, 1870 and 1924.)  
(Incorporating the NATIONAL ORPHAN HOME, HAM COMMON, SURREY.)

**FOUNDED 14th March, 1758.**

*Patrons*—HIS MAJESTY KING EDWARD VIII.

HER MAJESTY QUEEN MARY.

*President*—HIS GRACE THE DUKE OF PORTLAND, K.G.

## THE OLDEST GIRLS' ORPHANAGE IN THE WORLD.

Orphan girls are admitted from the age of 7 years, and educated and maintained until they are 16, when situations in private families are found. Applicants must be thoroughly sound and healthy. Over 4,000 girls have already been maintained, the majority being provided with situations.

### PLEASE HELP.

Bankers for over 150 years—MESSRS. HOARE.

**LEGACIES ARE ESPECIALLY SOLICITED.**

ERNEST J. BAYLEY, *Secretary*

## The Royal School for the Blind LEATHERHEAD, SURREY.

(Registered under the Blind Persons Act, 1920.)

*Patron* - His Majesty THE KING.

**OBJECT** :—To provide food, clothing, medical attention, education, instruction, and afterwards employment in a trade, to blind, blind-deaf, and blind-deaf-dumb young men and women, so that they ultimately may become self-supporting.

£8,000 annually is required from voluntary sources if the School is to maintain its present level of usefulness. Our factory urgently needs enlarging, and a permanent Home for unemployable blind has been provided.

All pupils admitted to this School at the end of successful training are offered Work (a) in one of our Factories, or (b) at Home. Visitors may view the School any day from 10 to 4. Saturdays excepted.

The Rev. E. H. GRIFFITHS, R.N., *Principal and Secretary.*

Bankers : LLOYDS BANK, LTD., 16 St. James's Street, S.W.1.

# ROYAL SURGICAL AID SOCIETY.

or Life Subscription of 5 5 0 } per annum.

Subscriptions, Donations and Legacies  
are earnestly solicited.

Bankers—BARCLAYS BANK Ltd., 19, Fleet Street, E.C.4.  
RICHARD C. TRESIDDER, *Secretary.*

# THE ROYAL UNITED KINGDOM BENEFICENT ASSOCIATION

**Office**: ALDINE HOUSE, 13, BEDFORD STREET, STRAND, W.C. 2.

*Patron*: HIS MAJESTY THE KING.

*President*: HIS GRACE THE DUKE OF ABERCORN, K.G., K.P.

The Association grants Annuities to Gentlemen of both sexes, such as Clergymen, Officers of the Navy and Army, Barristers, Solicitors, Landowners and Gentlemen Farmers, Doctors, and their families, and others of similar social standing. Applicants must be over 40, of sound mind, unable, through age or bodily infirmity, to earn a livelihood, and not in receipt of an income exceeding £65 a year. Since its foundation in 1863, the Association has granted annuities to 7,076 persons, of whom 2,997 are now living. The last list of accepted Candidates for annuities contained the names of 600 persons, many of whom were certified to be without any income at all.

ANNUAL SUBSCRIPTIONS, DONATIONS and LEGACIES are Earnestly Solicited to provide annuities for the waiting Candidates, and to augment the Annuities. Brig.-Gen. B. L. ANLEY, C.B., C.M.G., D.S.O., *Secretary.*

# SOMEHOW — SOMEWHERE — SOMEONE

is being helped every second of the day and night by The Salvation Army. Its Slum, Social, Evangelical and Missionary Work, through 19,477 Institutions and Corps in 90 countries, calls for wide support.

LEGACIES LIGHTEN THE LOAD

LEGACIES and BEQUESTS HIGHLY VALUED.

## South London Institute for the Blind

83 BOROUGH ROAD, LONDON, S.E.1.

(Registered under the Blind Persons Act, 1920.)

This Institute was founded in Southwark in 1870, and was, until his death, under the patronage of that well-known philanthropist, the 7th Earl of Shaftesbury.

The object of the Charity is, by means of voluntary helpers, to organise work among the poor blind in the following directions:—(1) a Bureau for those seeking employment; (2) Religious services and educational classes; (3) a Hostel for unmarried blind men; (4) Recreation.

This Society relies upon voluntary contributions. Nearly all the workers are honorary.
